Inquiries for missing letters, &c., should be made at the Secretary's office, G.P.O. (North), St. Martin's-le-Grand, between 10 a.m. and 5 p.m.; Saturdays between 10 a.m. and 1.30 p.m. The Returned Letter Office is at Mount Pleasant, E.C.

POSTE RESTANTE (solely for the accommodation of strangers and travellers).—Letters and parcels may be addressed to the Poste Restante at every Head Post Office in the United Kingdom and to all Branch Post Offices in London. Letters or parcels to be called for should have the words "Poste Restante" included in the address. No initials, or fictitious names, or Christian name only, will be taken in, but are at once sent to the Returned Letter Office for disposal; and all persons applying for "Poste Restante" letters must be able to say from what place or district such letters are expected, and must prove their identity. Foreigners must produce their passports. Poste Restante letters from abroad are not kept more than two months; from places in the United Kingdom, one month; from one part of London to another, one fortnight. After these intervals they are sent up to the Returned Letter Office. When, however, letters addressed "To be called for" bear a request for their return within a less time, if not delivered, they are dealt with in accordance with such request.

SEAMEN'S AND SOLDIERS' LETTERS.—Letters to or from H.M. ships abroad are 1d. per oz.; to or from non-commissioned officers, private soldiers and seamen serving abroad, and enrolled pensioners in Canada, not exceeding $\frac{1}{2}$ oz., are forwarded for 1d. If posted for a place abroad unpaid, or insufficiently paid, or the description of the soldier, &c., be not given, it will be detained and returned to sender for payment of the postage.

UNPAID AND UNDERPAID LETTERS.—If the postage of letters, books, or newspapers be not paid in advance, double postage will be demanded on delivery; and if the postage be insufficient, double the deficiency will be charged.

Halfpenny Packets.

Packets not exceeding 2 oz. in weight may be sent for $\frac{1}{2}$ d.; if exceeding 2 oz. they pass unconditionally at the letter rate. The limits of length, width, and depth are the same as those of letters.

Any matter wholly printed on paper (paper sent as stationery not admissible), books and periodicals, manuscript, invoices, deeds and agreements, circulars produced in identical terms by any mechanical process (if type-written they must be handed in as such over the counter, and at least 20 copies must be sent at the same time), prints or photographs (when not on glass, or in cases containing glass, or any like substance), together with the legitimate binding or mounting, and anything necessary for safe transmission. The packet must be open at the ends, but may be tied with string, or in an unfastened envelope, or cover easily removed, and must contain no communication in the nature of a letter.

RE-DIRECTION.—See "Letters."

Newspapers.

WEIGHT.—Newspapers registered at the G.P.O., not over 5 lb. in weight, 2 ft. in length, or 1 ft. in width or depth. Packing as for "halfpenny packets." No writing in the nature of a letter is permitted, but the wrapper may bear the name and address of the sender, and a reference to any page of its contents to which it is desired to draw attention. Newspapers not registered as such at G.P.O., and Christmas or other special issues of registered newspapers not forming part of the regular series, are treated as printed matter. Daily registered newspapers, magazines, and trade journals, published at least monthly, may be sent to the Dominion of Canada at the rate of 1d. per lb. **RE-DIRECTION.**—See "Letters."

Parcels.

REGULATIONS.—The limit of weight is 11 lb. The parcel must not be more than 3 ft. 6 in. in length, or greatest length and girth combined, 6 ft.; marked in the left-hand top corner "Parcel Post," and handed across the counter or given to a rural postman; and the postage must be prepaid by stamps, affixed by the sender. The hours for Parcel Post business are the same as for general postal business. The name and address of sender should be on the outside of every parcel. A greater weight than 11 lb. must not be accepted from one person by a rural postman on foot, or 21 lb. by a mounted postman, unless he shall have received notice on the day previous that a greater weight would be sent; and either of them may refuse parcels if already loaded.

Parcels addressed to, or sent from, the Channel Islands are liable to customs duty, and the sender must make a declaration of contents at the office of posting.

Parcels on Sundays, &c., see p. 357.

COMPENSATION.—Compensation to the amount of £2 can be claimed on unregistered parcels for loss or damage. To secure compensation where no insurance fee is paid, a certificate of posting should be filled up and handed in for the signature of the post-office official. The insurance fee in stamps can be paid only at a post office.

No compensation will be granted for loss or damage of parcels containing watches or jewellery, unless registered; or of money, in any case; or for damage done to a fragile or perishable article. **REGISTRATION.**—See "Letters."

RE-DIRECTION.—Parcels may be re-directed free of charge if the original address and the corrected address are both in a delivery from the same office, otherwise they are charged again at the ordinary prepaid rate.

STAMPS, ENVELOPES, POST CARDS, &c.

Stamps.

POSTAGE STAMPS (used also for receipts, telegrams, and certain Inland Revenue duties up to 2s. 6d.—for list of latter see p. 456) are sold of the respective values of $\frac{1}{4}$ d., 1d., $1\frac{1}{2}$ d., 2d., $2\frac{1}{2}$ d., 3d., 4d., 5d., 6d., 9d., 10d., 1s., 2s., 6d., 5s., 10s. and 20s. Books of 18 1d. stamps and 11 $\frac{1}{2}$ d. are issued, price 2s. These may be purchased at most offices between 8 a.m. and 8 p.m., and at any office during the hours that attendance is given for telegraph business. Rural postmen are authorised to sell $\frac{1}{4}$ d. and 1d. stamps and registered letter envelopes.

Embossed or impressed postage stamps cut out of envelopes, postcards, letter-cards, news-

paper wrappers, or telegram forms may be used as adhesive stamps in payment of postage provided they are not imperfect, mutilated, or defaced in any way. Embossed or impressed Inland Revenue stamps cannot be used in payment of postage, and stamps indicating the payment of a registration fee may only be used for registered correspondence.

Spoiled Stamps.

Payment of postage cannot be made by means of imperfect or defaced postage stamps. Stamps are considered defaced when marked on the face with any written, printed, or stamped characters. Stamps may, however, be perforated with initials or other identifying mark.

Applications for the recovery of the value of spoiled or unused stamps, whether postage or revenue, can be made to the Postmaster at most large Post Offices in the provinces.

Envelopes.

EMBOSSSED ENVELOPES.—Commercial Halfpenny Envelopes are in twosizes—Commercial, in packets of 16 for 9d., and Foolscap, $8\frac{1}{2} \times 3\frac{1}{2}$ 10 for 6d.; they are also sold singly. Penny Envelopes of the following sizes are kept in stock:—A, $4\frac{1}{2} \times 3\frac{1}{2}$, in packets of 20 for 1s. 10d.; "Commercial," $5\frac{1}{4} \times 3\frac{1}{2}$, 16 for 1s. 5d., and 240 for 21s. 3d.

REGISTERED LETTER ENVELOPES, for foreign and inland letters, bearing a threepenny stamp embossed on the flap for the payment of the registration 2d. and postage 1d., are of five sizes, and are sold: F, $5\frac{1}{2}$ in. \times $3\frac{1}{2}$ in., $3\frac{1}{2}$ d. each, or 12 for 3s. 3d.; G, 6 in. \times $3\frac{1}{2}$ in., $3\frac{1}{2}$ d. each, or 12 for 3s. 4d.; H, 8 in. \times 5 in., $3\frac{1}{2}$ d. each, or 12 for 3s. 4d.; I, 8 in. \times 5 in., $3\frac{1}{2}$ d. each, or 12 for 3s. 4d.; K, $11\frac{1}{2}$ in. \times 6 in., $3\frac{1}{2}$ d. each.

Letter Cards.

LETTER CARDS are sold thus:—1 for $1\frac{1}{4}$ d., and 8 for 9d., also in packets of 96 for 9s.

Post Cards.

POST CARDS impressed with a halfpenny stamp are sold at the rate of 10 for $5\frac{1}{2}$ d., or 10s. per parcel of 220; a thicker quality being 11 for 6d., or 5s. per parcel of 110. Impressed with 1d. stamp, 1d. each. Reply Post Cards are about double the rates for single cards. The left-hand half of the address side may be used for correspondence, both inland and abroad.

PRIVATE CARDS bearing an adhesive $\frac{1}{2}$ d. stamp, and corresponding as nearly as possible to the size (max. $5\frac{1}{2} \times 3\frac{1}{2}$, min. $4 \times 2\frac{1}{2}$ in.) and weight of official cards, may be used. They are also admissible for foreign and colonial post provided they have "Post Card" printed (or written) on them and are in conformity with the official cards in size and weight.

Wrappers.

WRAPPERS bearing a halfpenny stamp may be had at $\frac{3}{4}$ d. each or 7 for 4d.; 5s. $8\frac{1}{2}$ d. per packet of 120. With a penny stamp the price is, singly $1\frac{1}{4}$ d., or 4 for $4\frac{1}{4}$ d.; 3s. $6\frac{1}{2}$ d. per parcel of 40.

LONDON POSTAL ARRANGEMENTS.

For the purpose of facilitating the collection and delivery of letters, the Metropolis is divided into eight districts, marked:—

East Central (E.C.)	North Western (N.W.)
West Central (W.C.)	South Eastern (S.E.)
Eastern (E.)	South Western (S.W.)
Northern (N.)	Western (W.)

FOR THE COUNTRY AND ABROAD.—Letters and cards to go the same evening should be posted at chief district offices, branch offices, receiving houses, and pillar boxes before 6; in suburban places, half an hour to an hour and a half earlier.

LATE FEE LETTERS.—Inland letters and post cards bearing an extra $\frac{1}{2}$ d. stamp are forwarded by the night mails if posted at the town branch offices and receiving houses before 7 p.m., and at Mount Pleasant before 7.45, or at St. Martin's-le-Grand before 7.30. At certain district offices the hour for posting with the late fee is 7.30 and 8, when the letters are to go from the railways in their immediate neighbourhoods. Letters having an extra $\frac{1}{2}$ d. stamp may also be posted at the sorting carriage or platform barrier at the various railway termini up to the time of the departure of the train bearing the mails, varying from 5.15 a.m. to 10 p.m.

Foreign letters with an extra 1d. stamp may be posted in the E.C. District and at Metropolitan District Offices at times varying with the despatch of the mails; with an extra 2d. prepaid the time is extended.

POSTAGE, &c., ABROAD.

Letters.

The charge for letters throughout the British Empire and to Egypt, the United States of America, and the British Postal Agencies in Morocco* is 1d. the ounce.

The charge to all other places is $2\frac{1}{2}$ d. for the first ounce and $1\frac{1}{2}$ d. per ounce afterwards.

Post Cards.

The rate to all places to which Post Cards are available is 1d. single, 2d. reply. (See under Inland Postcards.)

Reply Coupons.

Coupons exchangeable for stamps of the value of 25 centimes ($2\frac{1}{2}$ d.) each in any country participating in the arrangement can be purchased at any Money Order Office in this country at the price of 3d. each for the purpose of prepaying replies to letters. The coupons can be exchanged by the addressees at the Post Office of the place of destination for local postage stamps.

Books, Newspapers, Samples, &c.

NEWSPAPERS, BOOKS, PRINTED PAPERS, &c., $\frac{1}{2}$ d. per 2 oz.

PATTERNS AND SAMPLES, $\frac{1}{2}$ d. per 2 oz.; but with a minimum charge of 1d.

COMMERCIAL PAPERS, MSS., &c., $\frac{1}{2}$ d. per 2 oz.; but with a minimum charge of $2\frac{1}{2}$ d.

The limits of size to the British Empire or non-Union countries† are—length 2 ft., width or depth 1 ft., and must not exceed 5 lb. in weight. To countries in the Postal Union the length is limited to 18 in.; weight not to exceed 4 lb. If in the form of a roll, the limits of size in either case are 30 in. in length and 4 in. in diameter.

The above-named rates should in all cases be prepaid; no packet can be sent forward wholly unpaid, but, if by inadvertence the postage is insufficiently prepaid, double the deficit will be chargeable on delivery.

* These are Alcazar, Casablanca, Fez, Larache, Marrakesh, Mazagan, Mequinez, Mogador, Rabat, Safi, Tangier, Tetuan.

† Afghanistan, Arabia, Bahrain (Persian Gulf), Banks Is., China, Friendly Is., Guadar (Baluchist.), Gilbert Is., Morocco, Muscat, New Hebrides, Nyasaland, Rhodesia (N.E. and N.W.), Solomon Is.

CANADIAN MAGAZINE POST.—See p. 362, col. 2.

Insured Box Post.

Gold and silver articles (not money), jewels, and similar valuables may be sent in boxes by letter mails to Austria, Belgium, Bulgaria, Denmark, Egypt, France, Germany, Holland, Italy, Luxemburg, Montenegro, Portugal, Rumania, Switzerland, and 57 chief places in European Turkey. Postage 1s. to 3s.; maximum weight 2 lb., size 12 × 4 × 4 in. Customs declarations must be filled in. Insurance limit £400.

Parcels sent abroad.

Customs declaration respecting the contents must be made on a form obtainable at any Post Office. The sender may arrange to prepay all charges to certain parts of the Empire and foreign countries by paying a fee of 6d., making a deposit of 1s. for each 10 lb. value of the parcel, and signing an undertaking to pay all Customs and other charges on demand; otherwise they are collected on delivery. Certain articles are prohibited; among them letters nearly everywhere.

Imperial British Parcel Rates.

The "triple system" of 3 lb. 1s., 7 lb. 2s., 11 lb. 3s. (or *vid* Italy or France, saving one week, 3 lb. 2s., 7 lb. 3s., 11 lb. 4s.), is charged to India and Aden, British East Africa, Ceylon, Cyprus, Hong Kong, Labuan, Malta, Mauritius, Straits Settlements, Uganda, and Zanzibar. Also, but without the quicker alternative route, to Ascension, Bahamas, Bermuda, Barbados, British Guiana, British Honduras, British North Borneo, British Somaliland, Falkland Islands, Gambia, Gibraltar, Gold Coast, Grenada, Jamaica, Lagos, Leeward Islands (Antigua, Dominica, Montserrat, Nevis, St. Kitts, Tortola), Malay States, Newfoundland, New Zealand, Nigeria, St. Helena, St. Lucia, St. Vincent, Sarawak, Sierra Leone, Tobago, and Trinidad. The charges for other parts of the Empire and for Foreign Countries are as follow:—

* Parcels for Greece and Rumania must be packed in some stronger material than paper or cardboard.

† Must be packed for opening by Customs. 1. #1

2. *vid* Italy, saving a week, 1s. extra.

3. Beyrout, Constantinople, Salonika, Smyrna only.

To India and the British Empire generally and to Constantinople, Beyrout, Smyrna, and Egypt the maximum length is 3 feet 6 inches, or length and girth combined 6 feet; Canada, length, breadth or depth, 2 feet 6 inches, length and girth combined, 6 feet; to Italy, Spain, Greece, and parts of Turkey, length 2 feet, length and girth combined 4 feet; other places in Europe, 2 feet in any direction.

INSURANCE.—Insurance may be effected for parcels to almost all countries up to £400, according to destination, at the following rates:—*Ad.* for £12; *6d.* for £24; *8d.* for £36; *10d.* for £48; *1s.* for £60; *1s. 2d.* for £72; *1s. 4d.* for £84; *1s. 6d.* for £96; *1s. 8d.* for £108; *1s. 10d.* for £120; *2s.* for £132; and so on to *5s. 10d.* for £400. Parcels sent to the U.S. by the *semi-official* service are insurable up to £120 at about double the above rates.

CASH ON DELIVERY.—A service of "cash on delivery" of parcels has been established between the U.K. and the following: Bahamas (Nassau), Bermudas, Barbados, Cayman Is., Cyprus, Egypt, Fiji Is., Gambia, Gibraltar, Gold Coast (£10 max.), Grenada, Hong Kong, Jamaica, Leeward Is., Malta, Morocco (Casablanca, Mazagan, Mogador, Tangier), Nyasaland, S. Rhodesia, St. Lucia, St. Vincent, Brit. Somaliland, S. Nigeria (Lagos), Forcados, Bonny, Calabar, Warri), Str. Settlements, Trinidad, Turkey*. Maximum collected, £20. Charges for collecting: *In U.K.*, £5, *4d.*; £10, *6d.*; £15, *9d.*; £20, *1s.*, *exclusive* of poundage on P.O. or M.O. by which amount is remitted; *in the above countries*, according to a graduated scale—*e.g.*, £1, *3d.* to *1s. 1d.*; £5, *1s.* to *2s. 5d.*; £10, *1s. 11d.* to *4s. 8d.*; £20, *3s. 5d.* to *9s. 4d.*, *inclusive* of poundage.

MONEY AND POSTAL ORDERS.

The sender of a money order (Inland or Abroad) may apply for an *advance of payment* to consignee at the office of issue at the time of issue or subsequently—fee, *2d.*, if the Order is payable in the United Kingdom, and *2½d.* if it is payable abroad. The Chief Money Order Office is at 144A Queen Victoria Street, E.C.

Inland Ordinary Money Orders.

The highest amount granted in one order is limited to £40. The commission charged is for sums not exceeding £1, *2d.*; £3, *3d.*; £10, *4d.*; £20, *6d.*; £30, *8d.*; £40, *10d.* No order may contain a fractional part of *1d.*

The rules and regulations are on the forms issued.

* The parcel post with the United States is carried on by means of two distinct services, namely, an official service with the United States Post Office and a semi-official service maintained through the Agency of the American Express Company. The sender of a parcel forwarded by the semi-official service may, without extra charge, direct that a parcel be sent through the New York Custom House in Bond for Customs examination at any one of the "United States Ports of Entry," or Inland Custom Houses. The addressees of such parcels must, however, make arrangements for the delivery of parcels so treated after they have been cleared at the Custom House of the Inland Port of Entry.

Parcels intended to be forwarded in bond must be plainly marked by the sender, "In bond to," naming the Inland Port of Entry chosen; and the same words must also be written by the sender in the same handwriting on the Customs declaration.

Inland Telegraph Money Orders.

Money may be transmitted by Telegraph Money Order from any Money Order office in the United Kingdom which is also a despatching office for telegrams, and may be made payable at any Money Order office which is also an office for the delivery of telegrams.

Commission at the same rate as for Ordinary Inland Money Orders, plus supplementary fee of *2d.*, and cost of official Telegram of Advice. If the order is to be delivered at payee's address any charge for postage must be prepaid.

Postal Orders.

British Postal Orders are issued and paid at nearly all post offices in the United Kingdom during the ordinary hours of business on week days. They are also issued and paid in almost all parts of the Empire (except Australia and Canada), in Egypt, and at the British Agencies at Panama, in the Turkish Empire (*note* §, p. 364), and Morocco (*p. 363, note* *). They are issued, with a counterfoil to be retained by the sender, for every *6d.* up to *20s.* and for *21s.*; those of *6d.*, *1s.*, *1s. 6d.*, *2s.* and *2s. 6d.*, at a charge of *½d.*; of *3s.*, *3s. 6d.* &c., up to *15s. 1d.*; those of *15s. 6d.* &c., up to *21s. 1½d.* They must be presented for payment within 3 months from last day of the month of issue, or a fresh commission will be charged. Adhesive British Postage Stamps (*not* perforated and not exceeding 3 in number) to the amount of *5d.*, but not fractions of *1d.*, may be affixed to the face of an order.

Ordinary Money Orders Abroad.

For sums not exceeding £1, *3d.*; £2, *6d.*; £4, *9d.*; £6, *1s.*; £8, *1s. 3d.*; £10, *1s. 6d.*, and for countries on which orders may be issued for more than £10, *3d.* for every additional £2 or portion of £2.

Telegraph Money Orders Abroad.

Commission at same rate as for Ordinary Money Orders abroad, plus supplementary fee of *6d.*, and cost of official Telegram of Advice.

TELEGRAMS.

Inland.

Inland telegrams may be sent to all parts of the British Isles at the rate of *6d.* for the first twelve words, and one halfpenny for every additional word; stamps in payment to be affixed to the form by the sender. Receipt for charges *1d.* The address of the receiver is charged for, but not that of the sender when written on the back of the telegram form. The charge includes delivery within three miles of the nearest telegraph office, or, if this be a head office, within the town postal limits—beyond that limit the charge is *3d.* per mile, calculated from the free delivery limit. Portage to be paid by sender. Telegram forms are of two kinds—one issued gratis; the other (A1), embossed with a *6d.* stamp, may be purchased singly, or in books of 20, interleaved, and with a sheet of carbonic paper, price *10s. 2d.* The usual hours are 8 a.m. to 8 p.m.

SUNDAY TELEGRAMS.—See p. 367.—*Offices always open:* London—G.P.O., Central; G.N.R., King's Cross; G.C.R., Marylebone (except 11.30 a.m. to 3.30 p.m.); G.E.R., Liverpool Street and Stratford; S.E. & C.R., London Bridge and Battersea Park Road; St. Pancras (M.R.), Waterloo and Willesden Stations, and West Strand Post Office.

The Provinces—Birmingham, Brighton (except from midnight Saturday to 8 a.m. Sunday), Bristol, Cardiff Docks (no delivery to ships after dark), Derby, Devonport, Dover, Exeter, Falmouth, Holyhead, Hull, Hurst Castle, Leeds, Liverpool, Lizard (wireless), Manchester, Newcastle-on-Tyne, Newport (Mon.), Norwich, Nottingham, Penzance, Plymouth, Portsmouth, Sheffield, Southampton Docks, and Swansea (no delivery to ships on dark nights). *Scotland*—Aberdeen, Dundee, Edinburgh, Glasgow, Inverness. *Ireland*—Belfast, Cork, Dublin, Londonderry, Queenstown. *Railway Stations* at Almouth, Bedford (M.R.), Blackburn, Bolton (L.Y.), Bradford (M.R.), Burton (M.R.), Chester, Crewe, Darlington, Fishguard Harbour, Gloucester (M.R.), Heysham Harbour, Ipswich (G.E.), Kettering, Killingworth, Leicester (M.R.), Low Moor, March, Newton Abbot, Peterboro', Reading (G.W.), Rotherham, Rugby, Shrewsbury, Skipton (M.R.), Stafford (N.W.), Stoke-on-Trent, Swindon, Wakefield (Kirkgate), Warrington (N.W.) and York.

Note—It is usually possible to get a telegram through from an office which is open to one which may, perhaps, be closed for telegraphic business by payment of the following extra fees: 1s. for the telegraphist, 1s. for the messenger, and 6d. an hour for the postmaster if he has to wait for a reply. In the same way postmasters may accept telegrams after the usual hours on payment of 1s. for the postmaster, 1s. for the telegraphist, and 1s. for a messenger if it be necessary to call the telegraphist. The following count one word—All names of towns and villages in U.K. and of branch and sub-offices in towns; all railway stations (not in towns) with public telegraph; words (not names) ordinarily written as one or with hyphen; "St." together with name following; each five figures; each initial, except London Postal Districts (p. 263). A.M.—P.M.—H.M.S. (in address, which are one word each group.

Rates for Telegraphing Abroad.

Rates per word are as follows:—Abyssinia, 2s. 5d.; Aden, 2s.; Alaska, 2s. 9d.; Algeria, 2½d.; Angola, 5s. 5d. and 5s. 6d.; Annam, 4s. 2d. and 4s. 5d.; Antigua, 4s. 4d.; Argentine Republic, 3s. 10d. and 4s. 2d.; Ascension, 2s. 6d.; Australia, 2s. 9d. and 3s.; Austria, 2½d.; Azores, 9d.; Bahamas, 2s. 5d.; Barbados, 4s. 9d.; Basutoland, 2s. 6d.; Bathurst (W. Africa), 3s. 6d.; Bechuanaland (British), 2s. 6d.; Belgium, 2d.; Bermuda, 2s. 6d.; Bissau, 3s. 6d.; B. K. I., 1s.; Bolama, 3s. 6d.; Bolivia, 4s. 2d.; Borneo (British), 3s. 7d. to 3s. 10d.; Borneo (Dutch), 4s. 2d. and 4s. 5d.; Bosnia-Herzegovina, 3½d.; Bourbon (Ile de), 2s. 8d.; Brazil, 3s. to 6s. 6d.; British E. Africa, 2s. 9d. (Mombasa and Kilindi, 2s. 6d.); British Guiana, 7s.; Brit. New Guinea, by post from Cocktown, in Queensland, at irregular intervals; Brit. Somaliland, by post from Aden; Bulgaria and E. Roumelia, 3½d.; Burma, 1s. 10d. and 2s.; Cameroons, 5s. 2d.; Canada (Cape Breton, New Brunswick, Nova Scotia, Ontario, P. E. I. and Quebec, 1s.; Manitoba, 1s. 6d.; other places, 1s. 6d. to 3s. 2d.); Canary Islands, 9d.; Cape Colony, 2s. 6d.; Cape Verde Islands, 2s. 2d. and 3s. 1d.; Caroline Islands, 4s. 8d. and 4s. 11d.; Ceylon, 2s. 1d. and 1s. 11d.; Chile, 4s. 2d. (Punta Arenas also 3s. 10d.); China, 4s. 2d. to 4s. 5d. (Amoy, 4s. 2d. to 4s. 7d.); Cochín China, 3s. 7d. and 3s. 10d.; Cocos, 2s. 6d.; Colombia, 5s. 9d. (Buenaventura, 5s. 6d.); Comoro Islands, by post from Zanzibar, etc.; Costa Rica, 4s. 2d.; Crete, 5½d.; Cuba, 1s. 10d. (Havana, 1s. 8d.); Curaçao, 6s. 9d.; Cyprus, 1s. (Larnaca and Nicosia also 6d.); Dahomey, 5s.; Delagoa Bay, 2s. 7d.; Denmark, 4s.; Dominica, 4s. 2d.; Dutch E. Indies, 3s. 2d. to 4s. 5d.; Dutch Guiana, 6s. 9d.; Ecuador, 4s. 2d.; Egypt (Alexandria,

1s.; Suakin, 1s. 4d.; other places, 1s. to 1s. 4d.); Falkland Islands, by post from Montevideo or Punta Arenas (Chile); Fanning Island, 2s. 6d.; Farø Islands, 5½d.; Fiji, 3s.; Formosa, 4s. 7d. and 4s. 10d.; France, 2d.; French Congo, 5s. 2d.; French Guiana, 6s. 8d.; French Guinea, 3s. 7d. (Conakry, 3s. 6d.); French Sudan, 1s. 5d.; German E. Africa, 2s. 8d. and 3s. 1d.; German S.W. Africa, 2s. 8d.; Germany, 2d.; Gibraltar, 3d.; Gold Coast, 4s. 8d. and 4s. 10d.; Greece, 5½d.; Greek Islands, 6d.; Grenada, 4s. 8d.; Guadeloupe, 5s. 1d.; Guam Island, 5s.; Guatemala, 3s. 4d. (San José, 3s. 1d.); Hayti, 5s. 4d. and 7s. 5d.; Hedjaz (Arabia), 2s. 6d.; Holland, 2d.; Honduras, 3s. 9d.; Honduras (British), by post (2½d.) from New Orleans; Hong Kong—see China; Hungary, 2½d.; Iceland, 8½d.; India, 1s. 10d. and 2s.; Italian E. Africa, 2s. 2d.; Italy, 2½d.; Ivory Coast, 4s. 8d. (Grand Bassam, 4s. 8d.); Jamaica, 3s.; Japan, 4s. 7d. and 4s. 10d.; Java, 3s. 9d. and 4s.; Jibouti, 2s. 3d.; Korea, as Japan; Labuan, 3s. 3d. and 3s. 6d.; Les Saintes, 5s. 1d.; Liberia, by post from Sierra Leone; Luxemburg, 2½d.; Madagascar, 2s. 8d.; Madeira, 1s.; Malay Peninsula, 3s. 1d. and 3s. 6d.; Malta, 4d.; Marie Galante, 5s. 1d.; Martinique, 5s. 1d.; Mauritius, 2s. 6d.; Medina (Arabia), 6d.; Mexico (City, 2s.), other places, 1s. 6d. to 2s. 4d.; Midway Island, 4s.; Montenegro, 3½d.; Morocco (Spanish, 3d.; Tangier and Algerian border, 4d.; Casablanca, Mogador, and Rabat, 9d.); Muscat, as Persian Gulf; Natal, 2s. 6d.; New Caledonia, 3s. 5d. and 3s. 8d.; Newfoundland, 1s.; New Zealand, 2s. 9d. and 3s.; Nicaragua, 3s. 11d. and 4s. 2d.; Nigeria, 5s. and 5s. 2d.; Norfolk Island, 3s.; Norway, 3d.; Nyassaland, 2s. 11d.; Orange River Colony, 2s. 6d.; Panama Rep., 3s. 2d. (Panama and Colon, 3s. 1d.); Paraguay, 3s. 10d. and 4s. 2d.; Perin, 2s.; Persia, 1s. 6d. (Bushire, 1s. 9d.); Persian Gulf, 2s. and 2s. 3d.; Peru, 4s. 2d. (Iquitos, Masisa, Orellana, Requena, 5s. 9d.); Philippine Islands, 4s. 2d. to 4s. 10d.; Porto Rico, 4s. 2d.; Portugal, 3d.; Portuguese E. Africa, 2s. 7d. and 2s. 8d.; Principe (Island of), 5s.; Réunion, see Bourbon; Rhodesia (N. and N.W.), 2s. 11d. (Pemba, 2s. 8d.); Zululand, 2s. 6d.

Wireless Telegraphy.

Telegrams are accepted for transmission from any Inland Telegraph Office to certain principal Ocean Liners (and *vice versa*) via the coast stations at Crookhaven, The Lizard, Malin Head, Niton, North Foreland, Rosslare, Seaford, and

Caister-on-Sea (all at 10½d. per word), and Bolt Head (8d.). Also to or from certain Mail Packets—e.g., G.E.R. Harwich Service, *via* Parkeston Quay (2½d. per word; minimum, 2s. 2d.); and Dover-Ostend Mails, *via* Nieuport (3d. per word; minimum, 2s. 1d.). Replies cannot be prepaid. In all radio-telegrams the name of the office of destination counts as one word.

POST OFFICE TELEPHONES.

London Telephone Area.—The office of the General Manager of the P.O. London Telephone System is at the G.P.O. South, Carter Lane, E.C. *Annual Subscription*, including one telephone, for connection to an exchange which is within 2 miles of the subscriber's house, and (a) in the county of London, £5; (b) outside the county £8; (c) anywhere in the London Telephone area, for an unlimited number of calls, £17. The corresponding Message Fees are: (a) For each call on an exchange within the county of London, 1d.; outside the county, 2d.; (b) each call on the same exchange, 1d.; other exchanges, 2d. Minimum payable yearly for calls, 30s. Private subscribers may use their lines for trunk messages, or for sending telegrams, and express messages (max. 60 words), on paying £1 deposit to cover the credit given. The *Call Office Fee*, whether for subscribers or others, is 2d. each 3 minutes.

Provincial Telephone System.—Applications for terms, &c., should be made to the Sec., G.P.O.

Telephone Trunk Lines.—These connect Exchanges in different towns. Rates in day-time:—3d. for 25 miles, 6d. for 50 miles, 9d. for 75 miles, 1s. for 100 miles, and an additional 6d. for every 40 miles over a hundred. Extra fees are levied where submarine lines are used, or between the National Telephone Co.'s and the Portsmouth Corporation's systems. 3 minutes is allowed, on the expiry of which the option of a further 3 minutes is generally given; by prepaying a double fee the line may be engaged for the maximum of 6 minutes continuously. From 7 p.m. to 7 a.m. half the day-rate is charged (minimum 6d., but a 3d. 3 min. day-rate becomes 3d. 6 min. at night).

Anglo-French and Anglo-Belgian Telephone.—Telephonic communication may be obtained through Post Office Exchanges or Call Offices from London and certain provincial towns in England to Paris, Brussels, and certain pro-

vincial towns in France and Belgium. Fee—8s. per conversation of three minutes (10s. for Bordeaux, Lyons, Marseilles and St. Etienne). Two consecutive conversations are permitted. *NOTE.*—Paris time is 10 minutes in advance of London time (i.e., 12 noon London = 12:10 p.m. Paris), but Greenwich time prevails in Belgium.

SUNDAY AND HOLIDAY ARRANGEMENTS.

On Sunday throughout the U.K. no Parcel Post, Money and Post Order Savings Bank, or Express Delivery (Service No. 1, p. 361) business is transacted. In London all but forty offices are closed. These forty open in the morning (thirty-four of them, including those on p. 294, except the N.W. District Office, also in the evening) to sell stamps and send telegrams. About ninety suburban stations, chiefly S.E. and S.W., send telegrams at train times (see also p. 354). There is no delivery of letters except express letters fully prepaid, marked with one thick vertical line and the words "Express Delivery on Sunday"; nor any general collection till midnight. Letters, etc., with extra 1d. stamp, posted in special boxes at one of the above-mentioned thirty-four offices before times varying from 5 to 6 p.m., or at any great railway terminus before 6 p.m. (later if at the appropriate terminus), leave by the usual night mails. Letters may be registered at these offices; or with 2s. fee at the Sorting Carriage on the mail train at the appropriate terminus, at times varying between 8 and 10 p.m. In the Provinces all Head Offices and most Sub-offices open from 8.30-10 a.m. for stamps, telegrams (Scotland 9-10), registering letters. There is only one delivery of letters (in most Scottish towns, and the smaller English and Irish villages, none) any one may prevent even this so far as relates to himself. CHRISTMAS DAY and GOOD FRIDAY.—In London there is one delivery of letters, express letters, and parcels; if Christmas Day be a Sunday, of parcels and express letters only. The G.P.O., Charing Cross, and Eversholt Street Offices open from 8-11 p.m. (stamps, registered letters); also certain Telegraph Offices (stamps, telegraph (p. 365) telephone, registered letters). Express letters are not accepted for delivery under Service 1, p. 365, and parcels are not collected. The Provinces: (In Scotland business is as on week-days; in England and Ireland as Sundays, but with one morning delivery of letters and parcels, even if Christmas be a Sunday. *Other Public and Bank Holidays.*—London. One morning delivery of letters and parcels. Collection of letters evening and midnight; of parcels, morning only. G.P.O. and Head District Offices (p. 294) open for all business except Savings Bank and non-telegraphic money orders. The Provinces: In England and Ireland the chief town and country offices and sub-offices, being also telegraph delivery offices, generally open as usual, closing one hour for Savings Bank, Postal, and Money Order business. The smaller offices of all kinds open either only in the morning or not at all. In Scotland the same holds good, but on New Year's Day no Money Order, etc., business is done. Throughout the U.K. there is only one letter and parcel delivery; in Scotland also on SACRAMENTAL FAST DAYS.

POST OFFICE SAVINGS BANKS.

Hours are specified in a notice exhibited at the office. On presentation of book a depositor may withdraw on demand a sum not exceeding £1. Deposits can be made from 1s. to £50 in one year (ending 31st Dec.). When with interest the

total exceeds £200, interest is allowed on £200 only. Interest is at 2½ per cent.

The Central Post Office Savings Bank is at Blythe Road, West Kensington, W.

* NOTE.—FINANCE BILL, 1909.

The following provisions affecting Excise Duties and Licences are embodied in the Finance Bill, 1909, which at the time of going to press had not reached its final stage:—

Liquor Manufacturers' Licences:—

Brewer of Beer for sale: according to quantity brewed in preceding year, viz.: not exceeding 100 barrels, £1; exceeding 100, £1 for first 100, and 12s. 6d. for every further 50.			
Distiller of Spirits: not exceeding 50,000 gallons, £10; exceeding 50,000, £10 for first 50,000, and £10 for every further 25,000.			
	£	s.	d.
Rectifier of Spirits	15	15	0
Sweets (including Brit. Wine), Maker of	5	5	0

Liquor Dealers' (Wholesale) Licences:—

	£	s.	d.
Beer	10	10	0
Spirits	15	15	0
Sweets	5	5	0
Wine	10	10	0

Liquor Retailers' On-Licences:—

Beer (Beer-house Licence): a Duty equal to a third of the annual value of the premises, subject to a minimum of from £3 10s. 0d. to £23 10s. 0d., according to population of district. There is an option to pay in proportion to the annual "compensation value" in certain cases of large beer-houses and "seasonal" hotels.

Cider: from £2 5s. 0d. where ann. val. is under £30, up to £6 where it is £100 or over.

Spirits (Publican's Licence): a Duty equal to half the annual value of the premises, subject to a minimum of from £5 to £35, according to population of district. There is an option to pay in proportion to the annual "compensation value" in certain cases of large public-houses and "seasonal" hotels.

(Hotels and Restaurants): duty to be charged according to proportion that receipts from intoxicating liquors bear to total receipts, or, optionally, 25% of the "annual licence value"; subject in either case to a minimum charge.

(Clubs): an Excise Duty of 6d. in the £ on their purchases of intoxicating liquors, but no Licence Duty.

(Theatres, Music Halls and Refreshment Rooms). The Bill has special provisions.

Sweets: the same scale as for Cider.

Wine: from £4 10s. 0d. where ann. val. is under £30, up to £12 where it is £100 or over.

Liquor Retailers' Off-Licences:—

Beer: from £1 10s. 0d. where ann. val. does not exceed £10, up to £10 where it exceeds £500.

Cider

Spirits: from £20 (ann. val. not exceeding £10) up to £50 (ann. val. exceeding £500).

Sweets

Wine: from £2 10s. 0d. (ann. val. not exceeding £20) up to £10 (ann. val. exceeding £500).

Other Liquor Licences:—

Passenger Vessel: £10 (annual); £2 (one day).

Railway Restaurant Car

Occasional Licences: 10s. per day (5s. if for beer and wine only).

Motor Spirit, manufactured in U.K.

the gallon £0 0 3
Duty repayable to persons using otherwise than for motive power for motor cars, and half duty repayable when used for trade cars or hackney carriages, or by a medical man for professional purposes.

Motor Spirit Manufacturer, ann. licence £1 0 0

 " Dealer,

(One pint at a time may be sold without licence.)

Spirits, made in U.K.: 3s. 6d. additional,

making total duty ... per proof gallon £0 14 9

Tobacco, grown in Ireland (from April 30, 1909),

or grown in England or Scotland (from Jan. 1,

1910):

Manufactured in bond

Unmanufactured, if containing

10 per cent. moisture

Less than 10 per cent. moisture

Tobacco Growers, Cultivators or Curers,

England and Scotland, annual licence

Local Taxation Licences.

(ADMINISTERED BY THE RESPECTIVE COUNTY COUNCILS. LICENCES OBTAINABLE AT ANY POSTAL MONEY ORDER OFFICE.)

ARMORIAL BEARINGS, annual licence, £ s. d.	
Great Britain	1 1 0

exceeds:	£	s.
500,000 and does not exceed £750,000...	£	750,000...
"	"	1,000,000...
"	"	100,000...

In calculating duty the net value of an estate where the death occurred between 2nd August, 1894, and 30th June, 1895, is raised to the next complete £10; on deaths after that date until the 8th April, 1900, any fraction of £100 is ignored, such adjusted value determining both the rate and amount of duty. On deaths on and after 9th of April, 1900, the rate and amount of duty is calculated on the exact net value.

Gifts made by the deceased within a twelvemonth of death are subject to aggregation with the rest of the estate.

In addition to the above, where property liable to Estate Duty is settled by the will of the deceased, or having been settled by some other disposition which took effect since 1 Aug., 1894, passes under that disposition on the death of the deceased to some person not competent to dispose thereof, a further duty (*Settlement Estate Duty*) is payable at the rate of £1 per cent. on the Settled property (except when the only life interest is taken by the husband or wife of the deceased), but from that payment the *ad valorem* stamp duty charged on the settlement may be deducted.

But where the net value of the property, real and personal, does not exceed £1,000, Estate Duty only is payable, and the property is exempt from Settlement Estate Duty, and from Legacy or Succession Duties.

Small estates up to £300 and £500 gross are charged, at the option of the accounting parties, either by the preceding scale or with fixed duties of 30s. and 50s., and are exempt from all other death duties.

Where the net value exceeds £100, but does not exceed £200, the *ad valorem* duty amounts to £1 only, provided that the death occurred on or after 1st July, 1895, and before 9th April, 1900.

Interest at 3 per cent. per annum is also payable on the Estate Duty on personally from the date of the death up to that of delivery of the affidavit or account.

The Estate Duty on real property may be paid, if desired, by eight yearly or sixteen half-yearly instalments, and that on certain annuities may at option be paid in four yearly instalments, and 3 per cent. interest is charged on all unpaid portions of duty in these cases from twelve months after death.

* Estates exceeding £1,000,000 pay 10 per cent. on first million, whilst the remainder, if not exceeding half a million, is charged 11 per cent. if not exceeding a million 12 per cent., and so on to a maximum of 25 per cent.

***LEGACY AND SUCCESSION DUTIES:—Also see "Estate Duty."**

If the deceased died on or after the 1st June, 1881, every pecuniary Legacy or Residue, or share of Residue, although not of the amount or value of £20, is chargeable with Duty by the 44 Vict. c. 12, s. 42.—Except in the cases of small estates, see note to Estate Duty.

No succession duty is payable where the principal value of all the successions on the same death does not amount to £100 (16 & 17 Vict. c. 51, s. 18).

Rates of duties payable on legacies, annuities, and residues (£1 per cent. Legacy Duty practically abolished since 1881), and of Succession Duties where deceased died before 1st July, 1883, or where Estate Duty, Finance Act, 1894, is payable (in which latter case the 1 per cent duty is also practically abolished).

To Children of the Deceased, or their Descendants, or to the Father or Mother or other Lineal Ancestor of the Deceased (see above)	£1 per cent.
To Brothers and Sisters of the Deceased, or their Descendants	£3 per cent.
To Brothers and Sisters of the Father or Mother of the Deceased, or their Descendants	£5 per cent.
To Brothers and Sisters of the Grandfather or Grandmother of the Deceased, or their Descendants	£6 per cent.
To any Person in any other degree of collateral Consanguinity, or to a Stranger in Blood to the Deceased	£10 per cent.
Where deceased died on or after 1 July, 1883, and Probate or Estate Duty is not payable, Succession Duties for the relationships above are at rates of 1½, 4½, 6½, 7½, and 11½ respectively.	

* See Note as to Finance Bill, at end of this Table.

The Husband or Wife is chargeable with Estate Duty, but not Legacy or Succession Duty; and the Husband or Wife of a relation is chargeable at the rate at which the relation would be charged.

Penalties.—Persons paying or receiving any Legacy, Residue, or Share of Residue liable to Duty, without taking or signing the proper Receipt for the same; persons not giving notice of a succession, or not delivering an account, are subject to certain Penalties.

Schedule E: Salaries, pensions, and other emoluments of Officers of Army, Navy, Civil Service, Ecclesiastical Bodies, Corporations, Public Companies, &c. } or 0 10 0

* See Note as to Finance Bill, at end of this Table.

† Relief for "Earned" Incomes.—An individual whose total income (from all sources) does not exceed £2,000 may claim to be charged at the lower rate of duty upon any portion of such income which is immediately derived by him from the exercise of a trade or profession, or from an office or employment of profit held by him, or from a pension for past services in an office or employment of profit, provided that the claim is made before September 30 in the year (ending the following April 5) for which the tax is charged. (See Finance Act, 1907, s. 19.)

Exemption and Abatements.
Income not exceeding £160 Exempt.

Excd.	Not Excd.	
£160	£400	Abatement of £160
400	500	150
500	600	120
600	700	70

When the total joint income of a husband and wife does not exceed £500, a wife can separate her claim for exemption or abatement from that of her husband on account of profits derived from any business carried on by means of her own personal labour (60 & 61 Vict. c. 24, s. 5), provided the husband is assessable under Sch. D, and that his income is unconnected with the business of the wife. Allowance of duty may be claimed on the amount of premiums paid for insurance of self or wife in approved Companies legally carrying on business in the United Kingdom, if not exceeding one-sixth of the net personal income.

A Clergyman or Minister paying rent for dwelling house and using part of the house mainly for his duties may obtain an allowance not exceeding the tax on one-eighth of the rent. (Finance Act, 1907, s. 28.)

Spoiled Stamps.

ALL applications for allowance must be made within two years from the time of spoilage of unexecuted instruments, or within two years of the date or of the first execution of others.

The hours of attendance for the allowance of spoiled stamps at Somerset House are from 11 to 3, Saturday, 10 to 1. At Telegraph Street, E.C. (sea policy and general spoiled stamps), from 11 to 3 on Monday, Wednesday, and Friday.

* See Note as to Finance Bill, at end of this Table.

Deeds Stamped after Execution.

REGULATIONS under which the Commissioners as a general rule allow deeds and other instruments to be stamped after execution:—

WITHOUT PENALTY, ON PAYMENT OF DUTY ONLY: Agreements under hand only, liable to the duty of 6d. — Agreements for letting furnished houses for less than a year, if in the form of letters and correspondence only.—Appraisements.—Attested copies,—within 14 days of first execution.

Foreign sea policies, within 10 days of arrival in U.K.

Deeds and instruments not otherwise excepted, within 30 days of first execution.

NOTE.—Where the deed or instrument has been wholly executed *abroad*, the period within which it may be stamped begins to reckon from the date of its arrival here.

WITH PENALTY IN ADDITION TO DUTY:—

Articles of clerkship.

Bills of exchange upon stamps of sufficient amount but of improper denomination.

Charter-parties. Receipts, within certain limits of time.—*Vide* Table of Penalties.

Contract notes.

Letters of Allotment and Renunciation. Scrip certificates.

Share warrants. Warrants for goods.

Policies of insurance, other than Marine policies.

INSTRUMENTS WHICH CANNOT LEGALLY BE STAMPED AFTER EXECUTION:—

Bills of exchange (except as before mentioned).

—Bills of lading.

Marine policies executed in the United Kingdom. Proxies and Voting Papers (except those first executed abroad, which may now be stamped within 30 days after first receipt in U.K.).

PENALTIES ENFORCEABLE ON STAMPING:—

Agreements under hand only. Attested copies or extracts: after 14 £ s. d.
days from their first execution 10 0 0

Charter-parties, within 7 days from their first execution 0 4 6

Charter-parties after the expiration of 7 days, but within one month..... 10 0 0

Receipts, within 14 days after they have been given 5 0 0

Receipts, after 14 days, but within one month 10 0 0

Other Instruments presented after the proper time (subject to special provisions in some cases)..... 10 0 0

NOTE.—FINANCE BILL, 1909.

The following are the principal provisions, affecting Stamps, Taxes, and Death Duties, embodied in the Finance Bill, 1909, which, however, at the time of this volume being sent to press had not reached its final stage:—

CONTRACT NOTES, for the sale or purchase of stocks and marketable securities. New Scale of Stamp Duties, according to value of the stock, &c.: £5 to £100, 6d.; exceeding £100, up to £500, 1s. 6d.; exceeding £500, up to £1,000, 2s. 6d.; exceeding £1,000, up to £1,500, 3s. 6d.; exceeding £1,500, up to £2,500, 4s. 6d.; exceeding £2,500, up to £5,000, 6s. 6d.; and so on (2s. 6d. extra for each additional £2,500) up to a maximum of £1 0s. 6d. where the value exceeds £20,000.

Continuation Notes to be chargeable on one only of the two transactions embraced.

Option Contract Notes to be chargeable with half the above rates only, unless the option is a double one.

Contract Note following a duly stamped option contract note to be relieved from half the duty.

CONVEYANCES or TRANSFERS on sale of any property: existing duties (*vide* scale in Table above) to be doubled, except conveyances or transfers of stocks or marketable securities; except also those in which the consideration does not exceed £500.

Conveyances by way of gift *inter vivos* to be charged as conveyances on sale. Exceptions for marriage settlements, and certain gifts of property for preservation of open spaces, and for conveyances to appoint new trustees, &c.

ESTATE DUTY: *Increased rates*, in the case of persons dying on or after April 30, 1909:—

Principal value of Estate exceeding	Rate per cent.	Principal value of Estate exceeding	Rate per cent.
£100	1	£100,000	10
500	2	150,000	11
1,000	3	200,000	12
5,000	4	400,000	13
10,000	5	600,000	14
20,000	6	800,000	15
40,000	7	1,000,000	15
70,000	8		

Settlement Estate Duty, to be increased from £1 to £2 per cent.

Gifts made by deceased during his life to be charged, unless made more than three years before death; gifts made for public or charitable purposes, or in consideration of marriage, or as part of deceased's reasonable normal expenditure, excepted. Gifts of less than £100 in value or amount also excepted.

Payment of Estate or Succession Duties may, by agreement with the Commissioners, be made, wholly or in part, in the form of real or leasehold property comprised in the estate.

INCOME TAX: Rate raised to 2s. 2d. in the £. But a person whose total income from all sources, while exceeding £2,000 does not exceed £3,000, can claim to be charged at rate of 1s. 6d. upon earned income. Those whose total incomes do not exceed £2,000 can still claim to be charged at 6d. upon earned income. Claims to these lower rates of 1s. 6d. and 6d. are to be made annually before September 30 (extended to November 30 in case of the new 1s. 6d. rate, for year 1909 only).

Super Tax, 6d. in the £, imposed on persons whose total incomes exceed £5,000, but the first £3,000 income not to be charged.

Allowance for Children may be claimed by persons whose total incomes do not exceed £500. £50 to be free of tax in respect of each child under 16 years old.

Allowance to Owners of Land and Houses, for average cost of maintenance, repairs, insurance and management, may be claimed in addition to the present fixed allowance, subject to a limit of one-eighth of the annual value in case of land and one-twelfth in the case of houses. This special allowance does not apply to houses of annual value exceeding £8. Five years' average to be taken.

Residents abroad.—No exemption or other relief dependent on total income is to be given to persons not residing in the United Kingdom.

Exceptions: present or former servants of the Crown, missionaries, servants of native States under British protection, residents in the Channel Islands or the Isle of Man, and persons residing abroad for their health.

LAND VALUES DUTIES:—

(I.) INCREMENT VALUE DUTY: payable on the occasion (a) of any transfer or sale of land or any interest therein, (b) of any lease for more than 14 years, (c) of the land, or interest in it, passing on death. (d) In the case of Corporations, in addition to (a) and (b), and in place of (c), the duty is payable in 1914 and every 15 years thereafter.

Rate of duty [payable as a stamp duty by (a) the seller, (b) the lessor, (c) the deceased's estate, or (d) the Corporation]: £1 for every £5 of "increment value," i.e., the increase in the value of the site—apart from the value of buildings, &c., thereon—since April 30, 1909, or since the last payment of duty.

Exemptions, &c.—Agricultural land, while it has no higher value than for agricultural purposes only.—Small residences occupied by the owner, or holder of lease of 50 years, where annual value does not exceed £40 in London, £26 in towns of 50,000 population, and £16 elsewhere.—Small agricultural holdings, where land and dwelling do not exceed £30 annual value, occupied and cultivated by the owner, and not exceeding 50 acres (of average value not exceeding £75 an acre).—Recreation grounds owned by corporate and other bodies, without view of profit, not to be liable to the periodical charge (d).—Flats (transfer, lease, &c., of separate dwelling).—Ten per cent. of increment allowed free on first and on any subsequent occasion, but such allowances not to amount to more than 25 per cent. in any period of five years.—Allowance is to be made where Reversion Duty has been paid for the same benefit or increment.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909.—Minerals not so exempt are subject to a special basis of charge to Increment Value Duty, as an annual duty.

(II.) REVERSION DUTY: payable by the lessor on the determination of a lease.

Rate of Duty: £1 for every £20 of the value of the benefit accruing to the lessor.

Exemptions, &c.—Reversions purchased before April 30, 1909, under leases which determine within 40 years of purchase.—Leases of agricultural land.—Leases the original term of which did not exceed 21 years.—Allowance to be made where fresh lease is granted before expiration of original lease, 2½ per cent. of duty for each unexpired year, up to 50 per cent. of whole duty.—Allowance is to be made where Increment Value Duty has been paid for the same benefit or increment.—Mining leases not to be charged.

(III.) UNDEVELOPED LAND DUTY: payable by the owner (including a lessee for a term of 50 years or more) of any land which has not been developed by the erection of dwelling-houses or buildings for the purpose of any trade, &c., other than agriculture (but including glass-houses or greenhouses as trade buildings), or is not otherwise used *bona-fide* for any trade, &c., other than agriculture.

Rate of Duty: One halfpenny annually for every £1 of the "site value," i.e., the

market value of the fee simple of the land if divested of buildings, timber, &c., and less the value of any minerals.

Exemptions, &c.—Land the site value of which does not exceed £50 an acre.—Agricultural land, except on such part of the site value as exceeds its agricultural value.—Parks and spaces open to the public as of right, or to which the public are allowed reasonable access.—Recreation grounds, used as such under agreements for not less than 5 years.—Land not exceeding 1 acre occupied with a dwelling-house.—Garden (with a dwelling-house) up to 5 acres, when site value of the whole does not exceed 20 times its annual value.—Agricultural land held under an existing agreement, not chargeable until agreement terminates.—Agricultural land occupied and cultivated by the owner, if all land owned by him does not exceed £500 in value.—Allowance is to be made where Increment Value Duty has been paid in respect of undeveloped land.

(IV.) MINERAL RIGHTS DUTY: payable in respect of the rental value of all rights to work minerals and of all mineral wayleaves.

Rate of Duty [payable by the proprietor where he works the minerals, or, in any other case, by the immediate lessor of the working lessee]: 1s. 6d. annually for each £1 of rental value.

Exemptions, &c.—Common clay, common brick clay, common brick earth, sand, chalk, limestone, and gravel not to be charged.—*Reversion Duty* is not to be charged on the determination, nor *Increment Duty* on the grant, of a mining lease.—Minerals which were the subject of a mining lease or were being worked on April 30, 1909, are exempt from *Increment Value Duty*, and minerals not

so exempt are to be charged to that *Duty* on a special basis in the form of an annual duty.

LEASES: the existing Stamp Duties (*vide* scale in Table) to be doubled, except those which are charged with the fixed duty of 1d.

LEGACY AND SUCCESSION DUTIES: the existing duties (*vide* Table) are thus affected:—

The 1 per cent. duty, which was abolished in most cases, is to be reimposed and extended to husbands and wives, as well as descendants and ancestors. *Exceptions*.—Estates not exceeding £15,000.—Legacies and successions of less than £1,000 (£2,000 in the case of widow or child of deceased), whatever may be value of whole estate.

The 3 per cent. duty (brothers and sisters and their descendants) raised to 5 per cent.

The 5 per cent. and 6 per cent. duties (more distant relatives) to 10 per cent.

MARKETABLE SECURITIES, transferable by delivery: Stamp Duties to be doubled, except as regards Colonial Government and certain Colonial Municipal Securities.

The classes affected are:—(1) Bearer Securities dated or signed on or before August 6, 1885, will be charged double the duty on a mortgage.—(2) Bearer Securities dated, signed, or offered for subscription after August 6, 1885, 2s. 6d. for every £10 or fraction.—(3) Bearer Securities given in substitution for like securities duly stamped, 1s. 6d. for every £20 or fraction.—(4) Foreign or Colonial (except Colonial Government) Bearer Securities, on negotiation in the U.K., 2s. 6d. for every £20 or fraction.

SHARE WARRANT AND STOCK CERTIFICATE TO BEARER of any Foreign or Colonial Company to be charged 2s. 6d. for every £20 or fraction.

Exchequer Windfalls in 1909.

The following table shows the estates exceeding half a million pounds sterling proved during the 12 months ending Oct. 31, 1909.

£6,666,666 (as far as can be ascertained) Charles MORRISON, owner of considerable City property, aged 91, May 25.

£2,018,114 gross (£2,018,649 net) Sir Frederick WILLS, Bart., aged 70, Feb. 28.

£2,500,000 (at least) Henry Isaacs BARNATO, aged 53, Nov. 30, 1908.

£2,377,052 gross (£2,305,852 net) Sir Donald CURRIE, O.C.M.G., aged 83, April 13.

£2,153,292 (reservoir) Sir John Blundell MAPLE, Bart., aged 58, Nov. 24, 1903.

£1,300,000 Alexander FLEMING, aged 84, Oct. 16.

£1,266,698 Duc DE DOUDEAUVILLE, Aug. 28, 1908.

£1,043,734 gross (£1,034,850 net) James Marke WOOD, aged 67, Dec. 27, 1908.

£1,000,000 (as far as can be ascertained) Lord BURTON, aged 72, Feb. 1.

£1,000,000 (apparently exceeds this sum) Morris Ketchum JESSUP, Dec. 17, 1908.

£879,594 gross (£427,645 net) Earl of LEICESTER, K.G., aged 86, Jan. 24.

£776,271 Lord BLYTHWOOD, aged 70, July 8, 1908.

£774,597 gross (£765,259 net) Mrs. Martha Maria Frazer MACEWAN, aged 78, March 25.

£701,117 gross (£696,848 net) Julius Caesar CZARNIKOW, aged 72, April 17.

£667,629 gross (£666,326 net) Selwood Cooke KIDDLE, aged 71, Dec. 20, 1908.

£617,627 gross (£614,999 net) Frederick GORRINGE, aged 77, April 10.

£587,870 gross (£585,200 net) Matthew George MEGAW, aged 61, Oct. 29, 1908.

£544,779 gross (£512,478 net) Maj.-Gen. James GUNTER, aged 74, Aug. 29, 1908.

£540,409 gross (£486,675 net) Sir Joseph Joel DUVEEN, aged 64, Nov. 9, 1908.

£537,933 gross (£502,361 net) Sir Cory Francis CORY-WRIGHT, Bart., aged 69, May 30.

£533,699 gross (£527,915 net) William PEECH, aged 75, July 1.

£508,989 gross (£508,623 net) Ellis Abraham FRANKLIN, aged 86, May 11.

BIRTHS, MARRIAGES, DEATHS, WILLS, AND OTHER USEFUL INFORMATION.

BIRTHS.

WHEN a birth takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The father or mother of the child. If they fail, 2. The occupier of the house in which the birth happened; 3. A person present at the birth; or, 4. The person having charge of the child. The duty of attending to the registration thereof rests firstly on the parents. One of them must, within 42 days of the birth, give to the Registrar by word of mouth the information needed to enable him to register, and must sign the register in his presence. If they fail to do this without reasonable cause, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register within the same period. If at the end of 42 days no one has given information and signed the register, the Registrar may write to any one of the above-mentioned persons, requiring him or her to come to him for that purpose, at a stated time and place. Any person who fails to comply with this requisition will become liable to a penalty of forty shillings. Not only will liability to a penalty be avoided, but the registration of a birth will be free when it takes place within 42 days (but in *Scotland* the period is 21 days), unless either of the persons above named sends to the Registrar a written request to come and register at his or her residence or at the house where the child was born, when the Registrar on so attending may claim a fee of one shilling. After three months a birth cannot be registered except in the presence of the superintendent Registrar, and on payment of fees to him and the Registrar. After twelve months a birth can be registered only on the Registrar-General's express authority, and on payment of further fees. The only legal proof of age and place of birth is afforded by the civil registers, which the law now requires to be made as above described. In districts where the Notification of Births Act, 1907, has been adopted by the local authority, notice of every birth must (subject to a penalty in case of default) be given by the father, or person in attendance on the mother, to the district medical officer of health. The notice must be sent by post within 36 hours of the birth, and is to be in addition to, and not in substitution for the notices above mentioned.

DEATHS.

When a death takes place, personal information of it must be given to the Registrar, and the register signed in his presence, by one of the following persons:—1. The nearest relative of the deceased present at the death, or in attendance during the last illness. If they fail, 2. Some other relative of the deceased in the same (Registrar's) sub-district. In default of any relatives, 3. A person present at the death; or the occupier of the house in which the death happened. If all the above-named fail, 4. An inmate of the house, or the person causing the body to be buried. Relatives present or in attendance are first required to attend to the registration. One of them must, within five days of the death, give to the Registrar by word of mouth the information needed, and must sign the register; or must within the same time send him written notice of the death, accom-

panied by a certificate of the cause of death, signed by a registered medical practitioner, if any such attended the deceased. The written notice will be useless without a legal medical certificate. If notice is sent, information must nevertheless be given and the register signed within fourteen days from the death. If relatives present or in attendance fail without reasonable cause to carry out these provisions, they will become liable to a penalty of forty shillings. In case of their failure, one of the other persons above named must give personal information and sign the register in their stead. It is important that every death should be registered and a certificate of registry be obtained from the Registrar before the funeral. This certificate should be delivered to the clergyman or other person who performs the funeral or religious service. The penalty for not delivering this certificate is forty shillings. If at the end of fourteen days one of the persons above mentioned has not attended to the registration, the Registrar may, by written application, require any one of them to come to him and do so at a stated time and place. Any person failing to attend on this application will be liable to a penalty of forty shillings. Whenever the deceased has been attended by a registered medical practitioner, a certificate of the cause of death, signed by him, must be delivered to the Registrar. Any person receiving such a certificate from the practitioner and not so delivering it will incur a penalty of forty shillings. The registration of a death is free of charge when it takes place within the above-mentioned periods, unless on request it is effected at an informant's house, or at the house where the death happened, when a fee of one shilling will be payable to the Registrar. After twelve months a death can be registered only on the Registrar-General's express authority, and on payment of fees.

CORONERS' INQUESTS are held in all cases of violent and unnatural deaths, such as the case of a person slain or drowned, or dying suddenly, and of any person dying in prison. Sudden deaths are supposed by the law to demand inquiry. Still, it often occurs that a medical man quite familiar with the case will give his certificate that the death arose naturally, from heart disease, apoplexy, &c., and in such case a coroner's inquest is dispensed with. Coroners do not obtrude into the houses of persons for the purpose of holding inquests, but are sent for by the peace officers, to whom it is the duty of those in whose houses violent or unnatural deaths occur to make immediate communication, whilst the body remains in the same situation as when the death occurred. Inquests are not to be held on Sunday. When the Coroner receives due notice of a violent death, casualty, or misadventure, he issues his warrant or precept to summon a jury to appear at a particular time and place for the purpose of instituting the inquiry, when, how, and by what means the deceased came by his death. The jury must consist of at least twelve lawful and honest men, "*probi et legales homines*," and the number is immaterial provided twelve agree. The jury is usually summoned from the householders residing in the neighbourhood in which the death took place. Any person summoned as a witness is bound to attend, or renders himself liable to be fined in any sum not exceeding forty shillings, the fine for defaulting *jurymen* being £5. In the case of sudden or suspicious death in Scotland, the Lord Advocate may order a

public inquiry to be held in the manner prescribed by the Fatal Accidents Inquiry (Scotland) Act, 1895, as altered by an amending Act passed in 1906.

VACCINATION.

The parent of every child born in England must within six months after the birth of the child, or the person having custody of a child must within six months after receiving it have the child vaccinated by a registered private medical practitioner or by the Public Vaccinator for the district. If the vaccination is performed by a private medical practitioner a certificate in the form prescribed by the Vaccination Order, 1898, of successful vaccination must be sent to the Registrar of Births within seven days. The Public Vaccinator is required on the request of the parent or guardian of a child to visit the home of the child and vaccinate it free of charge with glycerinated calf lymph or with such other lymph as may be issued by the Local Government Board at the option of the parent. If a child is not vaccinated within 4 months of its birth, the Public Vaccinator is required to give 24 hours' notice to the parent and to visit the home of the child and offer to vaccinate it. No parent or other person will be liable to any penalty under the Vaccination Acts if within four months from the birth he makes a statutory declaration before a commissioner for oaths or one justice of the peace that he conscientiously believes that vaccination would be prejudicial to the health of the child, and within seven days thereafter delivers the statutory declaration (which requires no stamp) to the Vaccination Officer for the district. A conscientious objector can thus escape all penalties, but a person who does not obtain a certificate, or make the declaration, will still be liable to penalties for not having a child vaccinated, and by the Vaccination Order, 1898, issued under the Vaccination Act, 1898, by the Local Government Board, the due vaccination of every child not exempted is secured by a very complete system of registration, and in future the Vaccination Officers will be able to undertake prosecutions without directions from Boards of Guardians, and the Boards will have no power to prevent such prosecutions. [See also Vaccination Order, 1907.]

MARRIAGE BY Banns OR LICENCE.

Banns of Marriage.—"Banns" formerly applied to any public kind of proclamation, and now refer only to marriages, so that the word signifies the public announcement in the parish church, the object being to ensure notoriety, and exclude clandestine marriages. Formerly banns might be proclaimed on Church holidays, but the Marriage Act, 26 Geo. II. c. 33, prescribes audible publication according to the rubric, on three Sundays preceding the ceremony. If there is morning service the right time for banns is after the Nicene Creed; and if there be afternoon or evening, and no morning service, then the right time is after the 2nd lesson. The law is now chiefly contained in the Marriage Act, 4 Geo. IV. c. 76, which repealed most of the laws then in force (see also 6 & 7 Will. IV. c. 85, and 1 Vict. c. 22). Where the parties reside in different parishes, the banns must be published in both, the minister giving his certificate of the same to be handed to the minister of the parish where the marriage takes place. The law provides specially for the case where one of the parties resides in Scotland, the publication being then in the Established

church of the parish. In like manner in Scotland the publication takes place in the parish church, even where the parties are married in the Anglican or Episcopal church. It may be noted that, by Scottish law only, omission to publish the banns does not invalidate the marriage. The names by which the parties are known are sufficient for publication of banns, so that a variance from the strict baptismal name is not important. But where wrong names are designedly given, for the purpose of concealment or otherwise, the case is different, and the marriage will be null and void (*Midgeley v. Wood*, 4 Sw. & Tr. 267). Where a wrong and fraudulent name is given by one party only, and the other party is innocent, the validity of the marriage is not affected.

The Bishop may licence a Chapel of Ease for the celebration of marriages; but where a district has been assigned to a chapel, and it becomes a vicarage, or "ecclesiastical parish," the option ceases, and the banns must be proclaimed and marriage celebrated therein, and not in the "mother church" or that of the civil parish.

If three months be permitted to elapse, the banns become useless, and the parties must either obtain a licence, or submit to the republication of banns. The minister ought to satisfy himself that the parties are of full age, or that the consent of parents is obtained, and it is usually on the score of insufficiency of age that banns are "forbidden." By the Act 6 & 7 Will. IV. c. 85, a marriage may be performed in church on the superintendent registrar's certificate without banns.

Marriage licences are of two kinds—(1) the Common or Ordinary Licence granted by the Archbishops and Bishops for marriage in any church or chapel duly licensed for marriages; (2) the Special Licence granted by the Archbishop of Canterbury for marriage at any time or in any place on good reason being shown (see p. 382). The Act of 1823 is severe on the clergy, making it a felony for any clergyman to marry the parties in the absence of banns or licence; and every Registrar or other person who knowingly unduly solemnizes a marriage is also guilty of felony. By a subsequent alteration in the law, the hours for marriage were extended, and they are now from 8 a.m. to 3 p.m.

The minister should be careful that there are two witnesses present, and that these witnesses attest the entries in the register books, which are kept in duplicate.

All civil jurisdiction over marriage was taken away from the Ecclesiastical Courts by the Divorce Act of 1857. An incumbent may under Section 25 of this Act refuse to marry a divorced person, whose marriage has been dissolved for his or her adultery, but must allow another clergyman of the diocese to perform the service. A person whose marriage has been dissolved for the adultery of the other party is entitled to be married in church by the incumbent, or his curate or substitute.

Although the presumption of law is in favour of the validity of a marriage, great care should be taken to comply with the directions of the several statutes in every particular. Where it is impossible to comply literally, the parties must do all they can to comply with the law.

A marriage certificate is nothing more than a copy of the entry in the church register; and the customary fee is 2s. 6d., and a stamp duty of 2d. Searches on the register-books may be made on payment of small fees, viz., 2s. for a single year, and 6d. additional for every other year. There are small fees, regulated by custom, on the certifi-

cate given of banns in one parish for marriage in another. Marriage fees are not uniform, and if excessive there is power with the Diocesan Chancellor to moderate them. With those who are in a position to afford it, it is usual to pay a guinea to the clergyman, and *ss.* to the clerk; and the usual fees are paid although a stranger-clergyman be invited to perform the service.

MARRIAGE LICENCES.

MARRIAGE LICENCES can be obtained in London by application at the Faculty Office, at the Vicar-General's Office, and at the Bishop of London's Registry, all within the old area known as Doctors' Commons, by one of the parties about to be married. In the country they may be obtained at the offices of the Bishops' Registrars, but licences obtained at the Bishop's Diocesan Registry only enable the parties to be married in the diocese in which they are issued; those procured at the Faculty Office, 23 Knight-rider Street, Doctors' Commons, E.C., or at the Vicar-General's Office, 3 Creed Lane, Ludgate Hill, E.C. (hours in both offices 10 to 4; Saturdays 10 to 2), are available for London and all England and Wales. No instructions, either verbal or in writing, can be received, except from one of the parties. Affidavits are prepared from the personal instructions of one of the parties about to be married, and the licence is delivered to the party upon payment of fees amounting to thirty shillings, in addition to the cost of stamp, *10s. 6d.* No previous notice is required and the licence is available as soon as it is issued. The cost of licences through a clerical surrogate in the country varies, according to the diocese, from £1 15s. to £2 12s. 6d. By the 4th George IV. c. 75, it is enacted, in order to avoid fraud and collusion in obtaining licences for marriage, that before any such licence be granted one of the parties shall make a declaration, on oath, that there is no legal impediment to the intended marriage; and also that one of *such parties hath had* his or her usual place of abode for the space of fifteen days immediately preceding the issuing of the licence within the boundary of the parish church, or the district parish in the church of which the marriage is to be solemnized.

It may be added that in the country there may generally be found a parochial clergyman who is also a surrogate, before whom the above-mentioned affidavit may be taken, and whose office it is to procure the licence from the Bishop's registry, the surrogate delivering the same personally to the applicant.

SPECIAL MARRIAGE LICENCES.

SPECIAL LICENCES are granted by the Archbishop of Canterbury through the Faculty Office, Doctors' Commons, under special circumstances, for marriage at any place with or without previous residence in the district, or at any time, &c.; but the reasons assigned must be such as to meet with his Grace's approval. Fees for licence stamp, &c., average £20 5s. 6d.

PROCEEDINGS AS TO A MARRIAGE BEFORE A REGISTRAR.

NOTICE AND DECLARATION.—In case of an intended marriage by *Certificate* at a register office (i.e., the superintendent registrar's office), or a certified building (i.e., usually a Roman Catholic or Nonconformist church or chapel), it is necessary for one of the parties to give notice under his or her hand (in the form prescribed by the 19 & 20 Vict. c. 119, schedule A) to the superintendent registrar of the district within which the parties shall

have dwelt for the space of seven days then next immediately preceding; or if the parties dwell in different superintendent registrars' districts, a like notice must be given to the superintendent registrar of each district; every form of notice contains solemn declarations that there is no lawful hindrance to such marriage, as to the necessary residence, the ages of the parties, and consent of parent in case of a minor; such notice and declarations must be signed before a registration officer of the district, namely, a superintendent registrar, or registrar of births and deaths or marriages or the deputy of some such registrar. If the marriage is intended to be had by licence, it is necessary for only one of the parties to give notice to the superintendent registrar, in manner before mentioned, in whose district he or she has resided for the space of fifteen days immediately preceding, and if the other party reside in a different superintendent registrar's district, it is not requisite that notice should be given to such last-mentioned superintendent registrar; but one of the parties must, for the space of fifteen days immediately preceding the giving of the notice, have had his or her usual place of residence within the district of the superintendent registrar to whom such notice is to be given. In case a minister did not happen to attend and the parties wished, they might be married before the registrar without any religious ceremony.

CERTIFICATE.—After the expiration of twenty-one days next after the day of the entry of notice of marriage which is to be had without licence, the superintendent registrar is required, provided there be no lawful impediment, to issue, upon the request of the party giving the notice, a certificate in the form prescribed by the 19 & 20 Vict. c. 119, schedule B. At any time within three calendar months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the authority of the certificate.

LICENCE.—In the case of marriage by licence the superintendent registrar is required, after the expiration of one day next after the day of the entry of the notice of marriage, provided there be no lawful impediment, to issue his certificate and also a licence to marry. At any time within three months next after the day of the entry of the notice of marriage the intended marriage may be solemnized under the licence.

MARRIAGE CEREMONY.—After the expiration of twenty-one days after the entry of the notice if the marriage is to be had without licence, or of one whole day if by licence, the marriage may be contracted at the register office and in the presence of the superintendent registrar and some registrar of the district, and in the presence of two witnesses, between the hours of eight a.m. and three in the afternoon, with open doors. Each of the parties must declare as follows:—"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D.;" and each of the parties shall say to the other, "I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband]." A wedding-ring is usually required. The fact that the surname of one of the parties, and her condition, was untruthfully stated, was held not to render such a marriage invalid (*Donaldson v. Rutter*, 1907, 24 T.L.R. 12). In case a minister is not present, and the parties wish it, they may be married in any chapel or building certified for marriages, the registrar only being present with the two

witnesses. "Gretna Green weddings" are obsolete, a period of residence being now required by law. Provision is made in the Marriages and Registration Act, 1837, sect. 23, for the declaration and form of words to be used in Welsh in Wales and in places where the Welsh tongue is used. If both parties are Jews, they must give notice to the registration officer in manner before mentioned, and may marry according to their usages in a synagogue or private dwelling-house, and at any hour; the marriage must be registered by the secretary of the husband's synagogue. If both parties are members of the Society of Friends, or, if not being in membership, they have been authorised by the Society of Friends to solemnize their marriage in accordance with its usages, they must give notice to the registration officer, and may be married in a Friends' meeting-house, and the marriage must be registered as soon as conveniently may be after its solemnization by the registering officer of the Society appointed to act for the district in which the meeting-house is situated. The presence of a registrar of marriages is not requisite at such marriages of Jews or members of the Society of Friends. The provisions as to Notices and Licences given above do not apply to Ireland. [Marriages before a Registrar in that country are regulated by 7 & 8 Vict. c. 81, and 26 & 27 Vict. c. 27; the Act regulating marriages in that country in places of Worship is 33 & 34 Vict. c. 110.]

Under the Marriage Act, 1838 (which does not apply to Scotland or Ireland) as to marriages according to the usages of the Society of Friends or of Jews, marriages may be solemnized in Nonconformist places of worship, provided they are duly registered for the solemnization of marriages without the presence of a Registrar, provided "the authorised person" (which means a person certified as having been duly authorised for the purpose by the trustees or other governing body of the building) is present and no notice has been given to the Superintendent Registrar that the parties to the marriage require the presence of a Registrar.

Where a marriage is solemnized under this Act each of the contracting parties shall in some part of the ceremony make the following Declarations:—

"I do solemnly declare that I know not of any lawful impediment why I, A. B., may not be joined in matrimony to C. D."

And each of the parties shall say to the other:—

"I call upon these persons here present to witness that I, A. B., do take thee, C. D., to be my lawful wedded wife [or husband];"

or, in lieu thereof:—

"I, A. B., do take thee, C. D., to be my wedded wife [or husband]."

The Act provides for the registration after marriage by "the authorised person." The Act provides for the payment to the Superintendent-Registrar of the district in which the registered building selected for the marriage is situated, of an additional fee of 6s. 6d. if the marriage is by licence, and otherwise a fee of 4s., but this provision for additional fees is only to remain in force for 10 years from the passing of the Act.

CERTIFICATE OF BIRTH, DEATH, OR MARRIAGE.

—On giving the name and date this can be obtained at Somerset House on payment of 3s. 7d. made up as follows: 2s. 6d. for certificate, 1s. for search, and 7d. for stamp. Enquiries by post from residents in the Metropolis will not be considered; attendance in person or by agent is necessary. Cer-

tificates are also obtainable at the above rate from the superintendent registrar of the district in which the birth, death, or marriage occurred.

FEES FOR MARRIAGE AT REGISTRY OFFICE.

For entering notice of a marriage without licence into the marriage notice-book: In London, &c.; elsewhere	s. d. 1 0
For entering notice of a marriage by licence into the marriage notice-book, &c.; stamp duty, &c. 6d.	3 6
For every certificate of notice of a marriage without licence	1 0
For every certificate of notice of a marriage by licence	1 0
For every licence for marriage	30 0
Stamp duty on licence for marriage	10 0
For every marriage solemnized in the presence of the Registrar without licence ..	5 0
Ditto, by licence	10 0
For every certificate of marriage	2 6
Stamp duty on ditto	0 1

MARRIAGES OF BRITISH SUBJECTS ABROAD.

Act passed 27th June, 1892; came into force 1st Jan., 1893. Order in Council passed 28th Oct., 1892, laying down Regulations for Marriages under the Act.

British subjects desirous of being married at an embassy, legation, or consulate, must give seven days' notice of the intended marriage, but one of the parties at least must have resided for that time in the district immediately preceding the giving of such notice. After the suspension of such notice for fourteen days the marriage may take place, provided one or both parties have resided for three weeks immediately preceding within the consular district. In cases where one of the parties only has dwelt within the district of the officer by whom the marriage is to be solemnized, the non-resident party, if resident abroad, must give notice to the Consular Officer for the district in which he or she resides; or, if resident in a place in the United Kingdom, the same notice must be given as if that party were about to be married at that place, and in England or Ireland shall be given to the superintendent registrar, or registrar, and in Scotland shall be given by proclamation of banns. In either case it is necessary that the non-resident party shall have had his or her abode in the marriage district (whether in the United Kingdom or abroad) for three consecutive weeks immediately preceding the date of the declaration required before the marriage can take place, and notice of the intended marriage must be given during those weeks. A Consular Officer holding a warrant for a district can only solemnize a marriage at his own official house. He cannot solemnize a marriage at the office of any subordinate consular officer, or elsewhere. No marriages performed at any other place are valid under the Foreign Marriage Act. Parties residing within a consular district who may wish to be married under the Act must go to the consular officer provided with a warrant for that district; two or more witnesses are required to be present; and an oath, declaration, or affirmation must be made by both parties with reference to their age, and parents' consent, if minors.

The following fees for marriages under the Foreign Marriage Act are leviable under the Consular Fees Order in Council of 18th August, 1892, and are payable to His Majesty's Govt.:—

For receiving notice of an intended marriage.....	£ s. d.
For receiving notice of a caveat.....	0 10 0
For every marriage solemnized by or in the presence of a Marriage Officer and registered by him	1 0 0
For certificate by a Marriage Officer of notice having been given and posted up, in case of one of the parties residing outside the consular district in which the marriage is to take place.....	0 10 0
For attendance by consular officer at a marriage solemnized in accordance with the local law and for registration of the same	0 5 0
Marriages may be solemnized 8 a.m. to 3 p.m.	1 0 0

The ceremony, if a marriage under the Foreign Marriage Act, may be performed by, or in the presence of, any Ambassador, Minister, Chargé d'Affaires, or any of the Secretaries authorised for that purpose, or by any Consul-general, Consul, Vice-consul, Consular agent (or any person duly authorised to discharge their duties), or Pro-consul, provided that such consular officer is furnished with a warrant signed by the Secretary of State for Foreign Affairs. No religious ceremony is required, but any form according to the creed of the contracting parties may be used. The presence of the duly authorised Marriage Officer is, however, necessary to render the marriage valid. If the ceremonial be that of the Church of England, it can only be performed by a clergyman of that Church. If the service be not that of the Church of England, the contracting parties must make a declaration before the Marriage Officer to the effect that they know not of any lawful impediment why they may not be joined in matrimony, and that they call upon the persons present to witness that they take each other respectively to be lawful wedded husband and wife. In the absence of any religious ceremony, such declaration is sufficient.

Marriages solemnized under the Foreign Marriage Acts are legal by English law when both parties are British subjects, and also when only one of them is a British subject, but such marriages are not necessarily valid out of His Majesty's dominions. In cases where one of the parties is a subject of the country where the marriage is proposed to take place, or of a third country, the party in question must previously comply with the requirements of the marriage law of the country to which he or she belongs, so far as it may be possible to do so, in order to render such marriage also valid by the law of that country.

An Englishwoman married to a foreigner follows the nationality of her husband.

In German marriages by any foreign consular officer are, in the absence of any treaty stipulations, strictly prohibited.

A marriage which would not be valid in England would be equally invalid if solemnized in an embassy, legation, or consulate abroad. For instance, marriages within the prohibited degrees of consanguinity or affinity would not be valid.

A marriage between Christians in India may be proved in England by an India Office certificate (*Braid v. Braid*, 1909, 25 T.L.R. 646).

Marriages may also be solemnized under the "Foreign Marriage Act, 1892," before any governor, etc., and also before the commanding officers of any of His Majesty's ships on a foreign station.

MARRIAGES ABROAD WITH FOREIGNERS ACCORDING TO FOREIGN LAW.

Any British subject desiring to be married in a foreign country to a foreigner according to the law of the country may, by virtue of the Marriage with Foreigners Act, 1906, after giving notice of the marriage, obtain a certificate from the registrar that there is no legal impediment to the marriage. In order to obtain the certificate, the rules set out in the schedule to the Act must be complied with. Any persons may enter an objection to a certificate, the validity of which will be decided by the Registrar-General.

A marriage by repute which is valid by the law of the domicile in a foreign country will be recognised as valid by the English courts (*re Green, Noyes v. Pitkin*, 1909, 25 T.L.R. 222).

MARRIAGES IN SCOTLAND.

The marriage laws of Scotland are peculiar among those of all nations for the latitude allowed the contracting parties, and, beyond requiring proof of present consent, the utter absence of direction as to celebration. No religious ceremony is obligatory, although the intervention of the Church is recognised and is becoming more usual in practice. That the parties give their free and serious consent is the only requisite. Males over fourteen and females over twelve may contract marriage without consent of their parents or guardians.

Marriages are of two kinds: (1) Those solemnized by a minister after (a) banns, or (b) publication of notice by the Registrar, called Regular Marriages; and (2) those celebrated without the assistance of a clergyman, called Irregular Marriages.

On Banns.—The proclamation of banns in Scotland has been customary authentically since 1242, and is probably of greater antiquity. It is regulated chiefly by the Acts of Assembly of the Church of Scotland. One of the parties (if not already domiciled in Scotland) must have resided in that country for six weeks previous to the proclamation, and in the parish where the banns are to be proclaimed for the space of fifteen clear days immediately preceding. The banns are proclaimed in the parish church (i.e., the church in the parish of the Established Church of Scotland) on two separate Sundays during service, but it is customary to complete the publication by proclamation at two services on the same Sunday. Where the parties reside in different parishes, the proclamation is made in both. There is no provision for cases where one of the parties resides in England, but it is usual to accept an English certificate. Episcopals, unlike other Dissenters in Scotland, have privilege of proclamation also in their chapel. Application for proclamation of banns is made to the session clerk of the parish church. A certificate of residence signed by two householders is usually required to accompany the application. The fee for banns is *ss. 6d.*

The certificate of publication of banns is authority to a clergyman of any denomination to celebrate the marriage. After the lapse of three months the banns are useless. The marriage must take place in presence of at least two witnesses capable of giving evidence. It need not be celebrated in a church, but may be in a dwelling-house or elsewhere, and at any hour; the time and place is a matter of absolute indifference to the law. After the marriage a schedule, signed by the parties, the clergyman,

and two witnesses, must be transmitted to the registrar within three days, under penalties. Clergymen do not charge fees.

After Notice by Registrar.—This procedure is regulated by the Marriage Notice (Scotland) Act, 1878. Both parties must have resided in Scotland for at least fifteen days prior to publication of the notice. Application is made to the registrar, who publicly exhibits the notice of the intended marriage for seven days. At the expiry of this period, unless written objections have been filed, the registrar issues a certificate of publication, which is equivalent in effect to banns. The fee is *rs. 6d.* Roman Catholics avail themselves of this method exclusively.

Irregular Marriages.—By declaration or acknowledgment. One of the parties must have resided in Scotland for twenty-one days immediately preceding. The parties, being capable of marriage and without legal impediment, may express either verbally or in writing, in presence of two witnesses (to whom the parties are known) capable of giving evidence, their mutual consent to take each other then and there for husband and wife. This act constitutes marriage. Registration is not essential to the validity of the marriage. If, however, it is desired to register the marriage, application is made to the sheriff of the county where it has been contracted. It is advisable to employ a solicitor to conduct the matter. The fees are *£1 5s.*

BRITISH NATIONALITY AND NATURALIZATION.

NATIONALITY.—The following are, by the law of England, deemed to be British subjects:—

1. All persons born in His Majesty's dominions, whether of British or of Foreign parents.
- *2. Children of natural-born British subjects, wherever born.
- *3. Grandchildren of natural-born British subjects, wherever born.
4. Persons naturalized (a) By Special Act of Parliament, (b) Under the provisions of the "Naturalization Act, 1870."

Natural-born British subjects can only deprive themselves of British nationality, (x) If they happen to be born in the British dominions of foreign parents, in which case they may, if of full age and if under no disability, make a declaration of alienage; (z) If they voluntarily become naturalized in a foreign state.

British subjects born in foreign countries sometimes become, by the law of the country of their birth, subjects or citizens of that country. In such case they may, by the law of England, when of full age, and if under no disability, make a declaration of alienage, and they then cease to be British subjects. Should they retain their British nationality, and continue to reside in the country of their birth, their British nationality will not avail them if claimed as subjects or citizens of the country in question.

NATURALIZATION.—The ordinary way of becoming a British subject is by fulfilling the requirements of the "Naturalization Act, 1870." The applicant must either have resided in the United Kingdom for a term of not less than five years, or have been in the service of the Crown for a

similar period. He must also furnish evidence of his intention, when naturalized, either of residing in the United Kingdom, or of serving under the Crown. All applications for certificates of naturalization should be addressed to the Secretary of State for the Home Department.

Privileges of naturalized British subjects:

"An alien to whom a certificate of naturalization is granted shall in the United Kingdom be entitled to all political and other rights, powers, and privileges, and be subject to all obligations, to which a natural-born British subject is entitled or subject in the United Kingdom, with this qualification, that he shall not, when within the limits of the foreign state of which he was a subject previously to obtaining his certificate of naturalization, be deemed to be a British subject unless he has ceased to be a subject of that state in pursuance of the laws thereof, or in pursuance of a treaty to that effect."

With reference to the last paragraph of the foregoing extract, it may be mentioned that the only country with which Great Britain has yet concluded a treaty on the subject of naturalization is the United States of America.

A natural-born British subject, who has become naturalized in a foreign country, may obtain a certificate of re-admission to British nationality on fulfilling the conditions required in the case of aliens applying for a certificate of naturalization.

The children of naturalized British subjects, if born in the British dominions, are by the law of England deemed to be British subjects. If born abroad, they are only deemed to be naturalized British subjects provided that their father was naturalized under the Naturalization Act, 1870, and that during infancy they became resident with their father, or mother being a widow, in any part of the United Kingdom.

A British colony may legislate on the subject of naturalization within its own limits.

The following fees are leviable under the Naturalization Act, 1870:—

On grant of certificate of naturalization	<i>£ s. d.</i>
For registration of declaration, with or without oath of allegiance.....	5 0 0
For certified copy of any declaration or certificate with or without oath	0 10 0

STATUS OF ALIENS.—Property may be held by an alien in the same manner as by a natural-born British subject, but the title to such property does not confer any right on an alien to hold real property out of the United Kingdom, or qualify him for any franchise.

Aliens are not entitled to be tried by a jury *de mediata lingua*, but are triable in the same manner as if they were natural-born subjects.

UNDESIRABLE ALIENS.—An undesirable alien—*e.g.*, one who is without means, or who is a lunatic, or an idiot, or who has been guilty in another country of an extraditable offence—may be prevented landing in the United Kingdom. An alien may also be expelled from this country if he prove to be "undesirable" within the meaning of the Aliens Act, 1905.

NOTIFICATION OF INFECTIOUS DISEASES.

By the Infectious Disease (Notification) Extension Act, 1899, the provisions of the Infectious Disease (Notification) Act of 1889 were extended to the whole of England and Wales on the 1st January, 1899. Every case of infectious disease, as defined by the Act, is to be notified to the

* N.B.—2 refers to father, and 3 to paternal grandfather only; married women are deemed to be the subjects of the State of which their husbands for the time being are subjects.

Medical Officer of Health of the district in which it occurs. The notice may be by letter or even verbal, and must be given by the head of the family, or by the nearest relatives present in the building or in attendance on the patient, or any other person in attendance, or by the occupier of the building. In addition to this, the medical man in attendance is required to send a certificate to the Medical Officer of Health. Failure to send the notice or certificate renders the defaulter liable to 40s. fine. No payment is made for the notices required to be given by persons in the house, but the medical man gets *as. 6d.* for every case in his private practice and *xs.* for every case in a public institution of which he is officer.

The diseases to which the Act applies are small-pox, cholera, diphtheria, membranous croup, erysipelas, scarlatina or scarlet fever, and the following fevers: typhus, typhoid, enteric, relapsing, continued, or puerperal. Plague must also be notified, in consequence of an Order issued in 1900. The local authority may order that the Act shall apply to any infectious disease other than those just mentioned, but such an order must be approved by the Local Government Board. In some districts the following have been declared infectious: measles, rubella or German measles, whooping cough, chicken-pox, mumps, and yellow fever. In the case of London the provisions of the Public Health (London) Act, 1892, are similar to those now extended to the rest of the country.

INFECTIOUS DISEASES.

PRECAUTIONS NECESSARY TO BE OBSERVED.—By the Public Health Act, 1875 (as amended by the Public Health Act, 1907), it is provided that any person who—(1) While suffering from any dangerous infectious disorder wilfully exposes himself without proper precautions against spreading the said disorder in any street, public place, shop, inn, or public conveyance, or enters any public conveyance without previously notifying to the owner, conductor, or driver thereof that he is so suffering; or, (2) Being in charge of any person so suffering, so exposes such sufferer, or causes or permits such sufferer to be so exposed; or, (3) Gives, lends, sells, transmits, or exposes, without previous disinfection, any bedding, clothing, rugs, or other things which have been exposed to infection from any such disorder, shall be liable to a penalty of £5. A person suffering from such disorder who enters a public conveyance is liable to a fine of 40s.; and if he so enters without notifying to the owner or driver that he is so suffering, shall be ordered by the Court to pay the owner and driver the amount of any loss and expense they may incur in respect of the disinfection of the conveyance. Every owner or driver of a public conveyance must provide for the disinfection of such conveyance after it has conveyed any person suffering from dangerous infection; but he cannot be required to convey any person so suffering until he has been paid a sum sufficient to cover any loss or expense incurred in disinfecting the conveyance. No person may knowingly let for hire any house, &c., in which any person has been suffering from any dangerous infectious disorder without having the same disinfected to the satisfaction of a medical practitioner, as testified by a certificate signed by him—penalty not exceeding £20, or imprisonment with or without hard labour, not exceeding one month. By the Public Health Act, 1907,

the Local Government Board has power to declare that this Act shall be in force in any specified district. Under this Act, a person suffering from an infectious disease must not engage in any trade unless he can do so without spreading the disease; nor may he take any book from a public or circulating library, or allow any such book to be returned after it has been exposed to infection. Clothes exposed to infection must not be sent to a public laundry unless they have been disinfected. A child who has been suffering from an infectious disease must not attend school without a medical certificate. Daymen must notify infectious diseases existing among their servants, and the owner or driver of a public vehicle which has conveyed an infectious person must notify the same to the district medical officer. No wake may be held over the body of a person who died of an infectious disease. Where the Infectious Disease (Prevention) Act, 1890, is in force, where any suitable hospital is provided, any person who is suffering from any dangerous infectious disorder, and is without proper lodging or accommodation, or is lodged in a room occupied by more than one family, or cannot be effectually isolated, may, on a certificate signed by a medical practitioner, and with the consent of the hospital, be removed by order of any justice to such hospital. Similar provisions apply to the Metropolis. The occupier of a house in which there has been infectious disease within six weeks before he ceases to occupy it, must have the premises disinfected and inform the owner of the disease. Where it appears to any District Council that any house is in such a condition that the health of any person is affected or endangered thereby, or that whitewashing, &c., would tend to prevent or check infectious disease, they may give notice in writing to the owner or occupier of such house to whitewash, &c., the same.

WILLS, TESTATORS AND EXECUTORS.

REASONS FOR MAKING A WILL.—Every man having a wife and family should make his will. However small his estate, it is an imperative duty in most cases, and is safer in every case, to protect the interest of the survivors by a will, and by the appointment of one or more trustworthy persons to carry his wishes into effect. When persons die intestate, having foolishly put off making a will until it is too late, their negligence may deprive those for whom they were most anxious to provide. Thus a widow may find that the estate, a life policy perhaps, is not all hers, but has to be shared with a distant cousin of her husband's. Negligence, or unreasoning dislike to making a will, becomes an irreparable crime against those who have the first claim to protection. The help of a lawyer in making a will is not in every case essential, but it is always advisable, particularly where there is a desire on a testator's part to provide for his property being "settled" as it is called—*e.g.*, the income being paid to his widow for her life, or until remarriage, and on her death or remarriage the capital being divided among his children equally. The tying-up or postponing the enjoyment of income or capital requires the skill of a practised lawyer. Assuming that a lawyer is not employed, a person having resolved to make a will must not regard it as a light matter, to be got rid of in a few minutes, like writing a letter, but one demanding the most serious attention. It is only after a person is dead, and cannot ex-

plain his meaning, that his will can be open to dispute. It is the more necessary, therefore, to express what is meant in language of the utmost clearness, avoiding the use of any word or expression that seems to admit of another meaning than the one intended. The lawyers have a maxim that the unforced (i.e., the event not provided for) always happens. It is better to be prolix than to leave the smallest room for doubt or uncertainty, although the same name or word be repeated over and over again. Sounding phrases are entirely out of place. Avoid the use of "legal terms," such as "heirs" and "issue," when the same thing may be expressed in plain language. If in writing the will a mistake be made, it is better to rewrite the whole. Before a will is executed, that is, *signed by the testator in presence of two witnesses*, an alteration may be made by striking through the words with a pen, but opposite to such alteration the testator and witnesses should write their names or place their initials. Never scratch out a word with a knife or other instrument, and no alteration of any kind whatever must be made after the will is executed. If the testator afterwards wishes to change the disposition of his estate, it is better to make a new will, revoking the old one, or to add a codicil to the first, which must be duly executed and attested in the same manner as the original will. *A will should be written in ink and very legibly on a single sheet of paper.* Although, of course, forms of wills must vary to suit different cases, the following directions may be found useful to those who, in cases of emergency, are called upon to draw up wills, either for themselves or others:—

TESTATOR OR TESTATRIX.—The person who makes the will is the testator, or if the will-maker be a woman, the testatrix.

ESTATE.—By this word is to be understood property of all kinds, both real and personal. Real property includes tithes and advowsons, as well as freehold land and houses; while personal property includes debts due, arrears of rents, money, leasehold property, house furniture, goods, assurance policies, stock in public companies, and the like.

RESIDUARY LEGATEES.—It is well in all cases to leave to some person or persons "the residue of my estate and effects," although it may be thought that the whole of the property has been disposed of in legacies already mentioned in the will. It should be remembered that a will operates on property acquired after it has been made.

TO BEGIN A WILL.—A form in which a will may be commenced is:—"This is the last will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks."

TO END A WILL.—After disposing of the property, the will may be ended as follows:—"And I revoke all former wills and codicils. Dated this tenth day of December, 1890."

EXECUTION OF A WILL.—The testator should sign his name at the foot or end of the will, in presence of two witnesses, who will immediately sign their names in his and in each other's presence. A person who has been left a legacy or share of residue in the will, or whose wife or husband has been left a legacy, should not be an attesting witness. Their attestation would be good, but they would forfeit the legacy. It is better that a person named as executor should not be a witness. Husband and wife may both be witnesses, provided neither is a legatee. If a

solicitor be appointed executor, it is lawful to direct that his ordinary fees and charges shall be paid; but in this case he (as an interested party) must not be a witness to the will.

ATTESTING EXECUTION.—Opposite to or beneath the testator's signature should be written the attestation clause. The following form of attestation will be found sufficient:—

Signed by the testator [or testatrix, as the case may be], in the presence of us, both present at the same time who in his [or her] presence and in the presence of each other have hereunto set our names as witnesses.

William Jones, of Vine Cottage, Silver Street, Reading, Tailor. Henry Morgan, of North Street, Reading, Esq.

It is desirable that the witnesses should be fully described, as they may possibly be wanted at some future time. If the testator should be too ill to sign, even by a mark, another person may sign the testator's name to the will for him, in his presence and by his direction, and in this case it should be shown that the testator knew the contents of the document. The attestation clause should therefore be worded: "Signed by Thomas Brown, by the direction and in the presence of the testator, Thomas Smith, in the joint presence of us, who thereupon signed our names in his presence and in the presence of each other, the will having been first read over to the testator, who appeared fully to understand the same." If the testator be blind the will should be read aloud to him in the presence of the witnesses, and the fact mentioned in the attestation clause. If by inadvertence the testator should have signed his will without the witnesses being present, then the attestation should be:—"The testator acknowledged his signature already made as his signature to his last will and testament, in the joint presence," &c. Any omission in the observance of these details causes delay and expense, and sometimes great difficulty is experienced in procuring an affidavit by one of the attesting witnesses before the will can be admitted to Probate.

CODICIL.—When any change is required to be made in the disposition of property as stated in the will, the change should be embodied in a codicil. A codicil should begin:—"This is a codicil to the will of me, Thomas Smith, of Vine Cottage, Silver Street, Reading, in the county of Berks, the said will bearing date," &c. A codicil must be dated at the end, and signed and witnessed with exactly the same formalities as the will.

EXECUTORS.—It is usual to appoint two executors, although one is sufficient. The name and address of each executor should be given in full, as follows:—"I appoint John Jones, of number twenty-one, London Street, Ipswich, and Edward Matthews, of number seventeen, Market Street, Lincoln, executors of this my will." An executor may be a legatee. Thus a child or wife to whom the whole or a portion of the estate is left may be appointed sole executor, or one of two executors. The addresses of the executors are not necessary; but it is desirable, here as elsewhere, to avoid ambiguity or vagueness.

APPOINTMENT OF TRUSTEES.—The form of appointment of executors will also serve when the estate is left in care of trustees, except that the persons should be designated "executors and

THOMAS SMITH
[Signature
of
Testator.]

trustees." The Public Trustee may be appointed executor or trustee of a will. See PUBLIC TRUSTEE, *post*.

TRUSTS OF THE WILL.—When the estate is wholly for the children, the will may read, after the appointment of the executors and trustees:—"I give and devise all my estate and effects, real and personal, of which I may die possessed or entitled to, unto the said John Jones and Edward Matthews, upon trust in equal shares for all or any my children or child living at my death who being sons or a son attain the age of 21 years or being daughters or a daughter attain that age or marry. And for all or any the children or child living at my death, who being male attain the age of 21 years or being female attain that age or marry of any child of mine who dies in my lifetime leaving children or a child living at my death, such last-mentioned children or child to take the share or shares which their parent would have taken if living at my death, and so that no grandchild of mine shall take whose parent is living and capable of taking." Where the widow is to have a life-interest use the following words: "upon trust for my wife during her life [or during her widowhood], and after her death for second marriage, which first happens] upon trust in equal shares for all or any my children or child" &c. as before. The words in square brackets will only be used where the widow is to lose her interest if she marries again.

WHO CANNOT MAKE A WILL.—A minor cannot make a will. A woman married before the 1st of January, 1883, can make a will with her husband's consent; but without such consent she can only (under the Married Women's Property Act) bequeath property accruing to her after that date except in certain circumstances, respecting which it is advisable to consult a solicitor. But a woman married after that date can dispose by will of all property belonging to her at the time of her marriage, and of all property acquired thereafter, in all respects as if she were an unmarried woman.

REVOCATION.—A will is revoked by a subsequent will (but only so far as such subsequent will operates as a virtual revocation, as by making other provisions inconsistent with the previous will; for this reason a will should always have a clause revoking previous testamentary dispositions), or by burning, tearing, or otherwise destroying the same. It is not sufficient to obliterate the will with a pen. Marriage in every case acts as the revocation of a will: so that after marriage the old will should be re-acknowledged, or a new one made.

LAPSED LEGACIES.—If a legatee die in the lifetime of the testator, the legacy or share of residue lapses and falls into the residue, excepting only in cases where the legatee is a child or "other issue" of the testator and leaves issue living at the testator's death, and the will does not provide for the class of children or issue being ascertained at some period other than the death of the testator. For instance, if a share of residue is left to "all my children living at my wife's death," the share of a child who died in the wife's lifetime would lapse even though the child should leave issue.

TO ONE PERSON ABSOLUTELY.—When it is the intention to leave all the property to one person, as for instance a wife or child, the will may

read:—"I devise and bequeath all my estate and effects, real and personal, which I may die possessed of or entitled to, unto my wife Mary Smith, absolutely."

TO CHILDREN UNDER AGE.—When estates are left wholly or in part to children under the age of 21 years, trustees should be appointed to hold the property in trust for those to whom it will ultimately belong. The trustees will have power to apply the annual income for their maintenance. A wife may be appointed a trustee, or may be sole trustee. It is also usual to appoint the executors or some near relative, guardians of children under age. By the Guardianship of Infants Act, 1896, the mother of a child, if she survives the father, becomes the guardian of such child, either alone, if no guardian is appointed, or jointly with any guardian appointed by the father.

ALL PROPERTY TO BE INVESTED.—Executors and trustees may be empowered to sell and dispose of an estate, and after the payment of all just debts and expenses to invest the remainder. For this purpose the section headed "Trust Investments" should be consulted.

The stringency of the law as to the due execution of wills is only relaxed in favour of sailors and soldiers while on service. The law of wills is mostly contained in the Wills Act, 1 Vict. c. 27.

DUTIES OF EXECUTORS.—After the death of the testator, the duties of the executor may be stated briefly as follows:—The first duty of the executors, or of one of them, is to see that the funeral takes place in a suitable and becoming way; then to make lists or schedules of the debts and the assets or property. For purposes of duty it is necessary to estimate the value of the real and personal property left, or get it valued. Under the Finance Act, 1894, duties are charged on all property in which the testator had a life interest, even though the property may not have been under his personal control. The executor must take the will to the Probate Registry, Somerset House, or to the Probate Registry of the district in which the testator had a fixed place of abode, or to a solicitor, and prove the will; to collect all the property of the deceased and pay all his just debts, and before distributing the estate, if it be a large one, it is necessary in order to relieve the executors from personal liability to duly advertise in certain London and local newspapers for all claims against the estate to be sent in before a specified date. Pay the legacy on succession duty. Dispose of the residue of the property as directed in the will. By the Land Transfer Act, 1897, all the testator's real estate becomes vested in the executors, who hold the same as trustees for the persons beneficially entitled under the will or otherwise, and such persons can only acquire a title to the estate through the executors, after payment of all charges and liabilities to which the same is subject. Executors are not obliged to act, neither is it necessary that all the executors should act: one alone is competent to prove a will and carry out its provisions. In small estates, probate and letters of administration may be obtained through an Inland Revenue Office.

ADMINISTRATORS.—If an executor has not been appointed in the will, or if the executor be dead, or does not wish to act, the residuary legatee nearest of kin to the deceased, or a legatee under the will, is entitled to act and administer the will, and is called administrator.

WHERE TO FIND A PROVED WILL.

To find a will proved before 1st January, 1858, the date on which the Court of Probate Act, 1857 (20 & 21 Vict. c. 77), came into operation, it is best to search first—if the testator was a man of substance—the index to the wills proved in the Prerogative Court of Canterbury, which is kept at Somerset House. Failing this, the will is probably to be found in the registry of the district in which it was proved. The wills proved prior to 1858 were all distributed among the district registries when these institutions came into existence. This is the only broad rule which can be laid down to guide a searcher. To find a will proved since 1858 is a far simpler task. It must have been proved either at the Principal Registry at Somerset House, or in the registry of the district in which the testator lived. In the former case the original will itself is carefully preserved at Somerset House, the copy of which probate has been granted is in the hands of the executors who proved the will, and another copy for Parliament is bound up in a folio volume of wills made by testators of that initial and date; the indices to these volumes fill a room of considerable size at Somerset House, where the indices may be examined and any will read on payment of a search fee of one shilling. In the latter case, the original will, proved in the District Registry, is there kept, and may be seen or a copy obtained, but a copy is sent to and filed at Somerset House, where also it may be seen. A general index of grants, both probate and administrations, is prepared and printed annually in lexicographical form, and may be seen at either the Principal or a District Registry. This index is usually ready by about June or July of the following year. The reader may not copy any part of the will except the names and addresses of the executors and the date and private number of the will. If he desires a copy, he can order one to be made, for which he will pay according to the length of the will, at the rate of sixpence a folio (ninety words) for an ordinary copy, and ninepence a folio for a certified copy, which, with a shilling stamp impressed thereon, can be produced and read in any court of law. The District Registries established by the Act of 1857 are the following:—

Registry.	Registrar.	District.
Bangor.....	G. H. Reid (£350)	Carnarvon and Anglesey.
Birmingham	W. G. Middleton (£800)	Warwickshire.
Blandford	H. F. C. de Crespigny (£250)	Dorsetshire.
Bodmin ...	W. H. L. Shadwell (£500)	Cornwall.
Bristol.....	John Henry Clark (600)	Bristol & Bath, present County Court Districts.
Bury St. Edmunds	Ronald Southey (£200)	Suffolk, West.
Canterbury	H. Mapleton Chapman (£350)	Kent, East, and Canterbury.
Carlisle ...	W. C. Butler (£700)	Cumberland and Westmoreland.
Carmarthen	W. Morgan Griffiths (£400)	Carmarthen, Cardigan, Pembroke, with the Deaneries of East and West Gower (including the town of Swansea) in the county of Glamorgan.
Chester ...	H. A. Jenner (£800)	Chester.

Registry.	Registrar.	District.
Chichester	W. B. B. Freeland (£200)	Sussex, West.
Derby	C. T. E. Wilde (£600)	Derbyshire.
Durham	W. J. Maynard (£500)	Durham.
Exeter	W. H. Bailey (£1,000)	Devonshire.
Gloucester	R. Fuller (£600)	Gloucestershire (except Bristol County Court Dist.).
Hereford...	H. C. M. Nolan (£400)	Herefordshire, Radnor, and Brecknock.
Ipswich ...	G. Pritchard, B.A. (£450)	Suffolk, East, & Essex, North.
Lancaster	Baldwin Adams (£700)	Co. of Lancs, except the Hundreds of Salford and West Derby, and the City of Manchester.
Leicester...	H. Pickering Clarke (£500)	Leicester and Rutland.
Lewes	J. W. Heisch (£350)	Sussex, East.
Lichfield...	H. G. Faussett-Osborne (£800)	Staffordshire.
Lincoln ...	G. L. Simpson (£500)	Lincolnshire.
Liverpool	J. C. Bromfield (£750)	W. Derby Hund. (Glamorgan, except Deaneries of E. and W. Gower), Monmouth.
Llandaff ...	Charles H. Wilkinson (£350)	City of Manchester and Hundred of Salford.
Manchester	R. S. O. Mairs (£800)	Northumberland, and Beds.
Newcastle-on-Tyne	H. E. Edwards (£500)	Northants, S'th, and Beds.
N'thampton	C. C. Becke (£250)	Norfolk.
Norwich ...	L. D. Powles (£700)	N'tinghamshire.
Nottingham	Dr. F. Oswald (£400)	Oxon, Berks, and Bucks.
Oxford	T. M. Davenport (£500)	Northants, N'th, Hunts, & Cambs.
Peterboro'	C. S. Magee (£400)	Flint, Denbigh, & Merioneth.
St. Asaph	J. P. Lewis (£350)	Wiltshire.
Salisbury...	H. Elliott Fox (£350)	Salop and Montgomery.
Shrewsbury	R. K. A. Green (£500)	Somerset, West.
Taunton ...	E. T. Alms (£250)	Yorks, West Riding.
Wakefield	G. Bridgeman (£1,200)	Somerset, East, except Bath & G. District.
Wells	O. F. Engleheart (£300)	Hampshire.
Winchester	C. Woodbridge (£500)	Worcestershire.
Worcester	G. F. Adams (£500)	Yorks, N. & E. Riding (including York).
York	H. A. Hudson (£1,000)	

SAFE CUSTODY OF WILLS.

There is a depository for the safe custody of the Wills of *living persons* at Somerset House. Since 1857 this depository has been provided by the State under sect. 91 of the Act 20 & 21 Vict. c. 77; but the provision has been almost a dead-letter. A will may be deposited through the Registrar of a District Registry, who will transmit the will to London in a registered letter on receiving a fee of 10s. for the deposit, of 2s. 6d. for entering a minute thereof, and 2s. for filing the affidavit which is required. A will once deposited will not be given up to anybody, but must remain in the registry until the testator dies, unless he goes to the registry with the original minute of deposit and other proof of his identity, and destroys his will in the presence of the Registrar. (See also PUBLIC TRUSTEE, *post*.)

TRUST FUNDS AND INVESTMENTS.

BY RULE OF THE SUPREME COURT, DATED NOVEMBER, 1882, trustees may invest trust funds in the following securities:—

2½ per Cent. Consols; to be reduced, 5th April, 1903, to 2½ per cent. Consols and Reduced 3 per Cent. Annuities. 2½ per Cent. and 2½ per Cent. Annuities. Exchequer Bills. Bank Stock. India 3½ per Cent. and 3 per Cent. Stocks. Indian Guaranteed Railway Securities. Colonial Government Stocks guaranteed by Imperial Government. Mortgage of freehold or copyhold estates in England or Wales. 3 and 3½ per Cent. Metropolitan Consolidated Stock.

Debenture, preference, guaranteed, or rent-charge stocks of railways in Great Britain or Ireland having for ten years next before the date of investment paid a dividend on ordinary stock or shares.

Nominal stocks or nominal debenture stocks issued under the Local Loans Act, 1875, provided in each case that such stocks shall not be liable to be redeemed within a period of fifteen years from the date of investment.

Local Loans Stock under the National Debt and Local Loans Act, 1887.

THE RULE OF COURT OF NOVEMBER, 1883, will be little referred to now that all the foregoing items in more extensive, and in some cases slightly different, language, are authorized by the Trustee Act, 1893, the more important clauses of which, especially where the Rule of Court is varied, may be summarized as follows:—This Act, which consolidates the enactments relating to trustees, authorizes mortgages on freeholds, or property equivalent to freehold, not only in England and Wales, but also (where not prohibited) in Ireland and Scotland. A very few leaseholds, viz., terms of 200 years, at a nominal rent, are also authorized by the Trustee Act, 1893.

THIS ACT ALSO AUTHORIZES investments by trustees upon any securities guaranteed by Parliament, and these include the following:—Certain Colonial Government stocks, the Turkish Loan of 1855, the Egyptian 3 per cent. Guaranteed Loan, and one or two others. In addition to Metropolitan Stock, any stocks of the London County Council are now authorized; also any Corporation or Municipal stocks of the cities or boroughs (about 60 in number) having at the last census a population exceeding 50,000. Also stocks, &c., under certain conditions, of waterworks companies and of water commissioners. Another very important addition to the list of trust securities is this: Preference, debenture, guaranteed, or rent-charge stocks of British railway companies which have paid 3 per cent. on their ordinary stocks for ten years. This includes all the great lines in England, Ireland, and Scotland, except a few, e.g., the Great Eastern, and Chatham and Dover, which have not, for the whole period of ten years, paid regular dividends to their ordinary shareholders.

THE ACT FURTHER AUTHORIZES trust investments in certain Indian Railways guaranteed by the Indian Government, which can be found on reference to the Stock Exchange official lists. But with regard to the entire list, a trustee cannot invest in anything which is (directly or by implication) prohibited by the terms of his trust.

THE PUBLIC TRUSTEE.

This Government Office, by which the State acts as Executor and as Trustee under a Will or as Trustee under Settlements and in other capacities of the like nature, as to which we have given full information in former editions, has proved a complete success. The capital value of the present and future estates, which have been placed in the care of the Public Trustee, amounts to a total of some £26,000,000, and the office is still growing daily.

The public, both rich and poor, in all parts of the country, are availing themselves of the protection and advantages afforded by the office. The methods of the Department dispense with forms as much as possible, and the business is conducted in a prompt and business-like way. The facts of any trust, new or old, in which it is desired the Public Trustee should take office, may be brought to his notice by letter or by personal interview. Upon his giving his consent to act, his appointment may be effected in the same simple way as that of a private trustee. Concurrently with his appointment, the trust estate is transferred by the appropriate means of conveyance.

In the case of a Will about to be made, the appointment may be effected with even greater simplicity. All that the testator need say is, "I appoint the Public Trustee executor and trustee of this my Will," or the appointment may be a joint one with personal friends or relations of the testator.

The great advantages of the Department are that it supplies a permanent trustee who will never die, and thereby saves the expense of fresh appointments. He will never be ill or unable to attend to business. He will never go abroad nor can he ever abscond with the trust funds, as his integrity is guaranteed by the State.

In addition to these advantages he makes a special feature of investments. The large funds placed in his care, and his official position, give him a special advantage in this respect, and he conceives it to be his duty, not only to see that the trust estate is properly invested, but to maintain it in that condition.

The Public Trustee is not limited in his powers of investment to trustee securities, and in practice, wherever possible, he appears to follow the sound policy of spreading his investments as much as possible geographically, so that the risk of any loss of capital or income to a trust estate is greatly diminished and the stability of both capital and income assured. He appears to be very successful in his investments, getting as much as 4 per cent. and over upon funds in his custody.

The Public Trustee also makes a great feature of giving the personal attention of himself and his senior officials to the human and personal details of the trust estates committed to his care; e.g., provision has been made for infirm people, schools chosen for children, careers considered for boys and girls, holidays arranged, and every need of this nature receives careful and prompt attention. The permanent success of the Office is assured, and there is every indication that the forecast of its career is likely to be correct, that it will probably become one of the largest departments of the State.

A special form of trusteeship—that of Custodian Trustee—was also provided by the Act of Parliament, it being intended thereby to set up a trustee who would take care of the capital and income of a trust only and ensure the integrity of

the estate, while leaving the personal management of the trust to personal trustees. The scheme, however, has proved a failure and is not adopted in practice. The public evidently prefer that, given an efficient and businesslike trustee, such as the Public Trustee, he should be a full ordinary trustee and thereby give the full benefit of his skill and experience especially in the direction of investments, rather than a mere silent custodian.

Special provision is also made under the Act of Parliament for the cheap and simple administration of estates having a value of £1,000 and under, called "Small Estates" by the Statute. There is no specially low rate of fee for these small estates, as experience showed that the ordinary fees were extremely small and a further reduction was not warranted. These small estates, however, have the advantage of an economic administration in that the Public Trustee is given direct access to the Court without formality and has all the powers of a Master of the High Court acting in the administration of an estate.

Another very valuable power given to the Public Trustee is that of being able to direct the audit and investigation of the condition and accounts of any trust. This provision is proving a valuable protection to any anxious trustee or beneficiary. The expense of the audit is in the discretion of the Public Trustee, and may fall upon the estate, the applicant, or upon the trustees, if meriting such an award.

The fees are conceived upon a very moderate scale, but in a great number of cases the advantages which the Public Trustee possesses as to investment appear to enable him to obliterate his charges wholly or partly by improving the investments both as to capital and income.

A low rate of fee was moreover determined upon so as to permit the expense of legal and local assistance, by agents in certain cases in the provinces, being incurred without increasing unduly the expense of administration. The Department does not disturb any existing practice in the trust as to the employment of any brokers, bankers, or solicitors.

The Public Trustee is not allowed to work for a profit, but merely to pay expenses.

The principal fees are of two kinds—a fee on capital and a fee on income. The fee on capital is taken in two instalments, half at the beginning and half at the end of a trust, such half ranging as follows:—

On the first £1,000, 15s. per cent.

On the excess of £1,000 to £20,000, 5s. per cent.

On the excess of £20,000 to £50,000, 2s. 6d. per cent.

On the excess of £50,000, 1s. 3d. per cent.

The fee on income is 1 per cent., if, as is usual, the income be paid direct to the person entitled, otherwise 2 per cent. up to £500 a year, and 1 per cent. on any excess of £500 a year. The fee on investment, if and when incurred, is ½ per cent., which includes the cost of brokerage. There is power to vary these fees to meet the peculiar circumstances of special cases, but, owing to the low range of the fees, the power of reduction is probably but seldom exercised.

An interview with the Public Trustee or with either of his principal clerks can be readily arranged by letter or telephone, and a pamphlet giving full information can be obtained post free on application to 3 & 4, Clement's Inn, Strand, W.C., or at any Post Office.

The staff, which at the opening of the Office on the 1st January, 1908, numbered 5 men, now numbers 100. The principal officers are given below:—

The Public Trustee, Charles John Stewart.

Principal Clerks, E. K. Allen; L. J. Fulton.

Principal in Charge of Investment, L. W. Thomas.

General Office, S. A. Poynder; H. M. Wallace; R. S. Shuckburgh; J. H. Jacob; H. B. Jackson; A. C. Pearce; A. G. Mears; R. T. Hughes; R. de C. Bower; E. C. Groves; J. F. Gore; C. E. Seton; W. C. McMillan; M. Limb.

Securities Office, H. Chown; A. J. H. Hughes; T. R. Alston.

Accountant, H. J. J. Freeman.

Assistant Accountant, A. F. Day.

Cashier, A. H. Cobbett.

Children's Visitor, Miss Beattie.

Chief Superintendents of Shorthand Typists,

Miss Rees; Miss Winder.

Telephone Nos., 27 Central and 2228 Central.

Office Hours, 10 to 4; Saturday, 10 to 1.

THE WORLD'S PRODUCTION OF GOLD AND SILVER, 1899-1908.

YEAR.	BRITISH EMPIRE.		OTHER COUNTRIES.		TOTAL.	
	Gold.	Silver.	Gold.	Silver.	Gold.	Silver.
1899	£38,706,000	£5,539,000	£26,360,000	£46,407,000	£65,066,000	£51,946,000
1900	25,302,000	5,522,000	27,319,000	43,687,000	52,621,000	54,212,000
1901	24,981,000	4,785,000	29,447,000	47,198,000	54,428,000	51,983,000
1902	31,654,000	4,244,000	29,606,000	44,506,000	61,260,000	48,750,000
1903	37,803,000	4,139,000	28,092,000	45,533,000	65,895,000	50,672,000
1904	40,386,000	5,540,000	29,432,000	48,646,000	69,818,000	54,186,000
1905	45,097,000	6,094,000	30,830,000	50,243,000	75,927,000	56,437,000
1906	49,694,000	6,015,000	35,648,000	48,396,000	85,242,000	58,021,000
1907	50,630,000	9,327,000	34,319,000	45,793,000	84,949,000	54,520,000
1908	53,554,000	12,055,000	37,946,000	47,599,000	91,509,000	59,574,000
Totals ...	£397,807,000	£63,892,000	£308,999,000	£473,508,000	£706,806,000	£547,400,000

The figures given in the above table are based mainly on Returns prepared by the Director of the United States Mint and on those contained in "The Mineral Industry," published by the *Engineering and Mining Journal*.

Gold has been valued in the table at the legal rate of £3 17s. 10½d. per troy ounce standard, and silver at its *winning* value in this country, namely 5s. 6d. per troy ounce standard.

PERSONAL PROPERTY, INCLUDING LEASEHOLDS.

TABLE of Succession applicable to England and Scotland, and showing persons entitled to administer.

The persons entitled to administer are shown in brackets.

IN EACH INSTANCE IT IS SUPPOSED THERE ARE NO NEARER RELATIONS THAN THOSE NAMED.

[* Where this is prefixed the Regulation applies to Scotland only.]

By the Intestates' Estates Act, 1896, a very important change was made in the law as regards provision for widows of men dying intestate and without issue. Under this Act the widow in such a case is entitled to the whole estate both real and personal if under £500 in value; if over that amount she takes £500 out of the real and personal estate rateably before any division is made, and after that the share in the remainder to which she was entitled before the passing of the Act.

*If the Intestate die, leaving**His representatives take in the proportions following:—*

Widow only.....	Half to widow. Half to the Crown. [Widow.] One-third to widow, two-thirds to children in equal shares. In case of deceased children who have left issue, such issue take amongst them their deceased parent's share. [Widow.]
Widow and child or children	*One-third to widow. One-third to living children in equal shares (but the heir must collate the heritable estate, and those children who have been advanced by intestate during life must collate the advances). One-third amongst living children <i>per capita</i> and issue of deceased children <i>per stirpes</i> . See NOTE A, next page.
Widow and father.....	Half to widow. Half to father. [Widow.]
Widow and mother, no father	Half to widow. Half to mother. [Widow.] *Half to widow, one-sixth to mother. Two-sixths to Crown.
Widow, brothers or sisters	Half to widow. Half equally amongst brothers and sisters, whether of the whole or half blood; if a deceased brother or sister has left issue, such issue take amongst them their deceased parent's share. [Widow.]
Widow, mother, nephews or nieces	Half to widow. One-fourth to mother. One-fourth to nephews and nieces <i>per stirpes</i> . [Widow.]
Husband, with or without children	*Half to widow. One-sixth to mother, two-sixths to nephews and nieces <i>per stirpes</i> . All to husband. [Husband.]
Father, brothers, and sisters	*Half to husband. Half to wife's next-of-kin. [Husband.] All to father. [Father.]
Mother, brothers, and sisters	*One-half to father. One-half equally amongst brothers and sisters. All equally. [Mother.]
Mother, but no other kin	*Mother one-third. Brothers and sisters two-thirds equally. All to mother. [Mother.]
Child, children, or grandchildren by deceased child	*One-third to mother. Two-thirds to the Crown. Amongst children in equal shares, the grandchildren by deceased children taking amongst them their deceased parent's share. [Any number of children not exceeding three.]
Brother or sister, and nephews or nieces	Amongst brothers or sisters in equal shares, the children of deceased brothers or sisters taking amongst them their deceased parent's share. [Brother or sister.]
Brother or sister, and grandfather.....	All to brother or sister. [Brother or sister.]
Brother or sister, and uncles or aunts	All to brother or sister. [Brother or sister.]
Grandfather, no nearer relation	All to grandfather. [Grandfather.]
Father's father, and mother's mother	Equally to both. [Either or both.]
Grandmother, uncles, and aunts	All to grandmother. [Grandmother.]
Great-grandfather, uncles, and aunts	*All to uncles and aunts if paternal. Equally <i>per capita</i> . [To either or any number not exceeding three.]
Uncles and aunts	All equally. [To either or any number not exceeding three.]

Uncle, and deceased uncle's child	All to uncle. [Uncle.]
Uncle by mother's side, and deceased uncle or aunt's child	All to uncle. [Uncle.]
Aunts, nephew, and niece	*Child of deceased paternal uncle or aunt takes in exclusion of maternal uncle.
Cousins	All equally. [Either not exceeding three.]
Nephew by brother, and nephew by half-sister...	*Nephew and niece.
	Equally <i>per capita</i> . [Any number not exceeding three.]
	Equally <i>per capita</i> . [Any number not exceeding three.]
	*All to nephew by brother.

NOTE A.—Taking *per capita* is taking by head individually. Taking *per stirpes* is taking by descent or representation. Thus, if A. die leaving three brothers or sisters, and no nearer kin, they each take an equal part of his personal estate in his or her own right, *i.e.*, *per capita*. If there are also children of a deceased brother or sister they share in the estate by taking amongst them the share which their deceased parent would have taken had he or she survived, *i.e.*, *per stirpes*.

NOTE B.—By English Law, brothers and sisters of the half blood share equally with the whole blood. By the Scottish Law, brothers and sisters german (that is, by the same father and mother) and their issue take in exclusion of brothers and sisters consanguinean (that is, by the same father only) and their issue. And brothers and sisters consanguinean and their issue take in exclusion of brothers and sisters uterine (that is, by the same mother only) and their issue.

NOTE C.—Posthumous children take equally with those born in the lifetime of their father.

Intestates' Estates—Real Property.

(N.B.—Leaseholds are Personal Property.)

TABLE of Descent of Real Property in England on death of an intestate. No illegitimate child is capable of inheriting real estate. Custom of Gavelkind (descent to all sons alike) still exists in Kent, and custom of Borough English (descent to youngest son) in divers ancient boroughs. The Dower (*viz.*, widow's thirds) of widows married since 1833 is in the majority of cases barred.

In each instance it is supposed that there are no nearer relations than those named.

If Intestate die, leaving

	Real Property would descend to—
Wife only, no blood relations	One-third to wife for life, rest to Crown; copyholds to lord of manor.
Wife and child or children, and children of a deceased child	One-third to wife for life in any case. Rest to eldest son or his issue, such son and his issue, whether male or female, being preferred to any other son and his issue, and all sons and their issue, whether male or female, being preferred to all daughters and their issue, whether male or female. If no son, rest to daughters equally. If daughters and grandchildren (sons and daughters of deceased daughter), rest to daughters and eldest son of deceased daughter.
Wife and father	One-third to wife for life; rest to father, if deceased purchased same, or had it left him by will.
Wife and mother	One-third to wife for life; rest to mother, there being no heirs on father's side.
Wife, brother, or sister, and children of a deceased brother or sister	One-third to wife for life in any case, rest to eldest brother or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Sister and children of deceased sister, rest equally between sister and nephew (eldest). Sisters and nieces, only, children of deceased sister, rest equally between sisters and nieces, nieces taking <i>per stirpes</i> .
Wife, mother, nephews, and nieces	One-third to wife for life; rest to nephew (eldest), or nieces, if brother left no son.
Wife, mother, brother, sisters, and nieces (children of deceased brothers and sisters)	One-third to wife for life in any case; rest to eldest brother. Rest to nieces, equally, if children of elder brother deceased.
No wife or child or issue of a deceased child	Lineal ancestor paternal, males of whole blood first.
Children by one or more wives, and the issue of deceased children	All to eldest son, or his issue. (See above, "Rest to eldest son or his issue," under head "Wife and child," &c.) Daughters equally.
Husband and child or children ...	Husband for life; afterwards to only child or to eldest son or issue of a deceased eldest son. If all daughters, to them equally.
Mother, but no wife, child, or issue of a child, father, brother, sister, nephew, or niece, or more distant descendants of father...	All to mother in default of lineal ancestors on the father's side, or issue of such ancestors.
Mother, and brothers and sisters	All to eldest brother.

Mother and sisters	All to sisters.
Father, and brothers and sisters	All to father.
Child and grandchild by deceased child	See above, "Rest to eldest son or his issue," under head "Wife and child," &c.
Brother and grandfather	All to brother.
Brother's grandson, and brother or sister's daughter	All to great-nephew, if eldest brother's grandson.
Brother and two aunts	All to brother's daughter, if child of eldest brother.
Brother and wife	Brother, all.
Grandfather (no nearer)	One-third to wife for life; rest to brother.
Father's father & mother's mother	All to grandfather.
Grandmother & uncle, or aunt on father's side (no nearer)	All to father's father.
Uncle, and deceased uncle's child	All to uncle or aunt.
Uncle by mother's side, and deceased uncle or aunt's child ..	Uncle, unless deceased uncle was elder brother, when his child takes all.
Two aunts, nephew, and niece, children of deceased brother ..	Child of deceased uncle on father's side, or (if none) child of deceased aunt on father's side.
Uncle or aunt's children, and brother's grandchildren through a son	Nephew.
Nephew by brother, and nephew by half-sister	Eldest brother's grandson, or if granddaughters between them equally.
Nephew by deceased brother, and nephews and nieces by deceased sister	Nephew by brother.
	All to eldest nephew, son of deceased brother.

NOTE A.—By the Land Transfer Act, 1897, the real estate of a deceased person devolves to the personal representative of the deceased, and probate and letters of administration may be granted in respect of real estate only, although there is no personal estate. The ultimate ownership of real estate is not affected by these provisions, which are for the convenience of administration. As to the persons entitled to administration of real estate, they are substantially the same as in the case of personal estate; but the Court shall, in granting letters of administration, have regard to the rights and interests of persons interested in the real estate, and the heir-at-law, if not one of the next-of-kin, shall be equally entitled to the grant with the next-of-kin.

INSTRUCTIONS FOR OBTAINING PROBATE OR ADMINISTRATION WITHOUT EMPLOYING A SOLICITOR.

THE entrance to the office for personal applications is in the south-east corner of the Quadrangle of Somerset House, Strand, Room 37. The applicant should bring the registrar's certificate of the death of the deceased, or an official certificate of burial, and the will, if there be one, and full details of the property and debts of the deceased.

If there be no will or no executor be appointed, or the executor will not act, two sureties must also attend and enter into a bond for the faithful administration of the estate, unless the whole personal estate does not exceed £50, or the husband is the applicant, when one surety only will be required.

The scale of probate duty as at present

in force will be found in detail on page 374.

In no case can any correspondence be entered into; nor can an interview be given to any agent. The business of the department can be transacted only with the applicant in person.

Where the deceased resided within the district of one of the District Probate Registries (see Appendix), application may be made at that registry instead of at Somerset House.

Where the whole real and personal estate, without the deduction of debts or funeral expenses, does not exceed £500, application may be made at one of the Inland Revenue Offices.

Where the deceased has left no will, and the whole personal estate does not exceed £100, and the widow resides at more than three miles from any Probate Registry, application may be made to the Registrar of the County Court.

COMPANIES ACT, 1862.

FEES TO BE PAID BY STAMPS.

On registration, with a capital of £2,000, £2; £3,000, £3; £4,000, £4; £5,000, £5.
Five shillings extra per £1,000 above £5,000 up to £100,000; 1s. extra per £1,000 above £100,000; but no fee higher than £50.

Deed stamp 10s. to be put both upon Memorandum and Articles of Association.

Fees on Registration of Mortgage 10s. up to £500, £1 above £500.

For ad valorem stamp on capital see p. 373.

Hours at Somerset House.

Inland Revenue Office, 10 to 5. No money received after 4 (Saturdays, 1).

BANK HOLIDAYS.

ENGLAND AND IRELAND.—Banks of England and Ireland, and the Exchequer: Good Friday, Easter Monday, Whit Monday, First Monday in August, Christmas Day and December 26 or 27 (as the case may be). The Stock Exchange, in addition to the Bank holidays, is also closed on Jan. 1, May 1 and November 1. And special Bank Holiday for Ireland, March 17.

SCOTLAND.—New Year's Day, Good Friday, First Monday in May, First Monday in August, and Christmas Day.

SCOTLAND has also special Quarter Term Days (see p. 34), and there are special holidays in Edinburgh (see pp. 30, 50), and Glasgow (see p. 42).

Voters' Qualifications.

I. PARLIAMENTARY ELECTIONS.

1. PROPERTY.

A. England.

i. Freehold Estate of clear yearly value of forty shillings, if owned in fee simple or fee tail, or in occupation, or acquired by marriage, marriage settlement, devise or promotion to a peer or office.

ii. Lands of any tenure, of £5 clear yearly value, held for life.

iii. Leasehold

a. of £5 clear yearly value, original term being not less than sixty years.

b. of £50 clear yearly value, original term being not less than twenty years.

B. Scotland.

i. Lands and heritages in proprietorship of £5 yearly value as appearing in the valuation roll.

ii. Leasehold.

a. of £10 clear yearly value, original term, being not less than fifty-seven years or for life.

b. of £50 clear yearly value, original term being not less than nineteen years.

C. Ireland.

i. Freehold of £5 net annual value.

ii. Rent charges or leases for life or lives of £10 clear yearly value.

iii. Leasehold.

a. of £10 clear yearly value, original term being not less than sixty years.

b. of £50 clear yearly value, original term being not less than fourteen years.

N.B.—The Property Qualification is confined to Counties and to Boroughs which are Counties Corporate.

MISCELLANEOUS.

Mortgagee. A mortgagor in possession is entitled to vote, but the mortgagee becomes entitled on taking possession.

Trusts. The beneficiary, not the trustee, has the vote.

Joint Owners. Only one may now vote, unless they were all entitled to vote in 1884, or their interests were derived by succession, or they are partners in business on the land owned by them.

Freeholds. Two or more freeholds may be joined to make up the requisite value.

Property in Boroughs. Property situate in a borough, such as would give a vote for the borough, will not give one for the county unless the freeholder be disqualified for the borough vote by non-occupation.

Leaseholds. A lessee who has sublet does not lose his right to vote; but a lessee who has assigned loses the right. To be entitled to a vote, a sub-lessee or assignee of a sublease must be in actual occupation.

2. OCCUPATION

for twelve months, before registration of lands or tenements within a county or borough, entitled the occupier to a vote. This qualification is uniform throughout the United Kingdom.

"Occupier" means one who uses the premises either as a dwelling house or place of business. Continuous occupation is unnecessary, provided the occupier has the exclusive right to occupy. He or some other person must have been during twelve months voted to the poor in respect of the premises, and all poor rates made and allowed during the twelve months preceding January 5th paid on or before July 20th.

Residence required. In English and Scotch counties, and in Ireland, none, but in English boroughs there must be residence during six months of the qualifying year (four months being allowed for absence on duty or employment); in Scotch Boroughs during the whole year in or within seven miles of the borough.

£50 Rental Franchise. This qualification, resting on the occupation of land in counties at a yearly rent of not less than £50, is now virtually obsolete, but persons registered in 1884 with this qualification are entitled to be re-registered from time to time, so long as they retain it.

Service Franchise. Lodgers, licensees and servants do not enjoy the occupation Franchise, as they are neither owners nor tenants, but a servant if allowed to occupy land (only in counties) as a reward for service may be a tenant and therefore entitled.

N.B.—Occupation Qualification extends to any part of a house separately occupied.

3. RESIDENCE.

This Household Qualification is given to the "inhabitant occupier" throughout the United Kingdom (whether he occupies as owner, as tenant, or in virtue of any office, &c.) of a dwelling house (including flats and residential chambers), or any part of a house occupied as a separate dwelling, which has been rated, and for which rates have been paid by a certain date. There need not be actual inhabitancy, but there must be an intention of returning after a temporary absence, and a power of doing so without a breach of a legal obligation. So an undergraduate occupying college rooms from which he is excluded during vacation is not entitled to vote, nor a soldier occupying rooms from which he is required to be absent from time to time on duty.

In calculating the twelve months, a period not exceeding four months may be counted during which the house has been occupied and furnished by some one else, or during which the inhabitant occupier has been absent on duty in connection with any office, employment, &c.

Occupation in immediate succession of different premises in the same parliamentary county or borough is equivalent to continued occupation of the same premises during the qualifying period.

N.B.—This rule applies both to occupation and Residence.

4. LODGERS.

This qualification belongs to anyone in the United Kingdom who has resided in the same lodgings for twelve months next preceding July 15th, such lodgings being of the clear yearly value, unfurnished, of £10. The Lodger is not disqualified because he has occupied different lodgings of the requisite value in the same house, nor because he occupies them jointly with another lodger, if the aggregate value is sufficient.

5 FREEMEN.

Reform Act, 1832, left the franchise to freemen of towns in which, prior to 1832, such qualification gave a right to vote, but only to those who have acquired freedom by birth or servitude, and who, during the year preceding claim, have resided in or within seven miles of the town.

In the City of London a freeman, to obtain a vote, must also be a Liveryman of one of the City Companies. He may also acquire freedom by purchase. He must reside within 25 miles of the place of poll.

6. THE UNIVERSITIES.

Graduates on electoral roll of Oxford, Cambridge, Dublin, and London, the Chancellor, the Professors, the members of the University Court and General Council of Edinburgh, Glasgow, St. Andrews and Aberdeen, are qualified to vote for their respective Universities.

Registration.

i. Property Voter must claim in order to get on to the Register, but once there he need not make a fresh claim. He must have been in possession, or receipt of rents, in case of freeholds for six, leaseholds for twelve calendar months prior to July 15th in the year in which they claim to be registered. This is not necessary where the qualifying property is freehold, and has been acquired by marriage, marriage settlement, etc.

ii. Occupiers need not claim at all, unless omitted by the Overseers, whose duty it is to register their names.

iii. The Lodger Voter has to claim afresh every year.

Claims for the Old Lodgers' List must be sent in by July 25th, all other new claims by August 20th. The Register, when made up, comes into force on the ensuing January 1st, unless accelerated by special legislation.

Disqualifications.

Aliens, idiots, lunatics (except during lucid interval), infants, peers (except Irish actually elected and serving in the House of Commons), convicted felons (until freed by pardon or otherwise), persons convicted of corrupt practices, either at Parliamentary or Municipal Elections (seven years from date of conviction), and School Board Elections (six years from date of election), persons convicted of illegal practices at Parliamentary and Municipal Elections (five years from date of conviction), persons employed at elections, or within six months before, for pay or reward, bankrupts, persons in receipt of parochial or other relief, persons with fictitious or collusive qualifications (e.g., *fagot voters*), corporations, returning officers (unless the votes are equal), corporations, and women.

II. MUNICIPAL AND COUNTY COUNCIL ELECTIONS (ENGLAND AND WALES).

A. CITY OF LONDON.

1. Election of Lord Mayor, Sheriffs, and Chamberlain.

The Electors are Liverymen.

2. Election of Aldermen, Common Councilmen, and Ward Officers.

The Electors are (a) Freemen occupying

premises in the city, and rated in that respect at not less than £20 per annum. (b) Male persons who have occupied for twelve months premises in the city, and are similarly rated. (c) Persons registered as Parliamentary Electors for the city by virtue of the borough occupation franchise. (d) Persons otherwise entitled to be registered as Parliamentary Electors for the city, but disqualified by non-residence.

B. OTHER BOROUGHES AND COUNTIES.

1. Election of Mayor or Chairman.

The Electors are the Councillors or County Councillors.

2. Election of Aldermen or County Aldermen.

The Electors are the Councillors or County Councillors.

3. Election of Elective Auditors.

The Electors are the Burgesses. This, however, does not apply to County Councils, whose accounts are audited by district auditors appointed by the Local Government Board.

4. Election of Councillors or County Councillors.

The County Electors, together with the burgesses of every borough within the county, form the Electorate for the County Council. A qualification which in a Municipal Borough would entitle a person to be a Burgess will, if held in a county, entitle him to be a County Elector.

The Municipal Franchise differs from the Parliamentary Borough Franchise in two important particulars—

a. The Franchise is, except in case of land, irrespective of the value of premises occupied.

b. Women may vote.

The qualifications are—

i. Occupation in the borough of a building of any value, or of land of the clear yearly value of £10.

ii. Residence in or within seven miles of the borough.

iii. Being rated and paying rates.

There are two additional qualifications for the County Franchise—

i. Being a peer owning property in the county.

ii. Being registered as an ownership voter for Parliament in a county.

Disqualifications.—These are the same as in the case of Parliamentary Electors, except that peers, women, bankrupts, and persons with fictitious qualifications are not disqualified. Women may not vote in the City of London.

III. PARISH COUNCILS ELECTIONS (ENGLAND AND WALES).

The Electors are the "Parochial Electors," i.e., those persons registered in such portion, either of the Local Government Register (*see II.*), or the Parliamentary Register (*see I.*) of Electors, as relates to the parish.

N.B.—A woman is not disqualified by marriage from being on any Local Government Register of Electors, but husband and wife cannot both be qualified in respect of the same property.

IV. DISTRICT COUNTY ELECTIONS.

URBAN AND RURAL (ENGLAND AND WALES).

The Electors are the "Parochial Electors" of the parishes in the district.

V. LONDON BOROUGH COUNCILS.

The Mayor is elected by the Council, the Aldermen by the Councillors, and the Councillors by the "Parochial Electors."

CANDIDATES' QUALIFICATIONS.

I. PARLIAMENTARY ELECTIONS.

The following are not eligible: Aliens, women, minors, lunatics, English and Scotch peers, Irish representative peers, judges, the holders of various offices, clergy of the Established Church, and of the Roman Catholic Church, and ministers of the Church of Scotland, Government contractors, persons holding pensions of the Crown (other than diplomatic and civil service), convicted felons, and bankrupts.

II. MUNICIPAL AND COUNTY COUNCIL ELECTIONS.

1. Mayor or Chairman must be chosen from the Aldermen or Councillors, or persons qualified to be such.

2. Aldermen must be Councillors or persons qualified to be such.

3. Elective Auditors must be qualified to be Councillors, but not members of the Council, town clerk, or treasurer.

3. Councillors must be, and entitled to be, burgesses, resident within seven miles of the borough, or within fifteen miles, if they possess a property qualification of £1,000, or the persons qualified to elect to the office of Councillor.

Disqualifications.—Officers on the active list, bankrupts, and persons convicted of crime or corrupt or illegal practices are disqualified. A person is disqualified if and while he is an elective auditor, or revising assessor, or holds any office of profit other than that of Mayor or Sheriff, or is interested in any contract or employment with or on behalf of the Council. A woman is not disqualified by sex or marriage from being elected a Councillor or Alderman of any County or Borough Council.

N.B.—Clerks in holy orders, and other ministers of religion, are qualified for election as County but not Borough (except London Borough) Councillors or Aldermen.

III. PARISH COUNCIL ELECTIONS.

Persons eligible are: "Parochial electors," or persons who have resided during the whole twelve months preceding the election in or within three miles of the parish. Persons may be disqualified by receipt of parochial relief, bankruptcy, crime, tenure of a paid office under the Council, or pecuniary interest. Women, married and unmarried, are eligible.

IV. DISTRICT COUNCIL ELECTIONS. (URBAN AND RURAL.)

1. *Urban.*—In urban districts, which are boroughs, the Municipal Council is the District Council. Elsewhere, the Urban District Councillors must be either "parochial electors" of some parish within the district, or persons who have, during the whole twelve months preceding the election, resided in the district.

2. *Rural.*—The District Councillors must be either "parochial electors" of some parish with a union, comprising the district, or persons who have, during the whole twelve months preceding the election, resided in the union, or, if the parish be wholly or partly situate within the area of a county borough or other borough, is qualified to be elected as a Councillor for that borough.

Disqualifications are the same as in III.

V. LONDON BOROUGH COUNCIL ELECTIONS.

A person is not qualified to be elected a Borough Councillor unless he—

1. is a Borough Elector of the borough;

2. has, during the whole twelve calendar months preceding the elections, resided in the borough.

The qualifications for Mayor and Borough Alderman are the same as those given in II., 1 and 2.

Women are not disqualified by sex or marriage. Otherwise the disqualifications are the same as in III.

Regulations respecting Passports.

1. APPLICATIONS for Foreign Office Passports must be made in the form printed on the back of the Regulations (to be had on application), and inclosed in a cover addressed to "The Passport Department, Foreign Office, London, S.W." They must reach the Foreign Office before 5 p.m. on the day prior to that on which the Passport is to be issued.

2. The charge for a Passport, whatever number of persons may be named in it, is 2s. Passports are issued at the Foreign Office, between the hours of 11 and 4 on the day following that on which the application for the Passport has been received, except on Sundays and Public Holidays, when the Passport Office is closed. If the applicant does not reside in London, the Passport may be sent by post, and a Postal Order for 2s. should in that case accompany the application. *Postage stamps will not be received in payment.*

3. Foreign Office Passports are granted (1) to natural-born British subjects, viz., persons born within His Majesty's dominions, and to persons born abroad who derive British nationality from a father or paternal grandfather born within His Majesty's dominions, and who, under the provisions of the Acts 4 George II., cap. 21, and 13 George III., cap. 21, are to be adjudged and taken to be natural-born British subjects; (2) to the wives and widows of such persons; and (3) to persons naturalised in the United Kingdom, in the British Colonies, or in India.

A married woman is deemed to be a subject of the State of which her husband is for the time being a subject.

4. Passports are granted to such persons as are known to the Secretary of State, or recommended to him by some person who is known to him, or (1) in the case of natural-born British subjects and persons naturalised in the United Kingdom, upon the production of a Declaration by the applicant in the form printed at the back of these Regulations, verified by a Declaration made by any *Banking Firm* established in the United Kingdom, or by any *Mayor, Magistrate, Justice of the Peace, Minister of Religion, Barrister-at-law, Physician, Surgeon, Solicitor, or Notary*, resident in the United Kingdom; the applicant's Certificate of Birth may also be required in certain cases; (2) in the case of children under the age of 14 years requiring a separate Passport, upon production of a Declaration made by the child's parent or guardian in a Form (B), to be obtained upon application to the Foreign Office; (3) in the case of persons

naturalised in any of the British Colonies, upon production of a letter of recommendation from the Colonial Office; and in the case of natives of British India, and persons naturalised therein, upon production of a letter of recommendation from the India Office.

5. If the applicant for a Passport be a Naturalised British Subject, his certificate of naturalisation must be forwarded to the Foreign Office with the Declaration or letter of recommendation. Naturalised British subjects, if resident in London or in the suburbs, must apply *personally* for their Passports at the Foreign Office; if resident in the country, the Passport will be sent, and the Certificate of Naturalisation returned, to the person who may have verified the declaration, for delivery to the applicant. Naturalised British subjects will be described as such in their Passports, which will be issued subject to the necessary qualifications.

6. Foreign Office Passports are not available beyond five years from the date of issue. Fresh Passports must then be obtained.

7. A Passport cannot be issued by the Foreign Office, or by an Agent at an outpost, on behalf of a person already abroad; such person should apply for one to the nearest British Mission or Consulate.

8. Travellers who intend to visit the Russian Empire, the Turkish Dominions, the Kingdom of Roumania, Persia, Colombia, Venezuela, Hayti, or Eritrea, in the course of their travels, must not leave the United Kingdom without having had their Passports *visa* either at the Russian Consulate-General, 17 Great Winchester Street, E.C.; the Consulate-General of the Sublime Porte, 140 Leadenhall Street, E.C.; the Roumanian Consulate-General, 49 Parliament Street, S.W.; the Persian Consulate-General, 122 Victoria Street, S.W.; the Colombian Consulate-General, 6 Holborn Viaduct, E.C.; the Venezuelan Consulate, Finsbury Pavement House, Finsbury Pavement, E.C.; the Haytian Consulate, 32 Fenchurch Street, E.C.; or the Italian Consulate-General (for Eritrea), 44 Finsbury Square, E.C., respectively, or at one of the other Consulates of those States in the United Kingdom. Travellers about to proceed to any other country need not obtain the *visa* of the Diplomatic or Consular Agents of such country.

N.B.—A statement of the requirements of Foreign Countries with regard to Passports may be obtained upon application to "The Passport Department, Foreign Office, London, S.W."

HORSE VEHICLES.

FARES BY DISTANCE (Cabs either with or without a Distance Recorder, but without a Taximeter): If hired and discharged *within* the Four-Mile Radius, for any distance not exceeding two miles s. d.

The driver may notify, by means approved by the Commissioner of Police, that he is willing to accept a fare of 6d. for any journey not exceeding a mile. s. d.

For every additional mile or part of a mile If hired *outside* the Four-Mile Circle, wherever discharged, for the first and each succeeding mile or part of a mile 1 0

If hired *within*, but discharged *outside* the Four-Mile Circle, whole distance not exceeding one mile, &c.; exceeding one mile, then for each mile *ended* within the circle, 6d.; and for each mile or part of a mile *ended* outside 1 0

FARES BY TIME: *Inside* the Four-Mile Circle. Four-wheeled Cabs, for one hour or less, 2s.; two-wheeled Cabs. 2 6

If above one hour, for every quarter hour or part of a quarter of the whole time, four-wheeled Cab, 6d.; if a two-wheeled Cab ... 0 8

If hired *outside* the Circle, wherever discharged, for one hour or less 2 6

If above one hour, then for every quarter hour or part of quarter of the whole time. 0 8

If hired *within*, but discharged *outside*, the Four-Mile Circle, the same.

EXTRA PAYMENTS.—*Hirers of Cabs should particularly notice these regulations, as disputes generally arise from their not being clearly understood.*

Whether hired by DISTANCE or BY TIME. LUGGAGE.—For each bicycle, child's mail cart, or perambulator, 6d.; for each package carried outside the carriage 0 2

EXTRA PERSONS: For each above two (two children under 10 years of age count as one person) 0 6

WAITING:—By distance: for every 15 minutes completed—If hired within the Four-Mile Circle, 4 wheels, 6d.; 2 wheels ... 0 8

If hired without Circle, 2 or 4 wheels ... 0 8

MOTOR CABS.

The fare payable for the hiring of a Motor Cab fitted with a Taximeter shall be according to the following scale:—

(a) Not exceeding one mile, or for a period of time, or a journey not exceeding ten minutes 0 8

(b) Exceeding one mile or ten minutes:—(1) For each quarter of a mile, or for a period of time, or a journey, not exceeding two and a half minutes ... 0 2

(2) For any less period or distance 0 2

In addition to the above the driver may be entitled to charge the following extra payments:—

(1) Luggage:—Whether hired by distance or by time—for each bicycle, child's mail cart, or perambulator, 6d.; for each package carried outside 0 2

NOTE.—Luggage carried on the footboard so that the doors do not close over it is deemed to be outside within the meaning of this clause.

(2) Extra persons.—When licensed to carry more than two persons—for each additional person beyond two, s. d. the whole journey. 0 6

Provided that two children under the age of ten years shall count as one person.

GENERAL REGULATIONS.

GENERAL REGULATIONS.—The fares by Taximeter Motor Cabs are based upon a combination of time and distance. When the cab is kept waiting, delayed by traffic, or caused to travel at the rate of less than six miles an hour, then the charge is by time. When travelling at a speed of six or more miles an hour, then the charge is by distance. Fares are according to distance or time, at the option of the hirer, *expressed at the commencement of the hiring*; if not otherwise expressed, the fare to be paid according to distance; but driver can refuse to be hired by time between 8 p.m. and 6 a.m.

DRIVER, if hired by distance, is not compelled to drive more than six miles, nor more than one hour if hired by time; further, if hired by time, the driver may be required to drive at any rate not exceeding four miles an hour; if required to drive more than four miles within the hour he may demand, in addition to the fare regulated by time, for every mile or any part exceeding four miles, the fare regulated by distance.

AGREEMENT to pay more than legal fare is not binding.

If the driver agree beforehand to take any sum less than the proper fare, the penalty for demanding more than the sum agreed upon is 40s.

The driver of every cab shall have with him, and when required produce, the Authorized Book of Distances, and every driver of any cab shall, if so required, deliver to the hirer a printed ticket, showing fares, &c.

Driver may demand a reasonable sum as a deposit from persons hiring and requiring him to wait at any place, over and above the fare to which the driver is entitled for driving thither. Penalty 40s., if driver, having received such deposit, refuse to wait, or go away before the expiration of the time for which the deposit shall be a sufficient compensation; or if the driver shall refuse to account for such deposit.

The London Cab Act, 1856, enacts that if any person hires a cab, knowing, or having reason to believe, he cannot pay the fare; or, fraudulently endeavours to avoid payment of a fare; or, having failed, or refused, to pay a fare, refuses, or gives a false address, is liable, in addition to the fare, to a penalty of 40s.

The fares legally demandable by a stage carriage are those painted in a conspicuous manner on the inside of every such carriage, and they are recoverable in a summary way before a Justice of the Peace, in the same way as fares for a hackney carriage.

All property left in any cab shall be deposited by the driver (and in the case of a stage carriage, by the conductor, or driver if no conductor) at the nearest Police Station within twenty-four hours, if not sooner claimed by the owner; such property to be returned to the person who shall prove to the satisfaction of the Commissioner of Police that the same belonged to him, on payment of all expenses incurred, and of such sum to the driver as the Secretary of State has by order prescribed. Property found in a stage carriage by a passenger must be given up to the conductor under a penalty of £10.

All inquiries, &c., relating to public carriages should be addressed to the Public Carriage Office, New Scotland Yard; but inquiries as to property left in a cab or stage carriage should be made at the Lost Property Office, New Scotland Yard. Office hours, 10 to 4.

HACKNEY CARRIAGE STATISTICS.

During 1908 there were licensed public carriages:—Hansons, 4,826; clarences—animal power 3,649, mechanical power 2,805; omnibuses—animal power 2,155, mechanical power 1,133; tramway cars—mechanical power 2,003, animal power 323; total, 16,894. Drivers and conductors:—Cab drivers—animal power 10,357, mechanical power 2,049; stage drivers—animal power 3,308, mechanical power 5,314; conductors, 9,752; total, 30,780.

HACKNEY AND STAGE CARRIAGE DRIVERS before obtaining a licence are required to pass an examination as to their ability to drive, and hackney

carriage drivers, in addition, have to pass an examination as to their knowledge of town. It extends to a knowledge of the principal squares, clubs, hospitals, hotels, theatres, streets, and public buildings in London. During 1908, of 3,142 men examined, 777 were successful. The annual average number of applicants who passed the examination during the past five years was 513. The proportion of drivers to hackney carriages is 10'99 drivers to 10 carriages; 146 of the drivers are over 70 years of age.

Of lost property, 60,407 articles were deposited, of which 26,571 were claimed by the owners, and £3,719 4s. 9½d. awarded to the drivers and conductors.

Tithe Commutation.

THE tithe of produce, the ancient provision for the maintenance of the clergy, was, after various attempts at modification and composition, commuted in 1836 by Act of Parliament to a payment in money. The land was valued, and a modus fixed, based upon the average value of corn for the preceding seven years, and payments, collected half-yearly by the clergy or lay-owners, have since been made on a septennial average. The value fixed amounted in some cases to as much as ten shillings per acre. The better the land for corn-growing, the larger was the sum to be paid, as it was a direct charge upon the corn grown, the prices upon which the Act was based being per quarter—wheat at 56s. 2d.; barley, 31s. 8d.; and oats, 23s. Consequently much land, not being worth the tithe, is now out of cultivation, or let at a price which just covers the charge. An Act passed in 1801 makes it compulsory for the owners of the land, instead of the occupiers, to pay the tithe, which amounts in the aggregate to about four millions annually, of which sum £766,334 is paid to 2,066 lay-owners or improprators. Extraordinary tithes were an additional charge made, when the Commutation Act was passed, upon hop, fruit, and market-garden grounds. These special industries were so affected by the tax, which in some cases amounted to thirty shillings an acre, that serious resistance against the payment ensued, and an Act was passed in 1886 providing that it should not be levied on land brought under such cultivation after the passing of the Act, but land under these crops at the time was permanently burdened with the impost. The tithe map and apportionment for each parish is deposited with the incumbent and churchwarden. Any one interested therein may have access to the same and obtain extracts by paying 2s. 6d. for inspection, and 3d. for every 72 words contained in the extract. Tithe may, upon the joint application of the land-owner and tithe-owner to the Board of Agriculture, be redeemed for a sum not less than 25 times its amount. This is dependent upon the consent of the Board, and sometimes on that of the Bishop and patron. Town property and building land is often redeemed, agricultural land rarely, the cost being too great.

The average Tithe Rent Charge for the first fifty years from 1836 was £102 9s. 9½d., and for the past 73 years (1837-1909) £93 2s. 10½d.

Architects' Fees.

THE custom is to charge 5 per cent. on the cost of new work, if exceeding £1,000. Below that sum, an increased scale is usual. An increased charge is also made for alterations to existing buildings, and for designs for decorations, fittings, and furniture. If PLANS, &c., are prepared for works which are never carried out, the charge is one-half the above, with a further half per cent. If tenders have been invited and received, these charges do not include negotiations for purchase of site, &c., nor settlement of difficulties with adjacent owners and public authorities, nor taking out quantities. For repetitions a modified charge is usually arranged. The minimum charge per day is three guineas. In all cases, travelling and other out-of-pocket expenses are paid by the employer in addition to the fees. For furnishing or checking a Schedule of Dilapidations and Estimate the usual charge is 5 per cent. on the estimate, but in no case less than two guineas. For valuing and negotiating the settlement of claims under the Lands Clauses and similar Acts the charge is on Ryde's Scale.

Surveyors' Fees.

SURVEY with plain plan—100 acres and under—by arrangement, according to work required. Over 100 acres, 2s. per acre and expenses; if with finished map, according to amount of embellishment.

VALUATION to fix rent—5 per cent. on first £300, and 2½ on remainder of one year's rental value, and expenses.

TIMBER valuation—5 per cent. on first £100, and 2½ on the excess, and out-of-pocket expenses.

CROPPING—5 per cent. up to £100, and 2½ on the excess, and out-of-pocket expenses.

VALUATION for probate—2 per cent. on first £500, and 1½ on the excess, and out-of-pocket expenses. But it is now usual to make a bargain for a fixed and moderate sum.

VALUATION of land—6d. per acre, and out-of-pocket expenses. No fee less than 5 guineas.

Auctioneers' and Estate Agents' Fees.

FOR THE SALE OF FREEHOLD AND COPYHOLD ESTATES AND HOUSES AND GROUND LEASES, BY AUCTION OR BY PRIVATE TREATY.—£5 per cent. on the first £100; £2½ per cent. up to £5,000; and on the residue above that sum £1½ per cent.; and the usual commission of £5 per cent. in addition on the amount paid for fixtures, furniture, and effects, and in addition for any disbursements.

FOR LETTING UNFURNISHED HOUSES, OR DISPOSING OF LEASES OTHER THAN GROUND LEASES BY ASSIGNMENT OR OTHERWISE.—Where the term is for three years or less, £5 per cent. on one year's rent; where for more than three years, £7½ per cent. on one year's rent, and (in either case) upon the premium or consideration, £5 per cent. up to £1,000, and 2½ per cent. on the residue, and the commission of £5 per cent. on any sum obtained for fixtures, furniture, or effects of any kind.

FOR LETTING FURNISHED HOUSES, IN TOWN OR COUNTRY.—When let for a year or less period, £5 per cent. on the rental. When let for more than a year, £5 per cent. on first year's rent, and £2½ per cent. on rent for remainder of term. Where a property is let, and the tenant afterwards purchases, the commission for selling will then become chargeable, less the amount pre-

viously paid for letting furnished or unfurnished.

FOR VALUATIONS OR SALE OF FURNITURE, FIXTURES, AND OTHER EFFECTS.—For Sale, £5 per cent.; for Valuation, £5 per cent. up to £500, and £2½ per cent. on the residue.

FOR VALUATION OF FURNITURE AND EFFECTS FOR PROBATE OR ADMINISTRATION.—£2½ per cent. on the first £100, and £1½ per cent. on the residue.

FOR VALUATION OF PROPERTIES FOR SALE, PURCHASE OR MORTGAGE.—£1 per cent. up to £1,000, 5s. per cent. above, on full amount of valuation. In valuations for Mortgage, if an advance is not made, one-third of the above scale, the minimum fee to be £3 3s.

FOR VALUATIONS FOR PROBATE OR ADMINISTRATION (UNDER THE FINANCE ACT, 1894) OF FURNITURE AND EFFECTS.—£2½ per cent. on the first £100, and £1½ per cent. on the residue. OF FREEHOLD, COPYHOLD, OR LEASEHOLD PROPERTIES—5s. per cent. on amount of valuation. Minimum fee, £3 3s.

FOR NEGOTIATING THE PURCHASE OF ESTATES, HOUSES, AND GROUND LEASES.—£2½ per cent. up to £500, and £1 per cent. beyond that amount.

FOR NEGOTIATING THE TAKING OF FURNISHED OR UNFURNISHED HOUSES.—Half the scale for letting.

FOR LETTING BUILDING LAND.—Amount of one year's ground rent, or by agreement.

FOR MAKING AND EXAMINING INVENTORIES, and making catalogue for auction sale.—From one guinea, according to length, exclusive of expenses.

MAKING schedule of fixtures to attach to lease.—From 1 to 4 guineas, or about 3 guineas per day.

FOR MAKING schedule of dilapidations, and serving notice to repair.—From 2 to 5s. per day.

FOR SETTLING amount of dilapidations—5 per cent. on amount, and out-of-pocket expenses.

RAILWAY, School Board, Corporation, Board of Works, and other compensations—SCALE:—

If the award be for £1,000 the fee chargeable is 18 gs., and for £1,200 19 gs., and so on, each £200 additional earning a further guinea, but no fee less than 7 guineas; and a fee of 3 guineas per day for London valuers, and 5 guineas per day for valuers outside the London area, for attendance in London before jury or arbitrator.

MANAGEMENT of estates, including collection of rents—Tithes—rent charges, ground rents, &c., from 3 to 5 per cent.; cottage property, from 5 to 10 per cent., according to special agreement.

Allowances under Bankruptcy Acts, 1883 and 1890.

The following charges are to be subject to reduction by agreement with the Official Receiver or the trustee, or to increase with the sanction of the Committee of Inspection and the Receiver:—

Brokers.—For inventory not exceeding 5 folios, 20s. 6d.; additional per folio to 20 folios, 1s. 6d.; each folio after 20, 1s. For inventory and valuation.—On the first £100, £2 10s.; for the next £400, £1 5s.; above £400 up to £10,000, £1 1s.; above £10,000, 20s. Travelling expenses in addition.

Auctioneers.—For sales by private contract half the above charges for inventory and valuation; for sales by auction (in addition to certain out-of-pocket expenses) of chattel property, 5 per cent. on first £500, 4 per cent. on next £500, above £1,000 2½ per cent.; and of estates in land, including prior valuations for determining amount of reserve bids, on first £300 5 per cent., on next £1,000 2½, above up to £5,000 1½, and above £5,000 1 per cent. Cost of surveys, dilapidations and specifications, £3 to £5.

Accountants.—For preparing balance-sheet, investigating accounts, &c., principal's time, exclusively so employed, per day of seven hours, including necessary affidavit, £1 rs. to £5 5s. Chief-clerk's time, rs. 6d. to £1 rs. 6d. Other clerk's time, per day of seven hours, 7s. 6d. to 16s. These charges to include stationery, except forms used.

MEDICAL FEES.

Unlike those in most other businesses or professions, the charges made by medical men are assessed upon a sliding scale. All engaged in the profession are supposed to be equal in point of skill, and therefore entitled to charge alike, the tariff depending chiefly upon the residence of doctor or patient. A medical man living in the eastern suburbs of London will perhaps charge but half a crown or three-and-sixpence if waited upon by a patient; but, when he removes to the neighbourhood of Cavendish Square, the fee charged for the first visit will be two guineas, and one guinea for the second and every subsequent visit.

Patients are charged according to their supposed incomes, the income being indicated by the rental of the houses in which they reside. The following are the charges usually made by general practitioners:—

GENERAL PRACTITIONERS.	RENTALS.			
	£10 to £25.	£25 to £50.	£50 to £100.	£100 to £200.
Ordinary Visit	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.	
Night Visit	Double an ordinary visit.			
Mileage beyond two miles from Home	1s. 6d.	2s.	3s. 6d.	4s.
Detention per 3 hour	2s. 6d. to 5s.	3s. 6d. to 7s.	5s. to 10s. 6d.	
Letters of Advice	Same charge as for an ordinary visit.			
Attendance on servants	2s. 6d.	3s. 6d.	5s. to 10s. 6d.	
Midwifery	25s.	25s. to 63s.	93s. to 105s.	
Administering Cupping	10s. 6d.	21s.	42s.	
CONSULTANTS.				
Advice or Visit alone	21s.	21s.	21s.	
Advice or Visit with another Practitioner	21s.	21s. to 42s.	21s. to 42s.	
Mileage beyond two miles from Home	10s. 6d.	20s. 6d.	20s. 6d.	

Special visits—i.e., of which due notice has not been given before the practitioner starts on his daily round, are charged at the rate of a visit and a half. Patients calling upon the doctor are charged at the same rate as if visited by him.

When the ordinary medical attendant is called upon to meet another in consultation, he is entitled to charge double his ordinary fee. When he himself is called in, in consultation, he is entitled to the minimum fee of 21s.

When more members of one family are ill at the same time, half a fee is charged for each beyond the first.

In midwifery cases the fee generally covers all charges for visits, &c., if all goes well, but if the illness be protracted, or if any special operation has to be performed, there is an extra charge.

If attendance on servants is paid for by employer, or if he send for the doctor, the charge is the same as to himself.

Certificates of health are to be charged for same as visits, except where special investigation is needed, as in certificates for lunacy, insurance offices, &c., when the charge may be from half a guinea to two guineas.

Vaccination is usually charged for according to the number of visits required.

Medical bills are commonly rendered once or

twice a year, and contain but one amount—"Attendance and medicine," from date to date, so much. The patient has no means of checking the correctness of the charge, although medical men, like all others, are liable to err; they, however, are always willing to show their ledgers when requested.

SOLICITORS' CHARGES.

These are now usually regulated in conveyancing and non-contentious business by the Solicitors' Remuneration Act, 1881, and the Scale thereunder—we say "usually" because that Act allows an option to a solicitor of declining to adopt it. In practice, most solicitors (although some old-established firms are found to prefer the old system) are willing to adopt the Scale, and especially on mortgages and sales. Looking first at the old system, we find that an Act of 1843 made solicitors' charges on conveyancing liable to taxation by a public official; and in 1870 a further Act enabled the taxing officer to have regard to "skill, labour, and responsibility" as well as to mere length of documents. The Act of 1881 enabled the high legal authorities, with the consent of certain representative solicitors, to frame a Scale, and this has been done. It chiefly relates to sales, purchases, and mortgages, and is based upon the value of the property or amount of the money involved. Besides this, it is legal for a client to make a bargain beforehand for a fixed sum. The amount coming to the solicitor, whether under Scale or agreement, is intended to cover the services of himself and his clerks, while it is, of course, exclusive of actual outlay for stamps, &c. On purchase or mortgage money exceeding £300 and not exceeding £1,000, the Scale charge for each party's solicitor is 1½ per cent.; this does not apply to sales by auction. Where a negotiation fee is chargeable, in addition, by the vendor's, purchaser's, or mortgagee's (not mortgagor's) solicitor, the Scale charge on sums exceeding £300 and not exceeding £3,000 is 1 per cent. It should be noted that if the solicitor negotiates the purchase or mortgage, he is entitled to an additional fee of substantial amount under the Scale referred to.

STREETS AND FOOTPATHS.

STREETS AND FOOTPATHS.—The scavenging of streets and the cleansing of footways and pavements is generally undertaken by the sanitary authorities. It is unlawful to place or leave on any footway any furniture, goods, wares or merchandise, or any cask, tub, basket, pail, &c.; or to place over any footway any blind, shade, covering, awning, or other projection less than eight feet in height from the ground; or to place any goods, wares, merchandise, matter, or thing whatsoever, so that the same project in such a manner as to obstruct or incommode the passage of any person over or along a footway; or to roll any cask, tub, hoop, or wheel upon any footway, except for the purpose of crossing the footway; or to throw or lay down any materials in any street, or beat or shake any carpet, rug, or mat in any street after the hour of eight in the morning.

RECEIPTS.

RECEIPTS should be kept for six years from the date of payment, after which period no action can be brought concerning the goods, &c., received.

Places of Interest and Amusement in London.

403

EXHIBITIONS, CHURCHES, PUBLIC BUILDINGS, THEATRES, AND OTHER PLACES AND OBJECTS OF INTEREST IN LONDON AND THE SUBURBS.

Note.—"Open Daily" means every Week-day, and not on Sundays, except where otherwise stated.

EXHIBITIONS, &c.

ACADEMY, ROYAL, Burlington House, Piccadilly.—Exhibition of works by living artists, open from 1st Monday in May to 1st Monday in August, from 8 to 7; admission, 1s.; catalogue, 1s. Evening Exhibition, last week, from 7.30 to 10.30; admission, 6d.; catalogue, 6d. Exhibition of works by old masters and deceased British artists, 10 weeks from 1st Monday in January, from 9 till 6; admission, 1s.; catalogue, 6d. Gibson and Diploma Galleries, free, daily, from 11 to 4.

AGRICULTURAL HALL, ROYAL, Upper Street, Islington, N.—Cattle Show in December; World's Fair in Dec. and Jan.; Dog Show in Feb.; Horse Shows in Feb. and March; Dairy Show in Oct.; and the following exhibitions in 1910:—Laundry and Clothing in April; Printing and Stationery in May-June; Confectioners in Sept.; Grocers, Sept.; Brewers, Oct.; Shoe and Leather, Nov.; Cycle (Stanley Show) in Nov.; &c.

ART EXHIBITIONS.—*Arts and Crafts Exhibition Society* (Hon. Sec., E. S. Prior, 1 Hare Court, Temple, E.C.).—*Royal Society of Painters in Water Colours* (1804), 51 Pall Mall East. Exhibitions confined to the works of Members and Associates are held in April and Nov. *Royal Institute of Painters in Water Colours*, 125 Piccadilly; exhibitions open to all artists; March 21 to May 28, 1s. *Royal Society of British Artists*, Suffolk Street, Pall Mall East, 1s. Exhibitions limited to members' works, April to July and Oct. to Feb., 10 to 6. *New Gallery*, 121 Regent Street, W., Jan. to March, exhibition of Arts and Crafts Society; April to Aug., Annual summer exhibition of works by living Artists; Sept. to Nov., Royal Photographic Society; Nov. and Dec., Society of Portrait Painters, 10 to 6, 1s. *Doré Gallery*, 35 New Bond Street. Daily, 10 to 6, 1s. *French Gallery*, 120 Pall Mall, open all the year except Sund. and Bank Hols.; admission, 1s. *Goupil Gallery*, 5 Regent St., Waterloo Place, 1s.; Those not specially mentioned in the preceding or following lists are open at uncertain seasons. The usual period is between the beginning of May and the end of August. There are also some Winter Exhibitions, in addition to the old masters at Burlington House. *The Royal Institute of Oil Painters*, 125 Piccadilly, open from Oct. 10 to Dec. 11; admission, 1s.

NATIONAL GALLERY, Trafalgar Square.—National collection of pictures. Students' days, Thursday and Friday. Admission after 11 a.m. on Students' days, 6d. Open free on Monday, Tuesday, Wednesday, and Saturday, from 10 to 4, 5, or 6; Sunday, from 2 to 4, 5, or 6.

TATE GALLERY (National Gallery of British Art), Millbank, S.W.—National collection of modern British pictures. Students' days, Tuesday and Wednesday, 6d.; other days free. For hours and Sundays see National Gallery.

NATIONAL PORTRAIT GALLERY.—St. Martin's Place, Charing Cross. Series of 1,550 historical portraits. Open free on Monday, Tuesday, Wednesday, and Saturday, from 10 to 4, 5, or 6, according to the season; on Sundays, free, from 2.30 to 5.30, or until dusk in winter; on Students' days (Thursday and Friday), from 10 to 4 or 5, an admission fee of 6d. is charged.

ILLEGITIMACY.—A man may be summoned to petty sessions on the application of the mother of a bastard child, or by the Guardians of the Poor where the child becomes chargeable to the Union or Parish; and the Justices, on his being proved to be the father of the child, may make an order requiring him to pay for its maintenance and education a sum not exceeding 5s. a week. The mother has the custody of her bastard children. No person is required as father of an illegitimate child to give information concerning

the birth of such child, and the registrar is forbidden to enter in the register the name of any person as father of the child unless at the joint request of the mother and father. Such person is in that case required to sign the register, together with the mother. A menial servant found to be *enclave* may be peremptorily dismissed without notice; but any attempt to examine without her consent a servant supposed to be *enclave* renders the employer liable to an action.

London Public Libraries.

411

Many of the Libraries are also open on Sundays.

ACTON.—(1898), 9 A.M. to 10 P.M.
BALHAM.—See WANDSWORTH.
BARKING.—(1888), East Street, 9 A.M. to 9.30 P.M.

[illegible]

The following table gives the winners of the Derby for the last 55 years. Including 1851, Sir J. Hawley scored four successes with Teddington, Beadsman, Musjid, and Blue Gown, the second and third being consecutive victories. The late Duke of Westminster also scored four wins with Bend Or, Shotover, Ormonde, and Flying Fox. The Duke of Portland, Lord Rosebery, and Mr. Bowes have won twice consecutively. H.M. the King has won three times (twice before his accession). Lord Falmouth, Mr. W. T. Anson, Mr. Merry, Sir F. Johnstone, and Sir J. Miller have been twice victorious at intervals of four or more years.

DISTANCE—1 MILE 4 FURLONGS 29 YARDS.

Year.	NAME AND OWNER OF WINNER.	Betting.	Jockey.	Trainer.	No. of Subs.	Value of Stakes.	No. of Runners.	Time.

BILLIARDS.

BEST "spot-in" break (exhibition match) 3,304, by W. J. Peall, 1882; 3,304, for money 2,037, by W. J. Peall, 1888. Best spot-barred breaks, 1,392 by J. Roberts, 1894, and 1,407 by T. Taylor, 1891. Greatest number of spot-barred in succession 623, by W. J. Peall, 1928. Successive nursery cannon record of 120 is held by W. Cook, on Jan. 22, 1906. Longest run of successively losing red hazards 98, by J. Roberts, 1894. Largest number of successive screw-back red hazards 185, by J. G. Sala, 1883. Fastest 1,000 up game, all-in, W. J. Peall, 1884, 44 min. Fastest 1,033 spot-barred, J. Roberts, 1894, 59 min. Under Billiard Association Rules, Major Fleming is the amateur champion. The record breaks are 959 (82 off the red) by Geo. Gray, at Melbourn, Aug. 25, 1909; 822 by J. Stevenson, Feb. 26, 1905, recognised by the B.A.; and 827 by John Roberts, Jan. 24, 1905, in Scotland. On Oct. 12, 1906, in London, W. J. Peall scored 300 points off the red ball. By means of the now abolished cradle cannon W. Cook, in June, 1907, scored 42,740; and by the aid of the same stroke T. Reese, during June and July, totalled 499,135, but the latter was not passed by the Billiard Association, as it was not made entirely in public play.

1 Balls jammed in mouth of pocket. 2 Both the break and the number scored off the red are records. Gray was 77½ years old at the time.

Amateur Records.—A. Shrubbs ran 11 m. 1136 yds. in 1 hour, Nov. 5, 1904, at Ibrox Park; G. Crossland, September 22, 1894, ran 20 miles and a half in 2 hours, at Stamford Bridge.

WALKING (AMATEURS).

SWIMMING.

CAPTAIN MATTHEW WEBB swam from Dover to Calais in 22 hrs. 45 mins., August 24 and 25, 1875. Longest time under water, Miss E. Wallenda, 4 min. 45½ secs., in a tank, Alhambra, London, Dec. 14, 1898.

English Channel attempts.—In 1906 J. Wolfe, Horace Mew, T. Burgess, and Miss A. Kellerman, of Australia, and others all failed. Wolfe once got within about 32 miles of the French coast. In 1908 and 1909 J. Wolfe, M. Holheim, and others also again made fruitless attempts.

(PROFESSIONALS.)

and 1 mile in 4 mins. 15-3-5th secs., at Travers Island, 1895, both in trial races with pacemakers.

¹ These are the only records generally accepted. Geo. Seward's apocryphal 6½ secs. is no longer accepted. M. W. Long, in 1900, ran a straight quarter in 47 secs. in America.

² Made in Australia.

³ British amateur records.

⁴ Not Music Hall exhibitions, but all doubtful.

⁵ With ankles tied.

⁶ Tom Griffiths walked 20 miles in matches against time in 2 hrs. 47 mins. 52 secs., Dec. 3, 1870.

BRITISH AMATEUR RECORDS.

200 yds. 9 4-5th secs., by A. F. Duffy (U.S.A.), on grass, and W. A. Schick (Harvard), 1904. 220 yds. (hurdles), 25 secs., by F. C. Smithson (Olympic Games, 1908). 250 yds. 24 4-5th secs., by C. G. Wood (1887) and C. J. Monypenny (1898). 220 yds. 21 4-5th secs., by C. G. Wood, 1917. 250 yds. 24 4-5th secs., by E. H. Polling, 1883. 300 yds. 31 2-5th secs., by A. R. Downer, 1895, and C. G. Wood, 1887. 300 yds. (hurdles), 35 2-5th secs., by O. Greenings, 1907. 400 yds., 43 secs., by H. C. L. Tindall, 1889, and E. C. Bredin, 1895. 500 yds., 58 2-5th secs., by E. C. Bredin, 1895. 600 yds., 1 m. 11 secs., by E. H. Montagne, 1908. 880 yds., 1 m. 54 secs., by M. W. Shepherd, 1908. 1,000 yds., 2 m. 14 4-5th secs., by W. E. Lutyens, 1897. 1,320 yds., 3 m. 31 secs., by W. G. George, 1882. 1 mile, 4 m. 15 4-5th secs., by J. Binks, 1902. Other British Amateur records from 1 mile to 200 will be found in table of "Bests on Record." High Jump, 6 ft. 4 1/2 in., by P. J. Leahy, 1898. Throwing the Hammer, 264 ft. 5 3/8 in., by S. P. Gillis, 1908. Putting the Weight (16 lb., 7 ft. 8 1/2 in.), 48 ft. 2 in., by D. Morgan, 1897. Pole Jump, R. D. Dickinson, 11 ft. 9 in., 1891. Putting the Weight (16 lb., 7 ft. 8 1/2 in.), 49 ft. 7 1/2 in., by Ralph Rose, 1907. Throwing the Hammer, 16 lb., J. Flanagan, 172 ft. 11 in., 1904. In America, from 7 ft. circle, A.A.U. rules, wire handle with loops, M. Sheridan holds the World's Discus Throwing record, viz., 134 ft. 2 in., at the Stadium, 1908; Free Style, 143 ft. 4 in., W. Jarvinen, Olympic Games, 1903. The pole-jumping record is held by an American amateur, W. R. Dray, Connecticut, 12 ft. 6 1/2 in. (1902). Best performance in England, 12 ft. 2 in., by E. T. Cooke and A. C. Gilbert, 1903.

* All these records were made with motor pacing and wind Shields.
† Flying starts.

At the Stadium, on July 3, 1903, J. H. Bishop established an amateur record, riding 513 miles 1430 yards in 24 hours.

On Sept. 17-18, 1893, M. Cordang, at The Hague, Holland, rode 642 miles 26 yards in 24 hours, but owing to his suspension at the time by the U.V.F. the record is not recognised. At Madison Square Gardens, New York, December, 1898, Charles Miller rode 2,007 miles 4 laps in 124 hours.

At Munich, on Sept. 25, 1902, Paul Guignard rode 202 kilos 623 meters (nearly 63 miles) in 1 hour. He was paced by Hoffman on a three-cylinder machine with a wind shield.

On Aug. 23, 1900, W. J. Bailey, Polytechnic Cy. C., beat his own quarter-mile flying start record of 25 4-5th secs. by 2-5th sec., Bailey's new record being 25 1-5th secs. This beats the professional world's record of 25 2-5th secs. made by T. J. Gascoyne, at Catford, on May 5, 1900.

THE NATIONAL AMATEUR WRESTLING ASSOCIATION CHAMPIONS FOR 1909.

1901	Oxford, 6-4.
1902	Oxford, 5-4.
1903	Cambridge, 8-2.
1904	Cambridge, 8-2.
1905	Oxford, 61-31a.
1906	Oxford, 7-2.
1907	Oxford, 51-31.
1908	Cambridge, 6-4.
1909	Oxford, 6-4.

ASSOCIATION FOOTBALL.

Oxford have won 17 matches, Cambridge 17, and 2 have been drawn. In 1908-9 each side scored x goal.

CRICKET.

Yr.	Result.
1839	C. won in x min. by 25r.
1840	C. won by 12 runs.
1841	C. won by 6 runs.
1842	C. won by 16 r.
1843	C. won by 54 runs.
1844	C. won by 6 wickets.
1845	Oxford won by 3 wickets.
1846	C. won by 23 r.
1847	Oxford won by 23 runs.
1848	C. won by 3 wickets.
1849	C. won by 3 wickets.
1850	C. won by 127 r.
1851	C. won in x min. by 77 r.
1852	Ox. won in x min. by 8v.
1853	Ox. won in x min. by 8v.
1854	Ox. won in x min. by 8v.
1855	Oxford won by 3 wickets.
1856	C. won by 3 wickets.
1857	Oxford won by 31 r.
1858	Ox. won in x min. by 38 r.
1859	C. won by 3 wickets.
1860	C. won by 133 runs.
1861	C. won by 6 wickets.
1862	Oxford won by 8 wickets.
1863	Oxford won by 4 wickets.
1864	Oxford won by 14 runs.
1865	Oxford won by 13 runs.
1866	C. won by 3 wickets.
1867	C. won by 57 r.
1868	C. won by 28 runs.
1869	C. won by 6 runs.
1870	Oxford won by 8 wickets.
1871	C. won in x min. by 65 r.
1872	Ox. won in x min. by 65 r.
1873	Ox. won in x min. by 65 r.
1874	Ox. won by 10 wickets.
1875	C. won by 23 r.
1876	C. won by 9 wickets.
1877	C. won by 10 wickets.
1878	C. won by 23 r.
1879	C. won by 7 wickets.
1880	C. won by 7 wickets.
1881	C. won by 7 wickets.
1882	C. won by 7 wickets.
1883	C. won by 7 wickets.
1884	C. won by 7 wickets.
1885	C. won by 7 wickets.
1886	C. won by 133 r.
1887	C. won by 7 wickets.
1888	C. won by 7 wickets.
1889	C. won by 7 wickets.
1890	C. won by 7 wickets.
1891	C. won by 2 wickets.
1892	Oxford won by 5 wickets.
1893	C. won by 266 r.
1894	Oxford won by 8 wickets.
1895	C. won by 234 r.
1896	Oxford won by 134 r.
1897	C. won by 179 r.
1898	Oxford won by 9 wickets.
1899	C. won by 5 wickets.
1900	Oxford won by 268 r.
1901	C. won by 40 r.
1902	C. won by 94 r.
1903	C. won by 5 wickets.
1904	Oxford won by 2 wickets.
1905	Match drawn.

THROWING THE HAMMER.

1811 (7 ft. circle), R. H. Lindsay-Watson (C.), 148 ft. 10 in. The square and circle were first introduced in 1880.

Hunts and Hounds.

Staghounds:—England, 27 packs (47 couples); Ireland, 3 packs (26 couples).
 Foxhounds:—England and Wales, 176 packs (over 6,700 couples); Scotland, 22 packs (358 couples); Ireland, 24 packs (205 couples).

PACK.	COUPLES.	MASTER.	KENNELS.
Staghounds (20 couples or more).			
Amory's (Sir J.)	25	Sir J. Amory, Bart.	Hensleigh, Tiverton.
Antrim, East	24	Mr. J. Craig	Brookvale House, Doagh.
Berks and Bucks	20	Messrs. Headington	Highway, Maidenhead.
Burton's (Mr.)	20	Mr. W. P. Burton	Edgehill, Ipswich.
County Down	40	Mr. S. B. Combe	Rockmount, Ballinahinch, county Down.
Devon and Somerset	56	Capt. Adkins	Exford, Taunton, Somerset.
Enfield Chase	23	Mr. D. D. Bulgar	Pursley, Shenley.
Gerard's (Mr.)	25	Hon. R. Gerard	Wrightington Hall, Apple Bridge, Lancs.
Mid Kent	24	Mr. G. B. Winch	Wateringbury, Maidstone.
New Forest	25	Mr. G. Thursby & Maj. Timson	New Park, Brockenhurst, Hants.
Norwich	24	Mr. J. Cooke	Brooke Lodge, Norwich.
Oxenholme	25	Mr. C. H. Wilson	Gate Beck, Kendal.
Ribblesdale	30	Lord Ribblesdale	Bolton-by-Bowland, Clitheroe.
Rothschild's (Lord)	20	Lord Rothschild	Ascott, Leighton Buzzard.
Surrey	26	Captain MacTaggart	Horleylands, Horley, Surrey.
Ward Union	42	Mr. Percy Maynard	Ashbourne, county Meath.
Warrnam	22	Mr. H. C. Lee Steere	Uckley, Dorking.
Foxhounds (50 couples or more).			
Albrighton	53	Col. Goulburn	Whiston Cross, Albrighton.
Atherstone	60	Earl of Huntingdon	Witley, Atherstone, Warwickshire.
Badsworth	63	Mr. J. P. Montague	Barwick, Pontefract.
Bathurst's (Earl V. W. H.)	53	Earl Bathurst	Cirencester.
Beaufort's (Duke of)	75	Duke of Beaufort	Badminton, Glos.
Belvoir	66	Sir G. Greenall, Bart.	Belvoir Castle, Grantham, Lincoln.
Berkshire, Old	50	Mr. L. Paine	Kingston Bagpuize, Abingdon.
Bicester	53	Mr. Heywood Lonsdale	Stratton Audley, Bicester, Oxon.
Blackmore Vale	57	Mr. F. B. Wingfield-Digby	Charlton Horthorne, Sherborne, Dorset.
Blankney	57	Sir R. Filmer	Lincoln.
Bramham Moor	51	Mr. G. R. Lane-Fox, M.P.	Bramham Park, Boston Spa, Yorkshire.
Cambridgeshire	50	Mr. D. Crossman	Caxton, Cambridge.
Cattistock	72	Rev. E. A. Milne & Mr. W. F. Fuller	Cattistock, Dorchester.
Cheshire	76	Duke of Westminster	Sandway, Northwich.
Cotswold	51	Mr. H. O. Lord	Cotswold, Cheltenham.
Cottesmore	57	Lord Lonsdale	Ashwell Road, Oakham, Rutland.
Crawley and Horsham	55	Col. C. B. Gorman	West Garsden, Horsham.
Crooms	50	Lord C. Bentinck	Crooms, Severn Stoke, Worcester.
Dartmoor	56	Mr. W. Coryton	Woodlands, Ivybridge.
Dobson's (Mr.)	60	Mr. W. W. Dobson	Trentham, Stoke-on-Trent.
Essex	50	Mr. J. Swire	Harlow, Essex.
Essex Union	50	Messrs. E. Heseltine & R. Courage	Billerica, Essex.
Ferne's (Mr.)	55	Mr. C. W. Fernie	Medway, Margat Harborough.
Fitzhardinge's (Lord)	53	Lord Fitzhardinge	Berkeley, Gloucester.
Fitzwilliam's (Earl)	53	Earl Fitzwilliam	Grove Kennels, Retford.
Fitzwilliam's (Mr.)	54	Mr. G. C. Fitzwilliam	Milton, near Peterborough.
Garth	64	Mr. R. H. Gosling	Preestund, Bracknell.
Grafton	50	Mr. C. McNeill	Paulers Pury, Towcester.
H. H. (Hampshire)	55	Mr. G. Evans	Ropley, Alford.
Hambleton	50	Capt. P. P. Standish	Uxbridge, Hertfordshire.
Harrington's (Earl)	50	Earl of Harrington	Gedding, Notts.
Hartfordshire	50	Major C. Jackson	Kenesbourne Green, Luton.
Heathrop	51	Mr. A. Brassey	Chipping Norton, Oxon.
Holderness	70	Mr. H. Whitworth	Elton, near Hull.
Kent, East	50	Mr. H. W. Lowndes	Elham, Canterbury.
Leconfield's (Lord)	30	Lord Leconfield	Petworth Park, Sussex.
Leobury	50	Sir G. Ballough & Capt. Peacocke	Leobury, Herefordshire.
Meynell	61	Mr. Gornall Hardy	Sudbury, Derby.
Middleton's (Lord)	52	Lord Middleton	Birdsall, Malton, York.
Miller's, Mr. (V. W. H.)	50	Mr. T. B. Miller	Cricklade.
New Forest	50	Mr. W. de P. Cuzenove	Furzey Lawn, Lyndhurst.
North Warwickshire	50	Hon. A. E. Parker	Kenilworth.
Oakley	60	Mr. E. F. Arkwright	Milton Ernest, Beds.
Pembrokeshire	60	Mr. J. H. Howell	Saundersfoot, Pembrokeshire.
Puckridge	60	Mr. E. E. Barclay	Brent Pelbar, Huntingford.
Pytchley	58	Lord Annaly	Brixworth, Northampton.
Qorn	52	Captain F. Forester	Barrow-on-Soar, Loughborough.
Rufford	50	Sir H. M. Fitzherbert	Wellow, Newark.
Southwold	50	El. P. Rawnsley & Sir W. Cooke	Beleford, Horncastle, Lincolnshire.
Tedworth	50	Capt. W. Faber, M.P.	Tedworth, Marlborough.
Tredzle	51	Mr. J. S. Straker	Stagshaw Bank, Corbridge.
Warwickshire	68	Lord Willoughby de Broke	Rixton, Warwick.
Worcestershire	64	Mr. A. Jones	Fernhill Heath, Worcester.
Wynnstay	50	Sir W. Williams Wynn, Bart.	Wynnstay, Ruabon.
Yarborough's (Earl of)	54	Earl of Yarborough	Brocksley Park, Lincs.
York and Ainsty	60	Mr. L. J. Stapilton	Acomb, York.
Zetland's (Marquess of)	53	Marquess of Zetland	Aske, Richmond, Yorkshire.
Scotland.			
Berwickshire	50	Mr. F. Usher	Briery Hill, Edrom.
Buchan's (Duke of)	57	Duke of Buccleuch, &c.	St. Boswells, Berwickshire.
Eglinton's (Earl of)	50	Earl of Eglinton and Winton	Kilwinning Castle, Irvine, Ayr.
Ireland.			
Galway County	55	Mr. N. W. Loder	Craghwell, county Galway.
Kildare	50	Mr. A. P. Pollok	Jiginstown, Naas, county Kildare.
Kilkenny	60	Mr. I. Bell	Birchfield, Kilkenny.
Meath	70	Earl of Fingall	Nugentstown, Kells.
Tipperary	55	Mr. T. Bouch	Grove, Fethard, county Tipperary.
Waterford	55	Marquess of Waterford	Curraghmore, county Waterford.

THE authorized Coinage of the United Kingdom consists of the following pieces, those marked* only being issued on special occasions; the issue of crowns and double florins has been discontinued for several years:

Denomination.	Standard Weight.	Least Current Weight.	Remedy of Weight.
GOLD:	Grains.	Grains.	Grains.
*Five Pound	616.37239	612.500	1.00000
*Two Pound	246.54805	245.000	0.40000
Sovereign	123.27447	122.500	0.20000
Half-Sovereign	61.63723	61.125	0.15000
SILVER:			
Crown	436.36363	—	2.000
Double Florin	349.09090	—	1.678
Half-Crown	218.18181	—	1.264
Florin	174.54545	—	0.997
Shilling	87.27272	—	0.578
Sixpence	43.63636	—	0.346
*Groat or 4d.	29.09090	—	0.262
Threepence	21.81818	—	0.212
*Twopence	14.54545	—	0.144
*Penny	7.27272	—	0.087
BRONZE:			
Penny	145.83333	—	2.91666
Halfpenny	87.50000	—	1.75000
Farthling	43.75000	—	0.87500

STANDARD GOLD contains twenty-two twenty-fourths of fine gold and two twenty-fourths of alloy; fineness, 916.66, or 22 carats. Twenty troy pounds of standard gold are coined into 934 sovereigns and one half-sovereign; one troy ounce is, therefore, intrinsically worth £3 17s. 10½d., and one ounce of pure gold, on the same basis, £4 4s. 11½d.

STANDARD SILVER consists of thirty-seven-fortieths of fine silver and three-fortieths of alloy; fineness, 925. One troy pound of standard silver is coined into 66 shillings. [Another Standard, called the "New Sterling" or Britannia, of the fineness 11 oz. 10 dwt. (958.33), is practically obsolete. It is occasionally used, however, for high-class plate.]

†BRONZE is an alloy of copper 95 parts, tin 4 parts, and zinc 1 part.

THE "REMEDY" is the amount of variation permitted in fineness and in weight of coins when first issued from the Mint.

TOKENS.—No person is allowed to coin any token to pass for, or as representing, bronze or other money, under a penalty of £20.

LIGHT GOLD.—Any person to whom it is tendered may break, cut, or deface any gold coin below the least current weight; but, under the

† It is interesting to note that the legal weight of a penny is one-third, of the halfpenny one-fifth, and of the farthing one-tenth of an ounce avoirdupois. Further, the halfpenny is one inch in diameter.

provisions of the Coinage Act, 1891, and an Order in Council of 16 March, 1892, light gold coin which has not been illegally dealt with is received by the Bank of England on behalf of the Mint at its full nominal value.

BANK OF ENGLAND NOTES are issued for sums of £5, £10, £20, £50; also for £100, £200, £500, and £1,000.

BANK POST BILLS are drawn for any sum from £10 to £1,000, and made payable to order at seven days' date, or at sixty days'. No charge is made for bills so drawn: they may be obtained at the Chief Office in London, or at any of the branches.

LEGAL TENDER OF MONEY.—The tender of Bank of England Notes is legal in England and Wales for every purpose, and by anyone (except by the Bank of England). No one can be compelled to give change. Gold, if above the least current weight, is a legal tender to any amount. Silver is not a legal tender for sums over two pounds, nor bronze, including farthings, for sums over one shilling.

OLD MONIES.—Guinea, 21s.; Carolus, 23s.; Moldore, 27s. 6d.; Angel, 10s.; Noble, 6s. 8d.; Tester, 6d.; Groat, 4d.

SCOTS MONEY.—Merk=1s. 1½d.; Pound=1s. 8d.; Shilling=1d.; Plack=2 Bodes=4d. Scots.

Foreign Moneys.

TABLE FOR CALCULATING THE VALUE OF ANY GIVEN WEIGHT OF STANDARD SILVER IN TROY OUNCES.

Market Price of Standard Silver in Pence per Troy Ounce.

Oz.	21½	22½	23½	24½	25½	26½	27	27½	28½	29½
1	21.5	22.5	23.5	24.5	25.5	26.5	27.0	27.5	28.5	29.5
2	43.0	45.0	47.0	49.0	51.0	53.0	54.0	55.0	57.0	59.0
3	64.5	67.5	70.5	73.5	76.5	79.5	81.0	82.5	85.5	88.5
4	86.0	90.0	94.0	98.0	102.0	106.0	108.0	110.0	114.0	118.0
5	107.5	112.5	117.5	122.5	127.5	133.5	135.0	137.5	142.5	147.5
6	129.0	135.0	141.0	147.0	153.0	159.0	162.0	165.0	172.0	177.0
7	150.5	157.5	164.5	171.5	178.5	185.5	189.0	192.5	199.5	206.5
8	172.0	180.0	188.0	196.0	204.0	212.0	216.0	220.0	228.0	236.0
9	193.5	202.5	211.5	220.5	229.5	238.5	243.0	247.5	256.5	265.5

By means of the above table, taken in conjunction with the column of the following page headed "Equivalent Weight of Standard Silver in Troy Ounces," the intrinsic value of any coin can be easily calculated with silver at several prices other than those given. It will only be necessary to take the numbers representing tenths, hundredths, and thousandths of ounces in that column, and the numbers opposite to them in the column of the above table giving the price of silver, and add these together, taking care to move the decimal point successively one, two, and three places to the left; the result will be the coin's intrinsic value in pence.

Price of Silver, 1899-1908.

The Average Yearly Price of Silver per standard Troy Ounce in the London Market during the last ten years was as follows:—

1899.	1900.	1901.	1902.	1903.	1904.	1905.	1906.	1907.	1908.
d. 27½	d. 28¼	d. 27½	d. 24½	d. 24¼	d. 26½	d. 27½	d. 30½	d. 30½	d. 24½

In the United States the price of silver is quoted in cents per troy ounce *fine*. In order to convert an English quotation into cents per ounce *fine*, first express the pence as a whole number

and decimal fraction and then multiply by a 100; to express a United States price on the English system multiply the cents by 0.4526.

Foreign Moneys and their English Equivalents.

Argentine Moneys. France, Belgium, Italy, Greece, and Switzerland constitute what is known as the "Latin" Union, and their coins are alike in weight and fineness. occasionally differing, however, in name. The same system has been followed in Spain, Portugal, Russia, and Rumania, but they have not joined the Union. France and countries in Spain, Italy and Rumania; levas and stotinki in Bulgaria. Similarly the Scandinavian countries, Norway, Sweden, and Denmark, employ coins of the same weight and fineness, their names being also alike. Special coins are struck for Austria and Hungary, identical in value but of different designs. Most of the above States possess a standard coin, equal in weight and fineness to that of the French franc, but usually without a gold currency, paper taking its place. The standard silver coin, in all other South American States gold, but usually without a gold currency, paper taking its place.

The exchange value of the moneys of these countries indicated by * is determined by the rate of exchange for the day, and may be taken as approximately that given in the last column. The rate of exchange of the Russian rouble is determined by the number of the standard coins that are equivalent to our sovereign. The Spanish rate is given in terms of pence per column. The rate of the Russian in pence per rouble, Portuguese in pence per milreis, and the United States rate in pence per dollar. The approximate value of other coins must be sought in one of the columns headed "Intrinsic Value with Silver at per Troy Oz." In "bimetallic" countries pure gold is generally taken as being worth 154 times its weight of pure silver. This proportion corresponds to giving standard silver a constant value of 62½. As in the last column of the table.

Colonial Moneys and their English Equivalents.

IMPERIAL sterling coins are the sole legal metallic currency in the following British Colonies:—

AUSTRALASIA.
CAPE OF GOOD HOPE AND SOUTH AFRICA
GENERALLY.
FALKLAND ISLANDS.
FIJI.
GIBRALTAR.
ST. HELENA.

In the following Colonies special coins are current in addition to the Imperial series:—

BRITISH GUIANA AND CERTAIN W. INDIAN ISLANDS.—A special groat or fourpence.
GUERNSEY.—Eight doubles (= 1 penny), 4, 2, and 1 double.
JAMAICA.—Nickel-bronze pence, halfpence, and farthings.
JERSEY.—Special pence, halfpence, and MALTA.—One-third of a farthing.
NIGERIA, NORTH AND SOUTH.—One penny (nickel-bronze) and one-tenth penny (aluminium and nickel-bronze), both perforated.

COLONIES POSSESSING SPECIAL METALLIC CURRENCIES.

COLONY.	STANDARD COIN.	SUBSIDIARY COINS.
BRITISH HONDURAS ...	U.S. Gold Dollar, and all U.S. gold coins. British Sovereign = \$4.867. " $\frac{1}{2}$ = \$2.433.	Silver—50, 25, 10, and 5 cents. Nickel-bronze—5 cents. Bronze—cents.
BRITISH NORTH BORNEO	Mexican Dollar.	Nickel-Bronze—5, 2½ and 1 cents. Bronze—1 and ½ cent.
CANADA	Same as British Honduras, but dollar of U.S. is described as \$4.86½ = £1.	Silver—50, 25, 10, and 5 cents. Bronze—cents.
CEYLON	Indian Rupee at fixed rating, 15 rupees = £1.	Silver—50, 25, and 10 cents; ½ and ¼ Indian rupees. Copper—5, 1, ½, and ¼ cents.
CYPRUS	British Sovereign = 180 piastres.	Silver—18, 9, 4, and 3 piastres. Bronze—1, ½, and ¼ piastre.
EAST AFRICA AND UGANDA	Indian Rupee at fixed rating, 15 rupees = £1.	Silver—50 and 25 cents. Nickel-bronze (perforated)—10 and 5 cents. Aluminium and nickel-bronze (perforated)—1 and ½ cent.
HONG KONG AND LABUAN	Mexican Dollar, British Dollar, or Hong Kong Dollar.	Silver—50, 20, 10, and 5 cents. Bronze—1 and ½ cent.
INDIA	Indian Rupee at fixed rating, 15 rupees = £1. (1 rupee = 16 annas = 64 pice.)	Silver—½, ¼, and ⅛ rupee. Copper—2, 1, ½ pice, and ⅓ pice or pie.
LABUAN	(See Hong Kong).	Nickel—1 anna (serrated).
MAURITIUS AND SEYCHELLES	Indian Rupee at fixed rating, 15 rupees = £1.	Silver—20 and 10 cents. Bronze—5, 2, and 1 cents.
NEWFOUNDLAND	Two-dollar Gold Piece = 100 pence.	Silver—50, 20, 10, and 5 cents. Bronze—cents.
STRAITS SETTLEMENTS	S.S. Dollar, or British Sovereign—7 sovs. = 60 S.S. dollars. Also S.S. ½ dollar.	Silver—50, 20, 10, and 5 cents. Bronze—1, ½, and ¼ cent.
UGANDA	(See East Africa).

IN PERPETUITY.

EXAMPLE 1.—What is the present value of a Lease having 37 years to run of the net annual value of £100, interest being reckoned at 4 per cent.? ANSWER.—£174 years' purchase, or £1,974.

EXAMPLE 2.—A man, aged 54, in the receipt of a pension or annuity of £100 a year net, wishes to commute that for a present payment, interest being reckoned at 5 per cent. How much will he receive? ANSWER.—Looking at the Table of Expectation of Life (p. 423), it will be seen that the expectation for age 54 is about 17 years; and

from the above table an annuity certain for 17 years, interest at 5 per cent., is worth 17.27 years' purchase. The present payment required would therefore be £1,727 approximately.

NOTE TO EXAMPLE 2.—This method is only approximate. The values of annuities which depend on lives of a given present age, when properly calculated according to a given mortality table and a given rate of interest, are always somewhat less than those given by the method used in this example.

THE following are Dr. W. Ogle's tables founded on the death-rates of 1871-80; in the 1897 Almanack a table appeared (p. 357) giving, alongside of the following, statistics compiled by Dr. Farr, of the General Register Office, on the basis of the death-rates of 1838-54. These columns are now omitted, and only the more recent figures appear. The first columns show the survivors of each sex at each year of life out of a million born; the other columns show the expectation of life at each year.

AGE.	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).		AGE.	OF 1,000,000 BORN, THE NUMBER SURVIVING AT THE END OF EACH YEAR OF LIFE.		MEAN AFTER-LIFETIME (EXPECTATION OF LIFE).	
	Male.	Female.	Male.	Female.		Male.	Female.	Male.	Female.

* When the annuity is payable at the beginning instead of at the end of the year, the amount for the following year, less $\frac{1}{2}$, must be taken. Thus, for $\frac{1}{2}$ at 21 per cent, for 25 years, take 26 years, $\frac{1}{2}$ per cent, and deduct $\frac{1}{2}$ - $\frac{1}{2}$ per cent.

REPAYMENT OF PUBLIC LOANS.

LARGE sums of money are every year advanced to County or District Councils and other public bodies, for improvements, building of workhouses, schools, harbours, bridges, &c., to be repaid in a given number of years, including interest. The following scheme of tables for the repayments of Loans was compiled under the Local Government Act, 1888, and examined by the actuary of the National Debt Office. It gives the sums needed

as the annual amount of principal combined with interest required for the liquidation of a debt of £100, at the stated percentage, in 10, 20, 30, 40, and 50 years:—

Years	3 per Ct.	4 per Ct.	5 per Ct.	6 per Ct.	7 per Ct.	8 per Ct.
10	£ 8. 8. d.	£ 8. 8. d.	£ 8. 8. d.	£ 8. 8. d.	£ 8. 8. d.	£ 8. 8. d.
20	12 14 5	12 0 5	12 0 5	12 0 5	12 0 5	12 0 5
30	16 14 5	16 0 5	16 0 5	16 0 5	16 0 5	16 0 5
40	20 14 5	20 0 5	20 0 5	20 0 5	20 0 5	20 0 5
50	24 14 5	24 0 5	24 0 5	24 0 5	24 0 5	24 0 5

If the loan be for £1,000, each annual instalment as shown above must be multiplied by 10; if for £2,000, then by 20, and so on.

To ascertain the Weight of Paper.

A quire of paper contains 24 perfect sheets; an outside quire 20, some of which may be torn.

Sizes of Type.

ALL Founders cast their type nearly to one uniform height, though the letters may vary considerably in their breadth.

The type chiefly used in this Almanack is named *Nonpareil*. The column contains 75 lines, and is, technically, 12 Pica ems wide; on an average every column actually contains about 3,000 letters. The compositor in making out his bill reckons that the column contains so many (1,800) ems; he then, doubling that number, charges as so many (3,600) ems.

A very minute type, used only occasionally, is:—*Brilliant*. A column the size of this in the Almanack if set in *Brilliant* would contain 124 lines, and about 7,500 letters.

Printing is the art of producing impressions, from characters or figures,

Diamond is the next size; the column would contain 107 lines, and about 6,000 letters.

Metric Weights and Measures.

THE Metric System is based upon the (assumed) length of the direct distance from the Equator to the North Pole. The ten-millionth part of this distance, as calculated in 1795, was adopted by the French Government as the unit of length, and called a *metre*. All other measurements are derived from this unit; the cube of the tenth part of the *metre* is the unit of capacity, called a *litre*, and the weight of a litre of water, at a certain temperature is the unit of weight, called a *kilogramme*. The unit of land measurement is 10,000 sq. *metres*, called a *hectare*. The above terms are now used in this country under the English names of meter, liter, kilogram, and hectare. In the designs at the left of the page, the figures refer to inches and centimeters, the former being divided into 16ths, 8ths, 4ths, and the latter into millimeters.

Rough Comparisons.

o centimeters =	4 inches	8 kilometers =	5 miles.
x liter =	1 $\frac{3}{4}$ pints	x cubic meter =	220 gallons.
x kilogram =	2 $\frac{1}{2}$ lbs.	x,000 kilograms =	1 ton.
x sq. meter =	10 sq. feet.	x hectare =	2 $\frac{1}{2}$ acres.

Accurate Comparisons.

EQUIVALENTS OF METRIC WEIGHTS AND MEASURES IN TERMS OF IMPERIAL WEIGHTS AND MEASURES FOR USE IN TRADE.

Metric to Imperial.

LINEAR MEASURE.

x millimeter (mm.) =	0.03937 inch.
x centim. (x-100th m.) =	0.3937
x decimeter (x-10th m.) =	3.937 inches.
x meter (m.) =	{ 39.370113 INCHES. 3.280843 FEET. 1.093613 YARDS.
x decimeter (10 m.) =	10.936 yards.
x hectometer (100 m.) =	109.36 "
x kilometer (1,000 m.) =	0.62137 mile.

SQUARE MEASURE.

x square centimeter =	0.15500 sq. inch.
x sq. decimeter (100 sq. centimeters) =	15.500 sq. inches.
x sq. meter (100 sq. decimeters) =	{ 10.7639 sq. feet. 1.1960 sq. yards.
x are (100 sq. meters) =	119.60 "
x hectare (100 ares or 10,000 sq. meters) =	2.4711 acres.

CUBIC MEASURE.

x cubic centimeter =	0.0610 cubic in.
x cubic decimeter (c.d.) (1,000 cubic centimeters) =	61.024 cubic ins.
x cubic meter (1,000 cubic decimeters) =	{ 35.3147 cubic feet. 1.357954 " yds.

MEASURES OF CAPACITY.

x centilit. (x-100th liter) =	0.070 gill.
x deciliter (x-10th liter) =	0.707 pint.
x liter =	1.75980 PINTS.
x dekaliter (10 liters) =	2.600 gallons.
x hectoliter (100 liters) =	2.75 bushels.

WEIGHT.

x Milligram (x-1,000th grm.) =	Avoirdupois. 0.015 grain.
x centigram (x-100th grm.) =	0.154 "
x decigram (x-10th grm.) =	1.543 grains.
x gramme (x grm.) =	15.432 "
x dekagram (10 grm.) =	154.4 drams.
x hectogram (100 grm.) =	3.527 oz.
x KILOGRAM (1,000 grm.) =	{ 2.204622 LB. OF 154.323564 GRAINS.
x myriagram (10 kilog.) =	22.046 lb.
x quintal (100 kilog.) =	226.8 cwt.
x tonne (1,000 kilog.) =	0.9842 ton.

x gramme (x grm.) =	0.03215 oz. troy.
x gramme (x grm.) =	15.432 grains.
x gramme (x grm.) =	1.543 grains.
x gramme (x grm.) =	0.2572 drachm.
x gramme (x grm.) =	0.7716 scruple.
x gramme (x grm.) =	15.432 grains.

Imperial to Metric.

LINEAR MEASURE.

x inch =	25.400 millimeters.
x foot (12 inches) =	0.30480 meter.
x yard (3 feet) =	0.914399 METER.
x fathom (6 feet) =	1.8288 meters.
x pole (16 yards) =	5.0292 "
x chain (22 yards) =	20.1168 "
x furlong (220 yards) =	201.168 "
x mile (8 furlongs) =	1.6093 kilometers.

SQUARE MEASURE.

x square inch =	6.4516 sq. centimeters.
x sq. foot (144 sq. inches) =	9.2903 sq. decimeters.
x sq. yard (49 sq. feet) =	0.836126 sq. meter.
x perch (160 sq. yards) =	35.233 sq. meters.
x rood (40 perches) =	10.117 ares.
x acre (4,840 sq. yards) =	0.40468 hectare.
x sq. mile (640 acres) =	259.00 hectares.

CUBIC MEASURE.

x cubic inch =	16.387 cub. centimeters.
x cubic foot (1,728 cubic inches) =	0.028317 cubic meter.
x cubic yard (27 cubic feet) =	0.764553 " "

MEASURES OF CAPACITY.

x gill =	1.42 deciliters.
x pint (4 gills) =	0.568 liter.
x quart (2 pints) =	1.136 liters.
x GALLON (4 quarts) =	3.785062 LITERS.
x peck (2 gallons) =	9.0908 liters.
x bushel (8 gallons) =	3.637 dekaliters.
x quarter (8 bushels) =	3.609 hectoliters.

APOTHECARIES MEASURE.

x minim. =	0.059 milliliter.
x fluid scruple =	1.234 milliliters.
x fluid drachm (60 minims) =	3.550 "
x fluid ounce (8 drachms) =	2.84123 centiliters.
x pint =	0.568 liter.
x GALLON (8 pints or 120 fluid ounces) =	3.785062 liters.

Time and Watch on Board Ship.

WATCH.—For purposes of discipline, and to divide the work fairly, the crew is mustered in two divisions: the Starboard (right side, looking forward) and the Port (left). The day commences at noon, and is thus divided:—

Afternoon Watch noon to 4 p.m.
First Dog " 4 p.m. to 6 p.m.
Second Dog " 6 p.m. to 8 p.m.
First " 8 p.m. to midnight.
Middle " 12 a.m. to 4 a.m.
Morning " 4 a.m. to 8 a.m.
Forenoon " 8 a.m. to noon.

This makes seven WATCHES, which enables the crew to keep them alternately, as the Watch which is on duty in the forenoon one day has the afternoon next day, and the men who have only four hours' rest one night have eight hours the next. This is the reason for having Dog Watches, which are made by dividing the hours between 4 p.m. and 8 p.m. into two Watches.

TIME.—Time is kept by means of "Bells," although there is but one bell on the ship, and to strike the clapper properly against the bell requires some skill.

First, two strokes of the clapper at the interval of a second, then an interval of two seconds; then two more strokes with a second's interval apart, then a rest of two seconds, thus:—

BELL, ONE SECOND; B., TWO SECS.; B. S.; B. SS. B. S.; B. SS.; B.

1 Bell is struck at 12.30, and again at 4.30, 6.30, 8.30 p.m.; 12.30, 4.30, and 8.30 a.m.

2 Bells at 1 (struck with an interval of a second between each—B. S., B.), the same again at 5, 7, and 9 p.m.; 1, 5, and 9 a.m.

3 Bells at 1.30 (B. S., B. SS., B.), 5.30, 7.30, and 9.30 p.m.; 1.30, 5.30, and 9.30 a.m.

4 Bells at 2 (B. S., B. SS., B. S., B.), 6 and 10 p.m.; 2, 6, and 10 a.m.

5 Bells at 2.30 (B. S., B. SS., B. S., B. SS., B.) and 10.30 p.m.; 2.30, 6.30, and 10.30 a.m.

6 Bells at 3 (B. S., B. SS., B. S., B. SS., B. S., B.) and 11 p.m.; 3, 7, and 11 a.m.

7 Bells at 3.30 (B. S., B. SS., B. S., B. SS., B. S., B. SS., B.) and 11.30 p.m.; 3.30, 7.30, and 11.30 a.m.

8 Bells (B. S., B. SS., B. S., B. SS., B. S., B. SS., B. S., B.) every 4 hours, at noon, at 4 p.m., 8 p.m., midnight, 4 a.m., and 8 a.m.

METRIC CONVERSION—continued.

AVOIRDUPOIS WEIGHT.

1 grain	=	0.0648 gramme.
1 dram	=	2.772 grammes.
1 ounce (16 drams)	=	28.350 grammes.
1 pound (16 ounces or 7,000 grains)	=	453.59243 KILOGRAM.
1 stone (14 lb.)	=	6.350 kilogrammes.
1 quarter (28 lb.)	=	12.70 " "
1 hundredweight (cwt.) (112 lb.)	=	50.80 " "
1 ton (20 cwt.)	=	0.9070 quintal.
	=	1.814 tonnes or 1.814 kilogrammes.

TROY WEIGHT.

1 grain	=	0.0648 gramme.
1 pennyweight (24 grains)	=	1.754 grammes.
1 troy ounce (48 pennyweights)	=	31.1035 " "

APOTHECARIES WEIGHT.

1 grain	=	0.0648 gramme.
1 scruple (20 grains)	=	1.296 grammes.
1 dram (3 scruples)	=	3.888 " "
2 oz. (8 drachms)	=	31.1035 " "

Note.—Approximately one liter equals 1.000 cubic centimeters, and one milliliter equals 1.0000 cubic centimeters.

THERMOMETER.

Comparison between Scales of Fahrenheit, Réaumur, and the Centigrade.

Fahrenheit			Réaumur			Centigrade

26	78.8	20.8	49	-56.2	-12.8	-64	-92.4	-104

Freezing point = 32° F = 0° C; Boiling point = 212° F = 100° C = 80° R. To convert degrees CENTIGRADE or RÉAUMUR into degrees FAHRENHIT, or vice versa, use one of the following formulae:—
Let F = Number of degrees Fahrenheit, C = Number of degrees Centigrade, and R = Number of degrees Réaumur, then—
$$F = \frac{9}{5}C + 32$$

$$C = \frac{5}{9}(F - 32)$$

$$R = \frac{4}{5}(F - 32)$$

$$F = 9R + 32$$

$$R = \frac{F - 32}{4}$$

$$C = \frac{5}{9}(F - 32)$$

UNIFORMITY.—In 1824 an Act was passed rendering uniformity compulsory from the 1st of January, 1826, since which time the Imperial Statute System of Weights and Measures has been in general use, although some remains of the older forms still linger.

Avoirdupois Weight.

Drachm	dr. = 27 $\frac{3}{4}$ grains.
Ounce	oz. = 16 drachms, 437 $\frac{5}{8}$ grains.
Pound	lb. = 16 oz., 256 dr., 7,000 grains.
Customary Stone.....	st., Butcher's Meat = 8 lb.
Legal Stone.....	st. = Horseman's weight = 14 lb.
Quarter	qr. = 25 lb.
Cental or Quintal, cent.	= 100 lb.
Hundredweight, cwt.	= 4 qr., 112 lb.
Ton	T. = 20 cwt., 2,240 lb.

Avoirdupois weight is used in all commercial transactions and common dealings, but in addition to the above there are special local weights for various articles, the chief of which are:—

A Quarter Loaf	= 4 lb.
A Peck of Flour, 2 Gallons (assumed) ..	= 14 "
A Firkin of Butter.....	= 56 "
A Barrel of Butter—4 firkins	= 224 "
A Firkin of Soft Soap (assumed) ..	= 64 "
A Box of Fish (assumed)	= 90 "
A Barrel of Gunpowder	= 100 "
A Barrel of Raisins	= 112 "
A Seam of Glass, 24 stones of 5 lb. ..	= 120 "
A Barrel (or pack) of Soft Soap.....	= 256 "
A Faggot of Steel	= 120 "
A Pig of Ballast	= 56 "
A Fodder of Lead, London and Hull ..	= 19 $\frac{1}{2}$ cwt.
A do. Derby = 22 $\frac{1}{2}$ cwt.; Newcastle ..	= 21 $\frac{1}{2}$ "
A Cask of Blacklead	= 11 $\frac{1}{2}$ "
A Sack—Flour, 280 lb.; Coals, 224 lb.; a ton of Coals, 10 sacks.	

The Metrical System of Weights is used in Belgium, France, Germany, Italy, Portugal, Spain, Sweden and Norway, and some other countries; the unit of which is the *Gramme* = 15 $\frac{1}{16}$ grains; the chief multiple of the Gramme is the *Kilogramme* = 2 $\frac{1}{2}$ cwt. 46 lb.; in practical use this is found inconvenient for small purchases, and nearly all commodities are sold by the demi or half kilo. The *Centner* of 50 kilos = 110 $\frac{1}{4}$ lb., very nearly represents the English cwt.; but heavy goods are sold by the *Tonneau* of 2204 $\frac{6}{16}$ lb., about 19 cwt. 77 lb., the *Myriagramme* being ignored.

In the United States and in Canada the cwt. is generally reckoned as 100 lb., and the ton of 20 cwt. = 2,000 lbs.

In Russia the *Pood* of 36 lb. is the commercial weight: 62 $\frac{1}{2}$ Poods = 1 English ton.

Indian Weights (Bengal).

Tola, unit of postage =	180 grains.
Chittak = 5 Tolas; Seer (16 Chittaks) =	2 $\frac{1}{2}$ lb.
Imperial or Indian Maund = 32 $\frac{1}{2}$ lb. =	40 seer.

Madras.

Viss = 3 $\frac{1}{2}$ lbs., Maund =	25 lb., Candy = 500 lb.
--------------------------------------	-------------------------

Troy and Apothecaries Weight.

Carat	= 3 $\frac{1}{8}$ grains.
Pennyweight	dwt. = 24 grains.
Ounce	oz. = 20 dwt., 480 gr.
Pound	lb. = 12 oz., 240 dwt., 5,760 gr.
Hundredweight, cwt.	= 100 lb.

Troy is the weight used by goldsmiths and jewellers. The grains Troy, Apothecaries', and Avoirdupois are equal, and the same in England,

France, the United States, Holland, and in most other countries; but the carat varies: in France it is 3 $\frac{1}{8}$ grains, in Holland 3 $\frac{1}{2}$ gr., and in the U.S. 3 $\frac{1}{2}$ gr. In the U.K. the jewellery ounce is divided into 15 $\frac{1}{2}$ carats or 600 pearl grains.

The oz. Troy and Apothecaries' = 1 $\frac{1}{2}$ oz. avoirdupois; but the lb. Troy and lb. Apothecaries' = only 8 $\frac{1}{2}$ lb. avoirdupois; while 175 lb. Troy and Apothecaries' = 144 lb. avoirdupois.

Apothecaries' Weight.

Scruple \mathfrak{S} = 20 Grains.....	= 20 gr.
Drachm \mathfrak{D} = 3 Scruples.....	= 60 "
Ounce \mathfrak{Z} = 8 Drachms	= 160 "
Pound \mathfrak{L} = 12 Ounces	= 5760 "

The avoirdupois oz. of 437 $\frac{1}{2}$ grains, and the lb. of 7,000 grains, are the weights named in the British Pharmacopoeia; drugs are purchased by avoirdupois, but compounded by Apothecaries' weight. The Apothecaries' oz. and lb. may now be considered obsolete.

Hay and Straw.

Truss of Straw, 36 lb.	Truss of Old Hay, 56 lb.
Truss of New Hay (to September 1st), 60 lb.	
Load, 36 Trusses—Straw, 11 cwt. 2 qr. 8 lb.; Old Hay, 18 cwt.; New Hay, 19 cwt. 1 qr. 4 lb.	

Wool.

Clove, cl. = 7 lb.	
Stone, st. = 2 Cloves =	14 lb.
Tod, td. = 2 Stones =	1 qr.
Wey, wy. = 6 $\frac{1}{2}$ Tod =	1 cwt. 2 qr. 14 lb.
Pack, pk. = 240 lb.	
Sack, sk. = 2 Weys =	13 qr.
Last, la. = 12 Sacks =	1 cwt. 19 lb.

Since the advent of SHODDY, some of the above weights have become nearly obsolete, although the terms are still in use with different values: thus 16 lb. = 1 st.; 28 lb. = 1 Tod; 20 lb. = 1 Score; 12 Score or 240 lb. = 1 Pack.

Worsted Yarn.

Wrap, 80 yards; Hank = 560 yards = 7 Wraps; Counts or Numbers are the number of hanks in a lb.

Cotton Wool.

Bale variable in United Kingdom; U.S.A. average 477 lb.; Egyptian, 719 lb.; East Indian, 396 lb.; Brazilian, 220 lb.

Cotton Yarn.

Thread = 1 $\frac{1}{2}$ yards.
Lea, or Skein, skn. = 120 Yards.
Hank, hk. = 7 Skeins, or Leas = 840 yds. } Also same for Silk
Spindle, spdl. = 18 Hanks.
Counts = the number of Hanks in 1 lb.
Bundle Hanks, either of 5 lb. or 10 lb.
Reels of Cotton vary from 30 to 1,760 yards; by the new Act must be marked correctly.
Bundles of Cotton are chiefly made up for export.

Liquid Measure.

The GALLON holds 10 lb. av. of water (strictly distilled at 62° Fahr.) and measures 277 $\frac{1}{4}$ cubic inches (1 cubic foot holds 62 $\frac{1}{2}$ gal.)	
1 gallon = 2 quarts = 8 pints (each holding 20 oz. of water as above) = 32 gills.	
Pin = 4 $\frac{1}{2}$ Gallons or $\frac{1}{2}$ Barrel.	Gals. Qts. Pts.
Firkin or Quarter Barrel	9 36 72
Anker (10 gallons)	10 40 80
Kilderkin, Rundlet, or $\frac{1}{2}$ Barrel	18 72 144
Barrel	36 144 288
Tierce (42 gallons)	42 168 336
Hogshead of Ale (1 $\frac{1}{2}$ barrels)	54 216 432
Punchon	72 288 576
Butt of Ale	108 432 864

Practically, the only measures in use are gallons, quarts, pints, and gills, the others are merely nominal; *e.g.*, the hogshead of 54 gallons, *old measure*, contains but 52 gallons, 1 quart, 1 pint, and 355 gills imperial measure; and of wine six nominal quart bottles go to the gallon. Of wines imported in casks the following are the usual measurements:—

Pipe of Port or Masdeu	= 115 gallons.
„ Teneriffe	= 100 „
„ Marsala	= 93 „
„ Madeira and Cape	= 92 „
„ Sherry and Tent	= 108 „
Butt of Lisbon and Bucellas	= 117 „
Aum of Hock and Rhenish	= 30 „
Hogshead of Claret, 46; Port, 57; Sherry, 54; Madeira, 46 gallons.	

The United States use the “Winchester” gallon of 231 cubic inches; the names of measures are the same, and 6 American gallons (1386 c.i.) are practically = 5 English gallons (1386·37 c.i.)

Apothecaries' Fluid Measure. Marked

60 Minims (drops) =	1 Fluid Drachm.....	f 5
8 Drachms	= 1 Ounce.....	f 3
20 Ounces	= 1 Pint	0
8 Pints	= 1 Gallon	C., or Cong.
1 Drachm =	1 Tea-spoonful.	} <i>Prescribing medicine by the spoon, glass or cupful is unsafe, as all those vessels vary in size. Graduated glass measures may be purchased for a few pence.</i>
2 Drachms =	1 Dessert-spoonful.	
4 Drachms =	1 Table-spoonful.	
2 Ounces =	1 Wineglassful.	
3 Ounces =	1 Teacupful.	

Dry or Corn Measure.

Quart	= 2 Pints.	Strike	= 2 Bushels.
Pottle	= 2 Quarts.	Coomb	= 4 Bushels.
Gallon	= 4 Quarts.	Quarter	= 8 Bushels.
Peck	= 2 Gallons.	Load	= 5 Quarters.
Bushel	= 4 Pecks.	Last	= 10 Quarters.

Boll of Meal = 140 lb.; 2 Bolls = 1 Sack.
Wheat and other cereals are commonly sold by weight, the bushel being thus reckoned:—
Wheat, English, 63 lb. Foreign, 62 lb.
Barley, English, 52 and 56 lb. French, 52½ lb. Mediterranean, 50 lb.
Oats, English, 40 & 42 lb. Foreign, 38 & 40 lb.
Rye and Maize, 60 lb. Buckwheat, 52 lb.
Grain of all kinds is sold by stone of 14 lb.
Coals were formerly sold by measure: 3 heaped bushels = 1 sack, 12 sacks = 1 chaldron. Coke, apples, potatoes, and some other goods are still sold by heaped measures and the sack of three bushels; of coke, four bushels are usual.

Fruit.—The Covent Garden bushel basket is 17½ inches in diameter at top, 10 inches at the bottom, and is 10 inches deep. The smaller market baskets are said to vary in size according to the season and the supply.

Cubic or Solid Measure.

Cubic Foot	= 1,728 Cubic Inches.
Cubic Yard	= 27 Cubic Feet, 21'033 bushels.
Stack of Wood	= 120 Cubic Feet.
Shipping Ton	= 40 Cubic Feet merchandise.
Shipping Ton	= 42 Cubic Feet of Timber.
Ton of displacement of a Ship = 35 Cubic Feet.	

Measures of Length.

Mile Geographical, Admiralty Knot, or Nautical	
Mile, 6,080 Feet = 1013½ fathoms = 1·15 Mile Statute.	
33 Knots = 38 Statute Miles.	
League = 3 Miles.	
Degree = 60 Geographical = 69·121 Statute Miles.	

Inch, in.	= 72 Points, or 12 Lines.
Nail, 1½	= 2½ Inches.
Palm	= 3 Inches.
Hand	= 4 Inches.
Link	= 7½ Inches.
Quarter (or a Span)	= 9 Inches.
Foot	= 12 Inches.
Cubit	= 18 Inches.
Yard	= 36 Inches.
Pace, Military	= 2 Feet 6 Inches.
Pace, Geometrical	= 5 Feet.
Fathom	= 6 Feet.
Rod, Pole, or Perch	= 5½ yards.
Chain (100 Links) ...	= 22 Yards (4 Poles).
Cable's Length	= 100 Fathoms, 600 Feet.
Furlong	= 40 Rods, 220 Yards.
Mile	= 8 Furlongs, 80 Chains, 320 Rods, 5280 Fathoms, 1,760 Yards, 5,280 Feet, 63,360 Inches.

Although no longer sold by that measure, Calicos, &c., are sometimes said to be “Ell wide”—the English Ell being 1½ yard, the Flemish Ell ¾ yard, and the French Ell 1½ yard.
The old *Scottish Mile* was 5,920 feet; ten *Scots Miles* being about equal to 11.21 Statute Miles. *Irish Mile* is 6,720 feet; eleven *Irish Miles* being equal to 14 Statute Miles.

Square, Surface, or Land Measure.

Square Foot = 144 Square Inches.	
Yard = 9 feet = 1,296 inches.	
Rod, Pole, or Perch = 30½ yards = 272½ feet.	
Chain = 16 rods = 484 yards = 4,356 feet.	
Rood = 40 rods = 1,280 yards = 10,890 feet.	
Acre = 4 roods = 160 rods = 4,840 yards.	
Yard of Land = 30 acres = 120 rods.	
Hide = 100 acres = 400 rods.	
Mile = 640 acres = 2,560 rods = 6,400 chains = 102,400 rods, poles, or perches, or 3,097,600 square yards.	
An Acre of four equal sides = 69·57 yards each or 208·71 feet. The sides of a square half-acre of equal sides = 147·581 feet, and of a square quarter-acre, 104·355 feet.	
The above Imperial Measure is employed in the United Kingdom, in Canada, Australia, and the Colonies generally also in the United States; but occasionally some older measurements are referred to. Of these—	
The Lancashire and Irish Acre, each of 16c perches, contain 7,840 sq. yards, equal to 1·615835 Statute. 1 Statute = 0·617347 Lancashire or Irish.	
The Cheshire Acre of 160 perches, each = 64 sq. yards = 10,240 sq. yards = 2·1157 acres.	
The Cunningham Acre, equal to 1·27322 Statute; or 1 Statute Acre is equal to 0·7744 Cunningham.	
The Scottish Acre = 1·261183 Statute (nearly 6,104 square yards).	

Measures of Time.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Hour.
24 Hours	= 1 Day.
(23h. 56m. 4s. = 1 Sidereal Day.)	
7 Days	= 1 Week.
28 Days	= 1 Lunar Month.
28, 29, 30, or 31 Days	= 1 Calendar Month.
12 Calendar Months	= 1 Year.
365½ Days	= 1 Common Year.
366 Days	= 1 Leap Year.
365d. 5h. 48m. 46s.	= 1 Tropical Year.
The Astronomical Day commences at noon, and is computed from 1 to 24 hours.	
In 400 years 97 are Leap-years and 303 common, Leap-year being omitted every 100th year, but not omitted every 400th. (1900 was not a Leap year.)	

Angular Measure.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Degree.
30 Degrees	= 1 Sign.
90 Degrees	= 1 Quadrant.
4 Quadrants, or 360°	= 1 Circumference.

The Earth rotates at a velocity of 15 degrees an hour of time at the Equator (about 17° 36 miles a minute); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of Circle $\times 3 \cdot 1416$ = Circumference.
 Diameter Squared $\times \cdot 7854$ = Area of Circle.
 Diameter Squared $\times 3 \cdot 1416$ gives Surface of Sphere.
 Diameter Cubed $\times \cdot 5236$ = Solidity of Sphere.
 One Degree of Circumference $\times 57 \cdot 3$ gives Radius.
 Diameter of Cylinder $\times 3 \cdot 1416$; product by length or height, gives the Surface.
 Diameter Squared $\times \cdot 7854$; product by length or height, gives Solid Content.

A Circular Acre is 235' 504 feet, a Circular Rod 127' 752 feet in diameter. The Circumference of the Globe is about 24,855 miles, and the Diameter about 7,900 miles.

Electrical Measures.

It is customary among electricians to express all measurements in terms of the centimeter, gramme, second (C.G.S.) system, either as force or work according to their nature, and, due allowance being made for the effect of gravitation, these units are called "absolute"; but it is fair to mention that the accuracy aimed at has not, and probably never will be, attained.

For practical and commercial purposes the chief units are the—

VOLT..... For the measure of Electromotive force = about 92·6% of that given by one Daniell's battery cell.

OHM..... Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.

AMPÈRE..... Current = the current 1 volt will drive through 1 ohm.

COULOMB..... Quantity = 1 ampère flowing for 1 second of time.

MICROFARAD Capacity = '000,001 coulomb at 1 volt pressure.

WATT..... Power = 44 ft. lb. per minute.

Board of Trade Unit = 1,000 watts 1 hour.

746 watts = 1 horse-power.

In carbon lamps of 16-candle power (nominal) about four watts are required per candle power to give good economical results for domestic purposes. One Board of Trade unit will keep a 16-candle carbon lamp alight for about 16 hours; metallic filament lamps require less.

Fish Measure.

Herrings are sold by the *Cran*, containing 37½ imperial gallons or *Half Cran* of 18½ imperial gallons (or *Barrel*, for white herrings, of 26½ imperial gallons) on the East Coast of Scotland from Shetland to Berwick, also at Castle Bay and Stornoway; but on the West Coast, Isle of Man, and in Ireland, by the *Maze*, which contains 5 long hundreds of 123 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred, 134; 10 Hundreds = 1 Thousand, 1,320; 10 Thousand = 1 Last, 13,200.

Timber and Wood.

40 cubic feet rough, 50 cubic feet squared = 1 load.
 50 cubic feet of planks = 1 load.
 100 superficial feet = 1 square of flooring.
 120 Deals = 100.

Width of Battens, 7 inches; Deals, 9 inches; Planks are 2 to 4 inches thick, and 10 or 11 inches wide. A Cord of Wood is 2½ tons, or 125 cubic feet.

Carpenters', Bricklayers', and Builders' Measurements.

Stock or kiln bricks	8½ inches $\times \frac{1}{4} \times \frac{3}{4}$
Welsh fire-bricks	9 " $\times \frac{1}{4} \times \frac{3}{4}$
Paving bricks	9 " $\times \frac{1}{4} \times \frac{3}{4}$
Square tiles	9½ " $\times \frac{9}{16} \times 1$
"	6 " $\times \frac{5}{8} \times 1$
Dutch clinker bricks	9½ " $\times 3 \times 1\frac{1}{2}$

A Rod of Brickwork 16½ feet \times 16½ feet \times 1½ brick thick = 306 cubic feet, or 11½ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.

A Square of Flooring is 100 square feet.

A Piece of Wall Paper is 12 yd. long \times 27 in. wide (English), and 9 yd. \times 18 in. (French).

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton, 11 cwt., 1 qr.

Sizes of Slates.

Empress	in. in. 26 x 16	Ladies	in. in. 16 x 10
" Small	26 x 14	" Small	16 x 8
Princesses	24 x 14	" Large	14 x 12
Duchesses	24 x 12	"	14 x 8
Marchionesses	22 x 12	Plantation	13 x 11
" Small	22 x 11	Doubles	13 x 10
Countesses	20 x 10	"	13 x 7
" Wide	20 x 12	Smalls	12 x 8
Viscountesses	18 x 10	Ditto	12 x 6
" Small	18 x 9	Ditto	11 x 5½

Water.

Cubic inch..... = 252·458 grains.

Gallon (277·274 cub. in.) = 10 lb. (distilled)

Cubic foot = 62·321 lb. |

35'943 cubic ft. (224 gals.) = 1 ton.

Water for Ships: Ton, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Gisterns: A cistern 4 feet by 2½ and 3 deep will hold brimful 186·953 gallons, weighing 16 cwt. 2 qrs. 21·6 lb. in addition to its own weight.

An inch of rain on the surface of an imperial acre = 43,560 sq. feet = 3,630 cubic feet = 100'993 tons.

A TON WEIGHT OF THE FOLLOWING WILL

AVERAGE IN CUBIC FEET

Earth	21	Coal, Newcastle	43
Clay	18	Pit Sand	22
Chalk	14	River ditto	19
Thames Ballast	20	Marl	23
Coarse gravel	19	Shingle	23
Coal, Welsh	40	Night Soil	18

A cubic foot of pure gold weighs 1,200 lb., pure silver 655 lb., cast iron 450 lb., copper 550 lb., lead 710 lb., pure platinum 1,220 lb., tin 456 lb., aluminium 163 lb.

Old Scottish Measures.

LIQUIDS.

4 Gills..... = 1 Mutchkin.	2 Pints..... = 1 Quart.
2 Mutchkins = 1 Choppin.	4 Quarts..... = 1 Gallon.
	8 Gallons..... = 1 Barrel.

2 Choppins = 1 Pint.

CORN MEASURE.

4 Lippies..... = 1 Peck.	4 Firlots = 1 Boll.
4 Pecks..... = 1 Firlot.	16 Bolls = 1 Chaldier.

Old Scottish Weights.

16 Pounds 1 Ounce, 16 Ounces 1 Pound, 16 Pounds 1 Stone.

Name of Testator.	Value of Estate.	Approx. Amount of Bequest.	Name of Testator.	Value of Estate.	Approx. Amount of Bequest.
Frederick Gorringe, aged 77, of London, draper & silk mercer	£ 617,627	£ 425,000	Mrs. Annie Jane Holborn, aged 74, of Campden Hill, W.	£ 52,581	£ 23,750

			Total	£ 3,411,170	19,128,665

Angular Measure.

60 Seconds	= 1 Minute.
60 Minutes	= 1 Degree.
30 Degrees	= 1 Sign.
90 Degrees	= 1 Quadrant.
4 Quadrants, or 360°	= 1 Circumference.

The Earth rotates at a velocity of 15 degrees an hour of time at the Equator (about 17° 36' miles a minute); 1° is therefore equal to 4 minutes.

Circular Measure.

Diameter of Circle $\times 3.1416$ = Circumference.
 Diameter Squared $\times .7854$ = Area of Circle.
 Diameter Squared $\times 3.1416$ gives Surface of Sphere.
 Diameter Cubed $\times .5236$ = Solidity of Sphere.
 One Degree of Circumference $\times 57.3$ gives Radius.
 Diameter of Cylinder $\times 3.1416$; product by length or height, gives the Surface.

Diameter Squared $\times .7854$; product by length or height, gives Solid Content.

A Circular Acre is 235 504 feet, a Circular Rod 117 752 feet in diameter. The Circumference of the Globe is about 24,855 miles, and the Diameter about 7,900 miles.

Electrical Measures.

It is customary among electricians to express all measurements in terms of the centimeter, gramme, second (C.G.S.) system, either as force or work according to their nature, and, due allowance being made for the effect of gravitation, these units are called "absolute"; but it is fair to mention that the accuracy aimed at has not, and probably never will be, attained.

For practical and commercial purposes the chief units are the—

VOLT..... For the measure of Electromotive force = about 92.6% of that given by one Daniell's battery cell.

OHM..... Resistance = the resistance offered to the passage of a current of electricity by a thread of mercury 106 cm. long and 1 mm. cross section at the temperature of melting ice.

AMPÈRE..... Current = the current 1 volt will drive through 1 ohm.

COULOMB..... Quantity = 1 ampère flowing for 1 second of time.

MICROFARAD Capacity = '000,001 coulomb at 1 volt pressure.

WATT..... Power = 44 ft. lb. per minute.

Board of Trade Unit = 1,000 watts 1 hour.

746 watts = 1 horse-power.

In carbon lamps of 16-candle power (nominal) about four watts are required per candle power to give good economical results for domestic purposes. One Board of Trade unit will keep a 16-candle carbon lamp alight for about 16 hours; metallic filament lamps require less.

Fish Measure.

Herrings are sold by the *Cran*, containing 37½ imperial gallons or *Half Cran* of 18½ imperial gallons (or *Barrel*, for white herrings, of 26½ imperial gallons) on the East Coast of Scotland from Shetland to Berwick, also at Castle Bay and Stornoway; but on the West Coast, Isle of Man, and in Ireland, by the *Maze*, which contains 5 long hundreds of 123 each. On the East coast of England they are sold by the *Last*, which contains 13,200 fish. They are counted by the *Warp*, which is 4. 33 Warps = 1 Long Hundred. 132; 20 Hundred = 1 Thousand. 1,320; 10 Thousand = 1 Last, 13,200.

Timber and Wood.

40 cubic feet rough, 50 cubic feet squared = 1 load.

50 cubic feet of planks = 1 load.

100 superficial feet = 1 square of flooring.

120 Deals = 100.

Width of Battens, 7 inches; Deals, 9 inches;

Planks are 2 to 4 inches thick, and 10 or 11 inches wide. A Cord of Wood is 2½ tons, or 125 cubic feet.

Carpenters', Bricklayers', and Builders' Measurements.

Stock or kiln bricks	8½ inches \times 4½ \times 3½
Welsh fire-bricks	9 " \times 4½ \times 3½
Paving bricks	9 " \times 4½ \times 1½
Square tiles	9½ " \times 9½ \times 1
"	6 " \times 6 \times 1

Dutch clinker bricks 9½ " \times 3 \times 1½

A Rod of Brickwork 16½ feet \times 16½ feet \times 1½ brick thick = 305 cubic feet, or 11½ cubic yards, and contains about 4,500 bricks with about 75 cubic feet of mortar.

A Square of Flooring is 100 square feet.

A Piece of Wall Paper is 12 yd. long \times 21 in.

wide (English), and 9 yd. \times 28 in. (French).

Ordinary bricks weigh about 7 lb. each; a load of 500 weighs about 1 ton, 11 cwt., 1 qr.

Sizes of Slates.

	in. in.		in. in.
Empress	26 \times 16	Ladies	16 \times 10
" Small	26 \times 14	"	Small 16 \times 8
Princesses	24 \times 14	" Large	14 \times 12
Duchesses	24 \times 12	"	14 \times 8
Marchionesses	22 \times 12	Plantation	13 \times 11
" Small	22 \times 11	Doubles	13 \times 10
Countesses	20 \times 10	"	13 \times 7
" Wide	20 \times 12	Small	12 \times 8
Viscountesses	18 \times 10	Ditto	12 \times 6
" Small	18 \times 9	Ditto	11 \times 5½

Water.

Cubic inch..... = 252.458 grains.

Gallon (277.274 cub. in.) = 10 lb. (distilled)

Cubic foot..... = 62.321 lb.

35.943 cubic ft. (224 gals.) = 1 ton.

Water for Ships : Ton, 210 gals., Butt 110, Puncheon 72, Barrel 36, Kilderkin 18 gals.

Cisterns : A cistern 4 feet by 2½ and 3 deep will hold brimful 186.963 gallons, weighing 16 cwt.

2 qrs. 21.5 lb. in addition to its own weight.

An inch of rain on the surface of an Imperial acre = 43,560 sq. feet = 3,630 cubic feet = 100.993 tons.

A TON WEIGHT OF THE FOLLOWING WILL AVERAGE IN CUBIC FEET

Earth	21	Coal, Newcastle	42
Clay	18	Pit Sand	29
Chalk	14	River ditto	22
Thames Ballast	20	Marl	18
Coarse gravel	19	Shingle	23
Coal, Welsh	40	Night Soil	18

A cubic foot of pure gold weighs 1,210 lb., pure silver 655 lb., cast iron 450 lb., copper 450 lb., lead 720 lb., pure platinum 1,220 lb., tin 456 lb., aluminium 163 lb.

Old Scottish Measures.

LIQUIDS.

4 Gills	= 1 Mutchkin.	2 Pints	= 1 Quart.
2 Mutchkins	= 1 Choppin.	4 Quarts	= 1 Gallon.
"	pin.	8 Gallons	= 1 Barrel.

2 Choppins = 1 Pint.

CORN MEASURE.

4 Lippies	= 1 Peck.	4 Firlots	= 1 Boll.
4 Pecks	= 1 Firiot.	16 Bolls	= 1 Chaldier.

Old Scottish Weights.

16 Drops 1 Ounce, 16 Ounces 1 Pound, 16 Pounds 1 Stone.

Charitable Bequests in 1909.

Remarkable Occurrences, &c., 1908-1909.

PRINCIPAL EVENTS, 1 Nov., 1908-31 Oct., 1909.

THE BRITISH ISLES.

THE KING AND COURT.—(1908) Nov. 17. The King gave a State Banquet at Windsor Castle in honour of the King and Queen of Sweden. 18. Accompanied by the Queen, the King opened a hall and library at Eton as a memorial for old Etonians who fell in the South African War. Dec. 14. The King held an investiture at Buckingham Palace. 22. The King received the Syrian Patriarch at Buckingham Palace. 23. The King left for Sandringham to spend Christmas with the Royal family. (1909) Jan. 22. The eighth anniversary of the King's accession was celebrated throughout the Empire. Feb. 2. The King received the delegates to the International Naval Conference. 9. The King and Queen arrived in Berlin. 13. Their Majesties returned from Germany. 18. Four Basuto chiefs were received at Buckingham Palace by the King. 23. The King held a Levée at Buckingham Palace, and received Dr. Sven Hedin. March 3. His Majesty held a Court at Buckingham Palace. 5. The King left for Biarritz on account of his health. 8. The Empress Marie of Russia arrived in England on a visit to the Queen. 17. The King went from Biarritz to Pau, where he witnessed Mr. Wilbur Wright's aeroplane flights. 27. Motoring from Biarritz, the King attended the Basque Fêtes at St. Jean Pied-de-Port. April 2. On the King's behalf the Prince of Wales held a Council at Marlborough House. 15. The King left Biarritz for Paris. 17. Accompanied by Queen and Princess Victoria, who had joined him *en route*, the King arrived at Genoa, leaving on the following day for a Mediterranean cruise. 21. Their Majesties arrived at Malta. 25. Leaving Malta, they arrived at Catania, and made an excursion round Mount Etna. May 3. Proceeding to Naples, the King and Queen visited Pompeii. 8. The King returned from the Continent, having greatly improved in health. 27. The King received and inspected at Buckingham Palace the Honourable Corps of Gentlemen-at-Arms on the occasion of the 400th anniversary of its formation. 19. His Majesty was present at the Naval and Military Tournament. 24. The King held a Levée at St. James's Palace, and received the Berlin Municipal Councillors at Buckingham Palace. 26. The King was present at Epsom, where, amid great enthusiasm, his horse Minorn won the Derby. June 5. The King presented new colours to the 1st Battn. Norfolk Regt. at Buckingham Palace. 7. The delegates to the Imperial Press Conference attended a garden party given by the Prince of Wales at Marlborough House, at which both the King and Queen were present.—Prince and Princess Nashimoto of Japan were received by the King and Queen. 8. The King and Queen visited the International Horse Show at Olympia.—The Prince and Princess of Wales made their first official tour of the Duchy of Cornwall. 16. The King and Queen held a Court at Buckingham Palace. 19. His Majesty presented colours to 108 Territorial Regiments at Windsor Castle. 21. The King and Queen visited Wellington College for the celebration of the Jubilee of its foundation. 22. The Special Ottoman Mission announcing the accession of Mahomet V. was received at Buckingham Palace.—The King held the third Levée of the season. 23. His Majesty visited

the Royal Agricultural Society's Show at Gloucester. 24. The King and Queen attended the dedication services of the Memorial Chapel at the Queen Alexandra Military Hospital, Millbank.—Their Majesties held the fourth and last Court of the season at Buckingham Palace. 25. The celebration of the King's birthday was interfered with by wet weather, the Trooping of the Colour being cancelled.—The visiting members of the Russian Duma were received by the King. 26. The new buildings of the Victoria and Albert Museum, South Kensington, were opened in State by the King and Queen. July 2. The first State Ball of the season was given at Buckingham Palace. 3. After holding a Council, the King opened a new speech-room at Rugby. 5. His Majesty reviewed and presented colours to the West Lancashire Territorials at Knowsley. 6. The King and Queen opened the new infirmary buildings at Manchester, and His Majesty at Worsley inspected and presented colours to the East Lancashire Territorials. 7. The King and Queen opened the new University buildings at Birmingham. 8. His Majesty laid the first stone of the new buildings of the Imperial College of Science and Technology at South Kensington. 9. The King inspected the boys of the Royal Hospital School, Greenwich, at Buckingham Palace. 16. The final State Ball of the season was held. 19. The King received the Turkish Parliamentary delegates, and witnessed a parade of the London Fire Brigade. His Majesty visited Mr. Joseph Chamberlain at Prince's Gardens. 20. The foundation-stone of the new King's College Hospital at Denmark Hill was laid by the King. 22. The King held an investiture and conferred the birthday honours. 24. The delegates to the Imperial Defence and South African Union Conferences were entertained to luncheon by the King at Buckingham Palace. 26. His Majesty received at Buckingham Palace a party of Australian and New Zealand sailors who had been training in English naval depôts. 31. Accompanied by the Queen, His Majesty reviewed the Home and Atlantic Fleets in Cowes Roads. August 2. The Tsar and Empress of Russia arrived at Cowes on a visit to the King. 4. The King and the Tsar visited the Royal Naval College and Osborne House. 9. The King and Queen returned from Cowes, and afterwards received Sir Joseph Ward, the New Zealand Premier. 10. The King held a Council at Buckingham Palace, and afterwards left for Marienbad. 27. His Majesty entertained M. Francis Kosuth, the Hungarian Premier, to luncheon at Marienbad. Sept. 4. The King returned from Marienbad in excellent health. Oct. 4. The King presented medals to five fishermen for gallantry in rescue work. 11. After a stay at Balmoral, His Majesty returned to London. 12. The King received in audience at Buckingham Palace the Prime Minister, Lord Lansdowne, and Mr. Balfour, subsequently proceeding to Newmarket. 18. The King held an investiture at Buckingham Palace, and afterwards held a Council. 21. By an ingenious arrangement of apparatus, the King, while staying at West Dean Park, Chichester, opened a new institute for tuberculosis work in Montreal. 25. His Majesty visited Norwich, and reviewed and presented colours to Norfolk Territorials; subsequently he laid the corner-stone of a new wing of the Norfolk and Norwich Hospital.

INTERNATIONAL COURTESIES.—(1908) Nov. 16. H.M.S. *Sapphire* visited Oporto for the celebration of King Manoel's birthday. 18. The King and Queen of Sweden entertained by the Corporation of London at Guildhall. Dec. 15. An address of congratulation to the new Turkish Parliament was signed by 376 members of all parties of the House of Commons. (1909) Jan. 15. A part of the United States Fleet arrived at Malta. Feb. 9. The Emperor and Empress and all the members of the Imperial Family received the King and Queen on their arrival in Berlin. In the evening a state banquet was given at the Royal Castle, at which cordial speeches were exchanged, both monarchs emphasising their desire for the preservation of the world's peace. March 6. The King was received by President Fallières at the Elysée in Paris, and lunched with the President.—Officers of the British cruisers *Venus* and *Arrogant* deposited wreaths on the tombs of King Carlos and the Crown Prince. 30. King Alfonso entertained King Edward at lunch at San Sebastian. April 12. The municipality of Genoa gave a banquet in honour of the officers of the British squadron which was awaiting the arrival of King Edward. 18. Under the guidance of German officers, a party of English boy scouts visited the battlefields round Metz. 29. A meeting took place at Baia between King Edward and Queen Alexandra and the King and Queen of Italy, the royal party dining together on the *Victoria and Albert*. May 22. Municipal visitors from Manchester and Salford were entertained by the Hamburg Council. June 4. Representatives of the British Labour Party were entertained by the Municipal Council of Frankfurt. 7. British bishops, clergy and ministers of all denominations, to the number of 120, left for Germany to return the visit of the German pastors in the preceding year. 21. A distinguished party of Russians, consisting of members of the Council of the Empire and of the Duma, arrived in London. July 13. The Lord Mayor entertained Prince and Princess Kuni of Japan at the Mansion House. Aug. 2. The Tsar and Empress of Russia arrived at Cowes on a visit to the King. 5. The Tsar received deputations from the Corporations of London and Portsmouth, and from the Chambers of Commerce of London and Liverpool. 15. The King at Marienbad entertained M. Clémenceau at luncheon. 18. The King gave a banquet in honour of the Austrian Emperor's birthday. Sept. 13. At the special invitation of the German Emperor, several British officers witnessed the Imperial manoeuvres. 29. A banquet was given in New York in connection with the Hudson-Fulton celebrations, the British admiral, Sir E. Seymour, being warmly applauded.

IMPERIAL POLITICS.—(1908) Dec. 1. Mr. E. G. Pretyman (U.) was returned for Chelmsford. 4. The Government's fourth Education Bill was withdrawn. 21. Parliament was prorogued. (1909) Jan. 1. The Old Age Pensions Scheme was inaugurated, and throughout the country the work of payment was carried out smoothly. 16. The Unionist candidate was returned unopposed at Tamworth. Feb. 9. Resolutions demanding Home Rule were passed at the Nationalist Convention in Dublin. 16. Parliament was opened by the King in state. 17. The report of the Royal Commission on the Poor Law was issued. Drastic changes were recommended, including the abolition of Boards of Guardians.

23. The bye-election at Taunton resulted in the return of the Unionist candidate. 24. The punishment of disorderly strangers in the House of Commons was provided for in a Bill. 27. Mr. J. Falconer (L.) was returned at the Forfarshire bye-election. March 2. At the Central Glasgow bye-election Mr. Scott-Dickson gained a Unionist victory. 9. Replying to a temperance deputation, Mr. Asquith said the Government had not abated their determination in regard to the licensing question.—Sir A. Dewar, K.C., was re-elected for South Edinburgh.—Liberals also retained the Hawick Burghs. 24. New Zealand's offer to provide a first-class battleship—or two, "if necessary"—was announced in the House of Commons. 29. Sir R. Hermon Hodge (C.) secured the late Mr. Arnold-Forster's seat at Croydon.—A vote of censure on the Government on account of their naval policy was defeated. 30. Disorder was created at Westminster by suffragists, and 12 were arrested. Similar scenes occurred on the following day. 31. A representative non-party meeting, to consider the state of the Navy, was held at the Guildhall, London. April 1. The Children's Act came into operation. 3. Mr. E. G. Hemmerde, K.C. (L.), re-elected for East Denbighshire. 8. The trustees of the Nationalist Parliamentary Fund issued an appeal to the Irish people for support. 16. Lord-Provost Gibson (L.) returned to fill the vacancy in East Edinburgh. 20. Shortage in the wheat supply occasioned a general rise in the price of bread. 27. Obtaining admission to the House of Commons, several suffragists chained themselves to statues in the hall. 29. Mr. Lloyd George introduced his first Budget in a speech of nearly four and a half hours' duration. 30. Invitations to a Conference on Imperial Defence were despatched by the Government to the British Dominions. May 1. Mr. Maurice Healy (Ind.) defeated the official Nationalist candidate at Cork. 4. A triangular contest at Stratford-on-Avon resulted in a Unionist gain.—The Labour candidate, Mr. J. Pointer, secured the seat for the Attercliffe division. 12. A motion in favour of the payment of members was carried in the House of Commons.—The Budget, as regarded its effect upon Ireland, was condemned at a representative meeting held in Dublin. 17. Mr. J. A. Clyde, K.C. (U.), was returned unopposed for West Edinburgh. 19. An important letter, protesting against many of the Budget proposals, was addressed to the Prime Minister by a number of leading City bankers, merchants and business men. 21. Mr. Asquith, at Sheffield, stated that it was the intention of the Government to adhere to the main lines of the Budget proposals. 24. Empire Day was marked by patriotic celebrations throughout the country and the British dominions on a more extended scale than heretofore. 27. Mr. McKenna defended Sir John Fisher against the charge of conducting a personal campaign, and denied that espionage was carried on in the Navy. June 11. Mr. T. Landon (Nat.) was returned for East Limerick. 22. Lord Hugh Cecil was invited to stand for Oxford University at the next election. 17. Mr. Asquith in the House of Commons reminded those members who constantly called into question the action of the Indian Government, that they were only encouraging the elements of mischief. 22. In a letter Lord Rosebery described the Budget proposals as revolutionary. 24. Speaking at a political

luncheon, Mr. Asquith denied the revolutionary character of the Budget. 25. The resignations were announced of Lord Fitzmaurice, Chancellor of the Duchy of Lancaster, and Mr. T. R. Buchanan, Under-Secretary for India; and Mr. Herbert Samuel, M.P., and the Master of Elibank, M.P., were respectively appointed to the vacant offices. 29. A further attempt was made by female suffragists to force an entrance into the House of Commons, and as a result 115 arrests were made. 30. Lord Charles Beresford addressed a meeting of the London Chamber of Commerce on naval matters, and submitted a programme, to cost between 55 and 60 millions. July 10. Mr. H. Samuel re-elected for the Cleveland division. 12. A scene, culminating in the suspension of Mr. Will Thorne, occurred during an all-night debate in the House of Commons. Two days following, on the motion of the Prime Minister, Mr. Thorne's suspension was expunged from the Journals. 16. Mr. J. S. Hancock (*L. and Leb.*) elected for Mid-Derbyshire. 20. Mr. J. W. Gulland (*L.*) was re-elected for Dumfries Burghs.—Mr. Asquith supported a motion by Mr. Dillon in the House relating to a breach of privilege in connection with a letter sent by the Duke of Norfolk to the Unionist candidate for the High Peak division. 21. Mr. Asquith denied that there was a prospect of an immediate dissolution. 23. Mr. O. Parlington (*L.*) was re-elected for the High Peak division. 29. A marble statue of the late Lord Salisbury was unveiled at the Foreign Office. 30. Mr. Lloyd George at Limehouse warmly defended the proposed new land taxes, and vehemently attacked landlords in general and dukes in particular. Aug. 7. Lord Lansdowne, speaking on the Budget, declared that the House of Lords was quite prepared to try conclusions on that issue. 10. Mr. Matthew Keating (*Nat.*) and Mr. Scanlon (*Nat.*) were returned unopposed for South Kilkenny and North Sligo respectively. 15. Serious rioting between Protestants and Roman Catholics occurred at Portadown, in Ireland, and at Lurgan on the following day. Sept. 3. Mr. Lynch (*Nat.*), who fought for the Boers in South Africa, was returned unopposed for West Clare. 10. Speaking in Glasgow, Lord Rosebery again condemned the Budget as being revolutionary. 17. Mr. Asquith spoke at Birmingham in support of the Budget, and replied to Lord Rosebery. 22. Speaking also at Birmingham, Mr. Balfour made a vigorous response to the Prime Minister's speech, and maintained that the country would prefer Tariff Reform to Socialism. 29. In a letter, Mr. Balfour categorically denied that it was the intention of the Unionist Party to withdraw Old Age Pensions when returned to power. Oct. 6. Mr. Balfour proceeded to Balmoral and had an audience of the King. 9. Mr. Lloyd George spoke at Newcastle in support of the budget. 22. A revised Budget estimate having shown an additional deficit, the Chancellor of the Exchequer announced that it would be met by taking half a million from the Sinking Fund. 26. Mr. Balfour in a speech attacked the Lord Advocate, Mr. Ure, in connection with speeches in which the suggestion was made that a Unionist Government would cease the payment of Old Age Pensions. 28. The Bermudez bye-election, necessitated by the death of the sitting member, resulted in a Unionist gain.

MUNICIPAL AFFAIRS.—(1908) Nov. 3. The final municipal election returns of the country

showed that the Unionists gained 131 seats, Liberals 33, Labour 11, Socialists 9, and Independents 4. The feature of the contests was the number of defeats sustained by the Socialists. 9. The Lord Mayor's Show took place, and in the evening the Prime Minister attended the customary banquet. Among the municipal mayors elected was the first lady to occupy that position, at Aldeburgh. (1909) Jan. 18. The construction of an embankment on the south side of the Thames for the site of the new County Hall was commenced. 25. At a meeting of South London mayors and town clerks a resolution to secure the Crystal Palace for the public was unanimously carried. March 9. Sir R. Melville Beachcroft was elected chairman of the London County Council. 16. The Port of London Authority held its first meeting, Sir Hudson Kearley presiding. April 22. The Mansion House Fund for the Messina earthquake sufferers exceeded £400,000. June 15. The effect of the Budget proposals upon the capital value of the property of the ratepayers was considered by the London County Council. July 21. The Corporation of London entertained 1,200 bluejackets from the Fleet in the Thames at the Guildhall. Aug. 23. A Highgate cable tramway, the first of the kind to be constructed in Europe, was taken over by the London County Council for electrification. The deputation of the City Corporation to inquire into the lighting of Continental cities reported in favour of incandescent gas. Sept. 14. Blackfriars Bridge, now the widest over the Thames, was reopened for the tramway connection with the Embankment.—The sale was completed by a private company of 14 of the London County Council steamers. 24. Italians resident in London presented the Lord Mayor with a bronze bas-relief of his portrait in appreciation of his services in connection with the Messina Earthquake Fund. 29. Alderman Sir John Knill was elected Lord Mayor of London for the ensuing year.

ACCIDENTS AND DISASTERS (GENERAL).—(1909) Jan. 14. Three men were killed at the Tilmanstone Colliery. Feb. 16. A terrible colliery accident occurred at the West Stanley Pit in north-west Durham, 168 men and boys losing their lives. 22. A fire broke out at some fibre stores at Millwall, over 10,000 bales of jute and manilla, valued at £40,000, being destroyed.—Damage amounting to £20,000 was done by a fire at the Scotstoun Flour Mills. March 6. By the collapse of a dam at Birkenhead 14 workmen were killed. April 8. At a fire at some cabinet works in Bristol a fireman was killed and another injured. 9. A portion of an express from London to Aberdeen was derailed near Newcastle, an attendant being badly crushed. 15. A fire broke out at an oil-refining works at Slivertown, over £60,000 damage resulting. May 7. The Oxford University Press warehouse in London was burnt out, the damage being estimated at £30,000. 29. Six men were drowned in Stornaway harbour by a boat accident. July 2. By the collapse of a dam at Newport, Mon., 39 lives were lost. 22. Armr.-Sergt. McCracken killed by an accidental shot at the Bisley Ranges. Aug. 4. During a sham fight of the West Riding Territorials the Rev. H. L. T. Hodgson, acting chaplain, was shot by a live cartridge. 10. Expansion of the rails through heat caused the derailment of a London and North-Western train near Stalybridge, the driver and fireman being killed and

several passengers injured. 12. Owing to the early morning mist, a motor car ran into a detachment of Territorials on Salisbury Plain, and ten men were injured, one dying later in hospital. 14. A panic among some children at a cinematograph show at Southsea resulted in one being killed and several injured. 17. Damage amounting to upwards of £100,000 was caused by a fire in Glasgow. 27. Through the fall of a pit-cage at Penygraig, Glamorganshire, five men were killed and 23 injured. Sept. 1. Lord de Clifford, in endeavouring to avoid an accident, was thrown out of his motor car and killed instantly. Oct. 1. An explosion took place in a colliery at Pontardulais, South Wales, resulting in the death of two men. 20. A colliery explosion took place near Auchinbeck, Ayrshire, in which four men lost their lives. 29. A terrible mining disaster occurred near Barged, South Wales; 27 lives were lost, several succumbing while attempting rescue work.

ACCIDENTS AND DISASTERS AT SEA.—(1908) Nov. 25. The E'leman liner *Sardinia* caught fire soon after leaving Malta, over 100 pilgrims and a number of Europeans being either burned or drowned. (1909) Jan. 22. The White Star liner *Republic* and an Italian emigrant steamer, the *Florida*, collided 175 miles off New York. Several persons were killed, but a greater disaster was averted by the arrival of the *Baltic*, which received the "C Q D," or distress signal, sent up by wireless telegraphy by the *Republic*. The latter vessel sank while being towed to New York. Feb. 1. Six lives were lost by an explosion which occurred while the Trinity House steamer *Argus* was blowing up a sunken wreck off Caister. The steamer *Cian Ronald* was lost off Edithburgh, Australia, the captain, five other Europeans and 25 Lascars being drowned. April 10. The steamer *Mahratta* went ashore on the Goodwins and broke up next day. July 14. 11 lives were lost by the sinking of the submarine C 11 after a collision. 22. A British fishing vessel was sunk on the Dogger Bank and 11 lives were lost. 31. While firing a salute on the *Temeraire* a gun charge exploded, injuring four men, one fatally. Aug. 5. The Shaw Savill liner *Maori* was wrecked off Cape Town and 32 lives lost. 14. In order to extinguish a fire on board, the *Cunarder Lucania* had to be submerged in dock at Liverpool. Sept. 6. The Allan liner *Laurentian* went ashore off the Newfoundland coast, but all the passengers were safely landed. 9. The Blue Anchor liner *Waratah*, which left Durban for Cape Town on July 26, was given up as lost. 16. The London liner *Umkati* was totally wrecked near Cape Town. Oct. 25. The Scottish steamer *Hestia* was totally wrecked on Grand Manan Island, Maine, and 34 lives were lost.

AERONAUTICS.—(1909) March 19. An Aeronautical Exhibition was opened at Olympia, London. May 3. Messrs. Wilbur and Orville Wright arrived in London, and had an interview with Mr. Haldane at the War Office. 5. Mr. Asquith announced the appointment of a special committee of investigation regarding aerial construction and navigation. July 12. M. Latham made an attempt to cross the English Channel from Calais to Dover in his monoplane, but the motor failed after seven miles, and the machine descended into the sea. 25. M. Blériot succeeded in flying across the Channel from Calais to Dover on his monoplane, the feat occupying 31 mins. 26. M.

Latham made his second attempt to cross the Channel, but the motor stopped when almost within reach of Dover, and the machine fell into the sea. Sept. 8. Mr. Cody made a cross-country flight of over an hour in his aeroplane at Aldershot. Oct. 15. In extremely unfavourable weather, the first aviation week to be held in Great Britain was opened at Doncaster. During the following days, a number of successful flights were made by foreign aviators. 18. The Blackpool aviation week was opened. On the following day, M. Paulhan, on a Farman biplane, accomplished a flight of over half an hour's duration in very gusty weather. Mr. Farman also established an English record by covering 47 miles 1284 yards in 1 hr. 32 mins. 16½ secs. The feature of the week was a daring flight, twice round the course, by M. Latham, the wind being estimated at 40 miles an hour.

ART, &c.—(1909) Feb. 12. At the sale of the Benson collection of Greek coins, the record price of £640 for a coin was given for a tetradrachm of Katana. April 7. An interesting exhibition of E'arly English Portraiture was opened at the Burlington Fine Arts Club. 28. The record price for a book, £7,810, was given in Paris for a copy of the "*Œuvres de Molière*," 1773. May 3. The Royal Academy opened, the feature of the year being the excellence of the portraits. 20. The art collection of the late Mr. Justice Day realised £102,546. June 3. On the eve of its departure for abroad, Holbein's "*Duchess of Milan*" was purchased for the nation, an anonymous donor contributing £40,000 and the Treasury £10,000. Sept. 28. The King granted a charter and diploma to the Royal British Colonial Society of Artists.

CAUSES CÉLÈBRES.—(1908) Nov. 16. The claim of Albert Kirby Fairfax to the Fairfax peerage was upheld by the House of Lords. (1909) Feb. 2. The Court of Appeal decided that a woman who obtains a separation order deprives herself of the right to divorce. March 10. In the cross-actions for divorce brought by Mr. J. A. Stirling and his wife, in the Court of Session, Edinburgh, Lord Guthrie found for Mr. Stirling. 12. Charges brought against Mr. Horatio Bottomley, M.P., and others for conspiracy were dismissed at the Guildhall. 17. Judgment by consent for £1,000 (which was awarded to charity) was given against the *People* for circulating defamatory rumours about Mr. Lloyd George. May 18. The House of Lords decided that an illegitimate posthumous child is a "dependent," and can claim compensation for his father's death. 20. A dealer in antique china was ordered by the High Court to pay £10,342 damages to the executors of the estate of a collector for fraudulent representation and breach of warranty. June 2. The Court of Criminal Appeal allowed the appeal of Joseph Stoddart against his conviction and sentence in connection with football coupon competitions. 12. The action for slander brought by the Hon. Alexis Roche against Sir Timothy O'Brien resulted in a verdict for the plaintiff with £5 damages. 18. Ex-Lieutenant Woods' appeal in his action against the Army Council was dismissed. July 26. The House of Lords decided against the Government in their claim for estate duty on £780,000, left by the late Duke of Richmond. Aug. 3. The High Court decided against the Board of Education in the Swansea schools case on the subject of salaries to teachers.

CONGRESSES, CONFERENCES, AND EXHIBITIONS.

—*Imperial Press Conference.*—At the invitation of the Home Press, delegates representing all shades of opinion from the Oversea Dominions assembled in London during the first week in June. A series of questions of the highest Imperial interest were very fully debated, and, in the course of the proceedings, Ministers, ex-Ministers, and highly-placed naval and military authorities contributed to the discussions.

—*South African Union.*—*July 18.* The Premiers of Cape Colony (Mr. J. X. Merriman), Natal (Mr. E. R. Moor), Transvaal (General Botha), and Orange River Colony (Mr. A. Fischer), and other delegates arrived in London in order to discuss with the Government the draft of the South African Constitution Bill. It was decided that the date of Proclamation of the Union should be May 31, 1910, the eighth anniversary of the Peace of Vereeniging, and that the Prince of Wales be invited to open the first Parliament.

—*Imperial Defence.*—The first sitting of this Conference was held on July 29. Owing to the highly important nature of the subjects discussed, the proceedings were regarded as confidential, but on Aug. 26 Mr. Asquith made a statement in the House of Commons with regard to the result of the Conference. As to military defence, the land forces of the Dominions should be so standardised that they could be rapidly combined into one homogeneous Imperial Army. As regards naval defence, New Zealand would continue her policy of contribution, and Canada and Australia proposed to lay the foundation of fleets of their own. The announcement of the South African plans would be deferred until after the Act of Union had been consolidated.

—*General.*—(1909) *Jan. 15.* The British Museum completed a century and a half of its existence. —The centenary of Sir John Moore was marked by an interesting exhibition of relics at the Royal United Service Museum. *Feb. 3.* The Foreign Office announced that the International Naval Conference had arrived at agreements on some of the most important items of the programme. *March 25.* The appointment of a Royal Commission was announced, with the Prince of Wales as president, to assist the organisation of international exhibitions. *April 27.* The Congress of the International Woman Suffrage Alliance opened in London. *May 8.* The "Golden West Exhibition" was opened at Earl's Court by the Lord Mayor of London. *13.* The Royal Naval and Military Tournament was opened at Olympia. *20.* The Imperial International Exhibition, at Shepherd's Bush, was opened by the Duke of Argyll. *24.* The 25th anniversary of the Society for the Prevention of Cruelty to Children was celebrated. *27.* The Prince of Wales opened the International Congress of Applied Chemistry. *31.* The Co-operative Congress opened at Newcastle. *June 2.* Mr. John Burns opened a Tuberculosis Exhibition at Whitechapel. *5.* The International Horse Show was opened at Olympia. *22.* The exhibition of the Royal Agricultural Society opened at Gloucester, and was visited by the King on the following day. *July 5.* The Travel and Sports Exhibition was opened at Olympia by Lieut. Shackleton. *Aug. 16.* A Darwin Centenary Exhibition was opened at the Natural History Museum. *Sept. 20.* The first sitting of the conference of the International Association of the Press took place in Lincoln's Inn Hall.

—*CRIMES.*—(1909) *Jan. 23.* An extraordinary outrage by aliens took place at Tottenham in broad daylight. Two Russian anarchists, after seizing £80 from a clerk, were chased by police and civilians, at whom they fired indiscriminately. A policeman and a boy were shot dead and fourteen others injured, while one of the miscreants committed suicide, and the other, severely injured, succumbed after removal to hospital. *Feb. 23.* The sum of £2,700 was stolen from the cruiser *Indomitable*. *24.* An American shot his wife in the National Portrait Gallery and then committed suicide. *April 3.* A man named Dench, at St. Blazey, Cornwall, shot and severely injured a boy in the street, afterwards barricading himself in a cottage, armed with a double-barrelled gun, with which he shot and slightly injured two men before surrendering after three days' siege. *June 26.* The "D. S. Windell" bank frauds were disposed of at the Central Criminal Court, a young Dutchman named Robert receiving eighteen months' hard labour, and a former bank cashier, King, seven years' penal servitude. *July 1.* Sir W. Curzon Wylie, a distinguished Indian civil servant and political aide-de-camp to the Secretary of State, was shot and killed, and Dr. Lalacac, a Parsee physician, who came to his assistance, was mortally wounded, by a young Indian student named Dhingra, at a reception at the Imperial Institute. Dhingra was subsequently sentenced to death, and duly hanged on Aug. 17. *23.* Arthur Horsley, the printer of the *Indian Sociologist*, edited by Krishnavarna, was sentenced to four months' imprisonment at the Central Criminal Court. *Aug. 22.* A gang of thieves was captured while leaving the premises of a large jeweller's in London, property amounting to upwards of £40,000 being found upon the men.

—*DEATHS.*—(1908) *Nov. 6.* Sir Henry Pitman, Emeritus Professor and Registrar of the Royal College of Physicians, aged 100. (1909) *Jan. 24.* The Earl of Leicester, K.G., aged 86. *April 3.* Lord Gwydyr, within twenty-four days of entering his 100th year. *10.* Algernon Charles Swinburne, the poet, aged 72. *May 18.* George Meredith, O.M., novelist, aged 81. *June 11.* Field-Marshal Sir Frederick Paul Haines, aged 69. *21.* Sir Andrew Lusk, Bart., a former Lord Mayor of London, aged 99. *July 9.* The Marquis of Ripon, K.G., aged 81. *Aug. 18.* Sir Theodore Martin, biographer of the Prince Consort, aged 93. *Oct. 16.* Mr. J. H. Hofmeyr, chairman of the Afrikaner Bond in Cape Colony, aged 64.

—*DRAMA.*—(1908) *Dec. 1.* A matinee in honour of Madame Ristori was given at His Majesty's Theatre. (1909) *Jan. 27.* A suggestive play, from a patriotic standpoint, entitled *An Englishman's Home*, was produced at Wyndham's Theatre. *April 8.* The Lord Chamberlain refused to sanction the performance of the Passion Play by the English Drama Society. *23.* The establishment of a Shakespeare Memorial Theatre was decided upon. The gift of £70,000 by an anonymous donor was announced at the meeting of the General Committee. *8.* The Shakespeare Festival at Stratford-on-Avon was brought to a close by a performance by Mr. Benson's company of *The Taming of the Shrew*. *June 21.* The Shakespearian Festival at His Majesty's commenced with the revival of *The Merry Wives of Windsor*. *22.* Mr. Asquith stated that a Joint Committee of the two Houses of Parliament would be appointed to inquire into

the Censorship. *July 29.* The Censorship Committee commenced its sittings, and evidence was given by a number of dramatists, actors, managers, and others interested in the question. *Aug. 25.* Mr. Bernard Shaw's play, *The Shewing Up of Blanco Posnet*, was produced in Dublin. *Oct. 8.* Sir H. Beerbohm Tree unveiled a bronze memorial tablet of the Globe Playhouse affixed to premises in Southwark, on the site of Shakespeare's theatre. *25.* A subscription list for a Shakespeare Memorial Theatre was opened, the sum to be raised being £500,000.

ECCLESIASTICAL.—(1908) *Dec. 21.* Dr. Paget appointed Bishop of Stepney; and the Rev. R. H. Whitcombe Bishop of Colchester. (1909) *Jan. 6.* The election of Dr. Lang, Bishop Suffragan of Stepney, as successor to Dr. MacLagan as Archbishop of York, took place at York Minster. *14.* Out of £40,239 collected for the Hospital Sunday Fund, the Church of England contributions amounted to £31,924. *20.* In the Consistory Court of Wells Cathedral, the Rev. Smyth Pigott, of the Agapemone, Spaxton, was found guilty of immorality. *25.* The new Archbishop of York was enthroned in the presence of a large congregation in York Minster. *28.* The Rev. J. H. G. Randolph appointed Bishop of Guildford. *Feb. 17.* It was announced that the Pan-Anglican Thank Offering, amounting to £223,000, had been provisionally allotted. *April 21.* The 800th anniversary of the death of St. Anselm was observed by a special service at Canterbury Cathedral, and by Pontifical High Mass at the Roman Catholic Cathedral. *May 5.* Convocation agreed to various recommendations in connection with the Revision of the Rubrics. *7.* The Sheffield Bishopric Bill was read a second time in the House of Commons. *10.* The Congregational Union adopted a scheme for a Sustenance Fund of £250,000. *11.* A petition, with nearly 750,000 signatures, protesting against any alteration in the Sovereign's Protestant Declaration, was presented to Parliament. *22.* Archdeacon Furse, of Johannesburg, was elected Bishop of Pretoria. —Archdeacon William Banister was appointed to the new Bishopric of Hu-nan, Central China. *18.* The Scottish General Assembly was opened in Edinburgh. *20.* Canon Henn, Vicar of Bolton, was appointed Bishop of Burnley. *26.* The Rev. L. H. Burrow appointed Bishop of Lewes. *Aug. 3.* The Rev. Walter Andrews appointed Bishop of Hokkaido, Japan. *24.* The Ven. J. C. Wright consecrated Archdeacon of Sydney in St. Paul's Cathedral, and Rev. C. J. Ferguson-Davie as Bishop of Singapore. *Sept. 7.* The Rev. H. Russell Wakefield appointed Dean of Norwich. *14.* The Right Rev. Edward Ash Wise and Canon C. T. Abraham appointed Bishops of Stafford and Derby respectively. *Oct. 6.* The Church Congress was opened at Swansea, under the presidency of the Bishop of St. Davids. *12.* The retirement was announced of Dr. Sheepshanks, Bishop of Norwich.—The Rev. R. S. Pyffe appointed Bishop of Rangoon.

EDUCATIONAL.—(1909) *Jan. 12.* The Modern Language Association met at Oxford, Lord Fitzmaurice delivering the presidential address. *Feb. 26.* Mr. E. C. Wills gave £10,000 to the Bristol University Fund. The President of the Board of Education, replying to a deputation from the National Union of Teachers, said that he could not promise to prohibit the employment of unqualified teachers. *April 20.* New buildings for the School of Forestry and Rural Economy

were opened at Oxford by the President of Magdalen. *26.* Lord Curzon, the Chancellor, submitted a memorandum on Oxford reform to the University authorities. *May 8.* The Earl of Derby was installed as Chancellor of Liverpool University. *17.* The warrant granting a charter establishing the University of Bristol was signed by the King.—The Goldsmiths' Company offered to contribute £50,000 for the extension of the engineering department of the Central Technical College. *June 15.* The last Senior Wrangler under the old Mathematical Tripos regulations at Cambridge was announced to be Mr. P. J. Daniell, of King Edward's School, Birmingham, and Trinity College. *18.* Mr. Haldane opened the New Institute of Physiology at University College, London. *July 7.* Lord Curzon opened new buildings at St. Paul's School in commemoration of the 400th anniversary of its foundation. Cambridge University received £20,000 for the endowment of a German professorship. *30.* The Jubilee of Wellington College was celebrated. *Sept. 19.* A large demonstration in support of the Gaelic language in the new Irish University was held in Dublin. *27.* A memorandum of arrangements between the Board of Agriculture and the Board of Education upon agricultural education was issued. *Oct. 14.* The new University College of South Wales and Monmouthshire was opened at Cardiff by Lord Plymouth.

EXPLORATION.—(1909) *March 23.* Telegrams from Lieut. Shackleton, commander of the *Nimrod* Antarctic Expedition, were published. *June 12.* The King and Queen telegraphed their congratulations to Lieut. (now Sir E.) Shackleton on his safe return to England. *28.* Lieut. Shackleton gave an account of his expedition before the Royal Geographical Society, the Prince and Princess of Wales being present. *Aug. 22.* Mr. Wellman, starting from Spitzbergen, made a further attempt to reach the North Pole with his airship, but was forced to abandon it, owing to a serious accident to the vessel soon after the commencement of the journey. *25.* A grant of £20,000 was recommended by the Government towards the cost of Lieut. Shackleton's Antarctic expedition. *Sept. 1.* The dramatic announcement was published that Dr. Cook, an American explorer, had discovered the North Pole. *6.* A despatch was published from New York announcing that Commander Peary had reached the North Pole on April 6, 1909, twelve months after the date on which Dr. Cook claimed to have arrived at the spot. *13.* Particulars were published of Capt. Scott's South Polar Expedition, to start in August, 1910. *23.* Dr. Cook, at New York, was severely cross-examined by a number of journalists in connection with his reported discovery of the North Pole, and was stated to have emerged successfully from the ordeal. *29.* The Antarctic exploration ship *Nimrod* arrived in the Thames, and was opened for public inspection.

LABOUR.—(1908) *Nov. 29.* The Appeal Court decided that Trade Unions could not legally make a compulsory levy for the purposes of Parliamentary representation. (1909) *Jan. 4.* Northumberland miners' wages were reduced by 3½ per cent. *13.* Some hundreds of unemployed marched to Grosvenor Square, and indulged in demonstrations in front of some of the houses. *Feb. 11.* Sir E. Fry gave his award in the dispute between the L. & N.W. Railway and its men.

April 9. The annual conference of the Social Democratic Party was opened at Bristol. *13.* At the Annual Conference of the Independent Labour Party, Mr. Ramsay MacDonald, M.P., the President, announced the resignation of himself, Mr. Keir Hardie, Mr. Philip Snowden, and Mr. Bruce Glasier from the national council, to which they had been re-elected on the previous day, "owing to the movement of irresponsibility which had grown up inside the party." It was decided to make a levy of 1s. a member in order to raise an election fund of £10,000. *May 19.* Mr. Churchill, in the House of Commons, explained the intentions of the Government as regards Labour Exchanges and Unemployment Insurance. *22.* Wages of Welsh miners were reduced 7½ per cent. by the Conciliation Board. *July 3.* Considerable friction resulted in various parts of the country from the introduction of the Miners' (Eight Hours) Act. In South Wales a threatened strike was averted. *30.* The Scottish coal strike, which promised to become general with disastrous consequences, was settled in terms stated to be satisfactory to the miners. *Aug. 5.* The conciliation board of the Great Central Railway settled various questions in dispute with the employees without appealing to an arbitrator. *Sept. 2.* Replying to a deputation of Northumberland and Durham miners, the Home Secretary urged them to treat the minor evils of the eight hour day with patience. *Oct. 1.* The Central (Unemployed) Body for London passed a resolution urging the Government to make further provision against unemployment. *11.* The President of the Board of Trade announced the appointment of a Director and a General Manager of Labour Exchanges under the Act of 1909.

LEGAL.—(1909) *Feb. 3.* Sir J. Gorell Barnes, President of the Probate, Divorce, and Admiralty Division, resigned, and was succeeded by Mr. Justice Bigham.—Mr. J. A. Hamilton, K.C., was appointed a Judge of the High Court. *April 1.* The Children's Charter, establishing separate courts for children among other provisions, came into operation. *May 5.* The Inner Temple authorities disbarred Krishnavarna for "conduct unworthy of a barrister." *Aug. 1.* The new law authorising the unlimited detention of habitual criminals came into force. *Oct. 19.* An order for the compulsory winding up of the Crystal Palace Company was made.

LITERATURE.—(1909) *Feb. 10.* It was decided to erect a memorial at Bury St. Edmunds to "Onida." *March 1.* Sir A. Conan Doyle presided at a dinner given by the Authors' Club in celebration of the centenary of Edgar Allan Poe. *April 27.* The centenary of the birth of Edward Fitzgerald, the translator of Omar Khayyam, was celebrated at Ipswich, and a similar function given by the Omar Khayyam Club in London. The sale of the Amherst Library was concluded; the amount realised, including 14 Caxtons, was over £57,000. *May 12.* A column commemorative of events in early English history associated with the Thames was unveiled by the Duke of Northumberland at Brentford. *June 23.* Cambridge University celebrated the centenary of Charles Darwin's birth, and the fiftieth anniversary of the publication of the "Origin of Species." *Aug. 6.* The centenary of Tennyson's birth was celebrated at Oxford. *Sept. 15.* Lord Rosebery opened the Bicentenary Commemoration of the birth of Dr.

Johnson, at Lichfield. *18.* The body of Mr. John Davidson, the poet, who disappeared in March, was found in the sea off the Cornish coast. *22.* The Tennyson centenary celebrations took place at Lincoln. *Oct. 6.* The American Ambassador opened Harvard House, at Stratford-on-Avon, where the ancestors of the founder of Harvard University resided, as a rendezvous for American admirers of Shakespeare. *19.* A statue of Tennyson was unveiled in the chapel of Trinity College, Cambridge.

MILITARY.—(1908) *Dec. 11.* A new Indian medal, to be known as the "Indian General Service Medal," was announced. (1909) *Feb. 13.* 17 Territorial corps marched through London on recruiting parades, meeting with considerable success. *March 17.* A battalion of Guards, with guns and baggage, was experimentally conveyed from London to Hastings in motor cars in about three hours. *May 1.* Mr. Haldane stated that the Territorial Army had 87 per cent. of its establishment. *15.* Over 8,000 City members of the Territorial Force paraded, and afterwards marched past the Lord Mayor at the Mansion House. *June 1.* Sir Ian Hamilton relinquished the Southern Command to become Adjutant-General of the Forces and Second Military Member on the Army Council. *16.* A committee headed by Lord Roberts was formed to erect a national memorial to General Wolfe. *July 12.* The Bisley Rifle Meeting was opened. *24.* Corporal Burr, London Rifle Brigade, won the King's Prize at Bisley. *26.* The resignation was announced of the Duke of Connaught as Commander-in-Chief and High Commissioner in the Mediterranean. *31.* Some 28,000 officers and men of the Territorial Force commenced a fortnight's camp training on Salisbury Plain. *Aug. 11.* Lord Kitchener, on his promotion to the rank of Field-Marshal, was also appointed to the Mediterranean command, the scope of which, it was stated, would be greatly extended. *26.* General Sir O'Moore Creagh, F.C., the newly-appointed Commander-in-Chief in India, left to take up his new duties. *Sept. 13.* In commemoration of the 150th anniversary of the battle of Quebec and the death of General Wolfe, a banquet was given in London, Field-Marshal Sir George White, F.C., presiding.

MUSIC.—(1909) *Jan. 16.* The English performances of Wagner's "Ring" commenced at Covent Garden. *April 25.* The Opera season opened at Covent Garden with the first performance in this country of *Samson et Dalila* by Saint-Saëns. *May 1.* Madame Petrazzini returned to Covent Garden, and was heard in *La Traviata*. *May 12.* A Stradivarius violin, known as "Le Mercure," realised £925. *June 15.* With picturesque ceremony the Eisteddfod was opened with the "Gorsedd" in Kensington Gardens, and at the celebrations of the festival in the Albert Hall Mr. Balfour delivered an address. Mr. Asquith spoke on the second day, and on the third Mr. Lloyd George presided, addressing the audience in Welsh. *26.* The Handel and Mendelssohn Festival concluded at the Crystal Palace with a performance of the "Messiah." *Aug. 14.* The Promenade Concerts commenced at Queen's Hall, and a season of opera in English at the Lyric Theatre. *Oct. 1.* Mr. George Washington Moore, founder of the Moore and Burgess Minstrels, died in his 90th year.

NAVAL.—(1909) *Feb. 22.* The *Vanguard* launched at Barrow. *April 20.* The *Nabian*, a 33-knot

destroyer, launched at Southampton. 27. The new sub-committee of the Committee of Imperial Defence met for the first time to investigate the naval questions raised by Lord Charles Beresford. *June 17.* About 350 warships of various types were mobilised for the naval manoeuvres. 28. The unreliability of the boom for defensive purposes was demonstrated at Portsmouth Harbour when the destroyer *Perret* completely cut through it without sustaining serious damage. *Aug. 16.* The sub-committee of the Imperial Defence Committee issued their report on Lord Charles Beresford's criticisms on the Navy, and while generally deciding against the Admiral, agreed that the Admiralty did not fully take him into their confidence.—A boiler explosion occurred on the destroyer *Otter* at Weihaiwei, resulting in the death of two men. 27. A mysterious discovery of blasting cartridges amongst the naval coal was made at Portsmouth. 27. The battleship *Hannibal* struck a reef in Babbacombe Bay, and much damage was done to the bottom plates. *Sept. 17.* Efforts to recover the sunken submarine *C 12* were abandoned, and a funeral service was read on board the *Vindictive* over the spot where the vessel was lost. 22. The cruiser *Clio*, which it was feared had foundered, was reported safe in the Haitan Straits. 30. The *Neptune* launched at Portsmouth, and the *Glasgow* from the Fairfield Works. *Oct. 12.* The institution of a Navy War Council was officially announced. 15. The Prince of Wales formally opened the new Admiralty Harbour at Dover, which had cost 3½ millions. 28. The battleship-cruiser *Indefatigable* launched at Devonport.

PAGEANTS.—(1909) *April 23.* St. George's Day was more generally observed as a national festival. The Prince of Wales, Grand Master, was present at the annual service for members of the Order of St. Michael and St. George at St. Paul's Cathedral. It being also Shakespeare's birthday, a memorial service was held at Southwark Cathedral, and celebrations took place at Stratford-on-Avon. *May 4.* A historical pageant, entirely acted by children, took place at the Whitechapel Art Gallery. *June 10.* The English Church Pageant was opened by the Archbishop of Canterbury in the grounds of Fulham Palace. The history of the Church, covering a period of 1,000 years, was impressively represented in a series of effectively arranged scenes, in which, altogether, 4,200 performers took part. 21. Colchester Pageant was opened by the Lord Mayor of London. 22. The Prince and Princess of Wales visited Wells for the celebration of the millenary of the Bishopric, and afterwards attended a thanksgiving service in the ruins of Glastonbury. *July 17.* The Fleet visited the Thames for a week, the line extending from Southend to the Houses of Parliament, and forming an imposing spectacle. 19. The Bath Pageant was inaugurated by the Duke and Duchess of Connaught. 26. The Welsh National Pageant at Cardiff and the York Pageant were opened.

RAILWAYS.—(1909) *March 1.* Replying to a deputation from Chambers of Commerce, Mr. Churchill said that in view of recent agreements and amalgamations, a general survey of railway policy should be taken. *May 6.* Mr. Churchill announced that he would appoint a committee of experts to investigate the question of railway amalgamation.

SHIPPING.—(1909) *Jan. 2.* Trans-Atlantic passenger traffic, east and west bound, for 1908 showed a shrinkage of almost a million persons in comparison with the figures for 1907. 19. The White Star Company notified their intention of placing the two great steamers building on the Southampton-New York route. *March 2.* The *Mauretania* arrived at Queenstown after the fastest eastern passage ever made. 5. The Canadian Pacific Company's liner *Empress of Britain* arrived at Liverpool, having established a record for the double voyage between Liverpool and Halifax, Nova Scotia, and back, in 11 days 15 hours 7 mins. *July 15.* The formation was announced of a committee to inquire into the present state and administration of the law with respect to pilotage in the United Kingdom. *Aug. 30.* By the arrival of the *Mauretania* at Fishguard a new service was inaugurated between New York and that port. The liner also beat all previous records, either out or home, having completed the journey in 4 days 14 hours 27 mins., at an average speed of 25.41 knots an hour. *Sept. 9.* The Blue Anchor liner *Waratah*, which left Durban for Cape Town on July 26, was given up as lost. 27. The Royal Mail Steam Packet Company celebrated the 70th anniversary of its incorporation by Royal Charter.

SPORT.—(1908) *Nov. 26.* At a Marathon race in New York, Dorando beat the English Olympic victor, Hayes, in 2 hours 44 mins. 20½ secs. *Dec. 12.* The Oxford and Cambridge Rugby match at Queen's Club ended in a draw of 1 goal each.—Wales defeated the Australians at Cardiff by a penalty goal and 2 tries to 2 tries. 26. At Sydney, N.S.W., Johnson, the American coloured boxer, easily beat Burns in the contest for the heavy weight championship of the world. (1909) *Jan. 1.* A Marathon race in Scotland was won by Saint Yves, a young French waiter, in 2 hours 44 mins. 40 secs. 9. The Australian Rugby team defeated England at Blackheath by 3 tries to 1 try. 16. Wales defeated England under Rugby rules at Cardiff by 1 goal and 1 try to nil. 29. The Amateur Skating Championship race for the King's Cup was decided at Lingay Fen, F. W. Dix being the winner, in 4 mins. 41½ secs. 20. England defeated France at Leicester under Rugby rules by 2 goals and 4 tries to nil. *Feb. 6.* The Canadian curlers beat the Scottish team in the test matches by 321 to 220. 20. The Oxford and Cambridge Association match at Queen's Club ended in a draw of 1 goal each. *March 15.* Dorando won a decisive victory over Hayes in a Marathon race at New York in 2 hours 43 mins. 8 secs. 20. Scotland beat England in the Rugby match at Richmond by 3 goals and 1 try to 1 goal and 1 try. At Dublin, Ireland beat France under Rugby rules by 19 points to 8. In the annual inter-Varsity sports at Queen's Club, Oxford beat Cambridge by six events to four. 26. The Grand National Steeplechase was won by a French horse, Lutteur III. *April 3.* Oxford secured a notable victory in the University boat race by 3½ lengths. 21. Oxford won the University golf match at Sandwich by six point to two. 24. Manchester United won the Association Cup, beating Bristol City by 2 goals to nil. 28. The King's colt *Minoru* won the Two Thousand Guineas. *May 10.* The Australian cricket team played their first match, defeating Notts by an innings and 6 runs. 26. The King was present at Epsom when his horse *Minoru* amid great enthusiasm, won the Derby. 28. The

King's Princesse de Galles was beaten by two lengths in the Oaks by Mr. W. C. Cooper's Perola.—The amateur golf championship was won by Mr. R. Maxwell, who beat Capt. Hutchison by one hole. 29. England won the first test match against the Australians at Birmingham by ten wickets. June 16. The second test match at Lord's was won by the Australians by nine wickets. 23. American won the first of the series of international polo matches by 9 goals to 5. July 3. The Australians were successful in the third test match at Leeds, winning by 126 runs. 5. America won the International Polo Cup, beating England by 8 goals to 2. 8. The Belgian Eight won the Grand Challenge Cup at Henley Regatta.—Albert Craig, the "Surrey poet," died after a long illness. 9. The Eton v. Harrow match ended in a draw in favour of the latter team. 10. The Players beat the Gentlemen at the Oval by 64 runs. 17. At Dublin, Ireland beat Scotland in the International Athletic Contest by eight events to three. 28. The fourth of the test matches, played at Manchester, ended in a draw. Aug. 17. First-rate form was exhibited by both the Australian and English elevens in the fifth and final test match at the Oval, which ended in a draw, the rubber being thus won by the visitors. Sept. 2. The St. Leger was won by Mr. Fairlie's Bayardo. 15. The match between Kent, the champion county, and the Rest of England was abandoned owing to the wet weather. 18. A twenty-four hours' amateur walking race at the Stadium was won by T. Payne, of North Shields, who covered 127 miles 542 yards.

IMPERIAL DOMINIONS.

(1908) Nov. 2. The Viceroy held a brilliant Durbar at Jodhpur. 7. A daring attempt was made by a Bengali to assassinate Sir A. Fraser, Lieut.-Governor of Bombay.—The cruiser squadron, commanded by Sir Percy Scott, were most hospitably entertained during their visit to South Africa. 16. The general election in Canada resulted in the return of 134 Liberals and 86 Conservatives. 17. A Woman Suffrage Bill passed the Victorian Legislative Council. Dec. 11. The Indian Summary Justice Bill was passed by the Viceroyal Council.—The Indians of the Six Nations, at Brantford, Ontario, elected the Prince of Wales an honorary "War Chief." 18. Lord Morley's Reform dispatch was published in Calcutta, and was well received. (1909) Jan. 3. A serious religious riot occurred at Titagur, Calcutta, the police having prohibited the sacrifice of cows at a Mohammedan festival. 4. The report of the Straits Settlements and Malay States Opium Commission was unanimous that hasty prohibition would be disastrous to the Colonies.—A draft Anglo-American Agreement dealing with the inland territorial waters between Canada and the United States was drawn up at Washington. 5. Sir Thomas Bent resigned the Premiership of Victoria, and a coalition ministry between the Government party and Independents was arranged.—In New Zealand, Sir Joseph Ward reconstructed his Cabinet. 9. In Australia the Broken Hill Mine strike continued, and Mr. Tom Mann and others were arrested. 11. The Waterways Treaty between the United States and Canada was signed at Ottawa.—The South African Union Convention re-assembled at Cape Town, and the question of a capital was discussed.—The Anglo-German Boundary Commission in West Africa reported

heavy fighting with the tribes.—The Jam Sahib of Nawanagar (Ranjitsinhji) was accorded a great reception on his arrival from England. 26. The Government undertook to institute an inquiry as regards the liquor traffic in West Africa.—The active measures taken in Eastern Bengal to reinforce British authority were stated to have had an excellent effect. Feb. 2. For mutilating the statue of Queen Victoria at Nagpur in November, a student was sentenced to two years' imprisonment, and another man to one year. 8. The new Constitution for United South Africa was published in the form of an Imperial Bill.—Pretoria was selected as the seat of the Government Offices, and Cape Town of the Parliament. 10. Fresh outrages were reported from India. The native Public Prosecutor at Alipur was murdered by a Bengali student, and two bombs were thrown at a train containing a European official of Calcutta, fortunately without doing injury. 19. The Canadian Government proposed the formation of a Department of External Affairs. 23. The submission to The Hague of the Newfoundland Fisheries question was agreed to by the United States. 26. Dinizulu, the South African native chief, was found guilty and sentenced to four years' imprisonment and a fine of £100. March 3. In Newfoundland, the Bond Cabinet resigned office, and Sir E. Morris formed a ministry. 12. General Botha, in a speech, said it must be made clear to the natives that the United South African Parliament would be their sole master in the future. 19. The Canadian Government announced the construction of a railway to Hudson's Bay. 22. The Indian Budget was presented in the Legislative Council, and was favourably received. 24. Lord Strathcona offered £50,000 towards military training in Canadian public schools. 29. Mohammedans held a meeting at Allahabad in support of separate representation under the Indian Councils Bill.—The appointment of Mr. Sinha, a native, to the Viceroy's Council was much criticised. April 2. During an extended tour, the Viceroy of India visited Amritsar and witnessed the ancient religious ceremony of Pahal. 12. Lord Grey opened an Empire Fair at Ottawa organised by the Society of St. George, to which the Queen and Princess of Wales forwarded embroidered banners. 13. The Governor of Newfoundland, owing to the continued political deadlock, ordered a new election. 14. The whirlpool and rapids at Niagara became invisible through a tremendous ice-block in the Lower River, the scene created having never previously been witnessed.—The Indian Government ordered the temporary closing of the Khajur Pass owing to friction with frontier officials. 16. At a reception given in Calcutta in honour of Mr. Sinha, the Maharaja of Tagore strongly denounced the spread of anarchism, which he described as a "cancerous growth." 27. An American fishing schooner was captured within the three-mile limit off Vancouver Island by a Canadian cruiser. 22. To make an offer of an immediate contribution to the Imperial Navy was the substance of a resolution adopted at a mass meeting at Victoria, British Columbia. May 5. It was announced that Lord Grey would complete his full period of six years as Governor-General of Canada, until December, 1910. 11. The Constitution of the South African Union was signed at Bloemfontein.—A British officer and 11 police were killed in an ambush in Northern Nigeria.—The Newfoundland elections resulted

in a victory for Sir Edward Morris. 14. Alterations made by the United States Senate to the Waterways Treaty led the Canadian Parliament to withdraw the measure for the session. 19. In his statement on Imperial Defence, Sir W. Laurier said it would not be wise for the Canadian Navy to be a part of the Imperial Navy, but it should act in accordance with the Admiralty.—A British force attacked the Mullah in Sonaliland, recovering 600 camels. 23. The All-India Moslem League at Lucknow expressed great alarm at the proposed limitations of Mohammedan representation. 25. It was announced that Lord Selborne had satisfactorily adjusted the European and native appeals against the partition of Swaziland.—Contributions amounting to £49,000 were promised towards the Hong-Kong University Endowment Fund. June 2. Mr. Deakin formed a new Cabinet of the Australian Commonwealth. 5. Mr. Deakin telegraphed to the Imperial Government offering, on behalf of the Commonwealth, a *Dreadnought*, or its equivalent. 12. The referendum in Natal on the question of Union resulted in a majority of 7,420 for the Union, 11,122 being in favour and 3,702 against. July 1. Dominion Day was celebrated throughout Canada and in London. 7. Lord Strathcona presented £100,000 to McGill University, Montreal.—Encounters between French steam trawlers and the crews of Canadian, American, and Newfoundland sailing trawlers took place on the Grand Banks. 10. A British picket was cut up in the Tochi Valley, on the Indian frontier, by Khost outlaws. 19. Drastic measures were passed by the Bengal Council for dealing with Indian sedition. The discovery of rich gold-bearing stone was reported at Ballarat, Victoria.—The State of Kelantan was formerly taken over by the Governor of the Straits Settlements. 24. Indian members of Legislative Councils in India emphatically condemned the recent political assassinations, and also the interference of British members of Parliament regarding deportations. 30. A meeting of Europeans and natives at Calcutta decided to erect a statue to Lord Kitchener.—The effective occupation of the "empty north" of the Australian continent was considered in the Commonwealth Parliament. Aug. 7. The anniversary of the introduction of the boycott in India passed off without disturbance.—Queensland's Jubilee was celebrated by an exhibition at Brisbane.—Canada assumed control of the naval yard at Esquimaux. 13. Earl Grey's visit to the Yukon was the cause of great enthusiasm. 19. The heaviest floods experienced for forty years resulted in considerable loss in Victoria. 20. The Viceroy gave a farewell banquet to Lord Kitchener. 22. Timber to the value of millions of dollars was destroyed by forest fires in British Columbia. 25. The meeting of the British Association commenced at Winnipeg with Professor J. J. Thomson, of Cambridge, as President. 30. Earl Grey, the Governor-General of Canada, had a narrow escape from death through being lost during a hunting expedition in the Yukon. Sept. 1. The Parliament Building in Toronto was completely destroyed by fire. 9. An impressive service was held in Johannesburg in memory of the fallen officers and men of the Imperial Light Horse. 14. Lord Dudley, Governor-General of the Commonwealth, opened the seventh Congress of Chambers of Commerce of the Empire at Sydney. An influential meeting was held in

Bombay strongly condemning the treatment of Indians in South Africa. 16. A motion for Preference was adopted at the Congress of Chambers of Commerce of the Empire at Sydney. 21. A Bill for compulsory military training was introduced in the Commonwealth Parliament. 25. General Botha left Southampton on his return to South Africa. 26. Dominion Day was celebrated throughout New Zealand. 28. It was announced that the Australian Fleet unit would be ready to take the place of the present Imperial squadron by the end of 1912. Oct. 16. A destructive fire occurred at a wheat elevator near the Government Docks in Quebec, involving a loss of over £200,000.

FOREIGN COUNTRIES.

(1908) Nov. 3. The Presidential election in the United States resulted in an overwhelming victory for Mr. Taft, the Republican candidate. 8. M. Victorien Sardou, the eminent French author and playwright, died, aged 77. 9. An agreement was arrived at between the French and German Governments in regard to the Casablanca incident. 10. The debate on the Kaiser interview in the *Daily Telegraph* took place in the Reichstag. Prince Billow was warmly supported in his remarks that he trusted for the future the Emperor would be induced to observe more reserve "even in private conversation." 11. A colliery explosion at Radbod, Westphalia, resulted in the loss of 360 lives. 14. The Emperor of China, Kwang-Hsu, died, aged 38, and on the following day the Dowager Empress expired, aged 74. 16. Pius X. celebrated his Jubilee at Rome. 21. The Tsar made his first public appearance in the streets for several years by attending the funeral of the Grand Duke Alexis. 30. An agreement was concluded between the United States and Japan as regards the Pacific Ocean policy of the two countries. Dec. 1. The 60th anniversary of the Emperor Francis Joseph's reign was celebrated in Vienna. 28. A most terrible earthquake desolated Calabria and a large area of Sicily. (1909) Jan. 2. Father John of Kronstadt died, aged 79. 4. The Supreme Court at Washington quashed the colossal fines, amounting to £5,800,000, which had been imposed upon the Standard Oil Company. 7. A further shock of earthquake destroyed the cemetery at Messina. It was estimated that the number killed in the earthquake of the preceding month was 156,500. 9. The suggested annexation of Crete by Greece was emphatically protested against at Constantinople. 12. The amount of a new Russian loan was stated to be £56,000,000.—Wholesale disorder continued in Persia, and Anglo-Russian intervention was suggested in St. Petersburg. 13. 100 men were said to have perished through an explosion in the Lick coal mine in Virginia. 20. An explosion occurred in Auka coal mine in Hungary, over 100 miners being killed. 27. M. Coquelin, *and*, the great French actor, died in Paris, aged 68. Feb. 1. The new Sultan of Morocco, Mulai Haïd, was informed of his recognition by the Powers. 2. Lemoine, the "diamond maker," was condemned by default to ten years' imprisonment and a fine of £150. 3. M. Lopukhin, a former director of the Russian police, was arrested in Paris. 9. The Khedive opened the Nile barrage at Esneh. 12. The centenary of Abraham Lincoln's birthday was celebrated throughout the United States. 14. 300

persons were burned to death at a theatre in Acapulco, Mexico. *March 4.* President Taft officially took office in the United States. *10.* The treaty between Great Britain and Siam was signed. *16.* In the Belgian Chamber, the Congo policy of the Government was severely criticised. *17.* A strike of postal and telegraph employes in Paris caused considerable inconvenience for nearly a week. *26.* The Balkan crisis was terminated by the formal recognition by Russia of Austria's annexation of Bosnia-Herzegovina. *27.* The Serbian Crown Prince announced his renunciation of the succession to the throne. *April 10.* Bluejackets from the British cruiser *Fox* were landed at Bushire, looting of goods from British merchants having taken place. *12.* A military revolution broke out at Constantinople. *18.* An enormous congregation assembled in St. Peter's at Rome for the ceremony of the beatification of Joan of Arc. *27.* The Turkish crisis was brought to an end by the deposition of Sultan Abdul Hamid and the succession of his brother, Rechid Effendi, under the title of Mehemed V. *30.* Queen Wilhelmina of Holland gave birth to a daughter. *May 5.* The Shah of Persia granted a Constitution. *14.* The German Emperor and Empress visited the Emperor Francis Joseph at Vienna. *20.* Sultan Mehemed V. visited the Parliament in Constantinople, and witnessed the taking of the oath by the Deputies. *22.* The Hague Court decision in the Casablanca dispute distributed the blame equally between the French and German authorities. *June 1.* A strike of tramway employes in Philadelphia led to serious rioting. *4.* The waters of the Willebroeck Canal in Belgium overflowed, and the country between Brussels and Vilvorde was flooded. *5.* M. Chauchard, founder of the Magasins du Louvre, died in Paris, leaving a fortune estimated at over seven million pounds. *8.* News arrived at the Hague that an earthquake had occurred in Sumatra, 200 being killed and many injured. *9.* The French Navy Council recommended an expenditure on construction of £120,000,000, to be spread over ten years. *11.* Earthquake shocks, extending over a wide area, were experienced in Southern France. *14.* Death of Dr. Penna, President of Brazil. *17.* The Tsar and the Emperor William met in the Finnish Skerries. A British steamer which had misunderstood the maritime regulations was fired on by a Russian torpedo boat, and an engineer was wounded. *20.* Riotous scenes were witnessed on the Auteuil racecourse, owing to a strike of stable-boys. *22.* The Queen of Spain gave birth to a daughter. *24.* An acute constitutional crisis commenced in Germany by the rejection of the Succession Duty Bill by the Reichstag. Italy celebrated the fiftieth anniversary of the battle of Solferino. *July 6.* The United States Senate adopted the proposal to levy an additional 25 per cent. duty on all dutiable articles. Geneva celebrated the 450th anniversary of John Calvin's birth. *10.* The bi-centenary of the battle of Poltava was celebrated in Russia. *14.* Prince Biliow's resignation of the Imperial Chancellorship was accepted by the German Emperor. *16.* The Shah of Persia was deposed, and his son, Ahmed Mirza, a minor, appointed to succeed him. *18.* Don Carlos de Bourbon, a former Spanish "Pretender," died at Varese, aged 61. *20.* The Clemenceau Ministry in France resigned in consequence of an adverse vote on naval matters, and M. Briand formed a Cabinet. *21.* The Spanish war with Morocco

was strongly opposed in Madrid and elsewhere. *23.* Heavy fighting took place at Melilla between the Moors and the Spaniards, extensive losses occurring on each side. *27.* Rioting of a desperate character broke out in Barcelona as the result of a general strike proclaimed as a protest against the Moroccan campaign. Churches and religious institutions were destroyed by the rioters. *28.* Leipzig celebrated the 500th anniversary of the University. *31.* The Tsar and Empress of Russia were received by President Fallieres on their arrival at Cherbourg. *Aug. 2.* A permanent Pacific Fleet was stated to be in contemplation in America. Terrible floods occurred in Manchuria, and over 1,000 people were reported drowned. *15.* Mr. Ramsay MacDonald, M.P., was forbidden by the German police to speak at a Socialistic meeting at Kiel. *16.* Naval developments in the United States were stated to include the construction of 30,000-ton battleships. *18.* Officers of the international squadron cut down the flagstaff from which the Greek flag was flown at Canca, Crete. The 79th birthday of the Emperor Francis Joseph was celebrated in Austria. *23.* A strike of steel workers near Pittsburg led to serious and fatal rioting. *25.* Sharp earthquake shocks were experienced in Siena, Italy, resulting in some damage. The Porte decided to recognise King Ferdinand's title as King of the Bulgars. *27.* Disastrous floods in the valley of the Santa Catarina river, Mexico, resulted in the loss of 1,500 lives and damage estimated at £2,400,000. *Sept. 8.* The first Session of the Turkish Parliament was concluded. *9.* The death was announced of Mr. E. H. Harriman, the American "Railway King." *25.* The Hudson-Fulton celebrations commenced in New York. The French military airship, "Republique," collapsed at a height of nearly 500 feet, and the crew of four were killed. *26.* The fifth German Dreadnought was launched at Kiel. *28.* The third International Shipping Conference, at which 25 nations were represented, assembled at Brussels. *30.* The sixth German Dreadnought was launched at Wilhelmshaven. *Oct. 2.* The formal opening took place of the Peking-Kalgan Railway, 122 miles long, which was constructed entirely by Chinese capital and labour. *4.* The Spanish troops suffered a severe reverse in Morocco, losing a general and 31 officers and men killed, and 248 wounded. *5.* President Taft arrived in San Francisco, and inspected the newly built city. *9.* General d'Amade, a distinguished French officer, was relieved of his command in consequence of criticisms of French and Spanish policy in Morocco. *13.* The execution of Señor Ferrer, on the ground that he was a revolutionary conspirator, at Barcelona, occasioned considerable excitement on the Continent. *15.* A military crisis was averted in Greece by the resignation of the Princes from the Army. *16.* President Taft and President Diaz exchanged friendly visits at the frontier towns of the United States and Mexico. *19.* Death of Professor Lombroso, the distinguished criminologist, aged 74. The anniversary of the discovery of the Bay of San Francisco, by Gaspar di Portola, in 1769, was celebrated. *21.* The Spanish Government resigned. *23.* The Tsar arrived at Racconigi, and was most cordially welcomed by the King of Italy. *26.* Prince Ito, the famous Japanese statesman, was assassinated on Kharbin railway station by a Korean. *29.* In imitation of their military colleagues, a portion of the Greek Navy revolted, but the mutiny was quickly suppressed.

The British Empire.

* THE total area of the British Empire is nearly 11,400,000 square miles, with a total population of about 410,000,000. The known surface of the globe is estimated at 55,000,000 square miles, and its total population is believed to be about 1,800,000,000; so that the British Empire occupies approximately 21 per cent., or more than one-fifth, of the earth's surface, and its population is in the proportion of 22 per cent., or over one-fifth, of the inhabitants of the globe. The total revenue exceeds £400,000,000, the debt totals over £1,500,000,000, and the trade exceeds £1,600,000,000. Railways to the extent of 90,000 miles have been opened, and 12,160,000 net tons of shipping sail under the British flag, while nearly 265,000,000 tons enter and clear annually at British ports.

Constituent Parts of the British Empire.	Area in Square Miles.	Estimated Population.

THE CONSTITUTION AND GOVERNMENT OF THE BRITISH EMPIRE.

The Constitution.—The Constitution, which is unwritten, recognises certain great principles, including the fair administration of justice; the prohibition of taxation without the consent of the people; and a limited monarchy, the power of the monarch being, in effect, wielded by a ministry supported by a majority of the House of Commons. The component parts of the British Government may be thus briefly described:

1. *The King.*—The King has a right to veto bills passed by both Houses of Parliament, but in practice his veto is almost obsolete. "The King can do no wrong," is a maxim of the Constitution, and consequently no action for civil wrong will lie against the Crown. A petition of right, however, will generally enable an injured subject to obtain redress.

2. *The House of Lords* consists of peers. A peer may hold his seat by (1) hereditary right, (2) creation by the King. English bishops, Irish peers, elected for life, and Scottish peers, elected for duration of Parliament, may also sit in the House of Lords. This House may alter or reject a Bill passed by the House of Commons. In practice it generally submits to the will of the people.

3. *The House of Commons.*—This body consists of 670 elected members representing county, borough, and university constituencies. Roughly speaking, about one-sixth of the population are electors.

4. *The Ministry.*—The Ministry includes members of the Cabinet and a number of other persons who have no seat in the Cabinet. Ministers are drawn from the ranks of the party in power.

5. *The Executive.*—This consists of the King in Council. It is the Crown which "makes peace and war, issues charters, increases the peerage, is the fountain of honour, of office, and of justice." Ministers hold their office during pleasure; they may be dismissed at any moment.

The Judicial System.—(a) *England and Wales.*—The laws in England and Wales are administered by judges appointed by the Crown, who hold office for life, and cannot be removed save on petition presented by both Houses of Parliament. The High Court comprises the King's Bench, Chancery, and Probate, Divorce and Admiralty Divisions. Two Courts of Appeal hear appeals from these divisions, the ultimate Court of Appeal from all the courts in the United Kingdom being the House of Lords. All civil cases arising in London and Middlesex are tried at the Royal Courts of Justice, but civil cases arising in the country are tried on circuit by judges of the King's Bench. The Chancery Division has exclusive jurisdiction to try certain classes of actions. To the County Courts is relegated the duty of trying actions where the sum in dispute does not exceed a certain amount. The County Courts, too, have jurisdiction to try cases arising under certain special Acts of Parliament, e.g.,

* An enlarged edition of WHITAKER'S ALMANACK, containing the whole of the Popular Edition, together with a supplement devoted to the Imperial Dominions, Foreign Countries, Annual Summaries, Sport, Shipping and Railways, Holiday and Health Resorts, County and Municipal Directories, &c., is also published, neatly half-bound, 792 pages, price 2s. 6d. net. (See Table of Contents, p. 593.)

the Workmen's Compensation Act. Bankruptcy cases arising in London are heard in the London Bankruptcy Court, while in the provinces the County Courts have jurisdiction in bankruptcy.

With regard to criminal law in England it is a general principle that, except for certain minor offences, every person charged is entitled to be tried by a jury. Courts of criminal jurisdiction are (1) the judges of the High Court sitting at Assizes for the trial of cases in the provinces, and in London at the Central Criminal for the trial of cases arising in and around London; (2) Courts of Quarter Sessions, holden for every county, and formed of justices of the peace, presided over by a chairman who is unpaid. The recorders of certain cities and boroughs have a jurisdiction similar to that of courts of Quarter Sessions in respect of cases arising within their districts. (3) Courts of Petty Sessions, consisting of two justices of the peace or a stipendiary magistrate. These courts hear and decide minor offences, and have power to commit offenders to take their trial in more serious cases. (4) *Court of Criminal Appeal*: This court, which was established by an Act passed in 1907, has power to hear appeals against convictions and sentences. It will not, however, re-try a case, nor will it upset the verdict of a jury unless it is manifestly unreasonable.

(b) *Scotland*.—Scots civil law, which is entirely different to that of England, is administered by the Court of Session, which is a court of law and equity. The High Court of Justiciary is the supreme criminal court in Scotland. It consists of all the judges, and as a rule it is confined to the trial of serious cases. The sheriff of each county is the proper criminal judge in all crimes occurring within the county which merit only an arbitrary punishment. Borough magistrates and justices of the peace have jurisdiction in petty cases occurring within the burgh or county, and in a number of minor offences under various statutes.

(c) *Ireland*.—The civil courts in Ireland are very similar to the English courts. In the main the criminal procedure is also similar.

Local Government.—Local government is carried out under the central control of the Local Government Board. The subjects which local bodies administer are, *inter alia*, the poor law; the laws relating to public health; the maintenance of the police; the control of the sale of intoxicating liquors; the provision of lunatic asylums. Local authorities also have to administer and carry into effect the laws as to elementary and others schools. Scotland and Ireland each have an elaborate system of local government. The ruling principle has been to entrust special interests to those specially interested.

Defence.—The defence of the Empire is entrusted to the navy and army. The numbers of the navy are maintained by voluntary enlistment, although the right of impressment still exists. The army is maintained by voluntary enlistment.

GOVERNMENT OF THE IMPERIAL DOMINIONS.

Colony Defined.—A Colony means any part of the King's dominions except the United Kingdom, the Channel Islands, the Isle of Man, and British India.

Control of Parliament.—All British dominions are subject (except as regards taxation) to the legislation of the British Parliament; but no

Act of Parliament affects a colony unless that colony is specially mentioned. If the legislature of a colony enacts a law which is repugnant to an imperial law affecting the colony, it is to the extent to which it is repugnant absolutely void.

Colonial legislatures may be controlled (x) by the refusal of the governor's assent to any measure passed; (2) by reservation of a measure for the consideration of the Crown, and refusal of Crown's assent; (3) by a suspensory clause and the refusal of the Royal assent.

Subject to what has been stated above, the parliament of a self-governing colony—such as Victoria—exercises throughout the colony all the ordinary powers of a Sovereign assembly.

The Imperial Dominions may be divided into four classes, according to the way in which they are governed:

1. *Colonies wherein both legislative and executive powers are vested in the governor alone*.—In this class are Gibraltar, Labuan, and St. Helena, where power is also reserved to the Crown to legislate by Order in Council. The South African colonies of Bechuanaland, Basutoland, and Zululand are governed in substantially the same way, but no power is reserved to the Crown.

2. *Colonies where there is government by a governor acting with an executive and a legislative council, the councils being nominated by the Crown or a governor representing the Crown*.—Colonies so governed include British New Guinea, Ceylon, Falkland Islands, Fiji, Gambia, St. Vincent, Sierra Leone, Straits Settlement, Trinidad.

3. *Colonies where there is government by legislative assembly wholly or partly elected, and an executive council nominated by the Crown or the governor representing the Crown*.—In this class may be placed the Bahamas, Barbados, Bermuda, British Guiana, Jamaica, Leeward Islands, Mauritius, and Malta.

4. *Colonies having responsible government*.—In these colonies the principal government departments are administered by political chiefs who are responsible, not merely or mainly to the Crown, but to the elected legislature. The colonies thus governed include Canada, Newfoundland, New South Wales, New Zealand, Queensland, Natal, Western Australia, the Cape of Good Hope, South Australia, Tasmania, Victoria, Transvaal, and Orange River Colony.

British India.—India is governed by the King as Emperor, acting on the advice of the Secretary of State for India. Where the advice of a council comes in, it is the Council of India, whose members are appointed by the Secretary of State. In certain matters the actions of the Secretary of State and Council are not valid unless sanctioned by Parliament. The Governor-General of India in Council acts for executive purposes very much on the lines of the governing body of a Crown colony.

Protectorates.—The protectorates are countries which, as regards their foreign relations, are under the exclusive control of the King. The protectorates of the British Empire include British Central Africa, British East Africa, Uganda, and Nigeria.

Spheres of Influence.—A sphere of influence may be described as an area wherein other foreign Powers undertake not to attempt to acquire influence or territory by treaty or annexation.

*. The figures in parentheses refer to the Appendix, where a descriptive account of each country will be found.

Trade and Products of the British Empire.

THE TOTAL TRADE OF THE EMPIRE in 1907 amounted to £1,667,343,000, of which £1,236,806,000 (74·2 per cent.) was Foreign, and £430,537,000 (25·8 per cent.) Inter-Imperial.

The following table shows the approximate amount of certain staple articles produced in the British Empire during the fifteen years 1893-1907:—

Years.	Wheat.	Barley.	Oats.	Tea.	Coffee.	Sugar.	Rubber.	Cotton.
	Bushels.	Bushels.	Bushels.	Lb.	Lb.	Cwt.	Lb.	Lb.
1893	408,100,000	83,800,000	257,800,000	217,230,000	54,497,000	...	6,159,000	1,015,846,000
1898	452,900,000	99,400,000	312,500,000	278,334,000	38,581,000	54,300,000	13,423,000	1,169,429,000
1903	572,200,000	108,100,000	369,500,000	362,064,000	39,442,000	49,900,000	5,288,000	1,268,579,000
1904	458,200,000	107,700,000	353,200,000	382,590,000	37,109,000	57,800,000	9,070,000	1,534,620,000
1905	565,000,000	112,000,000	375,300,000	398,409,000	42,076,000	47,300,000	9,818,000	1,376,985,000
1906	565,500,000	119,900,000	401,900,000	413,549,000	25,426,000	59,500,000	10,907,000	1,987,027,000
1907	412,300,000	114,200,000	372,500,000	430,913,000	45,106,000	55,700,000	11,940,000	1,235,124,000

Immigration and Emigration, 1908-09.

The following tables give the number of persons who left the British Isles between the years 1840-1908, and of those who arrived from 1870-1908. The Nationality of the Immigrants is given, and the Destinations of the Emigrants (*British and Irish only*).

NATIONALITY OF IMMIGRANTS.					DESTINATION OF EMIGRANTS.					
Year.	British and Irish.	Foreigners.	Not distinguished.	Total.	Year.	To British North America.	To the United States.	To Australia and New Zealand.	To South Africa.	Total.
1870	Not ascertained	retained until 1876	49,157		1840	32,293	40,642	15,850	—	90,743
1875	Do.	do.	94,228		1845	31,803	58,538	830	—	93,501
1880	47,097	21,309	—	68,316	1850	32,961	223,078	16,037	—	260,849
1885	85,468	27,006	1,075	113,549	1855	17,866	103,414	52,309	—	176,807
1890	109,470	44,663	1,777	155,910	1860	9,786	87,500	24,302	—	128,469
1895	109,418	64,803	1,453	175,674	1865	14,424	118,463	36,683	—	174,891
1896	101,742	56,509	1,662	159,913	1870	27,168	152,466	16,526	—	202,511
1897	95,221	57,994	1,899	155,114	1875	12,305	81,193	34,750	—	140,675
1898	91,248	46,362	1,736	139,346	1880	20,902	166,570	24,184	—	227,542
1899	100,246	59,576	2,289	162,111	1885	19,838	137,687	39,395	—	207,644

MINERAL PRODUCTION OF THE EMPIRE.

THE following table shows the approximate amount of Coal and Iron produced in the British Empire during the years stated. The production of precious metals will be found on page 391.

	Coal.	Iron Ore.	Pig Iron.
	tons.	tons.	tons.
1893	174,813,000	11,390,000	7,019,000
1898	217,311,000	14,418,000	8,675,000
1903	256,414,000	14,774,000	9,222,000
1904	259,778,000	14,760,000	8,965,000
1905	265,220,000	15,799,000	10,077,000
1906	284,227,000	16,683,000	10,644,000
1907	304,722,000	17,029,000	10,680,000

THE BRITISH ISLES.

THE British Isles, including the United Kingdom of Great Britain and Ireland, the Isle of Man and the Channel Islands, lie between the 48th and 61st degrees of N. latitude, and the 2nd degree of East and the 11th degree of West longitude. The total area is 77,683,084 acres, or 121,377 sq. miles, with a population in 1909 of 45,008,421. In 1908 there were 1,176,374 births (26·4 per 1000), 676,634 deaths (15·2 per 1000), and 319,061 marriages (14·3 per 1000) in the United Kingdom. The average strength of the Regular Army of the United Kingdom was 248,244 officers and men in 1908, the Army Reserve numbered 134,110, the Special Reserve 63,151, the Territorial Force 199,290, and the Police numbered 64,437. The number of Immigrants was 342,922, and of Emigrants 386,411, in 1908. The number of Paupers and Dependents in Jan. 1909 was 1,161,402, and 15,550 Criminals were convicted in 1908. There were in 1908 45,304 registered Joint Stock Companies trading in the United Kingdom, the paid-up capital amounting to £2,123,492,957, and 1,852 incorporated Building Societies, with liabilities of £57,300,118 (exclusive of 58 unincorporated societies, with liabilities of £15,989,111). There were also 2,267 Industrial and Provident Societies, with 2,461,028 members, having a share capital of £32,751,952 and a sales total of £109,020,449. In 1908 there were 28,598 applications for Patents, of which 16,284 were sealed, and 5,965 Trade Marks were registered. With regard to Insolvency, 4,733 persons were adjudicated bankrupts in 1908, with total liabilities £6,659,383 and assets £2,797,578. In 1908 shipping to the extent of 65,469,057 tons entered and 65,977,139 tons cleared at various ports of the United Kingdom, while in 1907 sailing and steam vessels numbering 307 were totally lost, their tonnage being 131,880, and 898 lives were lost, of whom 112 were passengers and 786 crew. Of the total area, 46,876,686 acres were under cultivation in 1908, 8,176,310 acres being under corn crops, 4,028,893 under green crops, 34,172,083 other crops, grass, permanent pasture, etc. The live stock included 2,079,043 horses, 11,697,592 cattle, 31,245,836 sheep, and 4,041,322 pigs; 53,929,440 bushels of wheat, 61,568,896 bushels of barley and bere, and 176,008,072 bushels of oats, were grown in the United Kingdom, while 91,131,205 cwt. (about 183,000,000 bushels) of wheat and 12,969,855 cwt. of wheatmeal and flour were imported in 1908.

BIRTHS, MARRIAGES, AND DEATHS, 1840-1908.

The numbers of Births, Marriages, and Deaths for the United Kingdom and the rate per 1,000 of the population are shown below:—

THE UNITED KINGDOM.

Year.	Births.	Rate per 1,000.	Marriages.	Rate per 1,000.	Deaths.	Rate per 1,000.
1895	1,154,898	29·4	279,746	14·3	735,244	18·7
1900	1,159,922	28·2	311,254	15·1	757,732	18·4

CENSUS POPULATION OF THE UNITED KINGDOM.

Previous to 1801 there existed no official return of the population of either England or Scotland; nor was it till 1831 that statesmen had anything more than surmise to guide them respecting Ireland, and the census then taken of that country was far from correct. The estimate formed of the English population at various periods, calculated from the numbers of bap-

tisms, burials, and marriages, was in the years—

1570.....4,160,221 1670.....5,773,646
1600.....4,811,718 1700.....6,045,008
1630.....5,600,517 1750.....6,517,035

The first general Census was taken in 1801, and since the time named there has been a fresh numbering every ten years, with the following results:

	1801.	1831.	1841.	1851.	1861.	1871.	1881.	1891.	1901.

† Exclusive of the Army, Navy, and Merchant Seamen Abroad.

‡ These rates have been corrected for the varying length of the intercensal periods.

§ Incorrectly taken.

From the above figures it appears that the population of the United Kingdom (including Islands in the British Seas) in 1901 shows an increase of upwards of 3,725,000 when compared with the population in 1801, and the number of inhabited houses an increase of 508,000.

URBAN POPULATION, BIRTHS AND DEATHS (U.K.), 1908.

In the following table the Population and Birth and Death Rates for the year 1908 are shown for some large towns in the United Kingdom and in different parts of the globe. The population of each town in the United Kingdom (with the exception of certain Irish towns) is estimated to the middle of 1908.

Cities, Boroughs, and Urban Districts.	Populatin.	Ratio per 1,000.		Cities, Boroughs, and Urban Districts.	Populatin.	Ratio per 1,000.

AVERAGE WEEKLY EARNINGS OF RAILWAY SERVANTS.

The following table shows the average wages per head of workpeople employed in the coaching, goods, locomotive, and engineers' departments of the 27 principal Railway Companies of the United Kingdom during the first or second week in December in each of the years 1897-1906. The Companies included in the table employ over 90 per cent. of the total number of Railway servants.

THE BUDGET, 1909-1910.

The Chancellor of the Exchequer opened his Budget for 1909-10 on April 29, 1909, but the Finance Bill of 1909 did not pass the report stage in the House of Commons until Oct. 29, and was not expected to go to the House of Lords for second reading until Nov. 23. The original proposals of the Finance Bill were to provide for an estimated deficit in the year 1909-10 of £14,200,000 (including £7,000,000 for Old Age Pensions and £3,000,000 for the Navy), by new or increased taxation estimated to produce in the year 1909-10 as follows: Income Tax, £3,500,000; Death Duties, £2,850,000; Liquor Licences, £2,500,000; Tobacco, £1,900,000; Spirits, £1,600,000; Stamp Duties, £500,000; Motor Cars and Petrol, £500,000; and Land Values, £500,000. As, however, the debate on the Finance Bill was prolonged until after the first half of the financial year had passed, the Chancellor of the Exchequer was able to revise his estimates by experience of the receipts into the Exchequer, with the result that a large decline in the yield

of the spirit duties under the increased charge required that the estimate of additional receipt from this source of revenue should be reduced from £1,600,000 to £800,000, whilst the large yield of the Death Duties in the first half of the financial year (including a million from the estate of the late Mr. Charles Morrison) enabled him to increase his estimate of the receipt from this source for the whole of the year by £1,300,000, thus making up the estimated increase in the receipt of the Death Duties for the year 1909-10 to £4,150,000. In the year 1910-11 a further increase is expected, and if this estimate be realised the yield of the Death Duties, which has hitherto not been so much as twenty millions, may be twenty-six millions or more. In addition to the proposed increases the sum of £3,500,000 was taken from the Sinking Fund, and the final figures were presented as Revenue £162,840,000, Expenditure £162,469,000, Balance for Contingencies £371,000.

EXCHEQUER RECEIPTS AND ISSUES, 1908-1909.

1909-1910	36,782,590	35,142,700	—	+ 2,823,200	128,000	Reginald McKenna.

The naval expenditure of the British Empire on sea-going force in 1903-9 was £32,138,000, of which the U.K. contributed £27,656,000. The aggregate gross tonnage of the Mercantile Marine protected thereby was 17,310,351 (U.K.) and 1,331,106 (India and Colonies), total 18,709,537 gross tons, which carries the annual value of nearly £1,700,000,000 (including ballast and speed). The naval expenditure is therefore 1·9 per cent., if regarded as a premium for insurance. Other nations spend as follows in millions of £.—U.S.A., 25 to protect 4,854,787 tons of Mercantile Shipping; Japan, 5 for 1,150,000 tons; Russia, 12 for 975,000 tons; Germany, 11 for 4,230,000 tons; and France, 12 for 1,864,000 tons.

* 1840-50, 3 Jan. to 2 Jan.; 1855 onward, 1 April to 31 March.

(a) Appropriations in Aid.—These consist of sums paid: By India £102,400, Australian Commonwealth £204,600, Dominion of New Zealand £100,000, Cape Colony £46,000, Natal £25,000, and Newfoundland £3,100—a total of £472,000. £300,000 is received from stoppages from pay for uniform and extras, £146,000 from the sale of old stores, £50,000 from proceeds of sales of old stores, &c., and £59,000 from the sale of charts. The fees paid for training Naval Cadets in the R.N. Colleges at Dartmouth and Osborne amount to £38,000. *New Coal*.—The estimated value of steam coal in stock on 31 March, 1909, was £1,158,000; additions to the value of £1,857,000 and issues to the value of £1,068,800 were anticipated, so that the estimated value of stock at 31 March, 1910, is £1,167,000. Steam coal to the value of about £1,750,000 is expended in one year.

COMPARISON OF MILITARY EXPENDITURE.—The Estimates for 1909-1910 show a decrease of £24,000, and the Army is decreased by 1,800 men. In the year 1908-9 the Military Expenditure of the United Kingdom amounted to £27,000,000, and India spent £21,000,000, while other parts of the Empire accounted for £12,000,000 (of which amount £7,300,000 fell upon the Imperial Exchequer), a grand total of nearly £61,500,000. The Ordinary Military Expenditure of other countries was as follows:—Russia, £45,000,000; Germany, £33,500,000; France, £27,500,000; U.S.A., £25,000,000 (exclusive of £28,000,000 for Pensions); Austria-Hungary, £14,600,000; Italy, £11,500,000; and Japan, £7,000,000.

DUCHY OF LANCASTER.

The revenue of the Duchy was £29,000 in 1847 and £122,772 in 1908. £63,000 was paid to His Majesty; £9,555 laid out for the benefit of the estate; £6,230 deducted under various Acts of Parliament; £7,504 to defray the cost of management; and £2,000 to the Chancellor. Capital account, December, 1908, £16,448 in cash and £40,000 in securities.

DUCHY OF CORNWALL.

Income, 1908, £144,115. £82,500 was paid to the Prince of Wales; £12,388 was laid out for the benefit of the estate; deductions under various Acts of Parliament, £17,617; superannuations,

&c., £4,540; expenses of management, £10,438; leaving a balance in favour of 1909 of £15,999. Capital account, December, 1908, £30,000 in cash and £442,513 in securities.

WOODS, FORESTS, AND LAND REVENUES, OR CROWN LANDS.

The receipts amounted on 31 March, 1908, to £802,144; expenditure to £183,304. £520,000 was paid over as Surplus Income to the Exchequer. The expenses on "Royal Forests and Woodlands" came to £25,171, and on "Woods, Forests, and Lands" to £146,920. The balances (capital account) on 31 March, 1908, were £87,128 cash and £531,713 stock.

(a) Appropriations in Aid.—Under Class I.—Receipts at the Convalescent Home for Officers of the Navy and Army at Osborne, £2,400; Bents and Licences for letting chairs, &c., £9,483; Sale of Ordnance Survey Maps, £26,200; and for map revision, £2,802; Harbour dues, £5,600; and £3,500 in lieu of rates on Foreign Consulates and Legations in London. Class II.—Fees for Private Bills, &c.: House of Lords, £27,000; House of Commons, £18,000; Home Office fees and fines, £8,700; Foreign Office (Passport) fees, £590; Board of Trade fees, £26,327; Patents (stamp receipts), £268,000; Designs £5,000; Trade Marks £12,000; Mercantile Marine Office fees, &c., £4,750; Bankruptcy Department, £111,506; Board of Agriculture fees, £26,400; Royal Mint profit on coinage, £29,000; Sales by Stationery Office, £220,000. Class III.—Supreme Court fees, £53,920; County Court fees, £50,500; Proceeds of Prison Labour, £20,000; Scottish Court fees, &c., £49,400; Irish Police Tax, &c., £24,728; payments in aid of cost of Royal Irish Constabulary, £42,140. Class IV.—Queen's College (Ireland) fees, £7,530. Class V.—Consular Court fees, &c., £202,072. Class VI.—Fees for honours and dignities, £4,250 (exclusive of £1,950 stamp duty on dignities conferred). Tower of London, Admission Fees, £2,200.

THE INCOME TAX.

A Tax on Income was first imposed by Pitt in 1798, in order to meet the expenses of the French War, and at the conclusion of peace in 1801 it was abolished. In 1803 the Income Tax was again imposed as a Property Tax, divided into Schedules A, B, C, D, and E, as at the present time, the rate being 1s. in the £ on incomes exceeding £50, except in the case of Schedule B, where the rate was 9d. in England and 6d. in Scotland. In 1805 the rate was increased by 3d.,

and in 1807 the figures were 2s. in the £ on Schedules A, C, D, and E, 1s. 6d. on Schedule B for England and 1s. for Scotland. At the conclusion of peace the Income Tax ceased for 26 years (1815-1842), to be re-imposed by Sir Robert Peel on June 23, 1842, at the rate of 7d. in the £ on all incomes exceeding £150. In 1842 the tax produced about £5,000,000, or about £710,000 per 1d. of tax; and in 1907-8 the yield was £31,860,000, or £2,622,000 per 1d. of tax.

 * The changes contemplated in the Finance Bill 1909 (the final stage of which had not been reached when these pages were sent to press) will be found on p. 353.

TEN YEARS OF PROPERTY AND INCOME TAX ASSESSMENTS.

The following table gives the amount assessed to Property and Income Tax in the ten years 1908-9 to 1907-8. "Land and Houses" represent Schedules A (Ownership of Lands and Houses) and B (Occupation of Land); "Businesses" represent Schedule D (Businesses, Concerns, Professions and Employments); "Investments" are Schedule C (British, Indian, Colonial and Foreign Government Securities) and "Salaries" are those included under Schedule E (Government, Corporation and Public Company Officials).

Year.	Land and Houses.	Businesses.	Foreign Investments.	Salaries.	Total.	Rate in £.	Produce of 1d.
1898-9	£ 153,110,123	£ 318,555,003	£ 36,793,116	£ 39,861,203	£ 548,229,430	8	2,284,289

THE NATIONAL DEBT.

The National Debt is mainly the remnant of the growth of many years, and nearly all was raised for foreign wars. There was a trifling sum of £664,263 until the "Glorious Revolution" of 1688, which added nearly £16,000,000 to the Debt. Under Queen Anne the campaigns of the Duke of Marlborough added nearly £38,000,000, part of which was paid off in the time of George I. In the reign of George II. about £87,000,000 were added, but the first twelve years of George III. saw £10,000,000 of this paid off. The American War added £121,000,000, making the total nearly £250,000,000, which was reduced considerably until 1793, when the repayments ceased owing to the outbreak of the French Revolutionary War. In twenty-three years, £601,500,343 were added to the debt for the purposes of the war, the following amounts being raised:—

Year.	£	Year.	£	Year.	£
1793...	4,877,956	1801...	27,305,271	1809...	12,298,375
1794...	6,998,389	1802...	14,638,254	1810...	7,792,444
1795...	30,404,831	1803...	8,752,761	1811...	19,143,953
1796...	22,244,682	1804...	14,570,763	1812...	24,790,697
1797...	30,356,873	1805...	16,649,801	1813...	39,649,282
1798...	16,858,593	1806...	13,035,344	1814...	34,563,603
1799...	21,714,863	1807...	10,432,934	1815...	20,241,807
1800...	23,030,520	1808...	12,095,044	1816...	514,059

The amount of the Debt in January, 1816, was £990,436,000 (Funded, £826,312,000; Unfunded, £164,124,000; Annuities, £39,397,000), the annual charge being nearly £33,000,000, but the following amounts were paid off from 1817-1837:—

Year.	£	Year.	£	Year.	£
1817...	1,826,814	1824...	7,456,559	1831...	2,673,858
1818...	1,624,606	1825...	9,900,725	1832...	5,696
1819...	3,163,130	1826...	1,195,531	1833...	1,023,784
1820...	1,918,019	1827...	2,023,028	1834...	1,776,378
1821...	4,104,457	1828...	4,667,965	1835...	1,270,050
1822...	9,964,564	1829...	2,760,029	1836...	1,590,727
1823...	5,261,725	1830...	1,935,465	1837...	1,985,885

At the accession of Queen Victoria the amount stood at nearly £788,000,000, with an annual charge of £29,000,000. Small sums were paid off annually from 1837-1854, when the Russian War added £33,000,000 to the Debt. Repayments were made from 1858 onwards, with slight increases in 1868, 1875, 1878, 1879 and 1886, the following being the actual amounts paid off:—

Year.	£	Year.	£	Year.	£
1858...	2,977,727	1872...	3,443,023	1886...	Nil.
1859...	58,441	1873...	6,899,370	1887...	5,993,723
1860...	2,888,254	1874...	15,094,807	1888...	30,703,615
1861...	381,691	1875...	Nil.	1889...	7,426,812
1862...	1,038,371	1876...	7,094,132	1890...	8,636,931
1863...	968,099	1877...	1,106,831	1891...	4,709,820
1864...	9,236,915	1878...	Nil.	1892...	5,412,351
1865...	4,054,429	1879...	Nil.	1893...	6,894,203
1866...	8,780,050	1880...	4,034,595	1894...	4,543,540
1867...	1,886,986	1881...	5,350,543	1895...	8,943,477
1868...	Nil.	1882...	15,647,752	1896...	7,620,502
1869...	1,092,700	1883...	6,669,421	1897...	7,630,258
1870...	4,073,603	1884...	9,952,555	1898...	6,643,795
1871...	5,303,405	1885...	6,093,283	1899...	6,873,119

On 31 March, 1899, the gross total was £635,049,965, being a decrease since 1837 of £153,000,000. For the South African and China wars £162,000,000 were raised, but since 1903 large reductions have been made.

The total gross Debt on 31 March 1909 was £754,121,309, against which must be set the value of the Suez Canal Shares (£32,667,000), other assets (£4,493,162), and Exchequer balances (£6,350,427), a total of £43,510,589; leaving the net amount of the Debt at £710,610,720.

The following table shows the state of the Debt since 1875, and the amounts raised or discharged since that year. In 1887-8 the sum of £26,558,959 was cancelled under the Act of 1887, and Local Loans Stock created in its place:—

STATEMENT OF THE NATIONAL DEBT, 1875-1900.

1908-1909	711,475,805	18,011,046	9,988,954	4,717,114	8,787,963	Nil	- 8,787,963
1909-1910	702,687,897	18,120,000	6,880,000

The Debt is of three descriptions:—I. Funded (a) *Permanent*, (b) *Terminable*; II. Unfunded; III. Certain other Liabilities. The Funded and Unfunded (or Floating) Debts are included in the fixed annual charge, and details of the various descriptions are given below:—

I. FUNDED DEBT.—(a) *Permanent*.

That is, Debt which the Government is not under obligation to pay off at any fixed time. This consisted of the following stock on 31 March:—

	1900.	1909.
2½ per cent. Consols...	£577,342,017	£573,739,122
2¼ per cent. Consols...	4,151,077	4,112,356
2½ per cent. (16 Vict.)	30,469,927	30,341,530
Bank of England Debt	11,015,100	11,015,100
Bank of Ireland do. ...	2,630,769	2,630,769
	£625,608,890	£621,838,957

(b) *Terminable Annuities*.

These are a description of Sinking Fund by means of which a considerable portion of debt is paid off year by year, and after a certain time the capitalized sum entirely extinguished, the Treasury giving an Annuity for a certain number of years in exchange for permanent stock.

The following is a list of these terminable annuities with their amount, the dates when they expire, and their capitalized value as on March 31, 1909:—

- (1) Annuities for Life and Terms of Years (£1,468,465, created 1830-1883) £1,438,432
- (2) Annuities created by the National Debt Act 1883, National Debt Local Loans Act 1887, and the Finance Act 1899:—
 - (a) Savings Banks Annuities (£490,533 expiring in 1913-1914) 2,468,573
 - (b) Savings Banks Annuities (£773,637 expiring in 1924-1925) 10,873,380
 - (c) Book Debt Annuities (£745,215 expiring in 1924) 9,542,161
- (3) Minor Annuities:—
 - (a) Trustee Savings Banks Deficiency Annuity (£83,672 created in 1881 and expiring in 1917) 686,741
 - (b) Sinking Fund Annuity (£15,547 created in 1884 and expiring in 1934) —

Total Capital value... £38,009,337

II. UNFUNDED DEBT.

The Unfunded Debt consists of loans, money borrowed for short periods, which the Government is bound to pay off at certain dates, and is represented by certain loans having currency for periods varying from a few months to five or more years. On 31 March, 1909, these con-

sisted of six months' Treasury Bills to the amount of £14,500,000, and also of War Stock and War Bonds (2¼ per cent.) repayable in 1910 to the amount of £21,339,602, and Exchequer Bonds (2¼ per cent.) repayable by annual drawings of £1,000,000 to the amount of £7,000,000.

The total Debt on which interest is included in the Permanent or Fixed Annual Charge is therefore £702,687,897.

III. OTHER CAPITAL LIABILITIES.

These sums, which are not included in the capital on which interest is arranged for in the permanent charge, stood as follows on 31 March, 1909:—

Under Barracks Act, 1890	£585,077
„ Telegraph Acts, 1892 to 1907	6,880,829
„ Uganda Railway, 1896 to 1902	4,237,984
„ Public Offices Act, 1895	403,701
„ (Whitehall Site) Act, 1897 ...	452,340
„ Royal Niger Comp. Act, 1899	661,666
„ Naval Works Acts, 1895-1905	20,570,019
„ Military Works, 1897 to 1903	11,805,171
„ Land Registry Buildings, 1900	190,603
„ Pacific Cable Act, 1901	1,880,795
„ Public Offices Site (Dublin) Act, 1903	89,620
„ Public Buildings Expenses Act, 1903	1,205,607
„ Cunard Agreement Act, 1904	2,470,000
Total	£51,433,412

There are also sundry Contingent or Nominal Liabilities which the State is not likely to be called upon to any material extent to discharge. On 31 March, 1909, these consisted of the following sums:—

Liability to Suitors (Chancery)	£1,932,125
„ „ Bankrupts' Estates	1,114,575
„ „ Suitors, &c. (Ireland) ...	602,436
Court of Bankruptcy	42,542
Unclaimed Dividends (B. of England)	79,000
„ South Sea Annuities, &c.	39,788
„ Dividends (Bank of Ireland) ...	1,459
„ Prize Money	6,492
Life Annuities, &c. (Nat. Debt Office)	20,000
Unclaimed Dividends	837,915

COST OF THE DEBT.

The Cost of the National Debt for the last two years is detailed below:—

	1907-1908	1908-1909
I. Annual Interest—		
Funded Debt	£	£
Terminable Annuities	15,773,533	15,652,808
Unfunded Debt	3,596,992	3,550,707
II. Cost of Management	1,584,073	1,166,203
III. New Sinking Fund ...	180,107	175,156
	8,365,294	7,455,126

Total..... £29,500,000 £28,000,000

TRADE OF THE UNITED KINGDOM.

* General Trade (Merchandise), 1700-1850, and 1854-1908.

Imports and Exports Classified.

The tables on the next page show the value of British Imports and Domestic Exports, differentiating Imperial and Foreign customers, and summarizing the merchandise into the four main headings of Food, Drink and Tobacco, Raw Materials, Manufactures, and Miscellaneous. The values are as ascertained by the Board of Trade, and represent in the case of Imports the full value (what is known as "C.I.F."), i.e., cost, insurance, and freight, or if sent on consignment the sale value at the date of entry; in the case of exports the term "Domestic" includes only British and Irish produce or manufactures, and the values are those known as "F.O.B.", i.e., cost and charges for delivery on board the ship.

It must always be borne in mind that Imports have two values—F.O.B. when they *start* and C.I.F. when they *arrive*, the latter being the free on board, or cost, plus insurance and freight. Similarly, exports scheduled with their F.O.B. values as above are enhanced in value (= C.I.F.) by the time they are landed. The existence of these two values accounts, in some degree, for the difference between the figures ascertained by the Board of Trade for the United Kingdom and those ascertained by the statistical authorities of other countries.

CLASSIFICATION.	IMPORTS (C.I.F.).			DOMESTIC EXPORTS (F.O.B.).			RE-EXPORTS (F.O.B.).

THE KINGDOM OF ENGLAND

may be roughly said to be divided from Scotland on the north by the Cheviot Hills and the rivers Tweed and Solway, and from Wales by the Severn and Dee. Except in the west and the north, England is for the most part a level country, so cultivated as to be highly productive. The other districts have mineral riches, including iron, tin, lead, zinc, slate, and coal, which make abundant amends for the poverty of their surface.

The southern and eastern parts of England have a population mainly derived from Belgic Gaul, whilst the western districts and Wales have been peopled from the West of France and the North of Spain, while Ireland and Scotland are believed to have been peopled by a race originally Belgic. When the Romans first came to our shores the inhabitants might have been roughly divided into two sections: those who lived inland, and who may with some reason be called Celtic colonists, were a race of hunters and shepherds, dressed in the skins of beasts, and inhabiting huts made of rude wickerwork and covered with rushes; whereas the coast-dwellers were, probably, of Gallic origin, with some approach towards civilisation, and holding intercourse, for purposes of trade, with foreign merchants visiting the island. Neglecting the Romans, who were no more than mere military garrisons, and mingled little with the natives—much like Europeans in the East at the present day—we have the Saxons and Jutes established from Kent to Devonshire, and the Angles (and subsequently the Norsemen) from the Thames to the Tweed. The Norman Conquest brought in a mixed multitude from the Continent; the wars of Stephen introduced a numerous body of Flemings, who were settled by Henry II. in Wales; and the commercial views of Edward III. led to the establishment of a still larger body of the same people as clothworkers in Kent. The west of England was known to the Phenicians, and was resorted to by them for its tin, four centuries or more B.C.; hence the whole country received the name of the Cassiterides, or Tin Islands. When invaded by Caesar (B.C. 55) it was called Britain (perhaps derived from Prydain, the name of an early chief of great power), or sometimes Albion, that is, the *White Land*, from the white cliffs on the S.E. coast.

Agriculture and Live Stock.—In 1908 the cultivated area was 24,585,455—Acres under Wheat, 1,549,732; Barley, 1,333,326; Oats, 1,958,810; Beans, 283,661; Peas, 162,023; Rye, 45,842; Potatoes, 391,093; Turnips, 1,052,488; Mangold, 415,360; Cabbage, 60,489; Kohl Rabi, 17,177; Rape, 74,303; Clover and Rotation Grasses, 2,565,508; Small Fruit, 75,750; Hops, 38,921; Other Crops, 111,532; Bare Fallow, 301,210; total arable land, 10,659,477. Permanent grass, 13,000,922. The produce in 1908 was 6,225,181 quarters of wheat (32·16 bushels per acre); 5,617,155 quarters of barley (32·49); 9,993,773 quarters of oats (40·82); 1,057,467 quarters of beans (29·94); 540,404 quarters of peas (28·24); 2,717,359 tons of potatoes (6·95 tons per acre); 14,515,895 tons of turnips and swedes (13·79); 8,756,647 tons of mangold (21·08); 2,597,094 tons of hay from clover, sainfoin, and rotation grasses (31·93 cwt. per acre); and 5,419,056 tons of hay from permanent grass (25·4 cwt. per acre). The Live Stock included 1,179,902 horses; 2,046,512 cows and heifers; 2,951,766 other cattle; 5,980,125

ewes for breeding; 9,978,750 other sheep and rams; and 2,439,087 pigs.

Education.—Public Elementary Education is free, and is conducted in various institutions known as Ordinary Public Elementary Schools,* with 223,027 boys and 208,686 girls under 5 years, 2,262,809 boys and 2,224,458 girls over 5 and under 12, and 533,969 boys and 531,182 girls of 12 years and over, on the registers in 1908. There were also 39 Higher Elementary Schools, with accommodation for 12,471 scholars, and Special Schools for Blind, Deaf, Defective, and Epileptic Children. Teachers are trained at 656 Pupil-Teacher Centres and at 79 Training Colleges and 27 Hostels. Public Secondary Education is conducted at 840 Recognised Secondary Schools, at 6,874 Evening (Continuation) Schools, and at 193 Day Technical Classes, 40 Art Classes, 37 Technical Institutions, and 225 Schools of Art. A Parliamentary grant of £11,380,784 was made for Public Elementary Education in 1907, the total receipts for that purpose being £11,702,300, exclusive of £9,491,703 received from Local Rates, the total payments being £21,194,003 in 1907. In addition to State action, there are many establishments known as "The Public Schools," where the upper and middle classes are educated at their own cost; and Universities at Oxford (1249 A.D.), Cambridge (1257 A.D.), Durham (1831), London (1836), Manchester (1850), Birmingham (1900), Liverpool (1903), Leeds (1904), Sheffield (1905), and Bristol (1909), with various University Colleges throughout the Kingdom.

Occupations (1901).—Of the 12,134,259 males of 10 years and upwards in England and Wales in 1901, 1,071,040 were engaged in Agriculture, 1,042,864 in Building and Works, 774,291 in Food, Tobacco, Drink and Lodging, 640,989 Coal and Shale Mine Workers, 626,263 Engineering and Machine Making, 548,190 Dock, Coal and General Labourers, 430,645 Road Conveyance, 351,911 on Railways, 311,618 Professional, 307,889 Commercial or Business Clerks, 233,000 Wood, Furniture, Fittings and Decorations, 229,123 Tools, Dies, Arms and other Metal Trades, 222,796 Merchants, Agents, Accountants, Banking and Insurance, 196,898 Cotton Manufactures, 184,081 Boot and Shoe Trades, 180,496 Messengers, Porters and Watchmen, 179,932 Domestic Outdoor Service, 171,687 General or Local Government, 168,238 Defence, 131,429 Seas, Rivers and Canals, 130,731 Precious Metals, Jewels, Watches, Instruments and Games, 124,263 Domestic Indoor Service, 119,548 Tailors, 115,083 Cycles, Coaches and other Vehicles, 101,081 Drapers, Mervens and Dress, 107,170 Printers and Lithographers, and 101,938 Chemicals, Explosives, Oil, Grease and Soap Makers. Of females, 3,254,242 unmarried and 917,509 married, aged 10 and upwards, were occupied, 1,330,783 being in Domestic Indoor Service, 340,582 Dressmakers, 332,233 Cotton Manufactures, 196,141 Laundry and Washing, 172,873 Teaching, 142,687 Food and General Shopkeepers, 122,668 Woollen and Worsted Manufactures, 117,640 Tailoresses, 111,841 Charwomen, and 95,900 Staymakers, Shirtmakers and Seamstresses.

* These Schools are also divisible as "Provided," where the provision of the fabric and the cost of maintenance is borne by the public, and "Non-Provided," where the buildings are not provided or maintained by the public, but by a religious denomination.

STATISTICS OF ENGLISH COUNTIES.

THE following tables show the Area and Population of each County* in England and Wales according to the Census of 1901, the Rateable Value as settled by the Assessment Committees in the Valuation Lists in 1908, the amount of Rates received by Boards of Guardians of Poor Law Unions in each county for their own purposes (i.e. excluding county contributions) during the year ended Lady Day, 1908, together with the number of Paupers who were actually in receipt of relief on Jan. 1st, 1909.

The total population of England and Wales in 1901 was 32,527,843, as compared with 29,002,525 in 1891. The total number of Paupers receiving relief on Jan. 1st, 1909, was 959,848, being an increase of 31,177 when compared with the previous year. The total cost of Relief to the Poor for the year ended Lady-Day, 1908, excluding the expenditure of the Metropolitan Asylums Board in connection with hospitals for infectious diseases, was £14,312,782.

The total amount of Rates received by Boards of Guardians in England and Wales for their own purposes during the year ended Lady Day, 1908, was £11,928,863, as compared with £12,118,836 in the previous year. This was equivalent in 1908 to a rate of 18.2½d. in the £ on Assessable Value or 6s. 10d. per head on estimated population. The receipts in aid of these Rates, inclusive of grants from County and Borough Councils, and grants under the Agricultural Rates Act, 1896, amounted to £3,800,000. The cost of Relief to the Poor for the year ended Lady-Day, 1908, amounted to 8s. 2½d. per head of the estimated population. (For statistics and other particulars as to Wales, see next page.)

* Note.—The Counties referred to above are Registration Counties, and do not precisely correspond with the areas of ordinary Counties, but with Poor Law areas to which the figures in this table relate. For particulars as to the area and population of Administrative Counties under the Local Government Act, 1888, see page 765.

† Received by Boards of Guardians for their own purposes.

THE PRINCIPALITY OF WALES.

THE Principality of Wales, with an extreme length of 135 miles and a breadth varying from 35 miles to 95 miles, lies in the S.W. of Great Britain, and has an area of 7,370 square miles, or about 4,725,000 acres. The Principality is rich in minerals; slate, coal, and iron being among the more important; while of its manufactures, flannel, cloth, and hosiery alone are worthy of mention. The native inhabitants are almost wholly of the Cymric stock of the Celtic race; and a large number of them belong to the religious body known as the Calvinistic Methodists.

At what time Christianity was introduced it is impossible to tell, but certainly not later than A.D. 400. When the British Christians were driven from their homes, such of them as did not seek refuge beyond the seas found in the rocky fastnesses of the Welsh mountains a secure retreat from their enemies. There they immediately set about dividing the country into ecclesiastical divisions for administrative purposes, and the present sees of Wales represent those leading centres of religious thought that became famous in the sixth century.

The four bishoprics still remain as of old, and the numbers of beneficed clergy now to be found in them are as follows: St. David's, 360; Llandaff, 246; St. Asaph, 206; and Bangor, 147. The sees of St. David's and Llandaff were united with the Southern province in the year 1107, and those of Bangor and St. Asaph in the years 1092 and 1143 respectively.

When the Saxon pirates began to visit and ravage the eastern shores of Britain, the Celtic inhabitants were gradually pressed westward by the invading hordes, and finally found secure shelter in the wilds of Wales, Devon, and Cornwall. The border-lands, or marches, between England and Wales were long in a state of at least guerrilla warfare; and it was not until about 850 A.D. that one Roderick (Rhodi Mawr) contrived to unite the whole country into one Principality, dividing it afterwards among his sons into three smaller ones, named, severally, Gwynedd, Dyfed and Ceredigion, and Powis. This was followed by the incursions of the Danes, after which Howell once more (in the 10th century) succeeded in reuniting the country. Later, when England was tending in the same direction of unity, Athelstane received a tribute from the Welsh in recognition of his nominal sovereignty over them. William I. and his son Rufus both tried the plan of granting fiefs to their more

adventurous Norman knights, on condition of their conquering the land; Henry I. introduced into the Principality a colony of Flemish wool-workers. Henry II., too, and John, endeavoured, with doubtful success, to effect a final subjugation of the troublesome province. A combination of fortuitous circumstances led to its lasting conquest. Llewellyn, who succeeded David, had been implicated in the Montfort rebellion, but, on the accession of Edward I., managed to get included in the general amnesty granted to those who had joined the Leicester faction. In 1276, however, Edward, having been repeatedly refused the homage due to him from Llewellyn, raised an army to enforce his commands. Internal dissensions among the Welsh greatly aided the English, and Llewellyn, at length cooped up and almost starved to death among the Snowdon mountains, was forced to submit at discretion, and accept the terms offered by the victor (1277). By the grace of Edward the Welsh prince was allowed to return to the Principality; but trouble arising again, in which both Llewellyn and his brother David were concerned, a war arose, and the independence of Wales was for ever shattered. Llewellyn was slain in battle in 1282, with two thousand of his followers; and in the following year David, being betrayed to the English, was sent in chains to Shrewsbury, and at last put to a painful and ignominious death as a traitor. The Welsh nobility then submitted in a body, and King Edward invested his son Edward (who had been born at Carnarvon) with the Principality, which very soon afterwards was fully annexed to the Crown. In later days the history of Wales has been almost identical with the history of England, the Principality and Country marching side by side in sure and steady progress.

In education the Principality has made great strides of recent years, and possesses a University (Prifysgol Cymru), consisting of the three university colleges of Aberystwyth, Bangor, and Cardiff, in addition to St. David's College at Lampeter.

The following table of statistics contains some interesting information with reference to the various individual counties of Wales. In addition to those named, Monmouth is, not without good reason, claimed as a Welsh county; if admitted, it would add over a quarter of a million to the population of the Principality, thus making it larger than that of Scotland in the early part of the last century. The Welsh is a distinct nationality, with a language and literature of its own.

THE KINGDOM OF SCOTLAND.

THE most northerly part of the island, divided from the south by the River Tweed, the Cheviot Hills, and the Solway Firth, is the ancient Caledonia or modern Scotland, and contains nearly 30,000 square miles, or 19,069,500 acres, with a population of 4,472,103 in 1901, estimated at 4,877,648 in 1909.

Industries.—In the Highland regions the crofters carry on a primitive system of farming, and the distilling of whisky is a typical industry. Sheep farming is carried on, but a great part of the land is preserved for deer. The South-Eastern Highlands contain granite in profuse quantities, and supply at Aberdeen a famous breed of cattle for the London market. In the Northern Lowlands grazing, fishing and manufacture of woollens are the chief occupations. The Western, Eastern and Mid Lowlands are immensely fertile, and contain iron and coal-fields. In 1908 the acreage under wheat was 43,828, barley 197,418, oats 948,513, potatoes 143,692, turnips 440,903, clover and rotation grasses 1,553,692, permanent grass 1,474,142, and total 4,863,473; there were 204,527

horses, 1,174,405 cattle, and 7,439,465 sheep. The principal industries are flax and jute (Dundee), cottons (Paisley), shipbuilding and engineering (Glasgow and Greenock), dyeworks (Perth), and printing and brewing (Edinburgh). The product of the sea fisheries amounted in 1907 to £3,241,941, and over 30,000,000 tons of coal were raised in Lanarkshire and the other mining districts in 1902, and about 150,000 hands were employed in textile industries. The annual value of the trade of Scotland is about £72,000,000, of which £39,000,000 represents the value of imports. The principal ports, with the tonnage of entries in 1908, are given on p. 459.

Education.—There were 3,143 Primary Schools in 1908, with 792,418 children on the register, and 169 Higher Grade Schools, with 19,928 children, in addition to 939 Evening Schools (87,599 scholars) and 754 Continuation Classes (101,664 scholars). There are Universities at St. Andrews (1411 A.D.), Glasgow (1450), Aberdeen (1494), and Edinburgh (1582).

POPULATION, AREA, VALUATION AND PAUPERS OF COUNTIES.

* The valuation of lands and heritages is that furnished by the Inspectors of the Poor to the Local Government Board for Scotland. The number of Paupers is that chargeable on May 15, 1908.

THE TAXES AS CONTRIBUTED.

The following table shows the amount contributed by each of the three kingdoms (England and Wales, Scotland, and Ireland) under the various schedules of the Property and Income Tax, Inhabited House Duty, and Land Tax in the financial year 1908-9.

Kingdom.	Tax.				Population, 30 June, 1909.
	Income.	Inhabited House.	Land.	Total.	
England and Wales.....	£ 31,765,537	£ 1,971,188	£ 711,601	£ 34,448,416	35,756,615
Scotland	£ 3,289,822	£ 128,010	£ 33,769	£ 3,451,601	4,877,648
Ireland	£ 1,220,129	nil	nil	£ 1,220,129	4,374,158
United Kingdom	£ 36,275,488	£ 2,099,198	£ 745,460	£ 39,120,146	45,008,421

THE KINGDOM OF IRELAND.

IRELAND is an island lying between $51^{\circ} 26'$ and $55^{\circ} 23'$ N. lat. and $5^{\circ} 20'$ and $10^{\circ} 25'$ W. long. It is about 60 miles to the west of England. On three sides it is washed by the Atlantic Ocean, and on the east by the Irish Sea and St. George's Channel. Its greatest length is, from north to south, 306 miles, and from east to west from 120 to 180, with an area of about 31,759 square miles. The total acreage is (1907) 20,710,589, of which 2,995,945 acres are barren mountain, turf bog, marsh, or building land. The greater part of the surface is a plain, interspersed with low hills, the highest mountain, being 3,414 feet above the sea-level. The rivers are numerous, the Shannon, 254 miles in length, being the principal; but the chief water feature of the country is the beautiful series of lakes or (as they are called) loughs, the largest, Lough Neagh, covering a surface of 98,255 acres. The harbours are among the finest in the world.

Government.—The government is semi-independent. A Lord-Lieutenant, appointed by each successive Ministry, exercises almost regal sway. The peerage consists of 176 members, who are represented in the Imperial Parliament by 28 of their number; and 103 members represent the country in the House of Commons.

The legal establishment is similar to that of England, and is presided over by a Lord Chancellor.

Population.—The population of Ireland on March 31, 1901, was 4,458,775 (2,200,040 males and 2,258,735 females), a decrease of 245,975, equal to 5.5 per cent., since the preceding census of 1891. Of the total population the professional class numbered 214,343, domestic 219,419, commercial 97,889, agricultural 876,062, industrial 639,413. In 1908 there were 28,831 marriages, 102,426 births, and 77,151 deaths, and the estimated population on 31 June, 1909, was 4,374,158.

Agriculture and Live Stock.—In 1908 there were 36,677 acres under wheat, 1,060,301 under oats, 154,596 under barley or bere, 8,950 under rye, 1,794 under beans, and 297 under pease—a total acreage of 1,261,715 under cereal crops; 587,144 acres were under potatoes, 279,044 under turnips, 72,092 under mangold, 39,153 under cabbage, 4,885 under vetch and rape, and 26,574 under carrots, parsnips and other green crops—a total of 1,008,897 under green crops; 46,916 acres were under flax, and 2,298,793 under hay; the total extent under crops of all kinds thus being 4,628,466 acres, while there were 10,078,073 acres

under permanent grass. The produce in 1908 was 746,047 cwt. of wheat, 3,554,724 cwt. of barley and bere, and 18,239,758 cwt. of oats; while 3,199,678 tons of potatoes, 5,416,958 tons of turnips and swedes, and 1,579,028 tons of mangolds were also grown. The live stock included 604,629 horses, 30,351 mules, 241,133 asses, 4,792,458 cattle, 4,126,106 sheep, 1,217,840 pigs, 245,286 goats, 24,031,095 poultry.

Industries.—In addition to agriculture and pasture, linen and shipbuilding are the principal industries in the north-east, sea fishing throughout the coast districts, distilling and brewing in many of the large towns, and cloth and lace locally. The western districts are being developed by the opening up of communication. An industry which is rapidly gaining ground is bee-keeping; the amount of honey produced in 1907 was 251,233 lb. in movable combs and 70,857 lb. in other hives, a total for the year of 322,150 lb.

The total value of fish landed in 1908 was £337,813, the quantities being 747,056 cwt. (including 356,025 cwt. mackerel and 250,287 cwt. herrings), exclusive of salmon and shell-fish.

Religion.—The prevailing religion is Roman Catholic, 3,308,661, or 74.21 per cent. of the population, professing that form of faith, there being also 581,089 Protestant Episcopalians, 443,276 Presbyterians, and 62,006 Methodists. Until the year 1871 the Established Church was a branch of that of England, with two archbishops and ten bishops, although the members of this communion were but 12 per cent.—9 per cent. of the remaining Protestants being Presbyterians.

Education.—Ireland is well supplied with educational establishments, having three universities, a large number of secondary schools, indirectly endowed under the Intermediate Education Board, and an admirable system of primary schools under the National School Commissioners. There is also a Department of Agriculture and Technical Instruction which issues detailed reports, and assists generally in the development of agriculture and industry. In 1908 there were 8,468 Primary Schools in operation, with 689,001 pupils on the rolls and 12,731 principal and assistant teachers; there were also 7 Training Colleges, with 522 men and 663 women students resident. The total expenditure by the Commissioners from grants and rates was £1,624,490 in 1908-9.

THE LORD LIEUTENANT.

His Excellency the Right Honourable John Campbell Gordon, 7th Ear of Aberdeen, LL.D., D.C.L., G.C.M.G., born 3rd August, 1847; married, 1877, Hon. Ishbel Maria, daughter of 1st Baron Tweedmouth; Lord Lieutenant General and General Governor of Ireland; sworn in 14th December, 1905... £20,000

Do., Telegraph Office, M. O'Toole £400 to £500

ROYAL IRISH CONSTABULARY.

Headquarters, Dublin Castle—£1,380,918.

The Royal Irish Constabulary, then styled "the Constabulary of Ireland," was formed in 1836 by the consolidation of the "Barony Constables" and the "Peace Preservation Police." The force is armed with rifle, sword, and pistol. Its duties are varied, and military as well as police work has often to be undertaken. In 1867, by Her late Majesty's command, the title of the force was changed from the Constabulary of Ireland to Royal Irish Constabulary, in special recognition of the splendid services rendered in the past, and in particular during the Fenian outbreaks of that year. Officers and men alike have given repeated proofs of conspicuous courage and daring, and of exceptional moderation under the most trying circumstances. Approximate strength of the force 1909-10.—235 Head Constables, 1,688 Sergeants, 382 Acting Sergeants, and 8,180 Constables; total, 10,485.

Inspector-General, Col. Sir Neville Chamberlain, K.C.B. £1,500 to £1,800

Museum, A. H. White. Registrar, G. F. Blake.

THE ISLE OF MAN AND THE CHANNEL ISLANDS.

ISLE OF MAN (MONA),

an island in the Irish Sea, in lat. $54^{\circ}3' - 54^{\circ}25'N$. and long. $4^{\circ}18' - 4^{\circ}47'W$, nearly equidistant from England, Scotland, and Ireland. It is about 34 miles long, and from 10 to 12 broad, containing an area of 745.325 acres, with a population of 55,598. In the ninth century a body of malcontents from Norway emigrated to the western isles of Scotland, and their prosperity drew upon them the anger of the Norwegian monarch Harold, who in the year 870 sent forth a great expedition and conquered the Orkneys and the Shetlands, the Western Isles, and Man. For three centuries the Norwegian rule remained intact, but when, in 1263, Alexander III. defeated the famous Haco, at the battle of Largs, all these islands fell under Scottish rule. On his accession to the English throne, Henry IV. seized on the Stanley family. In 1736 James, 10th Earl of Derby, died without issue male; the earldom went to his next male heir, but the sovereignty of the island went, with the Barony of Strange, to his heir-general, James, Duke of Athole, on whose death the island descended to his daughter Charlotte, from whom, in 1755, Parliament purchased the sovereignty for £70,000. In 1827 the Crown purchased it for the sum of £417,144. The land is rich in minerals, lead, iron, blende, and slate, and exports large quantities of agricultural produce. About 50 miles of railway have been constructed, and about 23 miles of electric tram roads. The natives of this island belong to a mingled race of Celts and Norwegians, and the language, in which the Celtic element is predominant, is known as the Manx.

Man is governed by an independent Legislature called the Tynwald, consisting of two branches—the Governor and Council, and the House of Keys. Bills after having passed both Houses are signed by the members, and then sent for the Royal Assent. Unless signed by the legal quorum of each House a Bill is not sent for the Royal Assent, the quorum of the Upper House or Council being the Governor and two Members, and of the Lower House or Keys thirteen Members, the majority of the whole number (24). After receiving the Royal Assent, it does not become law until promulgated in the English and Manx languages on the Tynwald Hill. On the promulgation taking place a certificate thereof is signed by the Governor and the Speaker of the House of Keys.

CAPITAL: Douglas, pop. 19,223 (Castletown, pop. 1,963, is the ancient capital); the other towns are Peel, pop. 3,306, and Ramsey, pop. 4,729.

	1906-7.	1907-8.	1908-9.

Speaker, House of Keys, A. W. Moore, C.V.O.	unp.

THE CHANNEL ISLANDS

comprise the bailiwicks of Jersey (including the Minquiers and Ecréhou Rocks) and Guernsey (in the latter of which are comprehended the small islands of Alderney, Sark, and Herm), situated off the north-west coast of France, at distances of from ten to thirty miles. They are the only portions of the Dukedom of Normandy now belonging to England, to which they have been attached ever since the Conquest. The area altogether is about 73 square miles; and the population in 1901 was 95,841—Jersey, 52,796, Guernsey, with Herm and Jérou, 40,328, Alderney, 2,054, and Sark, 506. The land under cultivation in Jersey amounted in 1909 to 43,740 vergées (2½ vergées = 1 acre), and in Guernsey (1904) 11,071 acres, the principal product of the soil of Jersey being potatoes and wheat, and in Guernsey green crops and oats. There were 2,385 horses, 12,205 cattle, 179 sheep, and 5,774 pigs in Jersey in 1909; in Guernsey (1904), 1,439 horses, 6,528 cattle, 209 sheep, and 5,099 pigs. The famous Jersey and Guernsey breed of cows has earned a well-deserved celebrity. The principal officer in each island is the Lieut.-Governor, who represents His Majesty. French is the official language of the local legislatures, called the *States*, and of the Royal Court, and the old Norman dialect is still spoken by the people, but English is now permissible in the legislative assembly. The Bailiff, appointed by the Crown, presides over the *States* and over the Royal Court or judicial body. The climate of these islands is mild, and the soil exceptionally productive. The islands being all but exempt from imperial taxation, they possess a very large trade. The chief town of Jersey is St. Helier, on the south side, where there is excellent sea-bathing; the principal town of Guernsey is St. Pierre, on the east coast.

Imports from United Kingdom, 1908... £1,521,912

THE CITY OF LONDON.

LONDON was a place of importance under the Romans, and was famed for its vast conflux of traders and its abundant commerce even in the first century of the Christian era. From the Romans it is said it received municipal institutions, which have endured in their main features to the present day. In Saxon times it was in reality a small independent State, and its burgesses maintained their independence even after the Battle of Hastings. William the Norman only gained possession of their city by means of a treaty with them; and about eight years after he granted a charter, which is still preserved. It is addressed to William the Bishop, Godfrey the Portreeve, and all the Burgesses, and promises that they shall be "law worthy" (*i.e.*, possessed of privileges) as they were in the days of Edward the Confessor. The Portreeve, however, received the Norman title of Bailiff, which, in 1191, was changed to Mayor; the first holder under the new name being Henry Fitzalwyn, who filled the office for 24 years. On his death a new charter was granted by King John in 1214, which directed the Mayor to be chosen annually, which has ever since been done, though in early times the same individual often held the office more than once. A familiar instance is that of "Whittington, thrice Lord Mayor of London" (in reality, four times, A.D. 1397, 1398, 1406, 1419); and modern cases occur with Alderman Wood, 1815, 1816; Sir John Key, 1830, 1831; Alderman Cubitt, 1850, 1861; and Alderman Sir R. N. Fowler, 1883, 1885. The title of Lord Mayor is said to have been first bestowed in 1354 on Sir Thomas Legge, by Edward III.

Aldermen were first appointed by a charter of Henry III. in 1242, and were elected annually between 1377 and 1394, when a charter of Richard II. directed them to be chosen for life.

The Common Council was at an early date substituted for a popular assembly called the Folk-mote. At first only two representatives were sent from each ward, but the number has since been greatly increased, some wards having as many as 16 members, and none less than four. Sheriffs (as well as aldermen) were Saxon officers, who usually had charge of a large district. The time of their appointment for London is uncertain, but they appear in ancient records as early as A.D. 1130. At first they were only the officers of the Crown, and were named by the Barons of the Exchequer; but King John gave them, in the first year of his reign, permission to choose their own Sheriffs. The citizens, however, lost this privilege, as far as the election of Sheriff of Middlesex is concerned, by the Local Government Act, 1888, but they continue as heretofore to choose the Sheriffs of the City of London. They are appointed on Midsummer Day, and enter on office at Michaelmas, on which day the Lord Mayor is elected. He is sworn into office on November 8, and on the following day presented to the Lord Chief Justice at the Royal Courts of Justice, to take the final declaration of office—the pageant, conducted with some degree of civic state, being popularly known as the Lord Mayor's Show. The Recorder was first appointed in 1298. The Chamberlain is an ancient officer. There were at one time 2 Chamberlains—the King's Chamberlain and the Chamberlain of the Guildhall. The former appears to have fallen into abeyance *circa* 1319. The first contemporary record of the office of City Chamberlain is 1276. The Town Clerk (called Common Clerk) and Common Serjeant (now appointed by the Crown) are mentioned as officers in the charter of Edward II., A.D. 1319, but the offices can be traced to a much earlier date than this.

The Lord Mayor and the Aldermen.

Lord Mayor, 1909-10. £10,000.

* The above is abstracted from the 27th, "City's Cash Account" of the series extant—A.D. 1533 to 1908. (The Accounts earlier than A.D. 1853 were believed to have been destroyed in the Fire of London; but two years' Accounts, temp. Queen Elizabeth, have been recently discovered among the Corporation Archives, as exceptions to that belief.) The Volumes are in full detail, signed by the Auditors, and in perfect preservation. The extract is from the 24th Annual Printed Account of the Corporation, A.D. 1784 to 1907. The Accounts are prepared and stated as directed by Resolutions of the Court of Common Council of the 5th June, 1903, and the 14th December, 1905, upon Reports of the Coal and Corn and Finance Committee, and they are printed in conformity with the 76th Standing Order of the Court of Common Council. The Accounts show the Income and Expenditure applicable to the year on the various Funds.

Offices, Spring Gardens, S.W.—Education Offices, Victoria Embankment, S.W.

Hours 9.30 to 5 (Saturday 9.30 to 1).—Meets on Tuesday at 2.30 p.m.

The next triennial election takes place in March, 1920.

THE London County Council was constituted under the Local Government Act of 1888. London is an administrative county, covering an area of 122 square miles, with boundaries continuous with those of the area over which, prior to 1889, the Metropolitan Board of Works exercised jurisdiction under the Metropolis Management Act of 1855, except that under the London Government Act, 1899, there was some rearrangement of the county boundaries, the principal being that Penge was taken out of and South Hornsey was added to London.

The City of London is an electoral division of the county, and was not much affected by the Act. The County of the City of London is a county for non-administrative purposes, such as quarter sessions, justices, &c.; and the Metropolis outside the City is a county for non-administrative purposes, by name the County of London, in which the justices continue their judicial duties.

The Council comprises a chairman, 19 aldermen, and 128 councillors, together 138, or, if the chairman be also an elected member or alderman (as at present), 137. The term of office for aldermen is 6 years, and 10 or 9 retire every 3 years. The councillors are elected for 3 years, and will all retire in March, 1920, the seventh council having been elected in March, 1907. The councillors are elected directly by the ratepayers, and the councillors elect the aldermen. The positions of aldermen and councillors are the same, except as to the term of office. The first meeting of the London County Council was held on the 21st March, 1889, under the presidency of Lord Rosebery.

In the present Council the Municipal Reform Party have for the first time a large majority, previous Councils having been strongly Progressive.

The powers, duties, and liabilities of the Council include the following: *First*, those formerly belonging to the Metropolitan Board of Works in connection with the raising and loaning of money, and the sanctioning of loans required by the councils of the metropolitan boroughs; main drainage, and the sanctioning of local sewers; fire brigade; parks and open spaces; works for prevention of floods by the Thames; Thames crossings (bridges, tunnels, and ferry); street improvements; controlling the width of new streets, the building line, and the naming and numbering of streets; supervising buildings and district surveyors; dangerous structures; structure of theatres and music-halls; artisans' dwellings; cattle diseases; explosive substances and petroleum storage; infant life protection; gas, gas-meter, and electric-meter testing; tramways, &c. *Secondly*, those transferred from former county justices in connection with the granting of music and dancing licences; provision of asylums for pauper lunatics, and of reformatory and industrial schools, the duties with regard to the latter, however, being now discharged by the Council under its powers as Education authority; testing weights and measures; county buildings; coroners; and other minor matters. *Thirdly*, powers transferred from various authorities with regard to highways; licensing of houses or places for the performance of stage-plays beyond the limits of the Lord Chamberlain's authority; licensing of slaughter-

houses and of cow-houses; and the supervision of common lodging-houses. *Fourthly*, new powers with respect to registration of electors; public health; historic buildings and monuments; inspection of factories and certain other buildings to secure means of escape from fire; suppression of nuisances; regulation of overhead wires; the administration of the Shop Hours and Shop Seats Acts, the Employment of Children Act, and the Midwives Act; reformatories for inebriates; the registration of motor cars; and the collection of duties on dog and establishment and certain other licences. Under the Education (London) Act, 1903, the Council became the authority for all public education in the county, both elementary and higher. As the central representative body in London, the Council also interests itself in the thousand and one things affecting the welfare of the people of London as a whole, and has delegates on the Metropolitan Water Board and numerous other boards, charities, &c.

The Council entrusts many of its duties to committees, who not only administer most of the executive duties which fall upon the Council, but also prepare and submit for the consideration of the Council schemes and proposals. The Finance Committee have important statutory powers. No costs, debt or liability exceeding £50 may be incurred by the Council except upon a resolution passed on an estimate submitted by the Finance Committee. The Council is the principal money-raising body for all the local authorities in the county, and has a gross debt, according to the latest returns, of about £82,165,000, a Sinking Fund of £31,517,000, and an annual expenditure, including loans advanced to other bodies, of about fifteen millions, of which five and a half millions are expended on education. The Council has recently revised its standing orders relating to expenditure with a view to strengthening its control. The Asylums Committee have special powers under the Lunacy Acts, and manage Hanwell, Colney Hatch, Banstead, Canehill, Claybury, Bexley, and Horton Asylums. On the Horton estate a working colony for epileptic patients has been established. Accommodation is provided in the London County asylums for over 19,200 patients. The Housing of the Working Classes Committee perform the duties cast upon the Council by the Housing of the Working Classes Acts, including the clearance of insanitary areas and the building of working-class dwellings. The total accommodation provided by the Council up to 31st March, 1909, comprised 1,768 cottages, 6,428 tenements in block dwellings, and 1,845 cubicles in three lodging houses. The total capital outlay was £2,674,209. It is the aim of the Council to make its working-class dwellings self-supporting, and in this, taking all the dwellings as a whole, it has succeeded, but there is a charge on the rates in respect of estates in course of development.

The Improvements Committee are responsible for the carrying out of street improvements and the construction and maintenance of bridges (outside the City of London) and tunnels across the river Thames. The largest improvements carried out in recent years are the new street between Holborn and the Strand, now known as Kingsway and Aldwych, which was opened by H.M. the King on 28th October, 1905; a new

tunnel under the Thames, connecting the districts of Rotherhithe and Shadwell, opened by the Prince and Princess of Wales on 12th June, 1908; and an extensive improvement at Westminster, including a new embankment of the Thames between the Houses of Parliament and Lambeth Bridge. This improvement is nearing completion, and the committee have in hand several smaller improvements.

The Fire Brigade, directed by the Fire Brigade Committee, has been much increased since the Council came into existence: the authorised staff now numbers over 1,350 men; several new stations are being built, while old stations are being improved and enlarged, and the equipment improved by the addition of motor appliances. Perhaps the most popular work of the Council is that connected with its parks and open spaces. Amongst the latest additions to these open spaces in and around London are Marble Hill, Twickenham (to preserve the view from Richmond Hill), Avery Hill, Eltham, Hainault Forest, Essex, Springfield Park, Clapton, and Ruskin Park, Denmark Hill. The annual expenditure on the maintenance of parks and open spaces (over 5,000 acres) is about £140,000.

The disposal of sewage is the work of the Main Drainage Committee. The metropolitan main drainage system covers about 140 square miles, including certain districts outside the county, and comprises 290 miles of main, storm-relief, intercepting and outfall sewers, ten pumping stations and two sewage precipitation stations. The sewage is conveyed to the outfalls at Barking and Crossness, and there the solid matters held in suspension are precipitated, the harmless effluent being allowed to flow into the river, while the sludge is taken out to sea. The total quantity of sewage treated at the outfalls in the course of a year amounts to about 100,000 million gallons. A comprehensive scheme for enlarging the main drainage system was adopted by the Council in 1900, and this was supplemented in 1904 by a scheme of extensive flood relief works. These works are already well in hand. The total capital outlay on main drainage up to 31st March, 1909, was £11,110,388.

In previous Almanack parliaments have been given of the purchase by the Council of the most important tramway systems within the county. The Council is now in possession of all the tramways in London with the exception of a few miles of lines in the north-west. On 31st March, 1909, the system extended over 227½ street miles, being 85½ miles of electric lines (mostly underground conduit) and 42 miles of horse lines. The latter are being rapidly reconstructed for electric traction. Practically the whole of this great system is worked by the Council. The total capital outlay on tramways amounted, on 31st March last, to £9,483,562, and the debt outstanding to £8,043,129. A report recently presented to the Council on the results of the year 1908-9 showed gross receipts of £1,847,459, a surplus on working of £645,762 (surplus on electric lines £675,965, less deficiency on horse lines £30,203), and a net surplus, after payment of interest on capital outlay and providing for repayment of debt, of £1,07,570, which was carried to the renewals fund. 39,119,472 car-miles were run and 412,933,841 passengers were carried during the year. This department of the Council's work is directed by the Highways Committee.

The Education Committee comprises thirty-

eight members of the Council and twelve co-opted members. Names of these members will be found under the Alphabetical List of Councillors. The Council is responsible for the education of about 730,000 children in elementary schools, and is doing much to improve the supply of secondary and technical education in London and the provision of training colleges for teachers. The estimates of expenditure on rate account for education for the year 1909-10 amount to £5,623,153; of which £4,634,408 is for elementary and £988,745 is for higher education, which now includes evening schools as well as secondary schools, training colleges, polytechnics, and technical institutes. The charge falling on the rates, after deducting grants and other receipts in aid, is £3,675,694, necessitating a rate of 2s. 7½d. in the pound—an increase of ¾d. in the pound upon the rate for 1908-9.

In 1908 the Council decided to discontinue the service of steamboats on the river Thames which the previous Council had established under an Act obtained in 1904, and all the boats have now been sold. The Council also resolved, on 28th July, 1908, to close the Works Department, which had been in existence since 1822, and was created for the purpose of executing works by direct employment of labour. Both these questions were much to the fore at the last election.

The Local Pensions Committee, appointed under the provisions of the Old Age Pensions Act, is composed of twenty-one members of the Council and twelve persons appointed by the Council.

The expenditure of the Council is met by two chief sources of supply—capital money raised by the issue of Stock, and current income raised in a county rate. Certain contributions, including education grants, are also received from the Imperial Exchequer. The capital disbursements for the year ended 31st March, 1909, amounted in round figures to £2,391,000, including improvements (streets, bridges, and tunnels), £305,000; housing of the working classes, £81,000; main drainage, £364,000; fire brigade, £22,000; parks and open spaces, £31,000; lunatic asylums, £63,000; tramways, £1,069,000; new county hall, £58,000; and education, £383,000. The maintenance of these works and services, the sinking fund to pay off debt, and the interest on the debt, together with all recurring disbursements of every kind, are paid out of rates, or, in the case of tramways and working-class dwellings, out of receipts. Some idea of the nature and amount of the expenditure on rate account will be gathered from the statement on the next page.

During the year 1909 the Council made a further issue of £2,250,000 London County Consolidated Stock, carrying interest at the rate of 3½ per cent., the Stock being issued at £102 per £100 of stock. All borrowings by the Council are subject to the provision of a sinking fund, under Treasury approval, sufficient to repay all expenditure within a period of 60 years. The total Stock now outstanding amounts to rather more than £74,000,000.

The rating for the year 1909-10 amounts to 2s. 10½d. in the pound over the whole county, including the City, and a further rate over the county outside the City of 2½d. in the pound, together 2s. 13½d. This includes 2s. 7½d. for education. The assessable value of the County of London on 6th April, 1909, was £44,666,682.

—a *rd.* rate over the whole county producing £186,111.

The following is a summary of the estimates of the amount to be raised by county rate for the year to 31st March, 1910, prepared at the

beginning of the year. These figures do not include the receipts and expenses on account of the revenue-producing undertakings (tramways, working-class dwellings, &c.) :—

THE SEVENTH LONDON COUNTY COUNCIL.

497

Elected 2nd March, 1907, for three years.

Chairman Sir Melvill Beachcroft, J.P., South Paddington.
Vice-Chairman Edward White, J.P., Alderman.
Deputy Chairman Edward Smith, J.P., North-East Bethnal Green.

* * In the following list the figures after each division represent the number of voters on the Register in 1907; the figures after the names represent the votes polled at the General (or subsequent bye-) Election. The names of members are in *italics*, and members of the last Council have an asterisk * prefixed to their names; † denotes an Alderman of the late Council, and ‡ a change of constituency.

Education Officer, R. Blair	£1,000	Engineer, W. C. C. Smith	£1,200
Ch. Insp., Eden, Dr. C. W. Kimmins	£1,000		

LONDON POLICE.

THE CITY POLICE district comprises an area of 673 statute acres, and contains two courts of justice, those of the Guildhall and Mansion House, where the Lord Mayor and the Aldermen are the magistrates (see p. 205). Although the area is comparatively small, the rateable value is enormous, and there are 26,923 night residents to be protected.

The Force comprises 1 Superintendent, 1 ditto, Detective Department, 4 Chief Inspectors, 16 District Inspectors, 26 Station Inspectors, 9 Detective Inspectors, 84 Sergeants, 12 Detective Sergeants, and 944 Constables; also 1 Sergeant and 49 Constables on private service duty.

The METROPOLITAN POLICE district embraces an area of 447,626 statute acres, with a population of between seven and eight millions. There

are within this area sixteen Police Courts, viz., Bow Street, Clerkenwell, East Ham, Greenwich, Lambeth, Marlborough St., Marylebone, North London (Stoke Newington Rd.), Old Street, South Western (Lavender Hill), Thames (Stepney), Tower Bridge, West Ham, West London (Vernon St.), Westminster, and Woolwich (see p. 205).

The force on Oct. 18, 1909, consisted of 32 Superintendents, 594 Inspectors, 2,460 Sergeants, and 15,597 Constables, making a total of 18,683, with 286 horses.

It is scarcely possible to form an accurate estimate of the enormous actual value of the property under police protection, but the mean rateable value of the metropolitan area for Metropolitan Police purposes for the year 1908-9 was £54,598,639.

LONDON FIRE BRIGADE.

PREVIOUS to the formation of the Metropolitan Fire Brigade, under an Act passed in 1774, the churchwardens and overseers of every parish had been compelled to maintain an engine for putting out all fires occurring within their own boundaries; though, independently of this provision, for more than thirty years before 1866 the leading fire insurance companies had jointly organised and worked a fire-engine establishment of their own. On 1st January, 1866, the Metropolitan Board of Works took over these responsibilities. On 1st January, 1867, the Board also took over from the Royal Society for the Protection of Life from Fire (founded 1844) the service of the saving of life from fire. By the passing of the Local Government Act, 1888, the London County Council assumed control of the Fire Brigade. In 1904 the title of the Brigade was altered from "Metropolitan Fire Brigade" to "London Fire Brigade." The total amount expended on the Brigade for the year ending 31st March, 1909, was £291,383. Of this amount the Treasury and the various insurance companies contributed £46,950.

On the 31st March, 1909, the complement of

the Brigade consisted of:—1 chief officer; 2 divisional officers; 2 assistant divisional officers; and 1,346 officers, firemen, coachmen, and pilots. There were 80 land fire-stations, 3 river stations; and the appliances included 76 horsed fire-engines, 77 horsed fire-escapes, 8 motor fire-engines, 8 motor fire-escapes, 5 motor hose-tenders, 4 turntable long ladders, 29 long ladders, 23 smoke helmets, 90 hose-carts, 2 fire-boats and 4 steam fire-engines on rafts, 2 oil-tank wagons, 4 motor cars. There were 323 horses and 53 miles of hose in use by the Brigade. The fire-alarms distributed over London numbered 1,320. The number of calls to which the Brigade responded during the year ending 31st December, 1908, totalled 5,299, and the fires numbered 4,029, of which 61 were classed as "serious."

PRINCIPAL OFFICERS.

Chief Officer, Lieut. Sampson Sladen, R.N....£900

Divisional Officers, Sidney G. Gamble, C.M.E.; Arthur R. Dyer.

Assistant Divisional Officers, Cyril C. B. Morris;

Lieut. H. Spencer, R.N.

Headquarters: 94 Southwark Bridge Road, London, S.E.

METROPOLITAN WATER BOARD.

Chairman, E. B. Barnard, M.P.	†
Vice-Chairman, G. S. Elliott, J.P.	unp.
Clerk of the Board, A. B. Pilling	£1,750
Asst. do., W. J. G. Norris	£600
Superior, F. W. Drake	£700
Solicitor, W. Moon	£1,000
Chief Engineer, W. B. Bryan	£2,500
Depy. do., J. W. Kestler	£1,827
Accountant and Registrar, A. Newton ..	£1,000
Depy. do., D. P. Hutchings	£600
Chief Revenue Officer, J. Wilson	£618
Director of Water Examinations, Dr. A. C. Houston	£1,000

The Metropolitan Water Board was created in 1902, and came into existence in 1903, the duties of the Board being to supply water to the districts

previously supplied, or authorised to be supplied, by the various authorities superseded. The total amount of water supplied during the year 1908-9 was 81,823,864, 169 gallons. The sources of supply are four in number, namely, (1) the rivers Thames and Lee; (2) gravel beds adjoining the main stream of the Thames and other gravel beds at Hanworth; (3) natural springs; and (4) wells sunk in the chalk or other strata in the Lee Valley on the north of the Thames, in Kent, and at certain other points south of the Thames. The Board consists of 66 members, nominated by the constituent authorities of the water area for three years ending 1st June, 1910, and meets on the Friday in each fourth week at Metropolitan Asylums Board Offices, Thames Embankment, E.C. Officers, Savoy Court, Strand, W.C.

† A sum of £500 per annum is voted to the Chairman to defray the cost of "official hospitality."

LONDON CITY LIVERY COMPANIES.

501

THE CITY COMPANIES, NUMBER OF LIVERYMEN, CORPORATE AND TRUST INCOMES, MASTERS, CLERKS, AND HALLS.

As will be seen from the following table, many of the London Livery Companies are possessed of great wealth. Of some portion of the property they are merely trustees, but of the "corporate" property they are the sole owners, and may dispose of the income as they please. Fifteen of the Companies have more than ten thousand pounds a year, and most of them are very liberal in their charities, especially in the way of education. In the majority of cases the design-

nation of the Company gives a clue to the trade which gave rise to the guild, but the Fletchers (arrow makers) and the Loriners (bridle, bit, and spur makers) are not self-explanatory. The following list is compiled from returns made (in many cases but partially) at the Editor's request. Where the return was incomplete the Editor allowed the old figures to remain. The order of precedence is given in parentheses after the name of each Company.

COMPANY.	No. of Liverymen.	Corporate Income.	Trust Income.	Total Income.	Master or Prime Warden, 1909-1920.	Clerk.	Hall.*
<i>Mercers</i> (1)	200	55,000	58,000	113,000	Walter Seabrough	G. H. Blakesley	4 Ironmonger Lane.

* In case of a Company having no Hall, the address of the Clerk is given in brackets.

The report, in 5 vols., published in 1884, of the City Livery Companies' Commission appointed in 1880 (Chairman, the late Earl of Derby), stated the rateable value of the Halls of the London Companies at about £55,000, and that of their Schools and Almshouses about £18,000 a

year; the value of their Plate and Furniture at £320,000; and the annual income of the livings in their gift—several of the "great" Companies are patrons of livings—about £12,300. In 1880 the Companies were indebted to the extent of about £270,000.

LONDON WITHIN VARIOUS BOUNDARIES.

	AREA IN STATUTE ACRES.	POPULATION.	
		1891.	1901.
Within the Registrar-General's Tables of Mortality			
Within the Limits of the County of London	74,816	4,228,317	4,536,267*
City of London within Municipal and Parliamentary Limits	673	37,702	26,023
Central Criminal Court District	269,148	5,260,680	6,101,664

Metropolitan and City Police Districts	443,419	5,633,806	6,581,372

* Estimated population in the middle of the year 1901, 4,533,938.

Parliamentary Boundaries.—In consequence of changes of boundaries under the London Government Act, 1899, the County of London does not now include the whole of certain Metropolitan Parliamentary Divisions; on the other hand, it includes portions of certain Extra-Metropolitan Parliamentary Divisions.

The Metropolitan Police District extends over a radius of 15 miles from Charing Cross, exclusive of the City of London, with a rateable value in 1903-1904 of £54,598,639, and embraces an area of upwards of 699 square miles. The number of new houses built since 1879 up to and including the year 1903 is 542,897, with 3,003 in course of erection; during the same period 8,028 new streets and squares were formed, the new mileage since 1879 being 1,454.

THE INDIAN EMPIRE extends over a territory larger than the Continent of Europe without Russia. Legally, "British India" means all territories governed by the King through the Governor-General of India, or through any officer subordinate to him; while "India" means British India, together with any territories of any native prince or chief under the suzerainty of His Majesty, exercised through the Governor-General of India or any officer subordinate to him (Act 52-3 Vict., c. 63, s. 18). There are tracts of tribal territory on the N.W. and N.E. frontiers under the political influence, though not yet under the administrative rule, of the Indian Government; and within the Indian sphere of influence lie the self-governed States of Afghanistan, Nepal, and Bhutan.

Boundaries and Area.—The political boundary of India marches with Persia from the Gulf of Oman to near Zulfikar on the Harirud; then with the Russian Empire along the frontier laid down by agreement in 1885 as far as the Oxus at Khamiab; thence along the Oxus by the Panjah branch up to the Victoria lake, and from the east end of that lake by the line demarcated in 1895 up to Povalo Schweikovski on the Taghdumbash Pamir, where three empires—the British, Russian, and Chinese—meet. From this point the frontier—in many parts not yet clearly defined—touches the Chinese Empire, mainly along the crests of the Muztagh (Karakoram) and Himalayas, till the limits of French Indo-China are reached on the Upper Mekong. The Indian frontier, leaving the Mekong, marches with Siam till it reaches the sea at Victoria Point, half-way down the Malay peninsula. Beyond the sea the Indian Empire includes the Andaman and Nicobar Islands, the Laccadive Islands, Aden and Perim, besides protectorates over Socotra, Bahrain, and various chiefships along the coast from Aden to the Persian Gulf. Continental India, including Baluchistan, reaches from 8° to 37° N. latitude, and from 61° to 101° E. longitude. Calcutta, the capital, lies in 88° E. long. The total area of India proper is about 1,767,000 square miles, of which 680,000 square miles are under native administration. The British Provinces comprise 61 per cent. of the area, and nearly 79 per cent. of the population, which in 1901 numbered 294,361,056. (For details, see pp. 507-8.)

Physical Features and Products.—Excluding Burma, which forms no part of the Indian peninsula, we may broadly divide the country into three sections, viz., the Himalayan region, the northern river-plains, and the southern table-land.

The Himalayas.—The Himalayas (which lie partly beyond the frontier), with their southern offshoots, form the natural northern boundary of India. The Himalayan range runs for 1,500 miles from N.W. to S.E., with a varying breadth of 150 to 200 miles, and attains a general height of 20,000 feet above the plain, culminating in the loftiest peaks yet measured on the globe—Mount Everest, 29,141 feet, Kunchinjunga, 28,146 feet, and Dhaulagiri, 26,826 feet, near the centre of the range; and Mount Godwin Austen, 28,250 feet, near its junction with the Hindu Kush Mountains. The line of perpetual snow is at about 16,000 feet. The Himalayas collect and store up water for the tropical plains below. The slopes afford a representation of the tropical zone (especially on the southern slopes to the E.), the temperate zone (particularly to the S.W. of the range), and the arctic zone as the upward journey is taken from the plains. In the Himalayas are several sanatoria, including Murree, Simla, Mussoorie, Naini Tal, and Darjiling. Himalayan vegetation includes such varied species as the tree-fern, ilex, pine, oak, fir, deodar (cedar), rhododendron, barley, oats, millet, and many domestic vegetables. The fauna are as varied as the flora, and include the bison, musk-deer, yak, wild sheep and goat, bear, elephant, monkey, and tiger, with eagles, partridges, and pheasants. Between the Himalayas and the plains to the S.E. is the great fever-haunted Tarai or Duar jungle, densely forest-covered and full of big game.

The Great Plain.—The northern river-plains, lying at the foot of the Himalayas, comprise the rich alluvial plains watered by the Indus, the Ganges, the Lower Brahmaputra, and their tributaries. At no great distance from one another, four rivers take their rise in the Himalayas. Of these, two are on the north side—the Indus, which flows westward for 1,800 miles, and the Tsan-po or Brahmaputra, which flows eastward for nearly 1,500 miles. The other two, on the southern slope, are the Sutlej, which, after flowing W. and S.W. for 900 miles and collecting various other streams, joins the Indus; and the Ganges, which, during a journey S.E. and E. of about 1,550 miles, drains almost all the

The principal publications relating to India presented to Parliament in 1909 were:—Statistical Abstract, 1898-9 to 1907-8; Moral and Material Progress Report, 1907-8; Tables of the Trade of India, 1903-4 to 1907-8; Review of the Trade of India in 1908-9; Sanitary Measures in India, 1907-8; Indian Financial Statement for 1909-10; Home Accounts, 1907-8, with Estimates 1908-9; Explanatory Memorandum regarding the Accounts and Estimates of 1909-10; Return of Net Income and Expenditure, 1897-8 to 1907-8; Administration Report on Railways in India, 1908; Proclamations of 1898 and 1908 (H.C. 222); Regulations for Trade in Tibet (Cd. 4450); Report on Famine Administration in the United Provinces (Cd. 4487); Abolition of Military Supply Dept. (Cd. 4574); Representation of Muhammadans on Legislative Councils (Cd. 4652); General Index of Parliamentary Papers relating to East Indies, 1800 to 1907 (H.C. 89); Indian Councils Act, 1909.

Bengal plain. The Brahmaputra, after flowing along the northern side as far as the eastern extremity of the Himalayas, turns sharply to the S., then to the W., and finally joins the Ganges 75 miles from where their combined streams enter the Bay of Bengal. Thus the Himalayas supply India with the water gathered on both slopes. The Indus and Ganges, with their tributaries, are the source of an extensive system of irrigation by canals. The richest, most populous, and most historically famous part of India lies in the basins of these great rivers. Formerly the Ganges was the only great highway of Bengal; it is still the fertiliser and the water-carrier. But a close network of railways is increasingly used for transport. So rich is the Indo-Gangetic plain that it supports a population of about 50 millions, almost wholly agricultural. The density of the population is extremely high in this region, averaging in the Bengal delta 552 per square mile, and rising in a few districts to 900. The population has increased most in the densest areas, and pressure on the soil is severe in parts of Behar and the United Provinces. In Northern India there are two harvests, *rabi* (spring) crops being reaped in March and April, *kharrif* (autumn) crops in October to December. To the north we find wheat, pulse, maize, millet, barley, and tea; while in the south, indigo, cotton, sugar-cane, jute, oilseeds, tobacco, and many dyes, opium, and spices are produced. Among the fauna are monkeys, panthers, tigers, leopards, hyenas, jackals, squirrels, elephants, deer, crocodiles, and snakes. Salt, mica, and coal are the chief minerals. The Ganges delta yields rice, bamboos, and a large variety of palms. The Aravalli range, the primeval chain of India, divides Rajputana from the Central India Native States. To the N.W. of the peninsula lies the mountainous, barren, and thinly populated region of Baluchistan.

The Deccan.—Just as the Himalayas on the N. and the Hindu Kush and Sulaiman Mountains on the N.W. form natural barriers of defence for Hindustan, so do the Vindhya Mountains, running almost due E. from the head of the Gulf of Cambay, north of the Nerbudda River, form a firm southern boundary to the river-plains of Northern India. Southern India, or the Deccan, is a plateau of triangular shape and very old geological formation, bounded on two sides by the Malabar and Coromandel coasts, which converge at Cape Comorin, and on the third by the Vindhya. The Eastern and Western Ghats all but complete this enclosing triangle of mountain ranges. In the extreme N.W., south of the Vindhya, and parallel to them, but north of the Western Ghats, we find the Nerbudda and the Tapi flowing westwards, their basins being sharply defined by the Satpura Mountains, which lie midway between them. As the Western Ghats lie so close to the coast, and afford no exit for rivers, there are no streams on the Malabar coast south of the Tapi; all the rivers flow eastwards, through defiles in the Eastern Ghats, into the Bay of Bengal. The four chief rivers are the Mahamuddy, in the extreme N.E. (530 m.), the Godavery (900 m.), the Kistna (800 m.), and the Cauvery (472 m.), at intervals further to the south. The physical geography of Southern India has shaped its history: the S.W. coast, shut in by the mountains, is very primitive and moves slowly; the S.E., open and easy of access by sea and towards the interior, has made great progress. The mountain slopes of this region, especially those of the Western Ghats, which rise to 8,000 feet in the Nilgiris, are still covered with the splendid vegetation of primeval forests. Teak, ebony, satinwood, sandalwood, palm, and bamboo abound. The jungles in the E. are very deadly. The tiger, bison, leopard, deer, and various smaller game afford sport. Snakes are found everywhere. In the valleys and on the higher plains many valuable crops are raised, chiefly rice, millet, cotton, oilseeds, coffee, tea, indigo, tobacco, and cinchona. The black cotton soil is very fertile. There is irrigation by dams, wells, tanks, and canals. The southern table-land has furnished considerable supplies of minerals. At present the minerals principally worked are salt, coal, manganese ore, mica, and gold.

Burma.—Beyond the Bay of Bengal is the large province of Burma, watered by the Irrawaddy and its tributaries and by the Salween. The delta region is flat; further inland are hills and rolling downs; while the north is mountainous. Rice is the chief staple. Millet, cotton, sesamum, and tobacco are also grown. The forests, particularly of teak, make a considerable contribution to the exports. Petroleum is produced in rapidly increasing quantities, and jade and rubies are mined. The fauna include monkeys, jackals, tigers, elephants, bison, and deer.

Climate.—About half of India is within the tropics, but the greatest extremes of heat and cold are in the N.W. In the Himalayas the climate is moist and cold. In Northern India it is dry, and the winters are rather cold. In tropical Southern India the climate is more equable. Calcutta, Bombay, and Madras all have an equable climate, owing to proximity to the sea. India depends for its fertility upon the monsoon. The S.W. monsoon brings moisture from the ocean south of the Equator, and reaches the west coast early in June and the northern provinces late in June. The mountains arrest these currents and precipitate rainfall, which averages 60 inches in the sub-Himalayan region, 39 inches in the Indo-Gangetic plain, and 30 inches in the Deccan, but is small in Sind and Rajputana. Madras benefits by the N.E. monsoon in the autumn.

The People of India.

Population.—The third general census of India was taken on the 1st March, 1901. The enumeration embraced the whole of the Indian Empire, except a few outlying tracts and certain disturbed areas on the frontier. The final census returns gave a population of 294,361,056, as compared with 287,314,671 in 1891 (for details see p. 503). Deducting for purposes of comparison the population of tracts not enumerated in 1891, the increase in the ten years is only about 1½ per cent., as compared with an increase of over 11 per cent. in the previous decade. These statistics show that long-continued famine in Western India, combined with an abnormal prevalence of cholera, plague, and other diseases, had, during the decade, seriously enhanced mortality. The census total of 1901 is divisible into 231,899,507 (or 79 per cent.) for British India, and 62,461,549 or 21 per cent. for Native States. India is not over-populated, for two-thirds of the people live on one-quarter of the area. In Burma, Assam, and elsewhere a much larger population might subsist.

Languages.—India has 147 vernacular languages, of extraordinary variety. The languages spoken by 292,563,771 persons in India are grouped in three families; and twenty-three languages belonging to these families are spoken by not less than one million persons each. The principal languages are Hindi (spoken by 60,354,137 persons), Bengali (44,624,048), Bihari (37,076,590), Telugu (30,666,872), Marathi (18,237,899), Punjabi (17,070,961), and Tamil (16,595,500), after which come Rajasthani, Kanarese, Gujarati, Oriya, Burmese, and Malayalam. Hindustani, a dialect of Hindi, has become the literary language of Hindustan, and

is the *lingua franca* of India. English is understood by many.

Religions.—The population by religions includes 207,147,026 Hindus (70 per cent. of the total), 62,458,077 Muhammadans (21 per cent.), 9,476,759 Buddhists (3 per cent.), nearly all in Burma, leaving 6 per cent. for all other religions, including 2,923,241 Christians (two-thirds of whom are in Madras and Travancore), 2,195,339 Sikhs, 1,334,148 Jains, 94,190 Parsis, and 8,584,148 described as Animists, who believe in magic and strive to propitiate impersonal forces. The Muhammadans, who are increasing faster than the Hindus, are infected with the caste system and other Hindu characteristics. Christian converts come mainly from the more degraded classes in Bengal and Madras.

Large Towns.—Tables below show the populations of the chief towns and the distribution of the people by occupations. There are 28 towns with a population of over 100,000, and 49 with 50,000 to 100,000. The urban areas of over 5,000 people comprise less than 10 per cent. of the total population.

Occupations.—About two-thirds of the population depend on agriculture. The cotton industry supports over 7,500,000 persons, more than two-thirds of whom depend on hand-weaving. There are 5,500,000 persons in Government service, civil or military.

Sex.—Marriage is almost universal owing to religious obligations. Infant marriage and enforced widowhood are extending through Brahmanical influence and notions of social distinction. There are nearly 26,000,000 widows in India. The males outnumber the females in the proportion of 1,000 to 963.

OCCUPATIONS OF THE PEOPLE.

A Brief Sketch of Indian History.

ALEXANDER's invasion of India (326 B.C.) is the first landmark of Indian history. A dim outline of earlier events can be traced from the evidences of race and language, from the traditions contained in ancient Indian literature, from accounts of later Greek and Chinese writers, and from coins and inscriptions. The oldest Indian books are supposed to date from about 1500 B.C.; they are written in Sanskrit, a language akin to Persian and to the principal European languages. The people who wrote these books were Aryans, a race which, as their traditions indicate, came into India from north of the Hindu Kush. They found in India, and conquered, a population of yellow-skinned type in the Himalayan districts, and a short, dark-skinned race, of low civilisation, in the rest of India. Of both these types there are still survivals. The religion and metaphysics of the Aryans are to be found in the *Vedas* and *Upanishads*; their epics, the *Mahabharata* and *Ramayana*, extol their mythical heroes: while in the *Code of Manu* we find a picture of Indian society, rather as the priestly caste of the day wished it to exist, than as it actually then existed. The ascendancy of the Brahman priesthood over the soldier class of Kshetriyas is represented as fully established. The system of caste, originating in the attitude of the *Aryas* (kinsmen) to the dark and servile aborigines, generally prevails, and the people are organised in village communities. In the sixth century B.C. a new religion arose, called Buddhism. Its founder was Gautama, a prince of the Kshetriya caste, who took the name of Buddha, the "awakened," and died about 487 B.C. His supposed remains were discovered near Peshawar in 1909. His tenets are contained in the *Tripitaka*, the Buddhist gospel. Buddhism was, in India itself, mainly a social reform, a revolt against the pride of caste and the exclusiveness of the Brahman priesthood. It prevailed widely from 250 B.C. to 350 A.D., but was never quite general, and existed side by side with Brahmanism, which it never succeeded in ousting. At length it lost ground, less through persecution than through a change in popular feeling; and before the twelfth century it had become practically extinct in India itself, though it still flourishes not only in Siam, China, and Japan, but also in Nepal, Burma, and Ceylon. Its decline in India was accompanied by a revival of Brahmanism, much modified. A branch of Buddhism, however, or a survival of a kindred creed, continues to exist in India in the district sect of the Jains. The followers of this creed, which flourished most from about 950-1300 A.D., are still numerous in Gujarat, and are also found in other parts of India.

According to Herodotus the twentieth satrapy of Persia at one time included part of the north-west of India. Alexander (326 B.C.) did not penetrate beyond the tributaries of the Indus, though he sailed down the river. At his death his Indian possessions fell to Seleucus, whose ambassador, Megasthenes (306 B.C.), has left an account of the country under the rule of Chandragupta, the Greek Sandracottus. Megasthenes describes the democratic village communities of the Punjab, and speaks of the people as brave and truthful, and averse to litigation, and of the women as chaste; and he notes the absence of slavery. Asoka (272-231 B.C.), the grandson of Chandragupta, whose edicts on stone pillars throw light upon this

period, was a convert to, and a great patron of Buddhism, which became the State religion. Our last contributors to a knowledge of India before the period of continuous authentic history are the Buddhist pilgrims from China, who visited the country between 399 and 655 A.D.

The influence of the Greek conquest was swept away by the Scythians, who poured in many waves, between about 165 B.C. and 320 A.D., over Northern India. Their inroads left a lasting influence on the character of the population, and profoundly modified the religious beliefs and domestic institutions of the Hindus. The sixth century was a period of confusion. The emperor Harsha (606-648), after many years of fighting, which made him master of Northern India, ended his reign in piety and peace. From about 650 to 950 anarchy prevailed.

The Arab conquest of Persia, towards the middle of the seventh century, brought the successors of Muhammad to the Indus, and in N.W. India they made some temporary acquisitions; but three centuries were to pass before the foundations of a durable Muhammadan empire were laid. It was in 999 that Mahmud of Ghazni (in Afghanistan) began a long series of incursions into India, no fewer than fifteen expeditions taking place between 999 and 1027, one of which carried him beyond the Jumna, while another ended in the capture of Somnath, in Kathiawar. The succeeding dynasties of Afghan kings held power in India for 500 years; but the advance of their power was gradual, for it was not till 1206 that Delhi was taken and the greater part of Hindustan annexed by Kutb-ud-din, whose memory is perpetuated by the Kutb Minar, near Delhi. The first Muhammadan invasion of the Deccan took place in 1294.

THE MOGUL EMPIRE.—The Muhammadan Mongols, or Moguls, after overrunning Central and Western Asia, arrived in 1219, under Genghis Khan, on the frontiers of India, but did not cross the Indus. During the reign of the last monarch of the Taghlak line, the famous Tamerlane (or Timur) burst into India at the head of a mighty host, captured and sacked Delhi in 1398, and laid waste a great part of Hindustan. A period of weak dynasties followed; frequent invasions from without, and general misrule and anarchy within, paved the way for larger conquests by the Mogul Emperors. In 1526 Babar, a direct descendant of Timur, overthrew the last of the Afghan kings at Panipat, and founded the MOGUL EMPIRE, which at his death extended from the Oxus river in Central Asia to the borders of the Gangetic delta. His son, Humayun (1530-56), lost the whole of the territory conquered by Babar, but recovered a portion of it (including Delhi) shortly before his death. His victor was Sher Shah, Sur, who reigned from 1540-1545. Akbar the Great, his son (1556-1605), spent a long reign in firmly establishing the empire; at his death his dominions extended over Kabul, Kandahar, and all India north of the Nerunda. Moreover, of the Muhammadan kingdoms of the Deccan, Ahmednagar, Berar and Bidar were absorbed, and Bijapur and Golconda forced to pay tribute. Akbar followed up his conquests by important financial reforms; he was tolerant in religion, and just to all classes of his subjects. Among the great men of his time were the Hindu, Todar Mal, his able finance

minister; Abul Fazl, the historian of his reign; and Faiz, the poet. Bairam Khan, Akbar's faithful guardian in his youth, revolted when the young king seized the reins of power, but was pardoned. *Jahangir* (1605-27) received in 1616 Sir Thomas Roe, the ambassador of James I. His empress was the famous Nur Jahan. Under *Shah Jahan* (1627-1658) the Mogul Empire reached the zenith of its glory. Many public works and grand buildings, including the Taj Mahal at Agra, testify to his magnificence and taste. The close of Shah Jahan's reign was embittered by the rivalries of his four sons. *Aurangzeb* (1658-1707) defeated and killed his brothers and kept his father a prisoner till death (1666). Aurangzeb had great ability and courage, but religious intolerance, distrust and dissimulation characterised his chequered career. His reign, in some respects magnificent, ended in failure. He brought the Mogul Empire to its greatest extent by conquering and incorporating all India as far south as Tanjore. But from this time the decline of the empire began. Four sons disputed the right of succession, and *Bahadur Shah* (1707-12) gained the coveted crown. After four short-lived emperors *Muhammad Shah* (1719-42), grandson of Bahadur, came to the throne. His viceroys became rebellious, and so contributed to the success of the Mahrattas, who subdued the Deccan. About 1724 part of the Deccan became practically independent under Nizam-ul-Mulk (ancestor of the present Nizam). In 1738, to avenge an alleged insult, Nadir Shah of Persia invaded India, captured Delhi, gave orders for a general slaughter of the inhabitants, and carried off enormous plunder. All the country west of the Indus was lost to the empire. On the death of Muhammad, the phantom rulers, *Ahmad Shah* (1748-1754) and *Alamgir II.* (1754-1759), occupied the throne, and were succeeded by *Shah Alam* (1759-1806), who came to terms with the British.

THE MAHRATTAS.—As the Moguls declined, the power of the Mahrattas increased. They were Hindus, and their country was in the Western Ghats, to the east of Bombay. The founder of their power was *Siraji* (1627-1680), a chieftain of the family of Bhonsla, who became famous by his raids in the Deccan, and aimed at founding a Hindu kingdom. *Balaji Vishvanath* (1712-1720), Peishwa, or Prime Minister, succeeded in making that office of paramount importance and hereditary in his family. Sivaji's descendants thenceforth holding a merely nominal position. Under the Peishwas, aided by Scindia, Holkar, and the Gaekwar, who formed independent States about this time, the Mahrattas rapidly extended their territory and influence, conquering Gujarat, Malwa, Berar, and Orissa. Although they were severely defeated at Panipat in 1761 by Ahmad Shah, the Afghan invader, they remained for some time the first power in India, and were the most dangerous opponents of the English. Too often their rule degenerated into a system of organised plunder. Like the Pindaris, a horde of freebooters who followed in their train, they became a scourge to the country. It was not until both Pindaris and Mahrattas were finally overthrown in 1818 that India enjoyed the blessings of internal peace. The Mahratta empire, containing within itself the seeds of disintegration, was fated to bend before the superior sway of Europeans, who, at first attracted by love of adventure or hopes of gain, had gradually extended their power in India.

THE SIKHS.—The Punjab lay beyond the reach of the Mahrattas. There the decay of the Mogul empire gave the opportunity, not to a nation, but to a religious sect, united by military discipline, to establish territorial dominion. The founder of the Sikh religion was *Nanak Shah*, a Hindu reformer, born near Lahore in 1469. He preached the One God, purity of life, and abolition of caste. He had ten successors, named *gurus* or apostles, ending with *Gurind Singh* (1708). The sect, though cruelly persecuted, survived, and gradually adopted a political organisation. It became a power under *Ranjit Singh* (1780-1839), who, revolting against the Afghan Amir, by whom he had been appointed Governor of Lahore, founded the kingdom of the Punjab. The powerful army he had organised brought on the collision which he himself had carefully avoided, and after two wars with the British the Sikh kingdom was annexed, and became the province of the Punjab (1849).

EUROPEAN ADVENTURE.—From time immemorial the lucrative trade of Europe with India and the farther East has enormously enriched in turn each nation that has held it. In the 15th century it was mainly possessed by the Venetians on the European side, and by the Arabs on the Eastern side. The chief trading centres of the Arabs were Calicut, Ormuz, Aden, and Malacca. Seeing the large profits to be derived from this trade, the rising nations of Europe in the 15th century sought to obtain a share. Hence the ardour of the navigators who set out to discover an ocean route to India. The sea route round the Cape of Good Hope was discovered by Vasco da Gama, who anchored before Calicut in May, 1498. From that time until they lost their naval supremacy, a century later, the Portuguese enjoyed practically a monopoly of Indian trade. The first Portuguese viceroy, Francis of Almeida (1505-1509), established numerous factories and fortresses; while his successor, Alfonso de Albuquerque, captured Goa (1510), and extended the Portuguese dominion, notably on the Malabar coast. This dominion for 60 years from 1542 was tantamount to an entire regulation of the Asiatic coast trade with Europe from the Persian Gulf to Japan. It was stained by great cruelty. When the crowns of Spain and Portugal were united in 1580 under Philip II., the Asiatic interests of Portugal were subordinated to the European interests of Spain, and the decline of Portuguese power in Asia was rapid. Till then the Portuguese brought Indian products to Lisbon, whence the Dutch carried them to the other ports of Europe. But when Philip II., on account of the Dutch revolt, shut Lisbon against them, the Dutch were driven to trade directly with the East. In 1602 they formed "The Dutch East India Company" by amalgamating previously existing trading societies, and the principal Portuguese settlements in the East were gradually captured. By 1661 the Portuguese held only those remnants of their Indian possessions which they still hold. The Dutch occupied the Cape as a halfway station. After a time they firmly established themselves in Java and the neighbouring coasts and islands, but were forced by the British to relax their hold on India. French and Danish East India Companies were established in 1601 and 1616 respectively. The latter achieved little, but, as will be seen directly, the French had a brief but brilliant period of influence in the middle of the 18th century.

ENGLISH DOMINION.—At the close of the 16th century the English, like the Dutch, became eager to share in the profits of Indian commerce. After some smaller ventures, the London East India Company was incorporated by Queen Elizabeth by royal charter on 31st December, 1600. There were 217 subscribers of the capital of £68,373, and the official title was "The Governor and Company of Merchants of London trading to the East Indies." A second charter in 1609 made the Company's privileges perpetual. The new competitors were resisted by the Portuguese; but a permanent footing was obtained at Surat after several stubborn engagements off Swally in 1612. In 1615 the British ambassador, Sir Thomas Roe, aided by the influence of the Emperor Jahangir, greatly improved the position and prospects of the Company. In 1639 the English, who had acquired a narrow strip of land on the coast below Masulipatam, built a factory there, surrounded it with a wall, mounted guns, and named it Fort St. George; in 1653 this settlement of Madras became a Presidency. In Charles I.'s reign rival enterprises led to confusion and to piratical excesses in the East, but in 1657 co-operation and discipline were secured by the charter granted by the Protector Cromwell to a single company comprising the whole body of merchants. The charter was renewed by Charles II., in whose reign the Company enjoyed great prosperity. When, in 1662, Charles II. married Katharine of Braganza, a part of her dowry from Portugal was the Island of Bombay; in 1668 he transferred all his rights over it to the Company for an annual payment of £10. In 1687 Bombay replaced Surat as the seat of the Western Presidency. Although in 1633 the Company had obtained certain treaty rights in Bengal from the Mogul, and in 1651 a factory had been established at Hooghly, yet in that part of India they held no territorial possessions as in Bombay and Madras. In 1688 the Muhammadan rulers forced them to abandon their settlement, but they were invited to return, and in 1690 were laid, amid swamp and jungle, the foundations of Fort William, which was destined to develop into the modern city of Calcutta. In 1698 a rival company called "The English East India Company," to distinguish it from the old "London Company," was started with a capital of two millions. After a period of conflict and trade losses, the rival companies came to terms in 1702; and in 1708 they were finally amalgamated under the title of "The United Company of Merchants of England trading to the East Indies."

When Great Britain engaged in war with France in 1744, the rival Companies of England and France came into collision, with the result that Madras was captured in 1746. Had Dupleix received continuous support from home, he might have succeeded in founding a French Empire in India. The first reverses of the English were retrieved by Clive, whose gallant defence of Arcot (1751) was followed up by a series of brilliant movements, culminating in the utter defeat of the French army by Coote at Wandiwash in 1760, and in the capture of Pondicherry in 1761, which completed the ruin of the French Company. The territory retained by the French in India since that date is insignificant; and in these possessions they are forbidden by treaty to hold any considerable military force. The tragedy of the Black Hole

of Calcutta (1756) summoned Clive from Madras, and his victory at Plassey over the Nawab of Bengal in 1757 made British influence predominant.

Clive was appointed first Governor of Bengal in 1758. In 1760 he returned home, and in 1763 the English were again embroiled in Bengal, but completely defeated their opponents at Buxar (1764). In 1765 Clive (now Lord Clive) returned to Bengal as Governor, and before he left finally in 1767 he succeeded in reforming the services, in which great abuses existed. As a result of Clive's efforts, the East India Company in 1765 received from the Emperor at Delhi the *diwani* or fiscal administration of Bengal, Behar, and Orissa, with the Northern Circars (Madras), and 25,000,000 people came under the government of the Company. Thus were laid the foundations of England's territorial dominion in India.

After an interval of misrule Warren Hastings (1772-85) was appointed Governor of Bengal, and in 1774 he became Governor-General, on the creation of that office under the Regulating Act of 1773. He vigorously reformed the revenue arrangements and judicial procedure. Hastings was the first great administrative organiser of the British possessions. He greatly increased the power and territory of the Company, notwithstanding the opposition of a hostile Council. Mysore in 1760 had been seized by Hyder Ali, a Mussulman adventurer, and a powerful and inveterate enemy of the English. By repelling Hyder Ali's memorable invasion of the Carnatic (1780), and defeating the triple alliance of the Nizam, the Marhattas, and Hyder Ali, Hastings probably saved British India. On his return to England he was impeached, but acquitted.

The first administration of Lord Cornwallis (1786-93) was marked by a thorough reform of the Company's Civil Service, by the introduction of the permanent settlement of the land revenue in Bengal, by the remodelling of the judicial system, and by the third Mysore War, in which he defeated Tipoo, the son and successor of Hyder Ali. The rule of Sir John Shore (1793-98) was uneventful.

The administration of the Marquess Wellesley (1798-1805) was distinguished by many important events. Tipoo, as courageous and as hostile to the English as his father, was in 1798 in secret correspondence with the French, who were then dominant in the military councils of the Nizam and of Scindia, were strongly established in Mauritius, and under Napoleon, then engaged in his Egyptian campaign, were aiming at a great Eastern Empire. Lord Wellesley saw the necessity of crushing this dangerous Power, and the Fourth Mysore War ended in the capture of Seringapatam (1799), the death of Tipoo, and the conquest and restoration of Mysore to a representative of the family of Hindu Rajas whom Hyder Ali had dethroned. The Treaty of Bassee (1802) broke up the Marhatta confederacy, but led to the Second and Third Marhatta Wars, which curtailed the power of Scindia and Holkar, and increased the strength and extent of the Company's dominions. Lastly, Lord Wellesley developed, if he did not initiate, a system of subsidiary alliances with Native States, which aimed at making the British the one paramount Power, while giving greater security than the balance of power attempted by his predecessors. Wellesley doubled the territories of the Company, and transformed a mercantile body into a

political power with a preponderating influence throughout India.

During the brief second administration of Lord Cornwallis (1805), and that of Sir G. Barlow (1805-7), Wellesley's policy of subsidiary alliances was reversed. Lord Minto (1807-13) established peaceful relations with the Punjab, Afghanistan, and Persia, through the missions of Metcalfe, Elphinstone, and Malcolm respectively, and captured Mauritius. On the renewal of the Company's charter in 1813 the monopoly of Indian trade was abolished.

Under the Marquess of Hastings (1814-23) a severe struggle with Nepal ended with the Treaty of Sagauli (1816), which still regulates India's relations with that State. The annexation in 1818 of the territory of the Mahratta Peishwa enlarged Bombay Presidency to its present dimensions. Lord Hastings in the same year crushed the Pindaris of Central India, freebooters who organised large bands that devastated the country in all directions. Reviving Lord Wellesley's policy of alliances, he settled on their existing basis the relations of the Supreme Power with the feudatory States of Rajputana and Central India. He encouraged education. Lord Amherst (1823-8) succeeded Lord Hastings. Encroachments on British districts by the King of Ava and his insolent refusal of all redress led to the first Burmese War, which cost 20,000 lives and nearly £14,000,000, but gave to India the fertile provinces of Aracan and Tenasserim, and, practically, Assam.

While Lord William Bentinck was Governor-General (1828-35), steam communication with India was introduced, suttee (or widow-burning) was abolished, educated natives were admitted more freely into the service of the Company, and various reforms were passed affecting education, the liberty of the Press, finance, and justice. The new charter of the East India Company in 1833 abolished the remaining monopoly of Chinese trade, introduced reforms in the constitution of the Indian Government, made the North-West Provinces a separate administration, and did away with the restrictions on the residence of British subjects in India. The resolution of Lord Auckland (1836-42) to support Shah Shuja against Dost Muhammad brought on the first Afghan War (1839-42), and the serious disaster attendant on the fatal retreat from Cabul. The administration of Lord Ellenborough (1842-44) saw the conquest of Sind by Sir Charles Napier and its annexation (1843). Lord Hardinge (1844-48) conducted in person the first Sikh War, and fought a series of severely-contested battles, ending with Soobraon (1846).

Lord Dalhousie's administration (1848-56) was fruitful in events. The Second Sikh War resulted, after severe fighting, in the submission of the Sikhs and the annexation of the Punjab (1849). The second Burmese War (1852), deprived the King of Burma of Pegu. Lord Dalhousie promoted the introduction of railways and the telegraph. He established cheap postage, promoted steam navigation with England *via* the Red Sea, and opened the Ganges Canal, still one of the largest irrigation works in India. His annexation policy was much criticised at home. It proceeded on the principle that British being preferable to native rule, gross misrule or a break in the natural succession justified, in the interest of the subject populations, the transfer of a native State to the British Government. In 1849 the "doctrine of lapse" was applied

to Satara, and in 1853 Jhansi similarly became British territory; while on the death of the last of the Mahratta Princes of Nagpur, his territory was annexed, and became the Central Provinces in 1853. In 1856, after repeated warnings to the tyrannical ruler of Oudh, that kingdom was also annexed, without bloodshed or fighting.

Earl Canning (1857-62), who succeeded Lord Dalhousie, left England pledged to pursue a policy of peace, but he was destined to face the greatest crisis that has threatened the British Empire in India. A mutiny of sepoy broke out on the 10th May, 1857, at Meerut, and spread through the whole Bengal Army. Delhi was for some months in the possession of the rebels, and many chiefs joined the revolt. The siege of Delhi, the massacre at Cawnpore, the relief of Lucknow, the Central India campaign, and all the heroism of that momentous time will never be forgotten. Although the control of Indian affairs was vested in the Cabinet through the Board of Control, the Great Mutiny was laid to the charge of the East India Company, whose eventful annals were brought to a close by the transfer of the entire administration of India to the Crown.

INDIA UNDER THE CROWN.—The "Act for the Better Government of India" established the authority of the Crown; and a Proclamation to the Princes, Chiefs, and People of India, dated the 1st Nov., 1858, announced the resolution of Her Majesty to assume the government of the territories in India "heretofore administered in trust by the Honourable East India Company." Legislative Councils were established in India. Lord Canning was succeeded in 1862 by Lord Elgin, who, however, died in Nov., 1862. Sir John (Lord) Lawrence (1864-69) took measures to reform the finances, which had been seriously burdened by the heavy military expenditure necessitated by the Mutiny. His administration was marked by the Bhutan War (1864), and by the terrible Orissa Famine of 1866. He encouraged irrigation. Lord Mayo (1869-72) effected many administrative reforms, instituted State railways, and inaugurated the system of provincial finance, which has since been extended. He promoted the construction of roads and canals. During the tenure of office of Lord Northbrook (1872-76), H.M. King Edward VII., then Prince of Wales, visited India. The Viceroy devoted attention to finance and to famine relief. In 1875 the reigning Gaekwar of Baroda was deposed for misrule and disloyalty. Lord Lytton's administration (1876-80) was made eventful by a terrible famine in Southern India, by the Second Afghan War, and by the Queen's assumption of the title of EMPRESS OF INDIA in 1877. He was succeeded by the Marquess of Ripon (1880-84), whose peaceful term was marked by the extension of local self-government, and by fiscal, judicial, educational, and other reforms. His successor was the Marquess of Dufferin (1884-88), during whose viceroyalty occurred the Third Burmese War, by which Upper Burma with the Shan States was added to the Empire. The N.W. frontier of Afghanistan was delimited, the frontier of India strengthened, and the army increased. The Marquess of Lansdowne (1888-94) continued his predecessor's policy of strengthening the army and extending and consolidating British influence on the frontier. The Indo-Afghan boundary was defined, and a serious outbreak in Manipur was suppressed. As regards domestic policy, he took the first step in currency reform by closing the Indian mints to the free

coinage of silver. He also reconstituted the Legislative Councils in 1892 by introducing a more popular element, and conferring a limited right of interpellation and criticism in financial matters. The viceroyalty of Lord Elgin (1894-99) was full of events. In 1895 an outbreak in Chitral made necessary a large military expedition to relieve the garrison. Plague broke out in 1896, and has raged more or less severely ever since. In 1896-7 an area of 307,000 sq. ms., with a population of 70 millions, was visited by a grievous famine. In 1897 the tribes along the whole border from Chitral to Baluchistan rose against the British garrisons. In the Tirah Campaign that followed over 40,000 troops were employed. Several boundaries were settled under Lord Elgin, notably those with Russia on the Pamirs and with France on the Mekong; the frontiers of Afghanistan, Persia, and China were also defined. Among the internal proceedings were the reimposition of the general Customs tariff abolished in 1882, and the creation of Legislative Councils for the Punjab and Burma.

Lord Curzon (1899-1904, and 1904-5) succeeded Lord Elgin. In 1899 the pound sterling was made legal tender in India concurrently with the rupee, at the exchange of Rs. 15 to £1. India was thrice called on to defend Imperial interests by the despatch of troops to South Africa in 1899, to China in 1900, and to Somaliland in 1903-4. In 1899-1900 occurred one of the worst famines on record, the tracts affected covering 475,000 sq. ms. with a population of 60 millions, of whom more than a half were in native States. Lord Curzon's term of office was a period of reform and reconstruction. Among his measures for aiding cultivators were the institution of agricultural banks and departments, and reforms in revenue law and administration designed to free the cultivators from the money-lenders. The famine codes were amended. Better arrangements were made for controlling the tribes and for distributing the troops on the frontier, and a new province, under the direct control of the Governor-General in Council, was created, called the North-West Frontier Province (1901). The Adu and the Perso-Afghan boundaries were delimited. An Imperial Cadet Corps of native princes and nobles was inaugurated. The Viceroy appointed Commissions of Inquiry on irrigation, railways, universities, agricultural banks, excise, and police, all of which suggested important reforms. A Railway Board was constituted to administer the railways, and a Commerce and Industry Department, in charge of a new Member of Council, was created. Educational policy was reviewed and reforms introduced. The reform of the police was undertaken. Lord Curzon also secured a perpetual lease of Berar from the Nizam. Indian princes and native troops visited England in 1902 to attend the coronation of H.M. King Edward VII. The Viceroy held a great Imperial Durbar of the princes and nobles of India at Delhi on 1st Jan., 1903, to celebrate the coronation of the first British Emperor of India. In 1904 a mission with a military escort proceeded to Tibet, and secured a favourable treaty. Lord Curzon returned to England for a few months in 1904. During his absence Lord Amthill occupied the post of Viceroy. Lord Curzon returned to India on reappointment in Dec., 1904. In 1905 the treaty with Afghanistan was renewed. The Viceroy reduced the dimensions of Bengal, which had become unwieldy for administrative

purposes, and constituted a new province, called Eastern Bengal and Assam, by combining parts of Bengal with Assam. Lord Curzon carried out great reforms in the organisation of the Army in conjunction with Lord Kitchener (appointed Commander-in-Chief in 1902), but, differing from certain proposals made by the latter, and finding that he lacked the support of the Home Government, he resigned (Aug., 1905).

Lord Minto succeeded in Nov., 1905. The Prince and Princess of Wales made a tour in India during the winter of 1905-6. There has been considerable agitation among Bengalis since 1905-6 owing to the partition of Bengal, and a Seditious Meetings Act was passed in Nov., 1907. In his Budget speech in 1907, the Secretary of State foreshadowed important reforms in Indian administration, designed to bring all classes of the people into closer relations with the Government and its officers. He appointed two Indian members to his own Council, and an Indian member to the Governor-General's Council. Viscount Morley appointed Commissions to inquire into railways, into the possibilities of financial and administrative decentralisation, and into the conditions of factory labour, and action has been taken on their reports. In 1908 the unrest in Bengal assumed an anarchical character, and the laws relating to the Press and to explosives were strengthened. To mark the fiftieth anniversary of the transfer of India to the Crown a royal proclamation was issued in Nov., 1908, promising extended self-government. By the Indian Councils Act (1909) the Viceregal and provincial Legislative Councils were enlarged, their powers of interpellation and criticism enhanced, and the elective element extended, while the executive councils of Madras and Bombay were increased in size, and power was given to constitute executive councils in Bengal and other provinces. The Act becomes operative in Jan., 1910.

IMPERIAL LEGISLATION.—The original charter of the East India Company was granted by Queen Elizabeth at the end of 1600. *The Regulating Act* (1773), which created the first Governor-General and his Council, was the first statute that recognised the East India Company as a ruling body. Pitt's *India Act* (1784) left the business and most of the patronage to the Court of Directors, but gave the supreme civil and military authority to a Board of Control, whose president represented India in the House of Commons. In 1793 the Company's charter was renewed; in 1813, on a further renewal of the charter, the trade of India was thrown open; while in 1833 the monopoly of the China trade was abolished. In 1853 the Company's charter was renewed for the last time, and the Indian Civil Service was thrown open to competition. By "An Act for the Better Government of India" (1858), which still regulates Indian affairs, all the territories governed by the East India Company were transferred to the Crown, and all the powers exercised by the Company and the Board of Control were vested in the Secretary of State for India, assisted by a Council. Under this Act, as amended by Acts of 1889 and 1907, at least 9 members of Council must have resided in India for 10 years, and must not have left India more than 5 years prior to their appointment. The number of members may be 14. The term of office is now 7 years, with power of extension. In 1877 (under the Royal Titles Act) Queen Victoria assumed the title of Empress of India.

The Government of India.

EMPEROR OF INDIA—H.I.M. EDWARD VII.

Secretary of State—The Rt. Hon. VISCOUNT MORLEY of Blackburn, O.M.

H.M. SECRETARY OF STATE FOR INDIA is the head of the Indian Administration in England, and as a member of the Cabinet he is responsible to, and represents the supreme authority of, Parliament. In all matters the Secretary of State can impose his orders on the Government of India. No expenditure from the revenues of India is legal unless sanctioned by him and a majority of his Council. In matters requiring secrecy (e.g., foreign policy and the affairs of native states) the Secretary of State can act on his own authority without consulting his Council, and in most other matters can overrule the majority of his Council. Indian Government business in England is transacted at the India Office (see p. 587).

The King-Emperor appoints the Governor-General, the Governors of Madras and Bombay, the Commander-in-Chief, the Ordinary Members of the Councils of the Governor-General and of the Governors of Madras and Bombay, and the Judges in the High Courts. The appointments of Lieutenant-Governor are made by the Governor-General, subject to the Secretary of State's approval. The term of these appointments, except judgeships, is usually five years.

Subject to the Secretary of State's direction, the supreme executive authority in India, in both civil and military affairs, is the Governor-General in Council. The Governor-General's Executive Council now contains five ordinary members (of whom three must have served in India ten years), as well as himself and the Commander-in-Chief, who is an extraordinary member. The Governors of Bombay and Madras have each an Executive Council of four members. All acts of the SUPREME GOVERNMENT IN INDIA run in the name of "The Governor-General in Council"; ordinarily, the opinion of the majority prevails, but the Governor-General is empowered in special circumstances to overrule the majority. The Governor-General's Legislative Council, in accordance with the Indian Councils Act, 1909, will now consist of 68 members. There are similar Legislative Councils, but with varying membership, in Madras, Bombay, Bengal, Eastern Bengal and Assam, the United Provinces of Agra and Oudh, the Punjab, and Burma. The Governor-General's Council has an official majority of three, while all the provincial councils have non-official majorities. Every Indian Act requires the Governor-General's assent, but the Crown may disallow it.

As the result of important changes in administration, business is now conducted by nine Departments—Finance, Foreign, Home, Legislative, Revenue and Agriculture, Public Works, Commerce and Industry, Railway, and Army. The Military Supply Department was abolished in 1909. Each Department is in charge of a Secretary to Government, and under the care of a member of the Supreme Council, who has authority to deal with affairs of minor importance, and to select what is worthy of the consideration of the Governor-General and his Council. The Governor-General himself superintends the Foreign Department. The Finance Department deals with public accounts, loans, taxation,

excise, opium, salt, currency, banking, mints, &c. The *Foreign Department* conducts relations with Afghanistan, Nepal and other continuous countries, and, through its Political Residents and Agents in the various native States, supervises their administration and regulates their relations with the paramount Power. Its Agents in the Persian Gulf, Muscat, and Turkish Arabia look after the commercial and political interests of India in those quarters. The *Home Department* deals with the civil service, education, public health, ecclesiastical and judicial affairs, municipalities, district local boards, prisons, police, &c. The Legal Member of Council takes charge of Government Bills in connection with the *Legislative Department*. The most important subjects that come before the *Revenue and Agriculture Department* are land revenue and surveys, forests, agricultural development, famine, and meteorology. The *Public Works Department* deals with irrigation, roads, buildings, &c. A new department for *Commerce and Industry* has been created, and placed in charge of a special member, to deal with trade and shipping, customs, ports, post-office, telegraphs, mines, factories, statistics, &c. Railway administration is now entrusted to a *Railway Department*, which is in charge of the Commerce and Industry Member of Council, and controlled by a *Railway Board*. The Army is under the *Army Department*, of which the Commander-in-Chief has charge in Council.

British India is no longer divided into three Presidencies, but into 13 *Local Governments and Administrations*, viz.:—Under Governors, Madras and Bombay, still termed Presidencies; under Lieutenant-Governors, Bengal, Eastern Bengal and Assam, the United Provinces of Agra and Oudh, the Punjab, and Burma; under Chief Commissioners, the Central Provinces and Berar, Ajmer-Merwara, Coorg, British Baluchistan, the North-West Frontier Province, and the Andaman Islands. The chief Local Governments enjoy a large measure of financial and administrative independence. Proposals for further decentralisation are under discussion. The Governors of Madras and Bombay have greater independence than the others, being alone permitted to communicate direct with the Secretary of State.

The unit of administration throughout British India is the District, the executive head of which is the District Officer, called Collector-Magistrate or Deputy-Commissioner, as the case may be. In subordination (in most Provinces) to a Commissioner, who corresponds direct with the Provincial Government, he has control in every department of administration, and is the responsible head of his jurisdiction. There are now 267 Districts in British India.

There are separate *High Courts* for both civil and criminal cases in Madras, Bombay, Bengal (with jurisdiction also over the new province of Eastern Bengal and Assam), and in the North-West Provinces. Appeals may be carried to the English Privy Council. The Punjab and Lower Burma have Chief Courts. The Central Provinces, Berar, Oudh, Sind, North-West Frontier Province, and Upper Burma have each a Judicial Commissioner's Court.

THE SUPREME GOVERNMENT, CALCUTTA.

[Indian salaries are the substantive salaries (excluding allowances) stated in rupees per mensem.]

<i>Viceroy and Governor-General</i> , His Excellency the Right Hon. the Earl of Minto, P.C., G.M.S.I., G.M.I.E., G.C.M.G., b. 1845, assumed charge 18th Nov., 1905.....per mensem	Rs. 20,833
<i>Private Secretary</i> , Lt.-Col. J. R. Dunlop Smith, C.S.I., C.I.E., I.A.	Rs. 2,000
<i>Military Secretary</i> , Lt.-Col. V. R. Brooke, D.S.O., 9th Lancers	Rs. 1,500
<i>Aides-de-Camp</i> , Capt. Lord F. G. Montagu Douglas-Scott; Capt. R. G. Jeff; and Lt. J. E. Gibbs.....	
<i>Native Aides-de-Camp</i> , Subadar-Maj. Madho Singh Rana, Sardar Bahadur, 2-4 G. R.; and Risaldar-Maj. Abdul Karim Khan, Sardar Bahadur, G.-G's Body Guard.....	
<i>Surgeon</i> , Lt.-Col. W. R. Crooke-Lawless, M.D., C.I.E.	Rs. 1,200

COUNCIL OF THE GOVERNOR-GENERAL

<i>Extraordinary Member</i> , General Sir O'Moore Creagh, F.C., K.C.B., I.A., Commander-in-Chief in India (1909)	Rs. 8,333
<i>Ordinary Members</i> (5), Honrs. Sir H. Adamson, Kt., C.S.I.; J. O. Miller, C.S.I.; W. L. Harvey, C.S.I.; Sir G. F. Wilson, K.C.B., K.C.M.G.; and Satyendra P. Sinha..... each	Rs. 6,667
<i>Sec. to Council</i> , J. M. Macpherson, C.S.I.	

SECRETARIES TO THE GOVERNMENT OF INDIA.

<i>Finance (Ordinary) Sec.</i> , J. S. Meston, C.S.I.	Rs. 4,000
<i>Deputy do.</i> (vacant)	Rs. 2,250

PROVINCIAL GOVERNMENTS AND ADMINISTRATIONS.*

(1) **MADRAS** (area, 147,726 sq. miles; pop. 38,209,436) was the most important of the three Presidencies before Clive's conquest of Bengal, but it was small in extent until the annexation of the Carnatic in 1802. With a coast-line of 1,730 miles the province has no good natural harbour, though an artificial harbour has been constructed at Madras at great expense. The province is not naturally fertile, but irrigation systems in the river deltas have enormously increased the produce of the soil, and have yielded a large profit to the State. Rice, millet, and other food-grains, oilseeds, cotton, indigo, spices, tobacco, tea, &c., are cultivated. Manganese ore is mined and exported. Madras is served by the South Indian and by the Madras and Southern Mahratta Railways, the latter connecting it with Bengal on the north and Bombay on the west. The people are chiefly Hindus. Many natives of Madras Presidency emigrate to Burma and Ceylon, some only temporarily. There are over one million native Christians, mainly Roman Catholics. The languages principally spoken are Tamil and Telugu. The Governor of Madras is assisted by an Executive Council, which will in future consist of four members. The Legislative Council, from 1910, will consist of 48 members, partly nominated and partly elected according to regulations made under the Indian Councils Act, 1909. Madura (105,984) and Trichinopoly (104,721), famous for their Hindu temples, are the chief cities after the capital.

CHIEF CITY, Madras. Population, 509,346.

Governor, H.E. the Hon. Sir Arthur Lawley, G.C.I.E., K.C.M.G. (March, 1906) Rs. 10,000

Priv. Sec., A. Y. G. Campbell Rs. 1,500
Military Sec., Major A. A. Duff, 3rd Gordon Highlanders Rs. 1,000

Aides-de-Camp, Capt. G. Heseltine, 6th Dragoon Guards; Lt. The Hon. C. A. J. Annesley, Oxford L.I.

Native Aide-de-Camp, Risaldar Hari Singh.

Med. Officer, Capt. F. F. Elwes, L.M.S. Rs. 1,000

COUNCIL OF THE GOVERNOR.

Hons. Sir G. S. Forbes, K.C.S.I., and Murray Hamnuck, C.S.I., C.I.E. each Rs. 5,333

SECRETARIES TO GOVERNMENT.

Chief Sec., Sir W. S. Meyer, K.C.I.E. Rs. 3,750
Revenue Dept. Sec., A. G. Cardew Rs. 3,125

Local, Municipal, &c., Sec., H. D. Taylor Rs. 2,500
Public Works Secs., F. J. Wilson (Rs. 2,750); C. A. Smith (Irrigation, Rs. 2,500); F. D. Fowler (Railways) Rs. 2,000

Board of Revenue, J. N. Atkinson, C.S.I. (Rs. 3,750); C. J. Weir (Rs. 3,500); A. E. C. Stuart (Rs. 3,000); J. Twigg Rs. 3,000

HIGH COURT OF JUDICATURE.

Chief Justice, The Hon. Sir Chas. A. White, Kt. Rs. 5,000

Judges, Hons. Sir R. S. Benson; J. E. P. Wallis; L. C. Miller; J. H. Munro; C. Sankaran Nair, C.I.E.; Abdur Rahim; V. Krishnaswami Aiyar Rs. 4,000

(2) **BOMBAY**.—The Island of BOMBAY was part of the dowry of the Infanta of Portugal (1662), and was made over by Charles II. to the East India Company in 1668. The greater part of

the present territory was obtained by annexations from the Mahrattas, and by the lapse of the Satara State. Sind was conquered in 1842. The province (including Sind, but not Aden and Perim, which are also attached to it) contains 122,984 square miles (nearly equal in size to Prussia), with a population of 18,515,587; it is 1,050 miles in length. Eastern Sind is desert. The administration of Sind (which occupies about two-fifths of the Presidency) is in some respects separate. About 77 per cent. of the people of the Presidency are Hindus, and 20 per cent. Muhammadans. The Parsis, who are very prominent in trade, are mainly found in Bombay. The people have suffered greatly from plague and drought in recent years. Marathi, Gujarati, Sindhi, and Kanarese are the principal languages. Millet and other food-grains and oilseeds are cultivated. Cotton is largely produced for export and for manufacture in the constantly extending cotton-mills of Bombay and Ahmedabad. The chief railway systems are the Bombay, Baroda and Central India with the lines worked by it to the north, and the Great Indian Peninsula (now combined with the Indian Midland system) eastwards; south-eastwards is the Madras and Southern Mahratta system; while Karachi (Sind) is the port for the extensive North-Western Railway system. The Governor will in future have an Executive Council of four members, while the Legislative Council will comprise 48 members, partly nominated and partly elected. Ahmedabad (185,889), Poona (153,320), Surat (119,306), and Karachi (116,663), the capital and chief port of Sind, are important cities. For Aden and Perim, see p. 524.

CHIEF CITY, Bombay. Population, 977,822 (1905).

Governor, H.E. the Hon. Col. Sir G. S. Clarke, G.C.I.E., G.C.M.G. (Oct., 1907) Rs. 10,000

Private Sec., C. C. Watson Rs. 1,500
Military Sec., Capt. J. G. Greig, 121st Pioneers Rs. 1,000

Aides-de-Camp, Capt. E. G. Drummond, 4th Goorkha Rifles; Capt. G. A. Sullivan, 1st Oxfordshire L.I.

Native A.D.C., Risaldar Bhagavan Singh.

Medical Officer, Capt. T. C. Lucas, R.A.M.C. Rs. 1,000

COUNCIL OF THE GOVERNOR.

Hons. J. W. P. Muir Mackenzie, C.S.I.; J. L. Jenkins, C.S.I. each Rs. 5,333

SECRETARIES TO GOVERNMENT.

Public Works Secs., W. L. Cameron, C.S.I. (Rs. 2,750) and A. Hill, C.I.E. Rs. 2,500

Commr. in Sind, A. D. Youngusband Rs. 3,750
Revenue Commrs., E. P. Barrow; M. C. Gibb; W. T. Morison each Rs. 3,500

Commr. of Customs, W. W. Drew Rs. 3,500

HIGH COURT OF JUDICATURE.

Chief Justice, The Hon. Sir Basil Scott, Kt. Rs. 5,000

Judges, Hons. L. P. Russell; Narayan Ganes Chandavarkar; S. L. Batchelor; D. D. Davar; F. C. O. Beaman; J. J. Heaton, each Rs. 4,000

Judicial Commr. in Sind (Karachi), A. Lucas Rs. 4,000

Additional ditto, R. Knight Rs. 2,750

* The areas and populations of the separate provinces are for British territory only. The populations are according to the census of 1901.

(3) **BENGAL** (reconstituted area, 115,819 sq. miles; pop. 50,722,067) was placed under a Lieutenant-Governor in 1854. The old Bengal Presidency included practically all Northern and Central India, but the present province comprises part of Bengal proper, Behar, Orissa, and Chota Nagpur. Fifteen districts of Eastern Bengal were detached from the province in 1905 and combined with Assam, while one district from the Central Provinces was added to Bengal. Bengal occupies the Ganges Valley eastward of Benares, and extends from the Himalayas to the mouth of the Mahanuddy. Only 5 per cent. of the population live in towns. Nearly 78 per cent. of the population consists of Hindus. The principal languages are Bengali, Hindi, and Bihari. For the most part the province is a great alluvial plain, producing rice, and is the most populous and productive in all British India. Orissa and Chota Nagpur are ill-watered and liable to drought. The chief products of the province, besides rice, are opium, indigo, oilseeds, sugar, tobacco, silk, tea, and jute. In the hills bordering the great plain coal measures, yielding the greater part of India's coal output, are worked. The East Indian Railway is the great artery of the Ganges Valley. The Eastern Bengal Railway, running N. from Calcutta, is also important. Other extensive systems are the Bengal and North-Western in the north and the Bengal-Nagpur in the south. The Lieutenant-Governor, under the Indian Councils Act, will be assisted by a Legislative Council of 51 members, partly nominated and partly elected. Important cities are Patna (134,785) and Howrah (157,594), a great jute-manufacturing centre adjoining Calcutta.

CHIEF CITY, Calcutta. Pop., including suburbs and Howrah, 1,106,738.
Lieutenant-Governor, The Hon. Sir E. N. Baker, K.C.S.I. (Nov., 1908)Rs. 8,333
Private Secy., Capt. C. J. L. Allanson, 6th Goorkha RiflesRs. 750
Aide-de-Camp, Lt. R. C. B. Williams, 25th Sikhs, and Lt. J. S. Dallas, 6th Goorkha Rifles.

SECRETARIES TO GOVERNMENT.

Chief Sec., F. W. DukeRs. 3,333
Jud. and Gen. Sec., J. G. CummingRs. 2,750

Public Works Secs. (Irrig., Ry., and Marine)
T. Butler (Rs. 2,500), and (Bldgs. and Roads),
A. S. ThomsonRs. 2,750
Board of Revenue, F. A. Slacke, C.S.I.; W. C. Macpherson, C.S.I.each Rs. 3,750

HIGH COURT OF JUDICATURE.

Chief Justice, The Hon. Sir L. H. Jenkins, Kt., K.C.I.E.Rs. 6,000
 Puisne Judges, Hons. R. Harrington; C. M. W. Brett, C.S.I.; H. L. Stephen; J. G. Woodroffe; Dr. A. Mukharji, C.S.I.; C. P. Caspersz; H. Hohmwood; C. W. Chitty; E. E. Fletcher; Saliyd Sharif-ud-din; H. R. H. Cox; H. W. C. Caraduff, C.I.E.; L. M. Das; D. Chatarji
 each Rs. 4,000

(4) **EASTERN BENGAL AND ASSAM** (reconstituted area, 106,310 sq. miles; pop. 30,961,459). In 1905 this province was formed by the addition to Assam of 15 districts of Bengal, and was placed under a Lieutenant-Governor, with a Legislative Council. Under the Indian Councils Act this Council will have 43 members, partly elected, partly nominated. Assam had been constituted a separate administration in 1874,

out of certain Bengal districts, most of which had been ceded by Burma in 1825. The High Court for the province is that of Calcutta. Much of the transferred portion of Bengal belongs to the great Gangetic plain. A range of mountains divides Assam into the Burma and Brahmaputra valleys, of which the chief towns are Gauhati and Sylhet respectively. The forest area is very large. The rainfall is abundant and well distributed. Rice, tea, jute, wheat, oilseeds, sugar, and tobacco are cultivated. About 58 per cent. of the people are Muhammadans, and 37 per cent. Hindus. Large towns are few. There is a great variety of languages, Bengali and Assamese being the principal. The Assam-Bengal and Eastern Bengal Railways traverse the province, and the former terminates at the growing port of Chittagong. The census of 1901 showed that Assam contained 775,844 immigrants from other parts of India, mostly coolies for tea-gardens.

CHIEF CITY, Dacca. Population, 90,542.
Lieutenant-Governor, The Hon. Sir Lancelot Hare, K.C.S.I., C.I.E. (Aug., 1906)Rs. 8,333
Pte. Sec., Capt. L. E. Denning, 32nd Lt. Cav. Rs. 750
Aide-de-Camp, Capt. J. C. Pearse, 4th Cav. Rs. 750

Fin. and Munic. Sec., I. J. KershawRs. 2,250
Judicial and Gen. Sec., R. B. Hughes-Buller, C.I.E.Rs. 1,800
Public Works Sec., W. B. GwytherRs. 2,500
Board of Revenue, P. G. Melitus, C.I.E.; P. C. Lyon, C.S.I.each Rs. 3,500

(5) **THE UNITED PROVINCES OF AGRA AND OUDH**, called "North-Western Provinces and Oudh" until 1902 (area, 107,164 sq. miles; pop. 47,691,782), form the upper part of the great Ganges plain to the W. of Bengal, lying between the Himalayas and the hilly border of the central plateau. In population they come next to Bengal. Originally these provinces (excluding Oudh) formed part of the Bengal Presidency, but in 1835 a separate administration was formed under a Lieutenant-Governor. OUDH was annexed in 1856 and placed under a Chief Commissioner. After 1877 the two administrations were combined. The chief staple is wheat, while rice, barley, pulse, tobacco, millet, cotton, sugar, and oilseeds are widely cultivated. About 85 per cent. of the population are Hindus and 14 per cent. Muhammadans. Hindi and Bihari are the chief tongues. The province is served by the East Indian, Oudh and Rohilkhand, and Rohilkhand and Kumaon Railways. In 1887 a Legislative Council was established. Under the Indian Councils Act it will consist of 49 members, partly nominated, partly elected. Among the important cities may be named the ancient city of Agra (188,022), containing the Taj Mahal and other great works of architecture, the sacred Hindu city of Benares (209,331), the great manufacturing centre, Cawnpore (197,170), and Meerut (118,129).

CHIEF CITY (Agra), Allahabad. Pop. 172,032.

1st Add. do., L. G. Evans Rs. 3,333
2nd Add. do. (vacant)

(6) The PUNJAB (area, 97,209 sq. miles ; pop. 20,330,339) occupies the N.W. angle of the great northern plain of India, and derives its name from the "Five Rivers" which, descending from the Himalayas, traverse the plain and unite in the Indus. It was annexed in 1849, and up to 1853 was under a Board of Administration. This Board was then superseded by a Chief Commissioner, who was made Lieutenant-Governor in 1859, when also the Delhi Division was transferred to the Punjab from the North-West Provinces. The Punjab is mainly agricultural, and, owing to the scanty rainfall, depends largely for its harvests on vast irrigation canals, which are still being largely extended, and are highly remunerative. The principal crops are wheat, millet, barley, maize, pulse, oilseeds, sugar, and cotton. The Punjab possesses rich deposits of rock-salt, which, with wheat and other grains and cotton, form the principal exports. Wood is scarce. More than half the population are Muhammadans, and more than a third are Hindus. Of the former, the Pathans are found chiefly in the north-western hill districts. The Sikhs number over 2,100,000 in the Punjab and Punjab States, to which they are mainly confined. Punjabi and Hindi are the chief languages. The various branches of the North-Western Railway serve the Punjab. In 1897 a Legislative Council was constituted, which, under the Indian Councils Act, will consist of 27 members, partly nominated, partly elected. The ancient imperial city of Delhi, with 208,575 inhabitants, is the largest city; while Amritsar, the sacred city of the Sikhs, has 162,429 people.

CHIEF CITY, Lahore. Population, 202,954.
Lieutenant-Governor, The Hon. Sir Louis W. Dane,
E.C.I.E., C.S.I. (May, 1905) Rs. 8,333

Johnstone ; H. A. B. Rattigan each Rs. 3,500

(7) BURMA is bounded by China, French Indo-China, and Siam on the east, by the province of Eastern Bengal and Assam on the north, and by the Bay of Bengal. It is the largest province of the Indian Empire, having a total area of 236,738 sq. miles, with a population of 10,490,624. These figures include the Shan States and Chin Hills. Many immigrants come from

Bengal, Madras, and China. Tenasserim and Aracan were annexed after the first Burmese war in 1826, Pegu after the second war in 1852, and Upper Burma and the Shan States after the third war in 1885. The Shan States are administered by local sawbaws, or chiefs, under the superintendence of a political officer. The province is thinly peopled; but, owing to remarkable prosperity, the population is rapidly increasing. The inhabitants—of the common Indo-Chinese stock—belong to numerous tribes, who are distinguished by a variety of manners, languages, and religions. About 75 per cent. speak Burmese. Buddhism, now almost confined to Burma, is the religion of nearly 90 per cent. of the people. The Burmese are much better educated than the natives of India proper, education being conducted by Buddhist monks. The delta country of Lower Burma is flat, but above Prome there is upland, hilly country. Rice, the main product of the delta region, is largely milled at Rangoon and exported. The principal export after rice is teak, which comes from the extensive forests of Burma and the Shan States, and overland from Siam. Burma is fairly rich in minerals, especially petroleum, rubies, and jade-stone; gold and silver are also known to exist. The Irrawaddy and its chief tributaries, the Chindwin, the Shweli, and the Myingye, form important waterways. The main stream is navigable beyond Bhamo, 900 miles from its mouth, and carries much traffic. There are considerable exports by land to Western China. The Burma Railway has reached Myitkina on the Upper Irrawaddy, while a branch has been built to the Shan States, which lie in the Salwin basin. The Lieutenant-Governor of Burma has a Legislative Council, which, under the Indian Councils Act, will consist of 18 members, partly nominated, partly elected. The present capital, Rangoon, is fast increasing in population owing to commercial prosperity, while the old native capital, Mandalay, tends to decline.

CHIEF CITY, LOWER BURMA, Rangoon.

Pop. 234,881.

CHIEF CITY, UP. BURMA, Mandalay. Pop. 183,826.
Lieutenant-Governor, The Hon. Sir H. Thirkell
White, K.C.I.E. (May, 1905) Rs. 8,333
Private Sec., C. S. Pennell Rs. 833

Hartnoll ; E. W. Ormond each Rs. 3,500
Judicial Commissioner (Upper Burma), G. W.
Shaw, C.S.I. Rs. 3,500

(8) THE CENTRAL PROVINCES and BERAR (reconstituted area, excluding Berar, given below, 82,635 sq. miles; pop. 9,237,654). The Central Provinces were formed in 1861 out of territory taken from the North-West Provinces and Madras; but originally belonging to the Mahratta Kingdom of Nagpur. One

district was detached and added to Bengal in 1905. The country is hilly and forest-clad, and contains a large population of aboriginal tribes. A great deal of the waste land is covered with jungle. The people are mostly Hindus, and they speak mainly Hindi and Marathi. Much has been done by constructing roads and railways (belonging to the Indian Midland and Great Indian Peninsula and the Bengal-Nagpur systems) to open up the country, which possesses coal-fields and manganese ore, and is an important producer of rice, wheat, millet, pulse, oilseeds, and cotton. There are cotton mills at Nagpur.

Since 1st October, 1902, BERAR has been amalgamated with the Central Provinces. Berar (area, 17,710 sq. miles; pop. 2,754,016), which lies to the north of Hyderabad, was placed in our hands by the Nizam in 1853, in payment of arrears, and its revenues were charged with the future cost of the Hyderabad Contingent. In 1902 Berar was leased in perpetuity to the Government of India on payment of £167,000 a year to the Nizam, who thus obtains an assured instead of a fluctuating income therefrom. Berar is purely agricultural. It is very fertile, and yields the finest cotton in India, besides millet, oilseeds, &c. The chief language is Marathi, and most of the people are Hindus.

There is no Legislative Council for the Central Provinces and Berar, and all legislation is done by the Governor-General's Council.

CHIEF CITY, Nagpur. Population, 127,734.

CENTRAL PROVINCES.

Chief Commissioner, The Hon. Mr. R. H. Craddock, C.S.I. (March, 1907) Rs. 5,166
Chief Sec. Civil Dept., B. P. Standen, C.I.E., R. 2,250
Public Works Sec., J. B. Leventhorpe Rs. 2,750
Judicial Commr., H. V. Drake-Brockman, R. 3,500
Do. (ast addl.), J. K. Batten Rs. 3,000
Do. (and addl.), H. J. Stanton, C.I.E. Rs. 2,750
Financial Commr., M. W. Fox-Strangways, C.S.I. Rs. 3,500

BERAR.

Commr., F. G. Sly Rs. 2,750

(9) THE NORTH-WEST FRONTIER PROVINCE (area, 16,466 sq. miles; pop. 2,125,480) was constituted on November 9, 1901, by the transfer from the Punjab of portions of the district of Hazara, and the Trans-Indus districts of Peshawar, Kohat, Banna, and Dera Ismail Khan, and by the addition of the following Political Charges—Kurram, Malakand (Dir, Swat, and Chitral), Khailar, Tochi, Gomal, and Shirani. The officer in charge is directly responsible to the Government of India. The people are chiefly Muhammadans. The province produces wheat, barley and other grains, oilseeds, cotton, &c. It has a considerable trade with Afghanistan.

CHIEF CITY, Peshawar. Population, 95,147.
Agent to the Governor-General and Chief Commissioner, The Hon. Lt.-Col. Sir G. O. Roos Keppel, K.C.I.E. Rs. 4,000
Judicial Commr., C. E. F. Bunbury Rs. 2,750
Revenue Commr., A. L. P. Tucker, C.I.E.R. 2,750

(10) AJMER-MERWARA (area, 2,711 sq. miles; pop. 476,912), ceded in 1818, lies within Rajputana. The Governor-General's Agent in Rajputana is *ex officio* Chief Commissioner of Ajmer-Merwara and the chief executive and judicial authority.

CHIEF CITY, Ajmer. Population, 73,839.
Chief Commissioner, E. G. Colvin, C.S.I. Rs. 4,250
Commr., Lt.-Col. W. C. R. Stratton Rs. 2,250

(11) COORG (area, 1,582 sq. miles; pop. 180,607), annexed in 1834. The Resident at Mysore is *ex officio* Chief Commissioner and the chief executive and judicial authority.
Chief Commissioner, The Hon. Mr. S. M. Fraser, C.I.E. Rs. 4,000
Commr. L. T. Harris Rs. 1,950

(12) BRITISH BALUCHISTAN (area, 45,804 sq. ms.; pop. 308,246) was constituted a separate administration in 1883, under the Governor-General's Agent in Baluchistan, who also controls the affairs of the rest of Baluchistan, including the native States of Kalat and Las Bela, up to the Persian frontier. The districts it comprises (namely, the Assigned Districts of Sibi, Pishin, Thal-Chotiali, Quetta, Nushki, Zhob, Chagal, Nasirabad, and the Bolan) were acquired partly from Afghanistan by the treaty of Gundamuk (1879), partly from the Khan of Kalat by arrangement. Baluchistan consists largely of mountains and sandy deserts, and is sparsely populated. About 44 per cent. of the people lead a pastoral, nomad life. In religion they are Sunni Muhammadans. The Afghan-Baluch frontier was demarcated in 1896-7. To Chaman, on this frontier, a railway runs through Baluchistan to Quetta. A new trade route between India and Seistan, in Persia, *via* Nushki, in northern Baluchistan, was opened in 1896. A railway runs from Quetta to Nushki. The Khan of Kalat is the head of a loose confederacy, and is amenable in all important matters to the Governor-General's Agent. He receives about £11,000 per annum for quit-rents and subsidy. British troops occupy Quetta, commanding the Bolan Pass, and have the treaty right to occupy any other position.

Chief Commissioner of British Baluchistan, Lt.-Col. Sir A. H. McMahon, K.C.I.E., C.S.I. Rs. 4,000
Judl. and Rec. Commr., H. R. C. Bobbs, O.I.E. Rs. 2,300

(13) THE ANDAMANS AND NICOBARS (area, 3,143 sq. ms.; pop. 24,649) form a chain of islands in the eastern part of the Bay of Bengal. The *Andamans*, in two groups, the Great and Little Andamans, are covered with luxuriant vegetation, and inhabited by a tribe of Negritos. The race is dying out. Since 1858 these islands have been used as a penal settlement by the Indian Government. Port Blair, with its safe and spacious harbour, on South Andaman, is the convict station. The number of convicts in 1907 was 14,500. Much valuable timber, worked by convict labour, is obtained. The *Nicobar Islands*, which lie almost due south of the Andamans, and were first occupied by the British in 1865. They comprise 19 islands (seven uninhabited), of which the northernmost (Car Nicobar) contains half the population. The principal products are coco-nuts. The inhabitants, Malay in type, are indolent, and are becoming extinct. Chief Commissioner and Superintendent (Port Blair), Lt.-Col. H. A. Browning Rs. 2,700
The *Laccadive Islands* comprise 14 islands (nine inhabited), distant 200 miles from the Malabar coast of the Madras Presidency, in which they are included. (Pop. 10,274.)

Aden, Perim, and Protected Chiefships.—From old time Aden, situated on a peninsula of volcanic origin, on the southern coast of Arabia and lying on the Red Sea trade-route between Europe and the East, has been an important trade centre. Aden trade decayed after the Portuguese discovery of the Cape route.

but with the opening of the Suez Canal it regained more than its old importance. It was occupied by the British in 1839. It is now a great coaling-station and port of call, and an emporium for the trade of N.E. Africa and S. Arabia. It is the only fortified point between Egypt and Bombay, and may be regarded as an outpost of the Indian Empire. Aden and Perim—a small unfortified island serving as a coaling station at the southern entrance to the Red Sea, occupied in 1857 form part of the Bombay Presidency, and have an area of 80 square miles and a population of 43,974 (1901). Aden is a free port. The traffic in arms and ammunition is subject to special regulations. Aden serves as an *entrepôt* for the adjacent Arabian and African coasts. India, the United Kingdom, Austria-Hungary, and the United States have a considerable trade with Aden, the chief imports being cotton goods, grain, spices and sugar, and the chief exports salt, precious stones, and hides and skins. The total trade in 1908-9 was over £7,697,000. In 1907-8, 1,436 vessels entered Aden and 402 entered Perim. Aden has a Port Trust and a

Chamber of Commerce. In the hinterland of Aden the British Government has treaty engagements with, and subsidises, the neighbouring Arab tribes, both inland and along the coast (Hadrarnaut), from the Straits of Bab-el-Mandeb to Muscat territory at Ras Sair. As the result of an agreement arrived at in 1903-4 with Turkey, a line fixing the boundary of the tribes with which the British Government has treaty relations has been demarcated by a joint British and Turkish Commission from Sheikh Sayad, on the coast opposite Perim, to the river Bana.

The Kuria Muria Islands, to the S. of Omân, have been in British possession since 1854. In 1834 the East India Company occupied *Sokotra* (area, 1,400 sq. ms.), 150 miles from Cape Guardafui, which has a primitive, pastoral, Muhammadan population of 12,000, mainly Arabs. A formal protectorate was established in 1886. The Sheikh receives a small subsidy from the British Government in exchange for a pledge not to cede the island to any foreign Power.

Aden: Political Resident, Major-Gen. E. de Brath, C.B., C.I.E. per mensem Rs. 3,000

INDIAN APPOINTMENTS.

The higher civil administration of British India is recruited from four sources—1. Open competitive examination in England. 2. The Indian Army. 3. The patronage of the Secretary of State. 4. The patronage of the Local Governments.

The Civil Service of India.—Important changes in the regulations took effect in 1906. The next examination will commence in London on 1st August, 1910, the number of appointments (usually about 50) depending on the requirements of the local Governments. Candidates must be over 22 and under 24 on that date, and of good health and character. Application for admission to compete must be made on or before the 1st July, on forms that can be obtained from the Secretary, Civil Service Commission, London, W. Examination fee, £6. The selected candidates will be on probation in England for one year, and will receive an allowance of £150 if they pass their probation at one of the Universities or Colleges approved by the Secretary of State for India, conduct themselves well, and comply with all rules laid down for their guidance. A final examination is held in Indian law, languages, history, &c. Seniority in the service depends on the order in which candidates stand in the list resulting from the combined marks of the open competitive and final examinations. Selected candidates must qualify in riding. Successful candidates are allotted to the various provinces upon a consideration of all the circumstances, including their own wishes, but always subject to the needs of the public service. Within a certain time of the candidate's arrival in India, he must elect to serve in the executive or the judicial branch of the administration, the summit of the profession in one branch being the Lieutenant-Governorship of a Province, in the other a Judgeship of a High Court. The salary of a co-salaried civil servant commences usually at Rs. 4,800 (£300) a year. The number of civilians at present in the service is about 1,200.

Indian Army.—The Native Army absorbs the larger proportion of the officers; but a considerable number are selected for civil employment.

A certain number of appointments in the Indian Army are offered to cadets of the Royal Military College, and a certain number to candidates from the Universities (regulations obtainable from War Office). All King's Cadets, British and Indian, and Honorary King's Cadets, nominated by the Secretary of State for India (rules on application to the Military Department, India Office), have the option, during their last term at the Royal Military College, of electing for appointment to the unattached list for the Indian Army or for appointment to commissions in the British Cavalry or Infantry. After the claims of these cadets have been satisfied, remaining appointments in the Indian Army are allotted in order of merit to cadets who satisfy the requirements of the regulations respecting admission to the Royal Military College, and who elect to compete for such appointments, at each final examination at Sandhurst. Election is made during a cadet's last term at the Royal Military College, and is final, no transfer being subsequently possible except by exchange. On receiving his commission a successful candidate is gazetted as second lieutenant on the unattached list of the British Army, provided with a passage to India, attached for a year to a British regiment (receiving Indian pay and allowances as an officer of the British Army), and then transferred to a native regiment as second lieutenant. Unless he is found fit in every respect and passes certain language and professional tests before the end of the third year from appointment to the Indian Army, he will be removed from the service. Any officers who may from time to time be required to supplement the direct supply from Sandhurst are drawn from the R.A. and Cavalry and Infantry of the Line serving in India, subject to certain conditions. On appointment to a native regiment a second lieutenant or lieutenant's initial pay is not less than Rs. 3,900 (£260) a year.

The Public Works Department includes a staff of engineers engaged in the construction and maintenance of State public works. They are recruited from the corps of Royal Engineers, from persons appointed by selection in the United Kingdom, and, in respect of natives, from the

civil engineering colleges in India. Other qualified persons are occasionally admitted. In the summer of 1910 not less than 25 appointments of assistant engineers will be made by a Selection Committee including at least one eminent engineer. Candidates must be between 21 and 24 years of age on 1st July, 1910, must be of good health and character, be able to ride, have passed the A.M.I.C.E. examination, or have obtained a University degree or an equivalent diploma or distinction in engineering, and have had some experience of important work. Intending candidates should apply on a prescribed form to the Secretary, Judicial and Public Department, India Office, S.W., before 30th April, 1910. Assistant engineers in India commence at Rs. 4,560 (or £304) a year, and there is a prospect of pension and also a provident fund.

The Forest Department of India is recruited from this country. The Secretary of State, acting on the advice of a Selection Committee, will appoint not less than 10 probationers in the summer of 1910. Candidates must be under 23 years of age on 1st July, 1910. Preference will be given to those who, in addition to a good general education, possess an honours degree in natural science. Selected candidates, if they succeed in passing a strict medical examination, will spend two or three years on probation and in training, including practical training in Germany, and they must obtain the Oxford Diploma of Forestry. They must be able to ride before going to India. Assistant Conservators commence at Rs. 4,560 (£304) a year. There is a prospect of pension and a provident fund. Intending candidates should apply to the Secretary, Judicial and Public Department, India Office, before 1st July, 1910.

Indian Police.—An examination is to be held in this country on 28th June, 1910, for about 35 appointments: Madras, 4; Bombay, 3; Bengal, 6; United Provinces, 4; Punjab, 6; Burma, 5; Central Provinces and Berar, 3; Eastern Bengal and Assam, 4. Candidates must be between 19 and 21 on 1st June, 1910, and applications must be sent before 2nd May, 1910, to the Secretary, Judicial and Public Department, India Office, on a printed form to be obtained from him. There is a strict medical examination, and a test of proficiency in riding. Selected candidates "will be allotted as probationers to the various provinces upon a consideration of all the circumstances, including their own wishes." On passing the prescribed departmental examinations, which must be done within two years of arrival in India, and being found otherwise fit, a probationer is appointed an assistant-superintendent. The initial salary of a probationer is Rs. 3,600 (£240) a year. There is a prospect of pension and a provident fund.

Indian Medical Service.—Examinations are usually held in January and July. The number of appointments offered is about 15. Candidates must be between the ages of 21 and 28, of good health and good character, and must possess a registrable qualification to practise both medicine and surgery in the United Kingdom and a certificate of ophthalmic instruction. They may be married or not. Successful candidates are required to attend courses of instruction at Aldershot and at the Royal Army Medical College, Millbank, during which period they receive pay and certain allowances to cover cost of maintenance. A final examination is then held, and the position on the list of the service depends

on the combined results of the preliminary and final examinations. Officers will be liable for military employment in any part of India, but, with a view to transfers to civil employment, they will stand posted to one of four civil areas, their allocation being determined on a consideration of all the circumstances, including their own wishes. Officers in one civil area are liable to be transferred elsewhere or recalled to military duty. Private practice is usually permitted. The commencing grade pay of a lieutenant is Rs. 4,200 (£280) a year. Full information can be obtained from the Military Secretary, India Office.

The patronage of the Secretary of State for India is very small, and is chiefly dependent on the uncertain requirements of the Government of India in the Judicial, Educational, or Ecclesiastical Departments.

Appointments, usually of distinguished graduates of the Universities of the United Kingdom with a knowledge of teaching, are made by the Secretary of State to the Indian *Educational Service*, which includes teaching and inspecting posts. Conditions of pay and service are the same for both. The age is usually from 23 to 30. Appointments are in the first instance for two years, the salary beginning at Rs. 500 a month, with annual increments of Rs. 50 a month to Rs. 750 or Rs. 1,000, with prospects of promotion if service is extended. The number of appointments varies from year to year, and is not large.

The Ecclesiastical Establishment, which forms a civil department, consists of the Bishops of Calcutta, Madras, and Bombay (others whose names are found at page 263 are not Bishops on the Establishment), and 150 Chaplains of the English and Scottish churches. Chaplains (who must be between 27 and 34 years of age) are on probation for three years after appointment, and receive a salary of Rs. 5,760 (£384) a year. Applications should be addressed to the Secretary of State, India Office. Certain allowances are also paid from Indian revenues to other clergymen, and to priests and ministers of other denominations when serving with British regiments.

Appointments are also made by the India Office to the *Royal Indian Marine* (limits of age for officers 17 to 22, for engineers 21 to 25), *Bengal Pilot Service* (age 18 to 22), *Civil Veterinary Dept.* (age not over 26), *Financial Dept.*, *Enrolled List* (age 22 to 25), *Indian Military Accounts Dept.* (age 22 to 25), *Indian Public Works Dept.*, *Accounts Branch* (age 22 to 25), *Geological Survey Dept.* (age not over 25), *Imperial Customs* (age 22 to 25), *Agricultural Service* (age 23 to 30), *Assist. Supt., Traffic Dept.*, *Indian State Railways* (not over 25), *Telegraph Dept.*, *Public Works Accounts Branch*, and *Military Nursing Service* (age 25 to 32).

The patronage of the Local Governments is considerable, but no one who is not a native, a covenanted civilian, or an officer of the Indian Army can be appointed to a post of over Rs. 200 a month without the sanction of the Government of India—the departments excepted from this rule being: *Opium, Salt, Customs, Survey, Mint, Public Works, and Police.*

Pay, Leave, and Pension Regulations of the Indian Services are contained in the Civil Service Regulations, of which a partial summary will be found in the *India Office List*, published by Messrs. Harrison, 45, Pall Mall, S.W. This volume also contains the full regulations regarding Indian appointments.

THE FINANCES OF INDIA FOR THE YEARS ENDED 31st MARCH, 1907, 1908, AND 1909.
The figures below are given in £, rupees being converted at 1s. 4d. the rupee, or 15 rupees to the £.

GROSS REVENUE AND RECEIPTS.

Total Expenditure from Revenue*	£71,555	£70,697	£73,350

* Certain heads in the above tables of gross revenue and expenditure and also the grand totals have been affected by recent changes in the form of the Indian accounts:

- (1) Working expenses of railways are no longer treated as expenditure, but as a deduction from revenue;
- (2) Transactions of District Boards and certain other local bodies are now excluded;
- (3) Interest charges have been redistributed between ordinary and railway and irrigation debt;
- (4) Marine receipts and charges, other than for Ports and Pilotage, have been transferred to Army Services.

GROSS AND NET REVENUE AND EXPENDITURE. The statement of Gross Revenue and Expenditure exhibits all revenue receipts and payments therefrom, except that railway working expenses are deducted from revenue. A clearer view of the financial position is obtained from the following statement of Net Revenue and Expenditure, in which departmental receipts, which are a set-off against expenditure, have been deducted, as also railway interest charges, interest charges and working expenses of irrigation works, refunds and assignments, cost of cultivating and manufacturing opium, &c.

In 1906-7 there was a surplus of Revenue over Expenditure of £1,589,000, in 1907-8 of £306,000, and in 1908-9 (revised estimate) a deficit of £3,721,000.

	1906-7.	1907-8.	Revised Estimate, 1908-9.
	1906-7. (1000 omitted.)	1907-8. Estimate.	1908-9.

Increased by Unspent Grants	£312	£-1,021	£-705
	£47,366	£46,700	£49,387
SURPLUS (or DEFICIT)	£1,589	£306	£-3,721

CAPITAL EXPENDITURE.—In addition to the expenditure from revenue there was a capital outlay in 1907-8, not charged to revenue, of £10,567,000 on State Railways, and of £846,000 on Irrigation Works.

BURDEN OF TAXATION.—If taxation proper be divided among the population of British India, without allowing for certain portions of Salt, Excise, and Customs duties which fall on persons in the native States, the burden in 1908-9 was rs. 8½d. per head, or, if land revenue (which is equivalent to rent) be added, 3s. 3½d. per head. In 1907 the burden of taxation was lightened by a further reduction of the salt tax.

DEBT AND ASSETS.—On 31st March, 1909, the debt of India amounted to £256,664,000, viz., Sterling Debt, £166,973,000, and Rupee Debt (converted into sterling at rs. 4d. the rupee), £89,691,000. Miscellaneous obligations (Savings Bank balances, &c.) amounted in addition to about £20,699,000. Up to the same date the Indian Government had devoted £116,114,000 to the construction of railways and £30,740,000 to the construction of irrigation works. It had purchased from companies, by cash payments, annuities, or the issue of India stock, nine railways, on which, at the time of purchase, £108,092,000 had been spent. It had lent £13,844,000 to Native States, corporations, agriculturists, &c., and had advanced £9,675,000 to railway companies. Other assets were the Gold Standard Reserve of £18,503,000, and the cash balances in India and England, £10,273,000 and £7,984,000 respectively. The assets of India exceed the liabilities. In 1908-9 a 3½ per cent. loan of £7,500,000 was raised in England, at 97, and a 3½ per cent. loan of 2 crores (£1,333,000) in India. These loans were for railway purposes.

LAND REVENUE.—This is the oldest and the most important source of revenue. The State is the paramount landlord in India, and the land revenue is the State's share in the rent of the soil. In most of Bengal, about one-fourth of Madras, and part of Assam the land revenue has been permanently fixed; elsewhere generally the assessments, or settlements, are revised periodically (usually once in 20 or 30 years). The nature of the settlements varies in different provinces. In parts of Bengal and Bombay, the greater part of the United Provinces, the Punjab, the N.W. Frontier Province, and the Central Provinces the settlement is with large proprietors or proprietary village communities (*zamindari*), and the estate is assessed as a whole. Elsewhere (especially in Burma, Berar, Bombay and Sind, Assam, and most of Madras) the *rayatwari* tenure prevails, and each rayat, or peasant proprietor, holds direct from the State. In temporarily settled zamindari districts the land revenue usually amounts to about 50 per cent. of the rental paid to the landlord by the cultivating tenant, while in temporarily settled rayatwari districts the revenue varies from 20 per cent. of the gross produce down to much smaller proportions, averaging about 8 per cent. Private improvements are exempt from assessment. The gross land revenue paid to the State in 1907-8 amounted to £19,766,000, of which £1,041,000 was due to irrigation and credited under that head.

THE OPIUM REVENUE.—Poppy may be grown only in parts of Bengal and the United Provinces, in the Punjab (for local consumption), and in the Central Indian (Malwa) native States. Except in these States the manufacture is a Government monopoly. In 1907-8 48,900 chests

of Bengal opium were sold for export. The monthly auction sales at Calcutta realised $\text{₹}4,621,956$, the expenses of production, &c., were $\text{₹}1,665,147$, and the net receipts $\text{₹}2,955,809$. In addition $\text{₹}619,736$ (net) was derived from the duty (Rs. 600 a chest) levied in Bombay on Malwa opium. Most of the opium produced is exported to China and the Straits Settlements. Duty and licence fees on opium consumed in India (credited to Excise) yielded about $\text{₹}981,000$. The total net opium revenue, therefore, was about $\text{₹}4,557,000$. It has been decided to restrict the cultivation of opium in India in order to reduce exportation to China, on the understanding that China will reduce her own output.

EXCISE.—Licence fees and duties are levied on the sale of intoxicating liquors and drugs. The revenue, owing partly to stricter administration, and partly to enhanced duties, has greatly expanded since 1897-8, and amounted to $\text{₹}6,163,000$ net in 1907-8. Reforms in excise administration are being effected.

CUSTOMS.—The net revenue was $\text{₹}4,896,000$ in 1907-8. (For tariff see page 531.) The export duty on rice yielded $\text{₹}682,000$, and the counter-vailing duty on Indian cotton goods $\text{₹}227,000$.

INCOME TAX.—This is levied on non-agricultural incomes of Rs. 1,000 to Rs. 2,000 at about 2 per cent., and on those above Rs. 2,000 at $\frac{1}{2}$ per cent. It yielded $\text{₹}1,531,000$ (net) in 1907-8.

STAMPS.—Stamps yielded $\text{₹}4,287,000$ (net) in 1907-8. Most of the revenue is from court fee and commercial stamps.

SALT.—The salt duty, which was Rs. $2\frac{1}{2}$ a maund (82 lb.) before 1903, over practically the whole of India, was then reduced to Rs. 2. In 1905 it was reduced to Rs. $1\frac{1}{2}$, and in 1907 to Re. 1. The rate for Burma remains as before at Re. 1. The consumption of salt has increased, owing to the reduction of duty, to 1,643,000 tons, yielding a net revenue of $\text{₹}3,072,000$ in 1907-8.

FORESTS.—Over 94,000 square miles of forests are reserved and scientifically worked by the State, while about 146,000 square miles besides are under State control. They produced in 1907-8 a net revenue of $\text{₹}1,728,000$. A third of the revenue comes from Burma.

TELEGRAPHS.—The length of telegraph wires on 31st March, 1908, was 271,944 miles, and the number of messages sent was 12,750,000. They yielded in 1907-8 a revenue of 201 per cent. on their capital cost of $\text{₹}6,857,000$. In addition the Indo-European Telegraph Department gave a profit of 334 per cent. on its capital of $\text{₹}997,000$. Owing to heavier working expenses there was a net loss to Government on telegraphs.

POST OFFICE.—The Post Office, which in 1907-8 conveyed 827 millions of letters, postcards, newspapers, &c., and issued 23 millions of money orders, was worked at a net profit to Government of $\text{₹}51,000$. Reductions in postal rates have recently become operative, and inland letter rates are the lowest in the world.

RAILWAYS.—Nearly all the railways in India are owned by the State and administered by a Railway Board, though many are leased to and worked by companies. The mileage opened for traffic in 1908-9 was 777, while the mileage under construction or sanctioned was 2,741. Of the mileage open or in hand on 1st April, 1909, viz., 30,983, about 52 per cent. on the standard gauge ($5\frac{1}{2}$ ft.), and about 42 per cent. on the metre gauge. Up to the end of 1908 there was a capital outlay on open lines of $\text{₹}74,620,000$. The net earnings of the railways in 1908 amounted

to $\text{₹}11,900,000$, equivalent to a return of 4½ per cent. on the capital outlay. The number of passengers increased to 321 millions, and the goods traffic remained at 52 million tons. The net gain to the State on the working of the railways was $\text{₹}2,308,000$ in 1906-7 and $\text{₹}1,563,000$ in 1907-8, after charging to expenditure interest on capital outlay and annuity payments in redemption of capital. The total capital expenditure on railways was $\text{₹}10,567,000$ in 1907-8. Rates are very low, third class passengers travelling on the average five miles for a penny. In 1908 a special committee of inquiry into the railways recommended the raising of larger loans for construction and equipment, so that $\text{₹}100,000,000$ may be expended in the next eight years. In 1907 the State purchased the Madras Railway, the last of the old guaranteed lines.

IRRIGATION.—The total capital outlay on State irrigation works up to 31st March, 1908, was $\text{₹}34,543,000$, which, apart from the advantages to cultivators and protection against famine, yielded a profit to the State of about 6½ per cent. The area irrigated was over 21 million acres, while the annual value of the crops raised is estimated at about 108 per cent. of the capital outlay. The Irrigation Commission of 1902-3 recommended the construction of further works estimated to cost eventually nearly $\text{₹}30,000,000$. Three large canals in the Punjab, besides less important works, have been put in hand. Two-fifths of the irrigation revenue comes from the Punjab.

HOME CHARGES.—The gross expenditure in England, chargeable to Revenue, amounted in 1907-8 to $\text{₹}18,487,000$:—Interest on Railway Debt and Annuities, $\text{₹}8,102,000$; Interest on Irrigation Debt, $\text{₹}108,000$; Interest on and Management of Debt, other than that for Railways and Irrigation, $\text{₹}1,820,000$; Stores, $\text{₹}1,462,000$, of which $\text{₹}854,000$ was for Marine and Military Stores; payments for British forces, troop service, &c., $\text{₹}1,093,000$; Army non-effective charges, $\text{₹}2,450,000$; Civil annuities, pensions, &c., $\text{₹}2,046,000$; Purlough payments, civil and military, $\text{₹}803,000$. The expenditure of the Indian Government in England is met by bills or telegraphic transfers drawn on India by the Secretary of State, and sold by him in London for sterling.

CURRENCY.—The principal coin in use is the silver rupee, containing 80 grains of fine silver and 15 grains of alloy. Up to 1893 the Indian Mints were open by law for the unrestricted coinage of silver into rupees. Owing, however, to the almost continuous fall in the value of the rupee from 1871 to 1893, legislation in the latter year closed the mints to the public, with a view to eventually fixing the exchange. For a time the rupee continued to fall, but subsequently it rose, and since January, 1898, has been practically stable at 18 *ad*. This rate has now a legal sanction, since an Act of 1899 makes the British sovereign legal tender in India at the ratio of 15 rupees to the sovereign, the rupee, however, remaining also legal tender to any amount. At the present low price of silver, the rupee at 18 *ad*. is worth much more than the value of the silver which it contains. For some years after 1893 the coinage of Indian rupees almost ceased, but in the five years ended 1907-8 there were large coinages. From 1900-1 to 1906-7, the whole, and in 1907-8 one-half, of the profit on silver coinage

has been held as a special reserve—now called the Gold Standard Reserve—which is partly invested in England in sterling securities, for the purpose of maintaining the rate of exchange between England and India. On 31st March, 1909, the investments of this fund in sterling Government stocks amounted to over £7,446,000 (cost price), while £10,587,000 was held in India in rupees, and £470,000 in cash in England. India has a paper currency. The 5, 10, and 50 rupee notes are legal tender everywhere in India proper, but other notes only within their circles of issue. A nickel anna piece, adopted in 1906, has become popular. Copper coins are being replaced by bronze.

ARMY.—The Army in India consists, first, of British troops, about 79,000; and, secondly, of the native troops (largely Muhammadans), about 162,000 (for details see page 519). In addition, the native Army Reserves number 34,450 men, and the Imperial Service Troops furnished by native States contribute 20,500, including cavalry, transport corps, and sappers. Further, there are 32,730 European and Eurasian volunteers (efficients). For police duties and frontier service the regular military is supplemented by frontier militia and local levies. The Army was renumbered and renamed in 1903. During the period (1902-9) while Lord Kitchener was Commander-in-Chief, considerable changes were effected in the organisation and training of the Army. On 1st June, 1907, there was a redistribution of the Army of India, which now consists of the Northern and Southern Armies, each under a general officer and staff. The Northern Army includes five divisions and three independent frontier brigades, while the Southern comprises four divisions and the Burma and Aden garrisons. The artillery has been increased. Factories for making rifles, cordite, and gun carriages have been erected. The transport service has been improved. A Staff College has been established at Quetta. Additions to soldiers' pay and enlarged expenditure on artillery, barracks, coast and frontier defences, stores, transport, factories, &c., have increased the net military expenditure (including marine) from £15,376,000 in 1899-1900 to £19,248,000 in 1907-8. During 1909-10 there will be increased expenditure for cost of food and forage, increase of Indian soldiers' pay, and cost of obtaining recruits and reliefs for the British Army in India. The health of the Army has greatly improved in recent years. Ague is the chief cause of sickness among British troops, and enteric fever the chief cause of death. The troopship service between England and India is carried out by hired steamers, under the superintendence of the Admiralty.

The ROYAL INDIAN MARINE consists of the four troopships of over 1,500 tons given below, four other steamers of about 1,000 tons each, and smaller craft for harbour and river navigation, surveying, and submarine mining. The principal officers and troopships of the R.I.M. are as follows:—
Director R.I.M., and Resident Transport Officer,
Bombay, Capt. W. Lumsden, R.N., A.D.C. Rs. 2,500
Deputy ditto (Calcutta), Capt. W. Chandler.
Assist. ditto (Bombay), Capt. A. W. McArthur.
(The figures denote gross tonnage and indicated horse-power.)

Dufferin, 6291 (10,190). Comm. F. Dolson.
Hardinge, 5434 (9366). Comm. A. S. Balfour.
Northbrook, 5038 (7429). Comm. A. J. Marsack.
Delhousie, 1524 (2202). Comm. E. Stocken.

For INDIAN DOCKYARDS, see page 222.

EDUCATION during 1907 benefited by increased grants for primary education. Increased attention is being given to primary, commercial, agricultural, and technical education. In State institutions education is secular. The institutions in 1907-8 numbered 165,473 and the scholars 5,708,238, including 710,844 females. Of the institutions, about 70 per cent. are maintained by the State or aided by grants, the remainder being private and unaided. There are five Universities, viz., those of Calcutta, Madras, Bombay, Allahabad, and the Punjab. The Indian Universities Act of 1904 provides for a teaching system. Of the total expenditure on education in 1907-8, £4,018,764, £1,049,976 came from fees, and £2,155,822 from provincial revenues or local and municipal funds. The census of 1901 showed that only 1 male in 10 and 1 female in 144 can read and write.

LOCAL SELF-GOVERNMENT, municipal and rural, in its present form, is a product of British rule. The municipalities in 1907-8 were 746 in number, controlling a total population of 16,985,200, and receiving an income of £2,848,227 from rates and taxes (octroi, taxes on houses and lands, water, lighting, and conservancy rates, &c.) and £1,057,842 from other sources (excluding loans). The members of municipal bodies are chiefly natives and non-official. In almost all districts in British India there are local district boards, partly representative. Nearly one-half of their total expenditure of £3,318,552 in 1907-8 was devoted to civil works, over one-fifth to education, and the remainder largely to sanitation and hospitals.

JUSTICE, POLICE, AND PRISONS.—There are about 7,000 officers exercising civil and criminal jurisdiction. Many of the superior and the great majority of the inferior officers are natives. In 1907 2,970,020 civil cases were decided; while 1,816,827 persons were tried, and 851,097 convicted, in criminal cases, of whom 468 were sentenced to death, 1,760 to penal servitude, and 153,151 to imprisonment. The strength of the police in 1907 was 10,602 officers and 161,652 men. There were 754 prisons, with a daily average of 98,853 prisoners, in 1907. At the convict settlement of Port Blair (Andamans) there were 21,235 prisoners on 31 March, 1908.

VITAL STATISTICS.—The statistics of births and deaths are defective, and the apparent increase in mortality in recent years is really due to completer returns. The recorded death rate for British India in the decennium ended 1907 ranged from 26.44 per 1,000 in 1898 to 38.91 in 1900. In 1907 it was 37.18. Fevers of various kinds are by far the commonest cause of death, cholera, dysentery and diarrhoea, small-pox, and (since 1896) plague, being other chief causes. The deaths from plague up to the end of 1908 were about 6,183,000 in India as a whole. About 22,000 people are killed by snakes every year. In 2,514 hospitals and dispensaries, maintained mostly from public funds, 24,882,000 patients were treated in 1907. The number of persons vaccinated was 9,170,000. According to the census of 1901 there were 97,340 lepers in India.

SURVEYS.—The Survey Department superintends forest and cadastral surveys, as well as trigonometrical and topographical surveys, special explorations, and map production. Marine, geological, and botanical surveys are in operation, while the archaeological survey has been recently extended. The Meteorological Department is of great service in forecasting rainfall.

Trade of India.

SEA-BORNE TRADE.	1904-5.	1905-6.	1906-7.	1907-8.	1908-9.
	£ (000 omitted.)	£ (000 omitted.)	£ (000 omitted.)	£ (000 omitted.)	£ (000 omitted.)

Net Exports of Merchandise	35,540	33,149	30,622	27,222	16,222

The following statement shows the chief articles of the foreign trade of India in 1908-9:—

IMPORTS.	EXPORTS.
(000 omitted.)	(000 omitted.)
Cotton Goods	Jute (raw)..... £13,223
and Yarn £25,343	Cotton (raw).... 13,179
Metals 8,663	Rice 10,593
Sugar..... 7,271	Jute Manufacts. 10,491
Railway Material 4,947	Hides and Skins 8,312
Machinery, &c. 4,411	Seeds 7,785
Mineral Oil..... 2,606	Cotton Yarn
Hardware, &c. . 1,951	and Cloth ... 7,691
Woollen Goods 1,941	Tea 6,929
Provisions 1,876	Opium 6,223
Apparel 1,611	Lac 1,863
Silk Goods 1,521	Wool (raw) ... 1,389
Liquors..... 1,323	Wheat & Flour 1,241
Spices 916	Coffee 927
Instruments, &c. 825	Fodder, &c. ... 878
Glass 779	Oils 630
Silk (raw)..... 679	Manures 600
Dyes & Tans 668	Pulse, Millets, &c. 545
Paper, &c. 618	Provisions 507
Salt 561	Spices..... 390
Tobacco 529	Wool, &c. 384
Chemicals 498	Sil (raw) 360
Matches 497	Coal, &c. 337
Drugs, Medicines, &c. 485	Indigo..... 327
Timber, &c. ... 482	
Government Stores:	Re-Exports:
Railway Material 3,013	Cotton Yarn
Metals 380	and Cloth... 751
Machinery, &c. 256	Wool (raw)... 186
Arms, &c. 105	Provisions ... 122

Among the countries constituting the British Empire, India comes second to the United Kingdom itself in the volume of its sea-borne trade, which is greater than that of Canada and Australia combined. The ordinary course of Indian trade shows a large yearly net export of merchandise and a net import of treasure. The above table exhibits the leading figures for the last five years in thousands of pounds sterling. It will be observed that the year 1908-9 showed a great falling-off from the prosperity of preceding years, especially as regards exports, which suffered from the results of the general bad harvests. The diminished purchasing power of the people affected imports. This was particularly noticeable in the reduced imports of cotton goods and yarn, which fell away by £6,685,000 (or 21 per cent.). But the imports of these articles had been specially heavy in 1907-8. Imports of metals and metal manufactures showed a trifling decline. Large imports of machinery were a sign of industrial activity. Sugar imports continued to grow, and mineral oil increased despite the large output in Burma. The imports of Government stores are mainly railway materials and army stores. In the export trade there were increases in jute and tea, cotton yarn and cloth, and hides and skins, but in wheat and other grains, cotton (raw), lac, seeds, and jute goods there were serious decreases. The exports of indigo have fallen rapidly in recent years. As will be seen, the great bulk of the imports consist of manufactured articles, while nearly 70 per cent. of the exports consist of food and raw materials.

The following table shows the distribution of Indian sea-borne trade in 1908-9:—

COUNTRIES.	PRIVATE MERCHANDISE ONLY.	
	Imports.	Exports.
Total Value (000 omitted) ...	£80,844	£99,883
	Per cent.	Per cent.
United Kingdom	62.6	24.0
China (including Hong Kong)	1.9	12.0
Germany	4.1	10.0
United States	2.7	8.8
France	1.5	6.4
Belgium	4.2	4.0
Japan	1.7	4.8
Straits Settlements	2.8	3.5
Austria-Hungary	3.2	3.1
Java	5.1	—
Ceylon	0.7	3.9
Italy	0.9	3.3
Mauritius	2.1	0.6
All other countries	6.5	15.6

In imports, the United Kingdom comes easily first with nearly two-thirds of the total, while all others, except Java, Belgium, and Germany, send less than 4 per cent. In exports, the United Kingdom is much less prominent, on account of the wide demand for India's raw produce for food and manufactures.

About 65 per cent. of India's total trade is with Europe, and about 23 per cent. with Asia.

CUSTOMS DUTIES.—Under the Indian Tariff Act, most goods imported pay a duty of 5 per cent. *ad valorem*. Cotton yarn and thread are exempt from duty; but the tax on other cotton goods is 3½ per cent., a corresponding Excise duty being levied on those woven in Indian mills. There are special duties on arms and ammunition, which are taxed mainly for police purposes. Spirits pay generally Rs. 7 a gallon; and salt now pays Re. 1 a maund (2½ lb.). Refined petroleum pays one anna a gallon. Iron and steel goods pay one per cent. Machinery, coal, raw cotton and wool, grain, oilcake, manures, living animals, unmanufactured tobacco, quinine, gold, precious stones and pearls, and a few other articles are duty-free. Bounty-fed sugars pay countervailing duties varying with the amount of the bounty given. There is an export duty of 3 annas per maund on rice. The Government of India have adopted an attitude of strong opposition to preferential tariff proposals. They point out that two-thirds of India's imports come from the United Kingdom, while among the remainder are many articles which this country cannot produce. The exports are chiefly commodities that are untaxed or lightly taxed in foreign countries, and if retaliatory imposts were levied on these India's trade would decline and her capacity to meet her financial obligations abroad would be impaired.

SHIPPING.—In 1908-9 the number of vessels which entered from and cleared to foreign countries fell to 8,000, with a tonnage of 12,910,823 tons. Of this tonnage, approximately 62 per cent. was from or to the United Kingdom and British possessions; and 80 per cent. of the total trade of India was under the British flag.

PORTS.—The chief ports are Calcutta and Bombay, which together do about three-fourths of the total trade. Next come Rangoon, Karachi, Madras, and Chittagong. These ports are administered by port trusts having wide powers, but subject to Government supervision.

FOREIGN LAND TRADE OF INDIA.—As registra-

tion is difficult, the statistics are of doubtful accuracy, and they include much that is really trade with border tracts administered by, or States subject to, the Indian Government. The most important countries are Afghanistan, Nepal, and the Shan States. The total frontier trade in merchandise and treasure has been as follows:—

	Imports.	Exports.	Total.
	000 omitted.	000 omitted.	000 omitted.
1906-7	£5,151	£4,275	£9,426
1907-8	5,718	4,643	10,361
1908-9	5,526	4,640	10,166

AGRICULTURE is by far the most important occupation of the people of India. Out of a surveyed area of 619 million acres in British territory in 1907-8, 266 millions were cropped or fallow, 113 millions cultivable waste, 153 millions not cultivable, and 83 millions under forests. The total area cropped was 238 million acres, of which over 8 per cent. was under wheat, 32 per cent. under rice, and 40 per cent. under other food-grains and pulses, 6 per cent. under oilseeds, and 8 per cent. under cotton, jute, and other fibres. The area under wheat has been considerably increased by the aid of irrigation in the Punjab and United Provinces. The cultivation of jute has been extraordinarily profitable. Sugar, spices, tea, opium, and tobacco are other important crops. The cultivation of indigo has greatly declined. The agricultural departments (central and provincial), which have been much developed since 1906-7, supply information as to crop prospects, new staples, manures, crop experiments, implements, cattle-breeding, &c., and distribute seeds. Owing to the increasing world demand for raw cotton, great efforts are being made to cultivate a superior long-stapled cotton in India.

MINERALS.—The output of the coal mines in India in 1908 was 12,770,000 tons. The production has much increased in recent years. Eleventh-twelfths of the total comes from Bengal. The production of crude petroleum in India (chiefly Burma) has increased from 19 million gallons in 1898 to 177 millions in 1908. The production of salt in 1907 was 1,280,000 tons. The output of manganese ore in recent years has been much increased, but there was a fall in 1908 to 431,000 tons. About 20,000 tons of saltpetre are produced annually and exported. The yield of gold (nearly all from Mysore) was about 567,000 oz. in 1908. There is a considerable output and export of mica, and a fluctuating output of rubies and jade stone.

MANUFACTURES.—In India the ancient village handicrafts still survive, though they suffer more and more from the competition of machine-made goods. Cotton-weaving is by far the most important hand industry. Power mills have grown up under European auspices, but are now largely owned by natives. The 227 cotton mills at work in 1907-8, mostly in Bombay and Ahmedabad, representing a capital of about £13,160,000, contained 5,764,000 spindles and 66,700 looms. Up-country cotton mills have increased. The production in 1908-9 was 657 million lb. of yarn (mostly of low counts) and 192 million lb. of woven goods. There is a tendency to produce finer yarns, and to pay more attention to weaving. The 50 jute mills, situated in or near Calcutta, with a capital of £7,090,000, contained 562,274 spindles and 27,244 looms. There were, in 1907, 6 woollen and 8 paper mills, 23 breweries, and various other factories. Owing to complaints of long hours in mills a new Factory Bill has been introduced, restricting the hours of adult males to 12, of women to 11, and of children to 6 per day.

TABLE OF PRINCIPAL INDIAN CHIEFS, SHOWING SALUTES TO WHICH THEY ARE ENTITLED, AND AREA, POPULATION, PREVAILING RELIGION, AND REVENUE OF THEIR STATES.

SALUTE AND TITLE OF CHIEF.	Date of Succ- ession.	Area in sq. miles.	Population in 1901.	Prevailing Religion.	Revenue for last year recorded or approximate.
Salutes of 21 Guns.					
Baroda, The Maharaja (Gaekwar) of, G.C.S.I.	1875	8,099	1,952,692	Hindus	812,000
Hyderabad, The Nizam of, G.C.B., G.C.S.I. ...	1869	82,698	11,141,142	Hindus and Muhammadans	2,393,000
Mysore, The Maharaja of, G.C.S.I.	1895	29,444	5,539,399	Hindus	1,433,000
Salutes of 19 Guns.					
*Bhopal, The Begum (or Nawab) of, G.C.I.E.	1901	6,997	665,961	Hindus	166,000
*Gwalior, The Maharaja (Sindhia) of, G.C.S.I., G.C.V.O., A.D.C.	1886	29,047	2,933,001	"	986,000
*Indore, The Maharaja (Holkar) of	1903	9,500	850,690	"	320,000
*Jammu and Kashmir, The Maharaja of, G.C.S.I.	1885	80,900	2,905,578	Muhammadans	750,000
Kalat, The Wali of, G.C.I.E.	1893	90,000	507,472	"	53,000
†Kolhapur, The Maharaja of, G.C.S.I., G.C.V.O.	1884	2,855	910,011	Hindus	317,000
†Mewar (Udaipur), The Maharana of, G.C.S.I.	1884	12,753	1,018,805	"	160,000
†Travancore, The Maharaja of, G.C.S.I., G.C.I.E.	1885	6,730	2,951,038	{ Hindus and Christians }	666,000
Salutes of 17 Guns.					
Bahawalpur, The Nawab of	1907	15,000	720,877	Muhammadans	158,000
Bharatpur, The Maharaja of	1900	1,982	626,665	Hindus	246,000
Bikaner, The Maharaja of, G.C.I.E., K.C.S.I.	1887	23,311	504,627	"	133,000
Bundi, The Maharao Raja of, G.C.I.E., K.C.S.I.	1889	2,320	171,227	"	46,000
Cochin, The Raja of, G.C.S.I.	1895	1,362	812,025	{ Hindus and Christians }	222,000
†Jaipur, Colonel The Maharaja of, G.C.S.I., G.C.I.E., G.C.V.O.	1880	15,579	2,658,666	Hindus	413,000
Karauli, The Maharaja of, G.C.I.E.	1886	1,242	156,786	"	33,000
Kota, The Maharao of, G.C.I.E., K.C.S.I.	1889	5,684	544,879	"	218,000
Kutch, The Rao of, G.C.I.E.	1876	6,500	488,022	"	132,000
Marwar (Jodhpur), The Maharaja of, K.C.S.I.	1895	34,993	1,935,565	"	333,000
Patiala, The Maharaja of, K.C.S.I.	1900	5,412	1,596,692	{ Hindus and Sikhs }	376,000
Rewa, The Maharaja of, G.C.S.I.	1880	12,676	1,325,307	Hindus	191,000
Tonk, The Nawab of, G.C.I.E.	1867	2,553	273,201	"	86,000
Salutes of 15 Guns.					
Alwar, The Maharaja of, K.C.S.I.	1892	3,141	828,487	Hindus	200,000
Banswara, The Maharawal of	1905	1,946	165,350	Animists	10,000
Datia, The Maharaja of	1907	912	173,759	Hindus	60,000
Dewas, The Senior Raja of	1900	446	62,312	"	4,000
Dewas, The Junior Raja of	1892	440	54,904	"	4,000
Dhar, The Raja of	1898	1,739	142,715	"	73,000
Dholpur, The Maharaj Rana of, K.C.I.E.	1901	1,155	270,973	"	66,000
Dungarpur, The Maharawal of	1898	1,447	100,103	"	15,000

N.B.—There are also 12 other chiefs entitled to salutes of 12 guns.

NATIVE STATES OF INDIA.

THE Native or Feudatory States, whose chiefs are in subordinate alliance with, or under the suzerainty of, the King-Emperor, comprise about two-fifths of the area, but only one-fifth of the population of India. Their administration, with a few unimportant exceptions, is not under the direct control of British officials, but it is subject, in varying degrees, to the Supreme Government. The chiefs are entitled to British protection, but have no power of making war and peace, or of sending ambassadors to one another or to foreign States; the military force they maintain is strictly limited; no European is allowed to reside at any of their courts without special sanction; and in case of misrule the Supreme Government can dethrone the chief or temporarily suspend him from the exercise of his powers. In matters of Imperial interest, trade, main lines of railway, &c., the Supreme Government has jurisdiction. Some States pay tribute, most do not. Generally speaking, the States are governed by their native Princes, Ministers, and Councils, with the advice of a political officer of the Supreme Government.

This officer may have charge, as British Resident, of one large State, or may be the Agent for a group of States. A common characteristic of all native States, important or insignificant, is that in their territory British Indian law does not run. For them the Legislative Councils of the Governor-General or of the Provincial Governments cannot legislate; and over them the High Courts or Chief Courts of the Provinces have no jurisdiction.

The Assigned Districts of Mysore (Bangalore), Kalat (Quetta and Pishin), and Berar are still technically Native States territory. The Shan States, on the other hand, are technically part of British India, though administered by local Sawbwas or petty chiefs. Excluding these territories, the native States have a combined area of 679,393 square miles, and a population of 62,461,549. The aggregate revenues of the chiefs are about £15,000,000, out of which a tribute of £584,520 (£233,000 from Mysore) was paid to the Government of India in 1907-8. They maintain troops of inferior military organisation to the aggregate number of 85,000 men in addition to their Imperial Service troops, numbering

* The present chief has a personal salute of four additional guns.

19,600 in 1909. Many treaties provide that States shall furnish troops on the requisition of the Supreme Government, and troops of native States served in almost every Indian campaign of the 19th century. The States vary greatly in size and importance. Hyderabad is as large as Italy, and the Nizam enjoys a very large revenue. On the other hand, in Kathiawar and elsewhere, where family custom has led to minute subdivision, there are many chiefs of single villages. In the case of such petty estates the nominal chief may have some very limited magisterial powers, but the administration is regulated and carried on by the Supreme Government in its executive capacity. The amount of control thus exercised over a native State in its internal affairs depends on a number of considerations, and varies from State to State. The rulers have not necessarily any religious or tribal connection with the majority of their subjects. Thus the Nizam of Hyderabad is a Muhammadan, but most of his people are Hindus. Although the native States, large and small, number 680, only about 200 are of any real importance. The majority represent the scattered military chieftships which sprang from the ruins of the Moghul Empire in the 18th century. The rulers of Gwalior, Indore, and Baroda are all descendants of successful generals who then rose to power. Most of these States are of more recent origin than the British power in India. Lord Curzon reformed the Chiefs' Colleges and inaugurated an Imperial Cadet Corps of Indian princes and nobles.

The salutes enjoyed by the native princes indicate their relative importance. Those with eleven guns or more are addressed as His Highness. On pages 532-3 will be found the names of 71 ruling chiefs who have salutes of eleven guns or more, with some particulars of their States. In each group the States are given in alphabetical order. Some well-known Indians, such as H.H. the Maharaja of Benares, G.C.I.E. (who is entitled to a salute of 13 guns), H.H. the Agha Khan, G.C.I.E., the Maharaja of Darbhanga, K.C.I.E., the Maharajah of Burdwan, K.C.I.E., and the Nawab of Dacca, K.C.I., are not ruling chiefs.

The native States may be thus classified:—
1. The Indo-Chinese group of States, and the numerous hill tribes of the N.E. frontier. 2. The aboriginal Gond and Kol tribes, under petty princes of aboriginal or Rajput blood, in Chota Nagpur, Orissa, the Central Provinces, and the Jaipur (Vizagapatam) Agency. 3. The Himalayan Hill States, west of Nepal (including Kashmir). 4. The numerous Afghan and Baluch tribes of the N.W. frontier, inhabiting the mountains from the north of Peshawar to the base of the Sulaiman range, a distance of 800 miles. The names of many of these tribes, Waziris, Orakzais, Afridis, &c., have become familiar owing to the many expeditions against them. 5. Kalat (including Makran and Kharan) and Las Bela, with tribal areas in the possession of the Marri and Bugti tribes. 6. The Sikh States, in the Sirhind plain, south of the Sutlej. 7. The three northern Muhammadan States of Khairpur (Sind), Bahawalpur, and Rampur, from which Warren Hastings expelled the Rohillas in 1774. 8. The ancient sovereignties of Rajputana, lying between Sind and the United Provinces. 9. The States of Central India, lying to the north of the Nerbudda, and to the south and east of Rajputana. 10. Gujarat, including Kutch and the

numerous petty chieftships of Kathiawar. 11. Baroda. 12. The Southern Mahratta States. 13. Hyderabad. 14. Mysore. 15. The Malayalam States of Travancore and Cochin, lying together in S.W. India.

The States of Hyderabad, Mysore, Baroda, Kashmir, and Kalat, and those belonging to the Rajputana and Central India Agencies, 175 in all, are under the direct supervision of the Governor-General in Council. Numerous minor States are under the supervision or control of various Provincial Governments. The States of first magnitude, which have a superior Resident, are Hyderabad, Mysore, Kashmir, Jaipur, Udaipur, Gwalior, Indore, Baroda, and Travancore and Cochin. Hyderabad is the premier State in India. Its capital, Hyderabad (448,466), is the fourth city in India in population. The important frontier State of Kashmir (capital, Srinagar, 122,618) was granted to Gholab Singh by Lord Hardinge, after the First Punjab War (1846). It comprises Jammu, Kashmir, Ladakh, Gilgit, and Baltistan. The administration of the State has been much improved under the advice of the British Resident. A British force stationed at Gilgit watches the northern passes and controls the feudatory chieftships of Hunza and Nagar; while on the west the subordinate chieftship of Chitral is occupied by British troops, depending for their support on the Peshawar border. Of the Sikh States the most important is Patiala. Rajputana (pop. 9,723,301) extends some 460 miles from north to south, and is 530 miles in breadth. About half of the area is desert. It comprises 19 States of varying size and importance. Of these 16 are ruled by hereditary Rajput chiefs, two by Jat chiefs, and one by a Muhammadan. The Governor-General's Agent's headquarters are at Ajmer; he has under him Residents for Eastern and Western Rajputana, and about twenty other officers, distributed among the States to supervise the administration, and give advice when it is required. The most important States are Jodhpur (Marwar), Udaipur (Mewar), and Jaipur. The Rajput dynasties, the most ancient in India, go back before the Moghul Empire, and resemble feudal monarchies. A large part of the area of Jodhpur, Bikaner, and Jaisalmer is desert. The Central India States, although in the aggregate one-third less in extent than those of Rajputana, are nearly four times as numerous. All but 17 are petty chieftships. The most important are Gwalior and Indore, which include between them one-half of the whole area. The 31 minor States of Bundelkhand (largest, Rewa) are in political relation with the Central India Agency. Bhopal, one of the principal Muhammadan States in India, is now for a fourth generation under female rule. In 1875 the reigning Gaekwar of Baroda was deposed, but the native administration was continued under an adopted heir. In 1881 Mysore, which had been administered by the Indian Government since 1831, was restored to native rule. The important States of Travancore and Cochin, attached to Madras Presidency, represent ancient Hindu dynasties. The former stands third in population among the native States, and is exceedingly prosperous. Their Christian population numbers about 900,000. Sikkim, a frontier State situated on the borders of Tibet, between Nepal and Bhutan, acknowledged the British protectorate in 1890, when also the boundaries of Tibet were defined by the Sikkim-Tibet Convention.

Countries within the Indian Sphere of Influence.

THE native States of Nepal and Bhutan, though in India, enjoy a large measure of independence, and may be most conveniently treated as within the Indian sphere of influence. Outside India, but within its sphere of influence, is Afghanistan. For French and Portuguese possessions in India, see pages 617 and 644.

NEPAL.

Sovereign, H.H. Maharaja Dhiraja Prithvi Bir Bikram Jang Bahadur Shah Bahadur Shamsheer Jang, b. 1875; *suc.* 1881. Salute in British territory, 21 guns.

Prime Minister, H.E. Maharaja Sir Chandra Shamsheer Jang, Rana Bahadur, G.C.B., C.C.S.I., D.C.L. (1901).

Nepal (500 miles long by 100 miles broad; area, about 54,000 sq. miles; pop. about 4,000,000, chiefly Hindus and Buddhists) lies between British India and Tibet on the S. slopes of the Himalayas, and includes, among other lofty peaks, Mt. Everest (29,141 ft.). Amid the wild, sterile mountains lie many fertile valleys. The lower hills are covered with jungle, in which wild animals abound. Rice, wheat, &c., are grown. Nepal is divided into four provinces and fifteen districts. In 1908-9 its exports to British India were £2,268,000, while its imports amounted to £1,152,000. The principal trade route is that between Katmandu and the Bengal frontier (76 miles). Nepal exports rice and other grains, oilseeds, *ghil*, cattle, jute, &c., and imports cotton goods and yarn, sugar, salt, spices, metals, &c. The revenue, realised chiefly from land rent, forests, customs, &c., is over £1,000,000. The aborigines are Mongolian in type, and their religion is Buddhism. The country was conquered in 1769 by the Gurkhas, who are Hindus and claim to be Rajputs. The Maharaja is a Sisodiya Rajput (Hindu). Their frequent aggressions led to a war with the British in 1814-6. Relations have now long been friendly, and the Prime Minister paid a most successful visit to England in 1908. The policy of seclusion is, however, consistently followed by the native rulers. The real political power rests with the Prime Minister. The British Political Resident at the capital does not interfere in internal affairs, but foreign relations are controlled by the Indian Government. The army numbers about 45,000. Complimentary missions are sent quinquennially to China. By arrangement with Nepal, India obtains many fine recruits for its Gurkha regiments. CAPITAL, Katmandu (pop. 75,000)—British Resident, Lt.-Col. J. Manners Smith, C.I.E. V.C.

Rs. 2,500

BHUTAN.

Bhutan (area, about 20,000 sq. miles; pop. about 250,000, mainly Buddhists) also lies on the S.E. of the Himalayas, and its products resemble those of Nepal. In 1863, owing to outrages on British subjects, portions of it were annexed to India, an annual allowance of £3,333 being now paid by the Indian Government as compensation. The former dual government of a spiritual chief and a temporal chief came to an end when the chief councillor and virtual ruler, known as the Tongsa Penlop (Sir Ugyen Wangchuk, K.C.I.E.), was chosen hereditary Raja in 1907. Bhutan's total trade with India in 1908-9 was £39,000. There is no British Resident.

CAPITAL, Punakha.

AFGHANISTAN.

Amir of Afghanistan and its Dependencies, His Majesty Siraj-ul-millat-wad-din Amir Habibullah Khan, G.C.M.G.; b. 1872, *suc.* October 7, 1901. Salute in British territory, 21 guns.

Afghanistan (called Khorassan by the natives) lies on the N.W. frontier of India. Its area is estimated at 246,000 sq. miles, and its population at 5,000,000. It is bounded on the W. by Persia (boundary fixed 1857 and 1904), on the S. by Baluchistan (boundary fixed 1896-7), on the N. by Asiatic Russia (boundary fixed 1886-7 and 1893-5), and on the E. by the Punjab and N.W. Frontier Province (boundary fixed 1895). The northern boundary runs from Zulkair on the Persian frontier to Kushk, the Russian railway terminus on the branch line from Merv, and thence N.E. to the Oxus, which forms the boundary from Khamiab to Lake Victoria, whence the line to the Chinese frontier was fixed by the Pamir agreement of 1895. The Indo-Afghan frontier was settled by the Durand agreement of 1903. On this frontier from the Pamirs to the Gomal Pass are many Pathan tribes, who are much influenced by Mullahs.

Mountains, chief among which are the Hindin Kush, cover three-fourths of the country, the elevation being generally over 4,000 feet. There are three great river basins, the Oxus, the Helmand, and the Kabul. The climate is dry, with extreme temperatures in winter and summer. The population is very mixed. The Afghans (or Duranis) have been predominant since 1747, especially in Kandahar; next come the Ghilzais (military and commercial) and the Tajiks (aboriginals, who are cultivators or retail traders). All are Sunni Muhammadans, except the Hazaras and Kizilbashes, who belong to the Shiite sect. The national tongue is Pushtu.

Afghanistan is divided into six provinces, Kabul, Kandahar, Herat, Turkestan, Farrah, and Badakshan (with Kafiristan and Wakhan), which are under governors, with subordinate nobles and judges, police, and revenue officers. The late Amir (1880-1901) established a strong central government, and introduced a regular civil and military organisation, including offices for public works, posts, police, finance, trade, &c. He first formed a national army, paid and controlled by himself, with transport services, &c. It comprises about 70,000 regulars and 20,000 irregulars, but lacks discipline and cohesion. Considerable quantities of rifles and artillery have been purchased in Europe under arrangements made with the Government of India. Factories for guns, rifles and ammunition, and for various commercial products, have been erected in Kabul. The Afghan laws are Islamic sacred laws, tribal laws, and those of the Amir, who is the Court of Appeal. The law is bulky and the criminal law severe. Recently steps have been taken to develop education, hitherto controlled by the Mullahs. Most of the people are industrious cultivators, and the country has become fairly settled, peaceful, and prosperous. There is excellent irrigation and all profitable soil is utilised. There are generally two crops a year, one of wheat (the staple food), barley, or lentils, the other of rice, millet, maize, and *dal*. Afghanistan is rich in fruits. Sheep and transport animals are bred. Silk, woolen, and hair cloths and carpets are manu-

factured. Salt, copper, coal, iron, lead, rubies, and gold are found. The roads are generally unsuitable for wheeled traffic, but have lately been improved, particularly where they may serve military purposes. Goods are conveyed by pack-animals. The trade of Afghanistan with India in 1908-9 was over £1,516,000. The exports to India are mainly fruits and nuts, raw wool, and *ghis*; while the imports therefrom are chiefly cotton yarn and piece goods, metals, leather goods, tea, and sugar. The Afghan customs duties are heavy. The chief trade routes to India are the Khaibar Pass, from Kabul to Peshawar (191 miles), and the road from Kandahar to Quetta (125 miles). The Sind-Pishia railway terminates at Chaman, on the frontier, 65 miles from Kandahar, from which a fine road of 38 miles runs to Kabul. There is a large export of wool to Persia and Russia, cotton and silk goods, sugar, &c., being taken in exchange. Russia gives bounties and rebates. The annual revenue is unknown, and consists largely of payments in kind. It may amount to £900,000, including the subsidy of £120,000 a year from the Government of India. There are taxes on land, a grazing tax, customs duties, stamps, fines, poll-taxes, receipts from State lands, monopolies, and factories, and mining royalties.

By agreement with the Amir, the "buffer State" of Afghanistan has no foreign relations with any Power except the Government of India. In all other respects it is independent, and the rule of the Amir despotic. The modern history of Afghanistan dates from 1881, when Abdurrahman, the late Amir, was recognised as ruler. As the result of a British mission to Kabul in 1904-5 the engagements which had

existed with the late Amir since 1880 were renewed by the treaty of 21 March, 1905. Under this treaty the British Government engaged to refrain from interference in internal affairs, but promised to preserve the safety and integrity of Afghanistan against any unprovoked attack, provided that the Amir acted as a friend and ally, and followed unreservedly the British Government's advice in all his external relations. The Amir visited India in 1907. By the Anglo-Russian Convention of August, 1907, Russia declared Afghanistan outside the Russian sphere of influence, and engaged to conduct all her political relations with Afghanistan through Great Britain. Great Britain declared her intention not to change the political status of Afghanistan, to exercise only a pacific influence, and not to take or encourage measures that might threaten Russia. After reciting the treaty with the Amir in 1905 Great Britain engaged not to annex or occupy any part of Afghanistan in contravention of that treaty. It was agreed that specially designated Russian and Afghan frontier officials might establish direct relations for settling local non-political questions, and that Great Britain and Russia should enjoy equality of commercial facilities.

There is a native British Agent (a Muhammadan) at Kabul. The Amir has an agent with the Government of India, and an agent at Peshawar, and also commercial agents in England and India.

CAPITAL, *Kabul* (about 150,000). The chief commercial centre is Kandahar (30,000). Other provincial capitals are Herat (12,000) and Tashkurgan (17,000).

British Agent, Fakir Saiyid Iftikhar-ud-din

Rs. 1,500

Foreign Countries Contiguous to India.

THE PERSIAN GULF.—For three centuries England has taken the lead in Persian Gulf trade. She has suppressed piracy, slavery, and inter-tribal warfare on land and sea, made surveys, and laid down buoys and cables. England and India still have the lion's share of the trade, though there has recently been German competition. The bulk of the trade is conducted by Indians, who make Bombay their *entrepôt*. The Arabian shores are low-lying deserts, the Persian coasts mountainous; while at the head of the Gulf are great alluvial plains. The heat is intense in summer. Natural harbours are few. The southern shores are Turkish from Katif Town up to the vicinity of Koweit, and beyond those limits as far as Basra.

Bahrain (capital, Manama), governed by Sheikh Isa and under the protectorate of the Indian Government, is the largest of a group of islands half-way up the Gulf, near the Arab coast (El Katr). It is the head-quarters of extensive pearl fisheries, and a distributing centre for the adjacent mainland. Pearls are the only notable export: rice, cotton goods, dates, and spices the chief imports. In 1907-8 the value of the exports was £1,107,000, and of the imports £1,422,000. The people (about 75,000) are Muhammadans. The Sheikh has been in treaty relations since 1820 with the Government of India, which has a Political Agent at Bahrain. In 1830 he engaged not to make treaties with any other State.

The independent tribes on the *Pirate* (Arab) Coast from Ras-el-Kheima to Odeid are bound under treaties with the Indian Government (dating from 1820, and confirmed in 1853 by

a Treaty of Perpetual Peace) to maintain a maritime truce for the prevention of piracy and slavery, and for the cessation of hostilities at sea. Hence their chiefs are sometimes called the "Trucial" chiefs. The British Political Resident in the Persian Gulf, stationed at Bushire, is the recognised arbiter and adviser of these tribes, and peace is maintained by the British flag. The trade of the Arab coast ports largely consists in exports of pearls to India *via* Lingah and Bahrain.

Important caravan routes converge at *Koweit*, the proposed terminus of the Baghdad railway, which has an excellent harbour, recently buoyed by the British India Steam Navigation Company, whose steamers call fortnightly. The Sheikh of Koweit (Mubarak bin Salah) is under treaty obligations with the Indian Government in respect of Koweit and its vicinity.

The Sultan of *Omân* (Muscat) is in treaty relations with, and subsidised by, the Government of India, who have a Political Agent at his Court (see page 639).

In the negotiations connected with the Anglo-Russian Convention of 1907 the policy of Great Britain was declared to be the preservation of the *status quo* and the maintenance of British trade, and Russia did not deny the special interests of Great Britain in the Gulf.

Political Resident, *Persian Gulf* (*Bushire*), Major P. Z. Cox, C.S.I., C.I.E., *per mensem* Rs. 2,750
Do., *Turkish Arabia* (*Baghdad*), J. G. Lorimer, C.I.E. *per mensem* Rs. 2,500

Political Agent, *Muscat*, E. E. Holland Rs. 2,200
Pol. Agent, *Bahrain*, Capt. C. F. Mackenzie Rs. 1,167
Do., *Koweit*, Capt. W. H. J. Shakespear Rs. 1,167
(For Persia, see pp. 640-642).

PERSIA borders on Baluchistan. The demarcation of the Perso-Baluch frontier, partially carried out in 1872 and 1895, was completed in 1905 by Col. McMahon, who, under the treaty of 1857, was deputed to examine a Perso-Afghan dispute regarding the course of the Helmand. A railway was opened in 1905 from Quetta to Nushki, whence there is a caravan route (478 miles), with wells, rest-houses, telegraph, &c., to Persian Seistan, but traffic is small. In Persia consular officers representing British and Indian interests work side by side. By the Anglo-Russian Convention of August, 1907, S.E. Persia, east of a line drawn from the Afghan frontier, *via* Gazik, Birjand, Kerman, and Ender Abbas, is assigned as a region in which Russia will not seek political or commercial concessions (for railways, &c.), or oppose similar concessions supported by the British Government (see also pp. 640-642).

ASIATIC RUSSIA.—The Anglo-Russian Convention of Aug., 1907, recognises N.W. Persia as a region in which Russia, and S.E. Persia and Afghanistan as regions in which Great Britain, have special interests. A portion of the Russian Empire, including the vassal State of Bokhara and part of the Pamir Region, is continuous with Afghanistan. The Russian Trans-Caspian Railway runs from Krasnovodsk, on the Caspian, *via* Merv, to Samarkand and Tashkent. The Murghab Valley branch from Merv to Kushk on the Afghan frontier, opened in 1898, brings the Russian railways within 70 miles of Herat, and within 450 miles of the Chaman terminus of the Indian railways. Another important strategic line connects Tashkent directly with the main Russian system at Orenburg. The Amu-Darya, or Oxus, which separates Bokhara from Afghanistan for 330 miles, is navigated by Russian steamers. Russian territory stretches into the Pamir Region—the "Roof of the World"—a wind-swept, icy mountain-land, snow-bound for half the year. Its southern boundary was fixed in 1895 by the Anglo-Russian Pamir agreement.

CHINA.—India is in contact with two dependencies, Chinese Turkestan and Tibet, and one province, of China, Yunnan.

Chinese Turkestan is surrounded by the mountains of Tianshan, the Pamirs, and Kuenlun. There are three difficult passes into Russian Turkestan and two still more difficult ones into India. The boundary between Kashmir and Chinese Turkestan has not been officially defined. Russia has special treaty rights in the dependency. There is a British consul at Kashgar (G. Macartney, C.I.E.). Trade with India, which has increased, is chiefly carried over the Karakoram Pass (18,500 feet) *via* Ladakh, in Kashmir.

Tibet, a plateau seldom lower than 10,000 feet, forms the northern frontier of India, from Kashmir to Burma, but is separated therefrom by the Himalayas. Northern Tibet is arid, but in the south there are fertile tracts in the valley of the Tsan-po. India imports from Tibet wool, borax, salt, living animals, and musk, in exchange for cotton and woollen goods, coral, and grain. The total trade in 1908-9 was about £305,000. Trade passes from Bengal (through Sikkim) or from the Punjab and the United Provinces. The once mysterious capital, Lhasa (11,830 ft.), is 333 miles from Darjiling (Bengal). The Lamas, or monks, who control the country, denied access to European travellers after 1846. Under the Anglo-Chinese Sikkim Convention of 1890, a trade mart was opened at Yatung; but as the Tibetans disregarded the Convention,

a political mission was despatched from India, with a military escort. It reached Lhasa, after a very arduous march and sharp fighting, on 3 August, 1904. A new Convention was signed (7 Sept.). This Convention provided for the erection of boundary pillars between Sikkim and Tibet; for trade marts at Gyantse and Gartok as well as at Yatung, and for unrestricted traffic by existing routes; for British and Tibetan agents at the trade marts; and for payment of an indemnity. The Tibetans pledged themselves not to alienate any territory or grant concessions to, or permit the intervention of, any foreign Power. By the Convention of Peking (27 April, 1906) China agreed to the terms of the Conventions of 1890 and 1904, and declared that no foreign State should interfere in Tibet, while England also undertook not to interfere in the administration of Tibet or annex territory. By the Anglo-Russian Convention of Aug., 1907, both Powers recognised the suzerain rights of China in Tibet, agreed to maintain its territorial integrity, to refrain from intervention in its internal administration, to treat with Tibet only through the Chinese Government, not to send representatives to Lhasa, not to assign any territory to either Power, and not to obtain railway, mining, or other concessions; but direct relations between British commercial agents and Tibetan authorities under the Conventions of 1904 and 1906 are permitted. The new trade marts have been opened and trade regulations signed (1908). In Dec., 1905, the ruler of Tibet, the Tashi Lama, visited the chief cities in Northern India. The Dalai (or Sacred) Lama, who fled before the British advance on Lhasa, has now returned to Tibet. The Chinese exercise much more influence than formerly in the administration of Tibet.

Yunnan is a Chinese province to the N.E. of Burma. By the Anglo-Chinese agreements 1894 and 1897, a boundary was fixed between Burma and Yunnan, and arrangements were made about trade, extradition, &c. The boundary towards Assam is undefined. By an agreement of 1896 Great Britain and France agreed to share equally all privileges or advantages that might be conceded by China in Yunnan. Western Yunnan, with its trade centre of Hsiakuan and Tai-fu, is reached by a difficult route from Blamo, in Upper Burma. The direct trade was about £550,000 in 1908-9. Burma imports iron Yunnan hides, &c., and exports raw cotton, cotton goods, and jade. A railway from Blamo to Teng-yueh (120 miles) is under survey. There are treaty "ports" at Teng-yueh and Ssumao, near the Burma frontier. British consuls are stationed at Teng-yueh and Yunnan-fu (see p. 608).

FRENCH LAOS.—Through the cession of a portion of Laos by China in 1894, France obtained access to the left bank of the Mekong at a point where this river forms the boundary of the Shan States of Burma. The territory forms part of French Indo-China (see pp. 617-8).

SIAM (see pp. 640-650) marches with Burma for many hundreds of miles through mountainous country, and considerable trade is carried on over this frontier, chiefly with Chiangmai, the imports being chiefly teak, cattle, and raw silk, and the exports cotton and silk goods. In 1908-9 the value of the total trade was £511,000. The boundary of Burma and N.W. Siam was demarcated in 1892-3. France in 1904 recognised the portion of Siam west of the Menam basin, including the Malay peninsula and adjacent islands, as within the British sphere of influence.

THE following accounts of the Imperial Dominions have been revised by the various Governments, to whom the Editor begs to return his warmest thanks. He is also indebted to the "Colonial Office List," which contains information upon every subject connected with the Imperial Dominions.

CEYLON.

an island in the Indian Ocean, to the south-east of the peninsula of Hindustan, is situated between $5^{\circ} 53' 12''$ — $9^{\circ} 50'$ N. lat. and $79^{\circ} 48'$ — $82^{\circ} 52'$ E. long. Its area is (with outlying islands) 25,481 square miles, or more than three-fourths of that of Ireland. Its greatest length is from north to south, 270 miles; and its greatest width 140 miles.

The climate varies with the altitude of the district; but on the whole, though tropical, it is healthy, except in the low-lying jungle. There are no great extremes of temperature, and throughout the low country the thermometer varies little in the course of the year, the mean temperature at Colombo being nearly 82° F. The coolest months are December and January; the hottest are April and May.

The estimated population on December 31, 1908, was 4,038,456, the most important element being the Sinhalese, descendants of colonists from the valley of the Ganges, who first settled in the island about B.C. 543. (Census, 1901: Sinhalese, 2,330,807; Tamils, a race of Southern India, 957,740; Moormen and "other races," 253,625; Burghers and Eurasians, 23,482; and Europeans, 9,212, including 2,911 military and shipping. "Other races" include a sprinkling of Veddahs, who are perhaps the aboriginal race of the island, and of Afghans and Malays.) In 1507 the Portuguese landed in Ceylon and formed settlements along the coast; but about 150 years later they were dispossessed by the Dutch. In 1796 the British took possession of the Dutch settlements on the island, and annexed them to the Presidency of Madras; but five years after, in 1801, Ceylon was erected into a separate Crown colony. In 1815 the King of Kandy was deposed and banished; and his dominions, which had up to that time maintained their independence of European rule, were annexed to the British Crown.

The staple products of the islands are agricultural. The most important for home consumption is rice in its two forms of padi and dry grain. The principal exports are tea, coffee, and products of the coco-nut palm, cinchona, rubber, cocoa, cinnamon, cardamoms, ebony, and a little vanilla.

About one-fourth of the island is under cultivation, and the leading areas in 1908, in acres, were:—Rice, 680,239; other grain, 106,635; tea, 553,348; coffee, 1,910; coco-nuts, 955,373; rubber, 131,695; cinchona, 1,066; cinnamon, &c., 54,423; cocoa, 39,788; and tobacco, 14,060. Among the more important native industries are gold, silver, ivory and tortoise-shell work, pottery, mats, fans, and wood-carving. Ceylon is famous for precious stones, especially catseyes, rubies, &c.; and the pearl fishery in the Gulf of Mannar, off the N.W. of the island, yielded a revenue of Rs. 2,405,645 in 1905. The manufacture of salt is a Government monopoly, and yielded in 1908 a revenue of Rs. 1,760,551.

There are 567 miles of railway open, 500 being 5 ft. 6 in. gauge and 67 miles 2 ft. 6 in.; and in 1909 the post and telegraph offices numbered 402, there being 4,063 miles of telegraph wire.

The Government of Ceylon is administered by a Governor, aided by an Executive Council of 5

members, and a Legislative Council of 28 members, including the Governor and the Executive Council. The Legislative Council contains representatives of the principal races and interests in the island. For administrative purposes the island is divided into 9 provinces, at the head of each of which is a Government agent. The larger towns have municipalities or local boards; and in the country districts the natives retain their village councils and tribunals for matters of minor importance.

THE MALDIVÉ ARCHIPELAGO lies to the S.W. of Ceylon, a few degrees north of the equator. Male, the seat of government, is about 400 miles distant from Ceylon, to which the islands have always been nominally tributary. The Sultan acknowledges his allegiance by sending an annual embassy to Colombo. The natives are Mohammedans. The islands are unhealthy, and the main exports are dried fish, cowry shells, coco-nut oil, and tortoiseshell.

Colombo, distant 6,300 miles; transit, 16 days.

STRAITS SETTLEMENTS.*

The Settlements forming what is known as the Colony of the Straits Settlements have an entire area of about 1,665 square miles. The population in 1901 was 572,249, exclusive of Labuan, Cocos, and Christmas Island (Singapore, 228,555; Penang, Prov. Wellesley and Dindings, 248,207; Malacca, 95,487). The great bulk of the population consists of Chinese and Malays.

The Government consists of a Governor, assisted by an Executive Council of 7 members, and a Legislative Council of 8 official and 7 unofficial members, appointed by the Crown. Two of the unofficial members are nominated by the Chambers of Commerce at Singapore and Penang respectively. The Resident Councillors of Penang and Malacca have seats in both Councils. The law of the colony is the common and statute law of England as it was in 1826, qualified by Indian Acts until 1867 and since then by local ordinances. The Supreme Court consists of the Chief Justice and four puisne judges, and constitutes also a court of appeal, from which there is yet another appeal in certain cases, viz., to the Privy Council. The jurisdiction of the Supreme Court includes that of a Colonial Court of Admiralty. There are also in each Settlement and in Labuan district courts with limited civil and criminal jurisdiction, and the usual police magistrates and coroners' courts.

The climate of the colony is almost uniform throughout the year, and foliage is perennial. The rainfall in 1908 amounted in Singapore to 85.44 inches, in Penang to 111.26 inches, and in Malacca to 72.2 inches.

The exports comprise—gutta-percha, gambier, pepper, india-rubber, horns, hides, canes, sugar, rice, sago, tapioca, spices, dye-stuffs, copra, rattans, coffee, tobacco, gums, tin, &c.

The chief imports are rice, cotton piece goods, opium, petroleum, and coal.

Master Attendant, Comm. C. A. Radcliffe, R.N.	£780 to 900
Inspector of Prisons, L. P. Elden	£900 to 1,020

SINGAPORE is an island situated off the southern extremity of the Malay Peninsula, from which it is separated by a narrow strait about three-quarters of a mile in width; its length is about 27 miles, and its breadth 14 miles; it comprises, with the adjoining islets, an area of 206 square miles. It was first occupied in 1819, and formally ceded to the British Government by the Sultan of Johore in 1824. The seat of government for all the settlements is the town of Singapore, situated on the south side of the island in lat. 1° 16' N. and long. 103° 53' E., with 238,500 inhabitants in 1901. The harbour, in the extent of its shipping, is one of the greatest ports in the world, being a port of call for vessels trading between Europe or India and the Far East, the North of Australia, and the Netherlands Indies, and is strongly defended. The Tanjong Pagar docks and wharves were taken over by Government in 1905 at a cost (fixed by arbitration) of \$29,000,000, and extensive works for their improvement and for the improvement of the harbour are now in progress. The trade returns for 1908 (including inter-settlement trade) amounted to \$422,071,477; the value of exported tin being \$33,477,542.

The number of merchant vessels entered and cleared in 1908, exclusive of native craft, was 10,342, with a tonnage of 13,933,235. The total for the whole colony was 18,495, with a tonnage of 21,750,245. The total native craft entered at all four ports, Singapore, Penang, Malacca, Labuan, during the same year was 17,747 (tonnage, 723,336). The climate is fairly healthy for Europeans, except for the absence of any marked change of temperature throughout the year. It is a free port; no duties are levied upon anything except opium, spirits, wines, and beer consumed in the colony. The opium and spirit trades are farmed out to Chinese, and the Chinese element is conspicuous among the trading classes.

LABUAN is an island of the Malayan Archipelago, situated about 6 miles off the north-west coast of Borneo, in 5° 16' N. lat. and 103° 45' E. long., and forms part of the Settlement of Singapore. Its area is about 31 square miles; and its population is 8,286. It was ceded to Great Britain by the Sultan of Brunei in 1846, being at that time uninhabited. The island has a fine

harbour, and possesses extensive coal-mines, which are now being developed, the annual export being nearly 50,000 tons. The exports consist of cloth, rice, sago, earthenware, brassware, &c. Victoria Harbour, in the south-east, is the principal inlet, and affords good anchorage. There is a cable station of the Eastern Extension Telegraph Company on the island. Imports (1908) \$1,129,278; exports, \$1,146,327.

Resident, M. S. H. McArthur.

CHRISTMAS ISLAND, in the Indian Ocean, about 200 miles South-west of Java, and 700 miles East of the Cocos-Keeling Islands, has an area of about 56 square miles and a population about 1,200. A District Officer is stationed on the island, which contains enormous phosphate deposits worked by the Christmas Island Phosphate Company. The amount exported in 1908 was 109,097 tons.

THE COCOS-KEELING ISLANDS are a group of about 20 small islands about 700 miles South-west of Sumatra, and form part of the settlement of Singapore. The population is about 700, and the island exports about 800 tons of copra. There is a station of the Eastern Extension Telegraph Company on Direction Island.

PENANG is the northernmost of the Settlements. It includes Penang or Prince of Wales's Island (population, 1901, 128,830), on the eastern side of which is Georgetown, the port and capital, and the strip of mainland opposite, known as Province Wellesley (population 1901, 115,264), and the Dindings. Penang Island, about 15 miles long and 9 broad, is situated off the west coast of the Malay Peninsula, in lat. 5° 18' N., long. 100° 21' E., and was ceded to the Government of India in 1786 by the Raja of the neighbouring territory, Kedah. Area, 107 square miles. At the time it was founded, Penang was the only British settlement in further India; now it is the emporium for all the trade of the northern and more prosperous parts of Sumatra and the Malay Peninsula. Its aggregate trade for 1908 (including inter-settlement trade) amounted to \$185,882,347; the export of tin from the port being \$38,255,694 in 1908.

PROVINCE WELLESLEY is a strip of coast about 45 miles in length with an area of 288 square miles, ceded by the Raja of Kedah in 1798, with some land S. of the Krian river acquired more recently. The province is in a high state of cultivation as compared with the neighbouring territory, containing rice, sugar, spices, tapioca and rubber plantations.

THE DINDINGS TERRITORY (area 260 square miles, population in 1901 4,113) is at present little developed; but it contains what is considered the best natural port on the western side of the peninsula. The headquarters are at Lunut, where a District Officer is stationed, and steamers call regularly at Pangkor. The territory comprises a group of islands (of which Pangkor is the largest); and a strip of the mainland on the west coast of the peninsula, cut out of the State of Perak, and measuring about 22 miles long by about 10 miles in width.

MALACCA, the largest of the Settlements, situated on the western coast of the peninsula, between Singapore and Penang, and about 120 miles to the N.W. of Singapore, comprises an area of about 659 square miles. It is one of the oldest European settlements in the East, having been taken possession of by the Portuguese in 1511, and held by them till 1640, when the Dutch drove them out. In 1795 it was captured by the British, and retained till 1818, when it was restored to the

Dutch; it finally became a British possession, in pursuance of the treaty with Holland, 17 March, 1824, being exchanged for the British settlements in Sumatra.

Aggregate trade, 1908 \$8,853,068
(Including tapioca, \$1,473,423; exported in 1908.)
Singapore, distant 8,700 miles; transit, 22 days.
Penang, 20 days; and Malacca, 23 days.

THE FEDERATED MALAY STATES.

These States are situated on the mainland of the Malay Peninsula, and are closely connected with the Straits Settlements; they consist of the States of Perak, Selangor, Negri Sembilan, and Pahang, which have by treaty (1895) renewed their engagements with the British Government, and are administered under the advice of a British Resident General, who controls the Residents subject to the instructions of the High Commissioner, who is also Governor of the Straits Settlements.

The first three States are on the west coast, and extend from the border of Province Wellesley to that of the independent State of Johore. Pahang is on the east coast. All are governed by their native rulers under the above-mentioned control.

There are 589 miles of railway all constructed from revenue, including the Johore State Railway (120½ miles), which was opened for traffic on July 1, 1909, thus establishing through communication between Penang and Singapore. There are 2,036 miles of road, and 732 miles of bridle-paths, while the principal rivers are navigable for small boats. The chief export and source of revenue is tin, of which about seven-tenths of the world's supply is produced. Coffee, coconuts, sugar, rice, and rubber are extensively cultivated. The climate is very uniform, and may be described as hot and moist. There is no well-marked dry season, and the rainfall in the low country is about 95 inches. The average maximum shade temperature is 90°, and the minimum 70°.

The States maintain a highly efficient regiment of Sikh troops (the Malay States Guides), and are policed by a mixed force of Indians and Malays, officered by Europeans.

HONG KONG.

The Crown Colony of Hong Kong consists of an island situated off the south-eastern coast of China, at the mouth of the Canton River, in 22° 9'—22° 17' N. lat. and 114° 5'—114° 18' E. long., and of a portion of the mainland.

Hong Kong was first taken possession of by Great Britain in January, 1841, and was formally ceded by the Treaty of Nankin in 1842, British Kowloon being subsequently acquired by the Peking Convention of 1860; and the "New Territories," being the southern part of the Kwangtung province, by a lease signed June 9, 1898. It is a military and naval station for the protection of British commerce. The island is about 11 miles long and from 2 to 5 miles broad, with an area of rather more than 29 square miles; the whole colony comprises an area of about 400 square miles. The island lies close to the mainland, being separated at one point by a narrow strait (Lyceomoon) not more than a quarter-mile wide. The city of Victoria lies along the northern shore of the island, facing the mainland; and between the mainland and the city is the harbour, which is one of the finest in the world, with a water area of some 10 square miles. The port is free, and is fortified. It possesses excellent docks, capable of holding the largest vessels for the purposes of repair. There is a considerable ship repairing and construction industry. Shipping entered (1907) 18,013,307 tons; (1908) 17,323,965 tons.

The island is broken in shape and mountainous, the highest point being Victoria Peak, which is about 2,000 feet high. The Peak District is a favourite place of residence, and is reserved for Europeans. The hot season lasts from May to October. During the winter months, from November to March, the climate is cooler, drier, and more invigorating. The thermometer ranges from a minimum of 32° in February to a maximum of 93° in August. The average annual rainfall is 85 in., of which not less than 70 in. are received between May and September, when the S.W. monsoon prevails.

Hong Kong is the centre of a vast trade in many kinds of produce, chiefly opium, sugar, flour, oil, amber, cotton, ivory, betel, sandalwood, rice, tea, woollens, silks, salt, &c.

The population of the colony in 1908 was 421,499, of whom 401,461 were Chinese. The white residents, including naval and military, numbered 20,038.

Much encouragement is given by the Government to education in the colony. In 1908 there were 73 schools subject to Government supervision, attended by 6,178 pupils. A University is about to be established.

Hong Kong is a Crown colony, and its government is administered by a Governor, aided by an Executive Council of 8 members, together with a Legislative Council of 14 members, including himself and a representative from the Chamber of Commerce. There is also a Sanitary Board, partly elected, which controls all sanitary measures.

WEIHAIIWEI.

The territory of Weihaiwei was leased to Great Britain by China by a convention made on the 1st day of July, 1898, and lies in latitude 37° 30' N., longitude 122° 10' E. It is situated in the Chinese province of Shantung, and comprises the island of Liu Kung, all the islands in the Bay of Weihaiwei, and a belt of land 10 English miles wide along the entire coast-line, with a total area of about 285 square miles, and an estimated population of 150,000, in which are included 4,000 resident on the island of Liu Kung. In addition to the leased territory there is a sphere of influence which comprises that portion of the province of Shantung lying east of the meridian 121° 40'—an area of 1,500 square miles. The winter is cold, but dry and bracing. The summer heat is not excessive, and the rainfall is, as a rule, small.

The Government is administered by a Commissioner, who discharges his functions under the Weihaiwei Order in Council of 24th July 1901, by which he is empowered to make ordinances, subject to the approval of the Secretary of State for the Colonies, for the administration of the territory, and provision is made for a High Court, in which all jurisdiction, civil and criminal, is vested, subject to an appeal to the Supreme Court of Hong Kong, and for District Magistrates' Courts. The village communities are administered through their headmen. Weihaiwei is a port of call for steamers running to and from

the North of China, and there is regular steam communication with the port of Shanghai.

Commissioner, Sir J. H. Stewart Lockhart, K.C.M.G.
Sec. to Government and Magistrate, R. Walter.
District Officer and Magistrate, R. F. Johnston.
Medical Officers, H. Hickin, M.B.; W. M. Muat.

BORNEO.

Borneo was discovered by the Portuguese in 1521, and is situated in the Eastern Archipelago, extending from lat. $7^{\circ} 4' N.$ to $4^{\circ} 10' S.$ and from long. $108^{\circ} 50' E.$ to $119^{\circ} 20' E.$ It is about 850 miles in length and 600 in breadth, and contains an area of 280,000 square miles, divided by the equatorial line into two nearly equal portions. The population is probably about 1,246,000, consisting chiefly of Dyaks, Malays, Kyans, Papus or Negritos, Chinese, Bajangs, Dusuns, Musuts and Bugis (the aboriginal Celebes). Rather more than two-thirds of the island is now included within the Dutch possessions in the East Indies. The remainder of the island is under British protection.

THE BRITISH NORTH BORNEO COMPANY.

The territory of British North Borneo occupies the northern part of the island of Borneo, with a total area of about 32,000 square miles, and a coast line of over 900 miles. The population is about 175,000, consisting mainly of Mohammedan settlers on the coast, and aboriginal tribes inland, with some Chinese traders and artisans. The interior is mountainous, Mount Kinabalu being 13,700 feet high, and is densely timbered.

The chief town is Sandakan, on the north-east coast. The appointment of the Governor is subject to the approval of the Secretary of State. For administrative purposes the whole district is divided into ten provinces. The laws are based on the Indian codes of criminal and civil procedure, amended and adopted by local proclamations. There is an Imam's Court for Mohammedan law.

	1906.	1907.	1908.
Revenue	\$396,186	\$1,139,554	\$1,220,675.95
Expenditure	497,745	583,325	748,583.77
Exports	4,857,943	4,332,973	4,612,841
Imports	2,988,976	2,921,100	2,754,788

The chief products are timber, tobacco, sago, rice, gums, gutta-percha, coco-nuts, rattans, and all varieties of jungle produce. The country is suitable for the cultivation of sugar, tapioca, rubber, pepper, and gambier on a large scale. Coal and gold have been found. Exports of leaf tobacco, (1906) \$2,943,645; (1907) \$2,459,122; (1908) \$2,772,172. A railway has been constructed from Weston to Beaufort (20 miles) where it connects with the line from Jesselton (56 miles), which has been extended to Tenom (33 miles). A further extension has been completed to Melalap (10 miles).

There is a native military force of 650 men under European officers, with one machine and four mountain guns. There is a Church of England and a Roman Catholic mission, and churches at Sandakan, Kudat, and Jesselton.

List of Officers (British North Borneo).

BRUNEI.

Sultan, H. H. Mohamed Jemal-ul-alam, *sue.* 11 May, 1906.

A native State on the west coast of the island of Borneo. The total area exceeds 3,000 square miles. The territory was placed under British protection in 1888, and on Jan. 1, 1906, the Sultan accepted by treaty a British Resident to assist and advise him in the administration. The chief town, Brunei, has a population of nearly 10,000, and is built entirely on the water, communication being possible only by boat.

High Commr., The Governor of the Straits Settlements.

British Resident, Brunei, M. S. H. McArthur (J. Fortescue Owen, *acting*).

Brunei is 5 hours by steamer from Labuan.

SARAWAK.

Rajah, H. H. Charles Johnson Brooke, G.C.M.G., born 3 June, 1829; *sue.* his uncle, the Rajah Sir James Brooke, 11 June, 1868; *m.* 1869, Margaret Alice Lily de Windt, of Highworth, Wilts.

Heir, Charles Vyner Brooke (H. H. the Raja Muda), b. 26 Sept., 1874 (administering the Government during the absence of H. H. the Rajah).

Resident, 1st Div., Hon. H. R. A. Day \$6,000 |

Resident, 3rd Division (vacant) |

Treasurer, Hon. P. H. Dallas 6,000 |

Commandant, Capt. Stuart Cunyngname 2,640 |

Postmaster-General, C. C. Robison 4,200 |

Commissioner of Public Works and Surveys, etc., H. F. Carew-Gibson, A.M.L.C.E. £600 |

Principal Medical Officer, A. J. G. Barker \$4,800 |

The Sarawak territory lies on the west coast of Borneo, with a seaboard of 400 miles, an area of about 50,000 square miles, and a population of about 600,000, composed of various races. The government of this district was obtained in 1842 from the Sultan of Borneo by the late Sir James Brooke, who became well known as Raja Brooke of Sarawak, and was uncle of the present Raja. Other concessions have been made in 1861, 1882, 1885, 1890, and 1904, when the Limbang River was obtained. The Lawas River was purchased from the B. N. Borneo Co. in 1906. The country produces sago, gutta-percha, india-rubber, beeswax, birds'-nests, gold, silver, diamonds, antimony, quicksilver, tobacco, rice, rattans, coal, gambier, and pepper. Gold exports, (1906) \$415,470; (1907) \$1,513,800; (1908) \$1,130,760.

	1906.	1907.	1908.
Revenue	\$1,327,800	\$1,441,194	\$1,259,482.10
Expenditure	1,262,169	1,359,273	1,243,643.30
Imports	5,174,280	5,172,004	4,467,988
Exports	6,883,704	6,177,419	5,732,733

CHIEF TOWN, Kuching. Distance from London, 8,700 miles; transit, 25 to 30 days. Telegrams sent by post from Singapore: steamer leaves Singapore for Kuching and Kuching for Singapore every Tuesday arriving on Thursdays.

THE Imperial Dominions in North America include the whole of the northern part of that continent, excepting Alaska, and the small islands of St. Pierre and Miquelon, in the Gulf of St. Lawrence, and extend from the United States northern boundary to the Arctic Ocean. From a physical point of view the whole region may be divided into an eastern and a western division, the Red River Valley, in long. 97° , forming the separating line. The eastern division comprises three areas, presenting radically distinct aspects:—(1) The south-eastern area, bounded by the line of the Gulf and River St. Lawrence, from Belle Isle to Quebec, thence by a line running directly south to Lake Champlain, which is generally hilly, and sometimes mountainous, with many fine stretches of agricultural and pastoral lands. (2) The southern and western area, presenting, in the main, a broad, level, and slightly undulating expanse of generally fertile country, with occasional step-like ridges or rocky escarpments. The main hydrographical feature is the chain of lakes, with an area of 150,000 square miles, contributing to the great river system of the St. Lawrence. (3) The northern area, embracing nearly two-thirds of the Dominion, with an average elevation of 1,000 feet above the level of the sea, pre-eminently a region of waterways, and including the great Laurentian mountain range. In this area are found the other great river systems, the Nelson and the Mackenzie. The western division referred to may also be said to possess two areas equally distinct in character. The first stretches from the Red River Valley to the Rocky Mountains. Here, between lat. 49° and 54° , is the great Prairie Region, rising to the west in three terrace-like elevations, the lowest of which is 700 feet, and the third about 3,000 feet above the level of the sea. North of the 54th parallel the country passes again into forest. The second area, from the western edge of the Prairie to the Pacific coast, is a distance of 400 miles, and contains the Rocky Mountains and the Gold and Cascade Ranges, whose summits are from 4,000 to 16,000 feet high, the country being on the whole densely wooded. The climate in the eastern and central portions of the Dominion presents greater extremes of cold and heat than in corresponding latitudes in Europe, but in the south-western portion of the Prairie Region and the southern portions of the Pacific slope the climate is milder. Spring, summer, and autumn are of about seven to eight months' duration, and the winter four to five months. The country possesses great mineral wealth; coal, gold, silver, copper, nickel, lead, and asbestos are produced, and Canada is the principal oil-producing country in the British Empire; while iron, phosphates, salt, graphite, &c., occur; the total value of the minerals produced in 1908 was over \$87,000,000. The soil is generally fertile; all the products of the temperate zone are cultivated, and Canada, with its vast wheat-growing belt in the provinces of Manitoba, Alberta and Saskatchewan, justifies its claim to be "Britain's Granary."

THE DOMINION OF CANADA.

The Dominion of Canada includes the various Provinces of North America formerly known as Upper and Lower Canada (now Ontario and Quebec respectively), New Brunswick, Nova Scotia, Prince Edward Island, British Columbia, and the territories of the Hudson Bay Company, now styled Manitoba, Saskatchewan, Alberta, the North-West Territories, and the Yukon Territory; in fact, the whole of British North America except Newfoundland and Labrador. This territory, nearly as large as Europe, stretches from the Atlantic to the Pacific Ocean, and is estimated to contain a total area of 3,745,574 square miles, and an estimated population of 7,185,000 (31 March, 1909). The descendants of the French colonists reside chiefly in the Province of Quebec, where, out of a total population (1901) of 1,638,898, 1,429,260 are Roman Catholics, the majority of whom still very generally use the French language. A Religious Census of Canada was taken in 1901, and the numbers were:—Roman Catholics 2,229,600, Methodists 916,886, Presbyterians 842,442, Church of England 680,620, Baptists 316,477, Congregationalists 28,293, and Lutherans 92,524. Canada possesses an Active Militia numbering 54,097 men (including infantry, cavalry, and artillery), and a reserve estimated at 1,030,000. The table on page 545 shows the expansion of the revenue, particulars being given for 1868, 1878, and 1888-1909. The revenue has increased from \$13,687,928 in 1867-8 to \$85,093,404 in 1908-9, and there has been a total net surplus since Confederation of \$131,391,740. The population has increased from 1,538,500 in 1841 to 5,371,315 in 1901, and 7,185,000 (estimated 31st March, 1909), the intermediate enumerations being (1851), 2,380,988; (1861), 3,182,418; (1871), 3,635,024; (1881), 4,324,810; and (1891), 4,833,239. In 1881 there were 35 cities and towns of 5,000 inhabitants and upwards, having a total population of 660,040; in 1901 there were 62 of such cities and towns, and their total population was about 1,330,000. Montreal has a population of 476,000 (with suburbs), and Toronto, the capital of Ontario, has over 335,000 inhabitants (including suburbs). Ottawa, the political capital, has in 1909, 90,000 inhabitants (100,000 including suburbs); Winnipeg, in Manitoba,

from 241 in 1871, has grown to 42,300 in 1901, and now is estimated to exceed 125,000. Vancouver, in British Columbia, which had no existence in 1885, numbers over 26,000. The city of Dawson, the "business centre" of the Klondyke gold region, was a barren waste in 1897, and in 1901 had a population of 9,142. The general rate of increase throughout the Dominion in the last decade was a little over 11 per cent.

Canada was originally discovered by Sebastian Cabot in 1497, but its history dates only from 1534, when the French took possession of the country. The first settlement (Quebec) was founded by them in 1608. In 1759 Quebec succumbed to the British forces under General Wolfe, and in 1763 the whole territory of Canada became a possession of Great Britain by the treaty of Paris of that year. Nova Scotia was ceded in 1713 by the Treaty of Utrecht, the Provinces of New Brunswick and Prince Edward Island being subsequently formed out of it. British Columbia was formed into a Crown colony in 1858, having previously been a part of the Hudson Bay Territory, and was united to Vancouver Island in 1866. By the British North America Act, passed in 1867, the Provinces of Canada (Ontario and Quebec), Nova Scotia, and New Brunswick were united under the title of DOMINION OF CANADA, and provision was made in the Act for the admission at any subsequent period of the other provinces and territories of British North America. In 1870 the Province of Manitoba was formed, and, with the remainder of the Hudson Bay Territory, then known as the North-West Territories, admitted into the Dominion. In 1905 the Provinces of Saskatchewan and Alberta were created, having previously formed part of the North-West Territories. British Columbia was admitted to the Dominion in 1871, and Prince Edward Island in 1873. By chaps. 3 and 27 of the Acts of 1905, the four provisional districts of Alberta, Assiniboia, Saskatchewan, and Athabaska were formed into the two Provinces of Alberta and Saskatchewan, and were admitted into the Dominion on the 1st Sept. 1905. Yukon was made a separate territory by Chap. 6, Acts of Canadian Parliament 1898. Newfoundland remains a separate colony.

OTTAWA is 3,540 miles from London; letters are six to nine days in transit. Telegraph charges, from 1s. to 3s. 2d. per word.

POLITICAL CAPITAL and Seat of Government, Ottawa. Pop. (1909), 85,000.

GOVERNMENT.

Governor-General and Commander-in-Chief, Right Hon. the Earl Grey, P.C., G.C.M.G., G.C.V.O. (appointed 1904 for five years, and extended for one year)	£10,000
Adju-tant-General, Maj. G. F. Trotter, M.V.O., D.S.O., G. Gds.; Viscount Lascelles; Capt. A. F. Fife, K.R.R.C.	205
Governor-General's Secretary & Military Sec., Major the Earl of Lanesborough, M.V.O., Coldstream Guards	750
Comptroller of the Household, Clement Edward Gresham Leveson-Gower.	
Private Secretary, Arthur F. Sladen.	

The executive government and authority are vested in the King, and exercised in his name by the Governor-General, aided by a Privy Council. The legislative power is a Parliament, consisting of an Upper House, styled the Senate, and a House of Commons. The Senate consists at present of 87 members, distributed between the various provinces thus: 24 for Ontario, 24 for Quebec, 10 for Nova Scotia, 10 for New Brunswick, 4 for Prince Edward Island, 3 for British Columbia, 4 for Manitoba, 4 for Alberta, and 4 for Saskatchewan. The members of the Senate are appointed for life by the Crown on the nomination of the Ministry for the time being; each nominee must be thirty years old, a resident in the province for which he is appointed, a natural-born or naturalised subject of the King, and the owner of a property qualification amount-

ing to \$4,000. The House of Commons is chosen every five years at longest, and the newly-elected Parliament consists of 221 members; 86 being elected for Ontario, 65 for Quebec, 18 for Nova Scotia, 13 for New Brunswick, 10 for Manitoba, 7 for British Columbia, 4 for Prince Edward Island, 7 for Alberta, 10 for Saskatchewan, and 1 for Yukon. The House of Commons is also composed of natural-born or naturalised subjects of the King; no property qualification is necessary, and its members are elected upon a very wide suffrage. For electoral purposes each province is divided into districts, each of which returns a member on a majority of votes taken by ballot. The members of the House themselves elect their Speaker, and twenty, including the Speaker, form a quorum. Each province has also a separate Legislature and

administration, with a Lieutenant-Governor, appointed by the Governor-General, at the head of the Executive. Justice is administered, as in England, by judges, police magistrates, and justices of the peace, of whom the first named are appointed by the Governor-General, for life, from among the foremost men at the Bar in the several provinces. The highest court is the Supreme Court of Canada, composed of a Chief Justice and five puisne judges, and holding three sessions in the year at Ottawa. The only other Dominion Court, viz., the Exchequer Court of Canada, is presided over by a separate judge, and its sittings may be held anywhere in Canada. The Provincial Courts include the Court of Chancery, Court of King's Bench, Court of Error and Appeal, Superior Courts, County Courts, General Sessions, and Division Courts. The duties of coroners are generally analogous to those in force in England, as are also methods of civil and criminal procedure, while trial by jury prevails.

TRADE WITH UNITED KINGDOM.

The principal articles of trade between Canada and the U.K. in 1909 were as follows:—

Domestic Exports to United Kingdom:

Animals.....	\$10,286,449	Fish.....	\$2,579,627
Bacon.....	8,205,107	Fruit (Apples).....	2,622,233
Butter.....	2,273,484	Hams.....	418,868
Cheese.....	20,263,166	Leather.....	2,310,508
Corn: Wheat.....	45,161,632	Pulp for Paper.....	2,024,720
Oats.....	975,224	Skins & Furs.....	2,233,534
Pease.....	522,165	Wood & Timber.....	9,845,422
Flour.....	4,532,192		

Domestic Imports from United Kingdom:

Cottons.....	\$8,278,955	Flax, Hemp & Jute Manufs.....	\$1,952,971
Earthen & China Ware.....	1,065,943	Jute Cloth, Yarn & Canvas.....	1,033,185
Hats.....	1,258,388	Leather Manufs.....	541,934
Iron and Steel Manufactures.....	8,426,695	Spirits and Wines.....	1,464,319
		Woolens.....	13,021,495

HIGH COMMISSIONER IN LONDON FOR THE DOMINION OF CANADA (*Offices*, 17 Victoria Street, London, S.W.): **Ed. Hon. Lord Strathcona** and **Mount Royal**, G.C.M.G., G.C.V.O., LL.D.

Permanent Secretary, W. L. Griffith.

Immigration Agent in London, J. Obad Smith, 17-12, Charing Cross, London, S.W.

THE PROVINCE OF ONTARIO contains a total area of 222,000 q. miles, and a population of 2,167,978, according to the census of 1901.

The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of 106 members elected for four years (no property qualification being necessary), representing 102 electoral districts into which the Province is divided, but which differ from those sending members to the Dominion Parliament. The Executive Council consists of eleven members, eight of whom act as the Ministry of the Province, and 3 are without portfolio; the legislature meets every year at Toronto. The principal cities are Toronto, the capital of the Province, with great shipping interests on the Lakes, and the chief centre of industrial and commercial activity (population, 323,602); Hamilton, the "Birmingham of Canada" (52,550); Ottawa, the Federal capital, with a large lumber trade and woodenware manufactures (59,902); London (37,083); Kingston (18,043); Belleville (9,117); Chatham (9,075); Stratford (9,959); Guelph (11,406); St. Catharines (9,046); Brantford (16,613); St. Thomas (11,485); Windsor (12,154).

In 1908 the total area of cleared land was 14,132,061 acres, of which 9,621,683 acres were under crops, the total value of the land being \$671,552,218. The total area under pasture was 3,326,169 acres, with 338,255 acres of orchards and vineyards. Average production in bushels per acre: Fall wheat, 24.2; spring wheat, 15.5; barley, 28.5; oats, 34.8; rye, 16.5; peas, 18.7; corn, 73.8; buckwheat, 23.6; beans, 16.9; potatoes, 111; turnips, 347; hay (tons), 142. 1,177 cheese factories produced 116,695,642 lb. of cheese, valued at \$12,641,055, and 97 creameries made 9,895,109 lb. of butter (\$2,355,170). There were 726,471 horses, 2,824,859 cattle, 1,143,898 sheep, 1,818,763 pigs, and 12,285,613 poultry in 1908. Fruit is grown on an extensive scale; there are vineyards and peach orchards of 50 or 60 acres in extent, and innumerable apple orchards. The Ontario Agricultural College at Guelph supplies a general education, together with a technical training in agriculture. The students meet part of their expenses by labouring on the experimental farm, the annual balance of cost for board, washing, and tuition being from £20 to £25 for natives and from £20 to £30 for students from other parts. Free grants of land are obtainable in this Province, and improved farms can also be bought at advantageous rates.

Lieutenant-Governor, His Hon. Col. John

THE PROVINCE OF QUEBEC contains an area estimated at 346,928 square miles, and a population (census 1901) of 1,620,974.

The Government of the Province is vested in a Lieutenant-Governor and a Legislative Council, consisting of 24 members appointed for life, and a Legislative Assembly of 74 members elected for five years to represent the same number of electoral districts in the Province. The principal cities are Quebec (population, 73,000), the capital of the Province, with a large export timber trade, and the great seaport town of Canada; and Montreal (population, 389,827), the commercial metropolis, and the principal centre of the grain export trade north of New York, situate at the confluence of the Ottawa and St. Lawrence Rivers. Other important cities are Three Rivers (8,334), Hull (17,000), Sherbrooke (15,000), St. Hyacinthe (10,016), Lévis (7,301). Ocean-going steamers ascend the St. Lawrence as far as Montreal. In 1905 1,228,200 tons of ocean-going shipping entered, and 1,256,930 tons cleared at Montreal.

The lumber industry is still by far the most important trade, but the settled portion of the country has been too much denuded of wood, and the provincial Government has found it necessary to organise an effective service of rangers to prevent the destruction of trees by forest fires. The forest lands cover an area of over 200,000,000 acres, of which 45,000,000 are under

licence to cut timber. The wood-pulp industry is assuming great importance; several large factories have recently been built, and the value of the output, which was only \$800,000 at the last census, is now probably ten times that amount. Improved farms may often be obtained in the eastern townships, largely occupied by settlers from Great Britain, at from £4 to £6 per acre, including dwelling-house, outbuildings, and fencing; while unimproved lands may be bought from the Government at from 20 to 60 cents per acre, and the purchase-money paid in five instalments. The area of land subdivided for the purpose of settlement unsold on 30 June, 1908, was 6,404,642 acres. In 1906 there were 1,392 cheese factories, 627 butter factories, and 736 butter and cheese factories combined.

Quebec is 2,634 nautical miles from London.

NOVA SCOTIA, a Province of the Dominion, is a peninsula between 43° 30'–47° N. lat. and 60°–66° 15' W. long., and is connected with New Brunswick by a low fertile isthmus about thirteen miles wide. It comprises an area (with Cape Breton Island) of 20,600 square miles, one-fifth part of which consists of lakes, rivers, and inlets of the sea; of the whole, about 10,000,000 acres are fit for tillage—that is, over half the entire area—and the soil in the western half of the Province, particularly in the Annapolis Valley and around the Basin of Minas, is unsurpassed for fertility, owing to the rich marine deposits left on the shore-land by the tides of the Bay of Fundy. The climate is delightful, and the winter is not so cold as in other parts of the Dominion. The population of the entire Province in 1901 was 459,574. In 1908 there were 5,064,968 acres of land occupied (2,219,573 improved), of which 892,900 acres were under crop, 1,282,050 acres in

pasture, and 54,051 acres in gardens and orchards, the remainder being woodland. Hay is the most important crop of the Province, occupying one-fourth of all the improved land, and yielding over 1,000,000 tons. Fruit is extensively cultivated, and Nova Scotia apples are claimed to be the best in the world (2,000,000 bushels in 1908), the principal district being the Annapolis Valley. Halifax, the capital, is one of the terminals of the Intercolonial Railway, and has a magnificent harbour covering ten square miles, which is one of the principal winter ports of Canada, and the *entrepôt* of a large trade with the West Indies and South America, with a dockyard and a dry dock which can accommodate the largest vessels afloat.

The coal deposits are extensive and of good quality 6,299,282 gross tons were produced in 1908; iron ores are plentiful, and extensive manufactures of iron and steel are carried on at Sydney, Cape Breton; gold mines are being profitably worked. The principal fisheries are upon the eastern coast, and the largest catches in value made are cod, lobster, mackerel, haddock, herring, halibut and salmon. The manufacturing interest is growing. There is a Government agricultural college and experimental farm near Truro for men and women. Improved farms of 100 to 250 acres, with house and buildings, may be obtained at from £100 to £1,000, whilst the Government offer uncleared Crown lands at \$80 per 100 acres, and 80 cents per acre for any additional quantity. Hunting, shooting and fishing abound; among wild animals there are bears, foxes, moose-deer, otter, mink, sable, muskrat, hares, raccoons, and squirrels; and among the feathered game are the woodcock, plover, snipe, partridges, ducks, geese, and curlew.

Nova Scotia has a Provincial Government, administered by a Lieutenant-Governor, aided by an Executive Council, a Legislative Council of 12 members, and a Legislative Assembly of 38 members.

CAPITAL, Halifax (population, 50,000). Other towns—Dartmouth (6,000), Truro (7,000), Windsor (3,500), Sydney (26,000), Sydney Mines (5,000), Glace Bay (17,000), N. Sydney (4,646), Pictou (3,300), New Glasgow (7,000), Annapolis Royal (1,200), Yarmouth (7,500), Amherst (9,000), and Lunenburg (3,000).

Agent-General for Nova Scotia in London, John Howard, 57A Pall Mall, S.W.

Halifax is 2,463 miles from Liverpool.

CAPE BRETON ISLAND, formerly a distinct Colony, now incorporated with Nova Scotia, contains an area of 3,125 square miles, with a population of 97,190 inhabitants. The chief town is Sydney, on the eastern coast, having valuable collieries in the neighbourhood. The Inter-colonial Railway connects the island with the mainland.

NEW BRUNSWICK is situated between 45°—48° N. lat. and 63° 47'—69° W. long., and comprises an area of 27,985 square miles, with a population in 1901 of 331,120. It was first colonised by British subjects in 1761, and in 1783 by disbanded troops from New England. The chief industrial pursuits arise from the produce of the forests and the fisheries. Coal is found; also silver, lead, antimony, copper, iron, manganese, and other valuable minerals in considerable quantities. According to the census of 1891 the occupied land amounted to 4,471,250 acres, of which 1,509,790 acres were improved, 1,018,704 acres being under crop, 479,607 acres in pasture, and 11,479 acres devoted to gardens and orchards. The value of agricultural produce in 1900 was \$12,873,480. Free grants of land are offered, and settlement encouraged. Improved farms are obtainable at reasonable rates. Sport of all kinds is abundant. The fisheries include salmon, cod, mackerel, herring, and shad, and were in 1905 of the value of \$4,671,084, ranking second in importance to those of Nova Scotia. St. John is one of the principal winter ports of Canada, and is connected by the Inter-colonial Railway with Montreal.

The Provincial Government of New Brunswick is administered by a Lieutenant-Governor, assisted by an Executive Council, and a Legislative Assembly of 46 members elected by the people.

CAPITAL, Fredericton. Pop. (1901), 7,117; chief cities, St. John (40,711) and Moncton (9,026).

<i>Lieutenant-Governor, His Hon. Lemuel John Tweedie, K.C., LL.D.</i>	\$9,000
<i>Premier and Attorney-General, Hon. J. Douglas Hazen</i>	2,100

Agent-General in London, Hon.

, Norfolk House, Laurence Pountney Hill, Cannon Street, E.C.

Fredericton is 2,748 miles from Liverpool *via* Cape Race, or 2,535 miles *via* Bellefleur and Chatham, N.B.

MANITOBA, formerly the Red River Settlement, was formed into a distinct Province in 1870, and

admitted into the Confederation on 15th July in the same year. It is situated in about the centre of the continent, between 49°—53° N. lat. and 95°—101° W. long. (these parallels and meridians forming its boundaries). Its area is 72,864 square miles. Its population, census 1906, was 365,688. The Assiniboine and Red Rivers intersect the Province, and the soil is fertile and productive; emigration is invited and encouraged, and liberal grants of land are made to settlers. In 1908 4,987,498 acres were cultivated, of which 2,850,640 acres were under wheat, and the crops were 49,252,539 bushels of wheat, 44,686,043 oats, 18,135,757 barley, and 74,701 flax, rye, and peas. The main line of the Canadian Pacific, the Canadian Northern and Grand Trunk Pacific Railways traverse Manitoba, and there are several other lines in operation. The Red and Assiniboine Rivers are also navigable for a considerable course in the Province.

The Government of the Province is administered by a Lieutenant-Governor, assisted by an Executive Council of 6 members and a Legislative Assembly of 41 members.

CAPITAL, Winnipeg. Population (1909), 130,000. Other towns, Portage la Prairie, pop. 5,500; and Brandon, pop. 11,000; Neepawa, Minnedosa, Morden, Deloraine, Virden, Carberry, Boissevain, Carman, Dauphin, Emerson, Gretna, Killarney, Manitou, St. Boniface, Selkirk, and Souris.

<i>Minister of Education and Municipal Commissioner, Hon. G. R. Coldwell</i>	1,000
<i>Public Works, Hon. Robert Rogers</i>	1,000
<i>Provincial Secretary, Hon. J. H. Howden</i>	1,000
<i>Chief Justice, Hon. Joseph Dubuc</i>	1,400
<i>Do., Court of Appeal, Hon. H. M. Howell</i>	1,500
<i>Puisne Judges (Appeal), Hons. A. E. Richards, W. E. Perdue, J. D. Cameron, each £1,400; (K.B.), Hons. T. G. Mathers, D. A. Macdonald, T. L. Metcalfe</i>	each 1,200

THE PROVINCE OF SASKATCHEWAN was formed, by an enactment of the Parliament of Canada taking effect September 1, 1905, out of the territory formerly known as the North-West Territories. Saskatchewan covers the area included between longitude 102° and 110° W. of Greenwich, with a small extension east of 102° at the south-eastern corner, and between latitude 49° and 60° N. The Surveyor-General of Canada estimates the Province to contain over 250,000 square miles, of which 86,000 square miles are land suited for grain-growing, 32,000 are land requiring irrigation, 106,387 are land suitable for ranches or other description of farming, and 27,000 square miles are water.

The census of 1901 showed the number of people within the area as 91,460, whilst the quinquennial census taken on June 24, 1906, showed the population to have increased to 257,763. The Province is being rapidly opened up by the means of railways, and is now traversed by the C.P.R. and the Canadian Northern Railway, while the Grand Trunk Pacific will cross the Province from east to west, with a network of branches. Several other railway projects are

under consideration for opening up communication between the Province and the deep-water ports on Hudson's Bay, by which it is expected that for a number of months in each year the distance between Saskatchewan and European markets will be reduced almost to that of New York, the greater part of which will be by water.

The principal products of Saskatchewan are grain and cattle, and Government encouragement is being given to the dairy industry. In 1898 there were but 276,253 acres under wheat, whilst in 1907 there were 2,374,058. In 1898 4,780,440 bushels were produced; in 1908 the yield increased to 45,000,000 bushels.

The range country in the Province is of limited extent, being almost entirely confined to the south-western corner, adjoining the range country of Southern Alberta. The northern two-thirds of the Province is known only to the traders of the Hudson's Bay Company and the Indian missionary.

The Government is vested in the Lieutenant-Governor, aided and advised by an Executive Council of four members chosen from time to time by the Lieutenant-Governor. Following the regular procedure of similar British institutions, the members of the Executive Council seek reelection to the Legislative Assembly, in which manner the fullest responsibility to the people is secured. The Province is divided into forty-one electoral districts, each of which is represented in the Legislative Assembly by one member.

The Supreme Court consist of a Chief Justice and a puisne judges; it has original and appellate jurisdiction. There are 8 judicial districts, each presided over by a District Court Judge, who also acts as Surrogate Court Judge for his district.

Rural educational areas, approximating twenty-five square miles in extent, are established as school districts, and their affairs each managed by an elective board of trustees.

The climate has a wide range—from 90° to -40° at its greatest extremes. Rainfall is not excessive, and there is an unusual amount of sunshine at all periods of the year.

CAPITAL, Regina.

Lieutenant-Governor, His Honour Amedée Emmanuel Forget	\$9,000
Premier, President of Council, and Commissioner of Public Works, Hon. Walter Scott	6,000
Attorney-General, Hon. Alphonse Turgeon	5,000
Provincial Treasurer and Commissioner of Education, and Commissioner of Railways and Telephones, Hon. J. A. Calder	5,000
Provincial Secretary and Commissioner of Agriculture, Hon. W. R. Motherwell	5,000
Clerk of the Executive Council, J. A. Reid	3,000
Clerk of the Legislative Assembly, S. S. Page	750
Chief Justice, Hon. E. V. Wetmore	
Puisne Judges, Hon. H. W. Newlands, C. Johnstone, J. E. P. Prendergast, and J. H. Lamont	

THE NORTH-WEST TERRITORIES of Canada comprise the present unorganised part of British North America lying to the north of the Provinces of Quebec, Ontario, Manitoba, Saskatchewan, and Alberta. Their administration is entrusted to the officers of the Royal North-West Mounted Police, the Comptroller of the Force, Lieut.-Col. Fred. White, C.M.G., being also Commissioner of the Territories, with full executive, legislative, and administrative authority. The Territories for nearly 250 years have been under the almost absolute control of the Hudson's Bay Company,

but of recent years the Dominion of Canada has taken an increasingly active part in the administration of the affairs of the country. Several expeditions to Hudson's Bay with a view to ascertaining the feasibility of the navigation of the Bay and Straits have been made, and at several points on the shores of the Bay police posts are maintained, being visited from time to time by an exploring ship sent into the Bay for that purpose.

THE PROVINCE OF ALBERTA was erected into a Province by an enactment of the Parliament of Canada, taking effect Sept. 1, 1905, out of the territory acquired from the Hudson's Bay Company, and until the date above mentioned it formed part of the North-West Territories. The total area of the Province is about 253,000 square miles, including about 2,500 square miles of water, and the population (1905) is estimated at 300,000. The Government is vested in a Lieutenant-Governor and Legislative Assembly composed of forty-one (41) members, elected for five years, representing 39 electoral districts into which the Province is divided. Cities of Edmonton and Calgary have two members each. The Executive Council consists of four members.

Alberta is rapidly developing into a grain-producing territory, and where, twenty years ago, there existed a wilderness with scattered bands of primitive Indians and strong detachments of North-West Mounted Police for the sole inhabitants, there is now a succession of wheat fields, homesteads, villages, and towns. While settlers from the U.S., Eastern Canada, and the British Isles arrive in annually increasing numbers. The total area in crops, year 1908, 837,650 acres. Spring wheat, 212,677 acres, yielding 4,001,503 bushels; winter wheat, 104,956 acres, yielding 3,093,422 bushels; oats, 431,145 acres, yielding 15,922,974 bushels; barley, 77,876 acres, yielding 1,649,164 bushels. The Provincial Government operate 24 creameries, where they manufacture butter. Free homesteads are available for thousands of settlers in desirable localities.

The principal cities are Edmonton, Wetaskiwin, Calgary, Medicine Hat, Lethbridge, and Strathcona.

CAPITAL, Edmonton.

Lieut.-Governor, His Hon. G. H. V. Bullyea	\$9,000
Premier and President of the Council, Provincial Treasurer, and Minister of Education, Hon. A. C. Rutherford	6,000
Public Works, Hon. W. H. Cushing	5,000
Attorney-General, Hon. C. W. Cross	5,000
Provincial Secretary and Minister of Agriculture, Hon. W. T. Finlay	5,000
Clerk of the Executive Council, M. J. Macleod	800
Chief Justice, Hon. Arthur L. Sifton	
Puisne Judges, Hon. Horace Harvey, D. L. Scott, C. A. Stuart, and N. D. Beck	

THE PROVINCE OF PRINCE EDWARD ISLAND lies in the southern part of the Gulf of St. Lawrence, between New Brunswick and Cape Breton, that is to say, between 45°-47° N. lat. and 62°-64° 30' W. long. It is about 140 miles in length, and from 4 to 34 miles in breadth; its area is 2,200 square miles (about equal to that of the English county of Norfolk), and its population (census 1901) 103,259. The island was first settled by the French, who held it for many years as a fishing station. The British took it from them in 1745, but afterwards restored it; they seized it again, however, during the Seven Years' War (1756-1763), and compelled the

greater part of the French inhabitants to leave, and from that time it has remained British. The island is divided into three counties (King's, Queen's, and Prince), each of which elects to representatives. Its inhabitants are almost exclusively engaged in agriculture, considerable attention, however, being devoted to the fisheries and to the breeding of horses and sheep. There were (1897) 718,000 acres of improved land, of which 535,175 acres are under crops, 178,072 acres of pasture land, and 3,845 acres of gardens and orchards. The soil consists for the most part of a rich red loam, uniform in character and peculiarly suited to the growth of grasses. Nearly the whole of the land is now cleared, and improved farms can be bought at about 20 dollars an acre.

The Provincial Government is vested in a Lieutenant-Governor and an Executive Council, and a Legislative Assembly of 30 members elected by the people.

CAPITAL, Charlottetown, on the shore of Hillsborough Bay, which forms a good harbour, is distant from Liverpool 2,630 miles, transit about 8 days. Population, 12,080. Summerside (pop. 2,875) and Georgetown (pop. 1,060), on the east coast, are also ports of considerable size, and the centres of shipbuilding trade.

BRITISH COLUMBIA, Canada's Maritime Province on the Pacific Ocean, is the largest in the Dominion, its area being variously estimated at from 372,630 to 395,610 square miles. It is a great irregular quadrangle about 700 miles from north to south, with an average width of about 400 miles, lying between latitudes 49° and 60° N. It is bounded on the south by the Strait of Juan de Fuca and the States of Washington, Idaho and Montana, on the west by the Pacific Ocean and Southern Alaska, on the north by Yukon and Mackenzie Territories, and on the east by the Province of Alberta. From the 49th degree north to the 54th degree the eastern boundary follows the axis of the Rocky Mountains, and thence north to the 120th meridian.

British Columbia has very extensive coal measures, and a vast and compact area of merchantable timber; the mines have produced over \$299,000,000, and are still in the early stages of development; the fisheries produce an average annual value of \$7,500,000. Only one-tenth of the available agricultural and fruit lands are at present settled upon, and there are acres of pulpwood as yet unexploited. There are undeveloped deposits of magnetite and hematite iron and petroleum. The average annual yield of the industries is: minerals, \$25,800,000; lumber, \$12,700,000; fisheries, \$7,000,000; fruit farm products, \$7,500,000; and manufactures, \$12,000,000. The climate is healthful and temperate. The principal exports are fish, coal, gold, silver, minerals and timber. In 1908 3,558 sea-going vessels (8,116,225 tons) inward, and 2,793 (3,755,509 tons) outward, entered and cleared, while 19,163 coastwise vessels (5,568,941 tons) entered and cleared outward. There are 220 1,685 miles of railway in operation (mainly C.P.R.), and the Grand Trunk Pacific has commenced building its main line eastward from Prince Rupert.

The population of the Province is estimated at 230,000, exclusive of Indians and Asiatics.

CAPITAL of the Province, Victoria; population (1909), 40,000. Vancouver City, population, 25,000. New Westminster, 9,500; Nanaimo, 7,000; Rossland, 6,100; and Nelson, 6,500.

	1905-1906.	1906-1907.	1907-1908.

CANADIAN RAILWAYS.

THE GOVERNMENT RAILWAYS are the Intercolonial and the Prince Edward Island Railways. The length of the Intercolonial system is 1,447 miles. The main line extends from Montreal to Halifax, N.S., 837 miles; to St. John, N.B., 740 miles; to Sydney, Cape Breton, 990 miles; and to North Sydney, 983 miles. In addition, the Government owns and maintains the Windsor Branch Railway, from a point on the Intercolonial to Windsor, N.S., 32 miles, which is operated under lease. The Intercolonial was built in fulfilment of the express stipulations

of the British North America Act of 1857, confederating the Provinces of Nova Scotia, New Brunswick and Canada, in order to form a connected system of railway communication between these Provinces. In this work, there were absorbed the existing Nova Scotia Railway, and the European and North American Railway, the whole being consolidated under the present name in 1872. By leasing arrangements, it was extended to Montreal in 1893; the portion so leased being the 37½ miles from Ste. Rosalie Junction to Montreal. At Sydney and North Sydney, it connects by steamer with Newfoundland.

The Prince Edward Island Railway system, 267 miles, extends the whole length of the island, from Souris on the east to Tignish on the west, with certain branches. Connection is made by steamer, all the year round, with the Intercolonial, at Pictou from Charlottetown, and at Point de Chene from Summerside.

THE CANADIAN PACIFIC stretches across the entire continent, from St. John, N.B., to Vancouver on the coast of British Columbia, a total distance of 3,779 miles. (Headquarters, Montreal.)—The share capital amounts to \$202,566,566 and \$129,930,123 Debiture Stock. *Chairman*, Sir William C. Van Horne, K.C.M.G. *President*, Sir Thos. G. Shaughnessy, K.C.V.O. *Secretary*, W. R. Baker. The total length of the Canadian Pacific Railway system is 9,878 miles, in Canada, while the total mileage controlled both in Canada and the United States amounts to over 14,500 miles. The Company has large fleets of steamers both on Atlantic and Pacific. The distance from China, Japan, and the Pacific coast generally to Liverpool is from 1,000 to 1,200 miles less by the Canadian Pacific Railway than by other routes. European Headquarters: 62-65, Charing Cross, London, S.W.

THE GRAND TRUNK was originally formed in 1853 by an Act of the Legislature, and in 1893 a number of lines were consolidated, forming a continuous line through the Provinces of Quebec and Ontario. *President*, Sir Charles Rivers Wilson, G.C.M.G., C.B.; *Vice-President*, Alfred W. Smithers; *Secretary*, H. H. Norman. London Office, Dashwood House, New Broad Street, E.C. The total loan and share capital of the company amounts to over £71,000,000 sterling. The mileage of the lines owned and leased is 5,467 miles, including the mileage in the U.S. The eastern extremities of the line are Quebec and Portland (Maine), and it extends westward to Detroit, Chicago, Grand Haven, and Muskegon, supplying the means of communication with Montreal, Toronto, Hamilton, Niagara, Buffalo, Detroit, and all the principal cities and towns in the Provinces of Quebec and Ontario. The *International Limited*, "The Railway Greyhound of Canada," runs every day of the year. About 3,500 miles are under construction, including *The Grand Trunk Pacific Railway*, an "All Red" route and the only "all Canadian" transcontinental route connecting Halifax, Nova Scotia, on the east over the Rocky Mountains to the Pacific Coast.

THE CANADIAN NORTHERN RAILWAY was founded in 1897, has an aggregate mileage of over 5,000 miles, and stretches from the Atlantic to the Rocky Mountains. It runs principally in the wheat-growing and lumbering districts of Manitoba, Saskatchewan and Alberta. *Headquarters*, Toronto; *London Office*, Bond Court, Walbrook, E.C.

NEWFOUNDLAND.

This island, situated between 46° 37'—52° 39' N. lat. and 52° 25'—59° 25' W. long., on the north-east side of the Gulf of St. Lawrence, is about 317 miles long and 316 miles broad, and contains about 40,200 square miles, and at the census of 1901 it had a population of 217,037, not including those resident in the portion of Labrador (3,347) within the jurisdiction of Newfoundland. Of these 75,689 are Roman Catholics, 73,008 Church of England, 61,388 Methodists, 1,497 Presbyterians, and 9,999 various. At the end of 1907 the estimated population of Newfoundland was 230,139, and of Labrador 4,024.

This is the oldest English colony, for it was discovered by John Cabot in 1497; the first land seen was hailed as *Prima Vista*—the present Cape Bona Vista. The inhabitants are chiefly located on the coast-line of the shore and bays, and the greater part are engaged in fishing—for cod in summer, and seal fishing in winter and spring; agriculture, mining, and lumbering are also engaging attention and affording means of employment, while large pulp and paper mills are in course of erection. Lakes and rivers abound; it is estimated that about one-third of the surface is covered with water. The interior is practically in a state of Nature; but 638 miles of railway have opened up large tracts of rich agricultural, mineral, and timber lands hitherto of small value. The trans-insular line runs to Port-aux-Basques, via Exploits River and Bay of Islands, with branch connections to Placentia, the principal settlements in Conception Bay, and to Lewisporte (in Notre Dame Bay). The climate is salubrious, and the people are strong, healthy, hardy, industrious race. The thermometer seldom falls below zero in winter, and ranges in the shade in summer from 70° to 80°.

The principal exports of the Colony are codfish, value £7,873,172; cod, whale, and seal oil, value \$1,011,426; sealskins, \$194,300; tinned lobsters, \$383,767; copper, copper ore, iron pyrites and other minerals, \$1,353,760. The total value of the fishery products in 1907 was \$9,942,688.

LABRADOR, a dependency of Newfoundland, forms the most easterly part of America, and extends from Blanc Sablon, in the Straits of Belleisle, on the south, to Cape Chudleigh, at the entrance to Hudson's Straits, on the north; it possesses valuable cod, herring, trout, and salmon fisheries. One of the grandest spectacles in the universe is provided by the Great Falls of Labrador, on the Hamilton River.

The Government is administered by a Governor appointed by the Crown, a responsible executive of nine, a legislative council of not over eighteen, appointed for life, and a House of Assembly of thirty-six, elected by the people every four years. In 1890 the franchise was given to all males of twenty-one years and over.

	1904-5	1906-7

BRITISH GUIANA,

which includes the Counties of Demerara, Essequibo, and Berbice, is situated on the north-east coast of South America. The boundaries have recently been definitely determined by the awards of the arbitrators in the Venezuela-British Guiana and Brazil-British Guiana boundary cases. It has a total area of 90,277.4 square miles, and a seaboard of more than 300 miles. The Essequibo River intersects the country in its entire length, the Corentyne River separates it from Dutch Guiana, and the Cuyuni is the great waterway on the west. The colony is bounded on the south by Brazil, on the west by Venezuela, and on the north and N.E. by the Atlantic Ocean. The two towns are Georgetown (estimated population, Dec. 31, 1907, 47,857) and New Amsterdam (estimated population, Dec. 31, 1907, 9,174). The climate is hot, but not generally unhealthy. The cultivated portion of the country, amounting to 189,457 acres (of which 74,543 acres are in sugar-cane), is confined to the sea-coast and to a short distance from the rivers. The coastland is very like Holland, being below the level of the sea, and intersected with canals constructed by its former Dutch owners. At the junction of the boundaries of British Guiana and Venezuela is Mt. Roraima, a flat-topped mountain 8,740 feet above sea level, and on the Potaro River is the Kaieteur Falls, with a clear drop of 741 feet and a total fall of 822 feet. The seasons are divided into dry and wet, the two dry seasons lasting from the middle of February to the end of April, and from the middle of August to the end of November. The temperature ranges between 75° and 90° F. The birth-rate in 1907 was 28.3, and the death-rate 26.9 per 1,000. The chief product is sugar, which forms 66 per cent. of the export trade. The leading exports for the year 1907-1908 were as follow:—Sugar, value £1,004,026; rum, £56,860; gold, £5,717 oz., valued at £239,229; diamonds, 1,863 carats, valued at £3,026; timber, £20,272; and balata, £76,778. The population, Dec. 31, 1904, was 301,923, of whom about one-third were Indian immigrants. There are about 10,000 aboriginal Indians, belonging chiefly to Arawak, Acawai, Carib, and Warau tribes; they are occupied largely in fishing, hunting, and raising crops of cassava.

The Government consists of a Governor and a Court of Policy of 15 other members, 7 official and 8 elected by the direct vote of the people, in which the Governor has an original and a casting vote, and a veto on any measure at any stage. The Court of Policy discharges the functions of a Legislative Council, except as to levying taxes, which is the prerogative of what is called the Combined Court, composed of the Court of Policy and of 6 Financial Representatives elected directly by the people. There is, besides, the Executive Council, consisting of the Governor, 6 official and 3 unofficial members nominated by the Crown, which exercises all the executive and administrative functions of government other than those before mentioned. There are 1,000 miles of post-office telephone wire, with 4 miles of aerial cable and 535 of telegraph lines, 93 miles for railway signals and 24 miles submarine cables, and 72 post-offices; also post-office telephone exchanges in Georgetown and New Amsterdam, with over 489 subscribers. There is a line of railway along the east sea-coast from Georgetown to Rosinol, Berbice, 60½ miles in length, owned by the Demerara Railway Company, and another line has been opened along the west coast of Demerara, extending from Vreed-en-Hoop to Greenwich Park, 15 miles in length. There is another line connecting the Essequibo and Demerara Rivers, 19 miles in length, and an electric tramway service in the capital.

Georgetown, 3,963 miles; transit, 16 days by Royal Mail steamer on alternate Thursdays from Southampton.

BRITISH HONDURAS.

This colony comprises about 7,562 square miles of territory in Central America, extending from 18° 25' 5" to 18° 53' 55" N. latitude, and from 85° 9' 22" to 88° 10' W. longitude. Its extreme length and breadth are 174 m. and 68 m. respectively; it abuts on the Atlantic, and is bounded on the north by Yucatan and Mexico, on the west and south by Guatemala, and on the east by the Caribbean Sea. The climate generally is damp and hot, but not unhealthy. The temperature ranges from 50° to 98°. The average lies between 75° and 80°, but this is considerably tempered by the prevailing sea-breezes. The country consists chiefly of primeval forest, with savannahs and so-called "pine-ridges," which are open sandy plains covered with a wiry grass and dotted with pine-trees, affording fair runs for cattle. The ground is level and swampy along the coast-line, and generally flat for about ten to twenty miles inland; after which hills from 500 ft. to 4,000 ft. high succeed each other to the western boundary. The census (1901) gives the population at 37,497 (males, 19,140; females, 18,339); the 1908 estimate is 43,270 (22,043 males, 21,227 females).

The staple products are the natural woods of the colony, principally mahogany and logwood; the export of mahogany, of which the cost ready for shipment is \$40 to \$50 per 1,000 ft., amounted in the year 1908 to 14,398,422 ft., that of logwood (\$10 to \$15 per ton) being 5,744½ tons. Sugar is grown, and cacao plantations have been started. Fruit, including bananas, plantains, coco-nuts, pineapples, oranges, and mangoes, grow well, while inland there are extensive regions of good pasture, and there are indications that gold and other minerals exist. Other exports are cedar-wood, india-rubber, chewing-gum, and bananas. The latest returns show that about 50,000 acres are under cultivation. The best description of cocoa trees grow wild in the bush. Crown lands can be purchased at \$2 per acre, plus cost of survey, which averages about \$1.25 per acre, or leased at an annual rental of 10c. to 30c. per acre. There are 46 public elementary schools in the colony, of which 44 are denominational, and 42 in receipt of Government aid; there are 3 denominational secondary schools in Belize.

British Honduras is governed as a Crown colony. The Executive Council consists of the Colonial Secretary, the Treasurer, the Attorney-General, and three other members appointed by the Sovereign. The Legislative Council includes the following members:—The Colonial Secretary, the Treasurer, the Attorney-General, and not less than five unofficial members appointed by the Sovereign. The Governor is President of both councils.

THE BERMUDAS.

The Bermudas, or Somers Islands, are a cluster of about 100 small islands (15 or 16 only of which are inhabited, the rest being mere rocks) situated in the west of the Atlantic Ocean, in 32° 15' N. lat. and 64° 51' W. long, comprising an area of about 19 square miles, and containing (1901) an estimated population of 27,535, of whom 6,383 are white, exclusive of army and navy. These islands derive their name from Bermudez, a Spaniard, who sighted them in 1507; but they were first colonised by Admiral Sir George Somers, who was shipwrecked here in 1609, on his way to Virginia. The nearest point of the mainland is Cape Hatteras, in North Carolina, 580 miles distant. Bermuda possesses a strongly fortified dockyard, where the British squadron refits.

The Government is administered by a Governor, who is also commander-in-chief of the military forces. He is advised by an Executive Council of 6 members, appointed by the Crown. There is also a Legislative Council, composed of 9 members appointed by the Crown; and a representative House of Assembly consisting of 36 members, four of whom are elected by each of the nine parishes. There are 1,318 electors, whose individual qualifications are the possession of freehold property of not less value than £60. Hamilton is the chief town and the seat of government; population (1901), 2,246.

The Commonwealth of Australia, &c.

From a physical standpoint the continent of Australia is divisible into an eastern and a western area; the former containing a regular coast-line with a good harbourage, roadsteads, rivers, and inland waterways, and a greater development of fauna and flora; the latter a broken coast-line with estuaries rather than rivers, and but little inland water communication. The whole continent is, roughly speaking, a vast, irregular, and undulating plateau, often below the level of the sea, surrounded by a mountainous coast-line, with frequent intervals of low and sandy shore on the north, west and south. A large part of the interior, particularly in the west, consists of sandy and stony desert, covered with spinifex and containing numerous salt-marshes, though reaches of grass-land occur here and there. The geological formation of Australia is remarkable for its simplicity and regularity; the strike of the rocks is, with a single exception, coincident with the direction of the mountain-chains, from N. to S.; and the tertiary formation to be found in the N., S., and W. develops in the S.E. into a gigantic tertiary plain, watered by the Darling and the Murray Rivers. Nearly all round the coast, however, and in eastern and south-eastern Australia, stretching far inland from the coastal range, is a rich grazing country, admirably adapted to the rearing of sheep. The seasons commence about March 21 (Autumn), June 21 (Winter), September 23 (Spring), and December 22 (Summer). The principal rivers are the Murray, with its tributaries, the Murrumbidgee, Lachlan, and Darling, in the S.E. part of the island, which fall into the sea on the south coast; on the east coast, the Hawkesbury, Hunter, Clarence, Richmond, Brisbane, Mary, Burnett, Fitzroy, and Burdekin; on the west, the Swan, Marchion, Gascoyne, Ashburton, Fortescue, De Grey, and Fitzroy; on the north, the Drysdale, Ord, Victoria, and Daly; and the Roper, the Flinders, and Mitchell, which debouch into the Gulf of Carpentaria. The most extensive mountain system on the Australian continent takes its rise near the S.E. point, and includes a number of ranges known by different names in different places, none of them being of any great height. The chief ranges of the system are the Australian Alps in Victoria and New South Wales, the Blue Mountains and the Liverpool Range in New South Wales, and the Craig Range in Queensland, the highest point being Mount Kosciusko (7,328 ft.), 327 miles from Sydney, N.S.W. Lakes are numerous, but nearly all are salt, depending for their supplies of water upon the rivers and floods, and alternating from immense reedy swamps to areas of submerged levels, with broad mud-banks for shores that render the water absolutely unapproachable. But the scarcity of the natural water supply has been, to a great measure, mitigated by successful borings. Minerals comprise gold, silver, copper, iron, and coal in large quantities, antimony, mercury, tin, zinc, &c.

HISTORICAL EPITOME.

The Venetian traveller, Marco Polo (1254-1324), and Niccolò dei Conti (about 1440), refer to a land called *Java Major*, which there is little doubt was Australia. On the Mappamundi in the British Museum, of not later date than 1489, there is a coast-line which can be no other than the west coast of Australia. Martin Behaim's globe (constructed in 1492) also shows part of Australia's coast-line. In the Dauphin map (about 1530-1536) Australia is referred to as *Jave la Grande*. About 1605 De Quiros, a Spaniard, sailed, with De Torres as his lieutenant, from Lima, Peru, for the Great South Land, and touching land, named it *La Australis del Espíritu Santo*. About 1616 Dirk Hartog sailed along a considerable part of the west coast, while in 1623 two ships, *Pera* and *Arnhem*, discovered Arnhem's Land, the peninsula on the western side of the Gulf of Carpentaria, so named by Jan Carstensz, after the Governor of the Dutch Indies. Further desultory exploration of the coast-line was carried on by the Dutch, who visited the southern and western shores from 1620 to 1630, and in 1642 Abel Janszoon Tasman sailed to the islands of New Zealand and Tasmania, which he named Van Diemen's Land, after the Governor of Batavia. In 1688 Dampier visited and explored nearly 1,000 miles of the north-west coast of Australia, which he revisited in 1699 in H.M.S. *Roebeck*, but no further efforts of importance were made for seventy years, when Captain Cook, of H.M.S. *Endeavour*, with

members of an astronomical expedition, landed at Poverty Bay, New Zealand, on October 8, 1769, and afterwards sailed round the islands and explored the south-eastern coast of Australia, which he named New South Wales. In his subsequent voyages round the world Captain Cook revisited New Zealand, and from his reports an English fleet anchored in Botany Bay (1788) and effected a settlement at Port Jackson, which was reinforced by free settlers in 1793. In 1795 Governor Hunter arrived at Sydney to take over the administration of New South Wales. In 1798 Bass and Flinders explored the coast of Victoria and sailed round Tasmania, while Port Phillip was discovered in 1801. Hobart was founded in 1803. By the year 1795 Captain Macarthur had accumulated a flock of 1,000 sheep, and in 1797 Captain Waterhouse brought from the Cape of Good Hope a number of very fine Spanish-bred sheep. During his visit to England, Macarthur purchased additional stock of the noted Spanish breed, which had formed portion of a present from the King of Spain to George III. The misadventures of Captain Bligh, of the *Bounty*, occurred in 1808, but in 1810 New South Wales was already on the road to prosperity, which was further enhanced by the discovery of the fertile plains westward of the Blue Mountains. Tasmania was made a separate government in 1825. Western Australia was founded in 1829, and in 1835 a permanent settlement was made at Melbourne, whence the present State of Victoria sprang in 1837, the same year seeing Adelaide founded by the colonists of South

Australia. In 1840 the transportation of convicts to New South Wales was discontinued, and in 1841 New Zealand was constituted a separate government, the towns of New Plymouth and Nelson being founded in that year. In 1842 Brisbane was founded, the population of the Australian mainland being over 145,000 at that date. In 1851 the Port Phillip district of New South Wales, with a population exceeding 75,000, was proclaimed a separate colony, to be thenceforth known as Victoria. A great impetus to immigration was given in that year by the discovery of auriferous districts in New South Wales and Victoria. In 1854 the first electric telegraph line was opened in Australia, communication with Great Britain being established in 1872. In the years 1855-56 responsible government was inaugurated in all the colonies with the exception of Western Australia, where responsible government dates only from 1890. In 1859 the Moreton Bay settlement was erected into the colony of Queensland. In 1861 the population of the various States was estimated at over 1,051,000, of which number Victoria contained 539,000, New South Wales 351,000, South Australia 127,000, and Tasmania 90,000. In 1871 the population numbered nearly 1,700,000 (Victoria 730,000, New South Wales 503,000, South Australia 185,000, Queensland 120,000, Tasmania 100,000, and Western Australia 25,000). In 1879-80 international exhibitions were held at Sydney and Melbourne, and in 1881 the population of Australia was taken at 2,250,000, the most notable increases being New South Wales to 750,000, Victoria 862,000, South Australia 280,000, and Queensland 213,000. In 1884-5 motions embodying the spirit of federation were successfully proposed in various legislatures. In 1885 the Government of New South Wales inaugurated the sharing of Imperial burdens by sending troops to help the "Old Country" in the Sudan. In 1890 further steps were taken towards the adoption of the federation, and in that year the Western Australian Constitution was promulgated, and from that date schemes embodying the idea were debated in the several States. In 1897 the Diamond Jubilee of Queen Victoria presented an opportunity for a meeting of the Premiers in London, and the free interchange of views between Australian and Imperial statesmen. On March 16, 1898, the Commonwealth Bill was adopted by the Federal Convention at Melbourne, and after ratification by the several States the Act was ratified by the Imperial Parliament on July 9, 1900, the inauguration of the Commonwealth of Australia taking place at Sydney on Jan. 1, 1901, a message from the Queen to the people of Australia being read by the *Earl of Hopetoun*, Governor-General. H.R.H. the Prince of Wales

(then H.R.H. the Duke of Cornwall and York) was designated by Queen Victoria for the purpose of opening the Commonwealth Parliament, and bidden to undertake the duty by King Edward VII., in spite of the lamented death of the Queen in 1901. The Prince and Princess sailed from Portsmouth, and declared Parliament open at Melbourne on May 9. The *Earl of Hopetoun* (now Marquess of Liffinghgow) resigned his post in 1902, and was succeeded in 1903 by *Lord Tennyson*, to be succeeded in 1904 by *Lord Northcote*, who held office until 9 Sept., 1908, when the *Earl of Dudley* became Governor-General. The area of the Commonwealth is estimated at 2,974,581 square miles, containing a population of 3,773,801 at the census of 1901, including 6,851 half-caste aborigines. Of this total persons born in the Australian Commonwealth and in New Zealand numbered 2,934,000; those born in England and Wales, 393,000; in Scotland, 102,000; in Ireland, 184,000; elsewhere, 201,000. Amongst the latter were 30,000 persons born in China. By religions there were in 1901, 1,497,576 members of the Church of England, 426,105 Presbyterians, 504,101 Methodists, 319,731 other Protestants, 850,620 Roman Catholics, and 15,239 Jews. The capitals of the various States are Sydney (pop. 592,100 at the end of 1908), Melbourne (pop. 549,200), Adelaide (pop. 181,275), Brisbane (pop. 137,670), Perth (pop. 51,711), and Hobart (pop. 41,610).

The Commonwealth of Australia is a confederation of the six "Original States" of New South Wales, Victoria, Queensland, South Australia, Tasmania, and Western Australia, the executive power being vested in the Sovereign (through the Governor-General), assisted by an Executive Council of seven members.

Legislative power is vested in a Federal Parliament, consisting of the Sovereign (represented by the Governor-General), a Senate of 36 (six from each of the Original States) and a House of Representatives elected on a population basis in such a manner that no Original State has less than five representatives. Such powers as are not vested in the Federal Parliament are regarded as remaining in the Legislatures of the several States, in which particular the Commonwealth differs from the Dominion of Canada, where the residuum of Legislative capacity is in the Dominion Parliament. The difference may be briefly stated in the following way:—In the Dominion the Central Parliament may legislate on all present matters, and such as may occur hereafter, except where its power is expressly delegated to the Provincial Legislatures. In the Commonwealth the Federal Parliament may only legislate on certain matters, or to the degree, surrendered to it by the federating States.

† Including Revenue collected by Commonwealth Government.

‡ Figures given for years prior to 1904 are aggregates of entries and clearances for the six States and include Interstate Shipping. For the five years 1904 to 1908 the figures relate to Oversea Shipping only, and comprise one entry and one clearance only for each voyage.

§ For year ended 30 June.

I. NEW SOUTH WALES.

The State of New South Wales is situated between the 29th and 37th parallels of S. lat. and 141st and 154th meridians of E. long., and comprises an area of 310,367 square miles—i.e., more than six times the area of England, and nearly three times the size of Great Britain and Ireland—with a population (census March 31, 1901) of 712,456 males and 646,677 females, or a total of 1,359,133, and 871,469 males, 755,122 females, or a total of 1,626,590 on 30th June, 1909. The population includes 4,287 aborigines of full blood, of whom 2,451 are males and 1,836 females. The births for the year 1908 were 42,525, deaths 16,090, and marriages 12,642.

The great plains are admirably adapted for sheep-farming, and several breeds of sheep, including the celebrated merino, were introduced in 1813. In 1792 there were but 23 head of cattle, 11 horses, 105 sheep, and 43 pigs. On the 31st December, 1908, there were 590,557 horses, 775,693 dairy cows, 2,173,591 all other cattle, 43,329,384 sheep, and 215,652 pigs. In 1908, 338,129,000 lb. (stated as in the grease) of wool, valued at £12,680,000, were produced.

Minerals.—The goldfields were discovered in 1851. Coal, coke, copper, silver, lead, zinc, bismuth, tin, iron, antimony, asbestos, platinum, alumite, cobalt, and kerosene shale are also found; and in small quantities, diamonds, rubies, opals, and other precious stones. The total value of minerals raised during 1908 was £8,384,149, coal accounting for £3,353,993, silver, silver-lead and ore £2,160,195, and gold £954,854.

Agriculture is one of the principal industries of the State; 2,717,085 acres are under cultivation, producing during the year ended 31 March, 1909, 15,483,276 bushels of wheat, 5,216,038 bushels of maize, 1,119,113 bushels of oats, besides other kinds of grain, with 71,794 tons of potatoes, and 5,268 cwt. of tobacco. Sugar-cane to the extent of 144,760 tons was produced; also 736,262 gallons of wine, and 654,001 cases of oranges, lemons, &c. (all citrus fruit); and almost every kind of fruit and vegetable may be grown. The total extent of land alienated and in process of alienation on June 30, 1908, was 51,106,748 acres, while the area of land leased for pastoral occupation and homestead, mining, and other purposes at the same date was 129,123,140 acres. At Sydney the mean temperature in the shade for 50 years averaged 63°; the mean temperature in the shade for the north coast is 65° 9', Hunter and Manning district 63° 9', south coast 59° 4', northern tableland 57° 8', central tableland 57° 2', southern tableland 52° 7', north-western slope 64° 8', central western slope 61° 6', south-western slope 58° 2', north-western plain 67° 5', central western plain 65° 3', Riverina district 61° 4', and western division 65° 5'.

The western portion of the country is not well watered, but immense reservoirs are being constructed for irrigation purposes, and many artesian bores have been laid down. The Darling and the Murrumbidgee, both tributaries of the Murray, which divides the State from Victoria, are only navigable for part of the year. The eastern or coastal district is watered by the Tweed, Richmond, Clarence, Macleay, Hastings, Manning, Karuah, Hunter, Hawkesbury, Shoalhaven, Clyde, Moruya, Tuross, Bega, Towamba, and Snowy.

Government.—"Responsible government" is vested in a Governor appointed by the Crown, and a Legislative Council consisting of not less

than 21 members; the Council in August, 1909, consisted of 57 members. The Legislative Assembly consists of 90 members, representing 90 electoral districts. Each member of the Legislative Assembly receives £300 per annum, and members of both Houses travel free over the Government railways and tramways in the State, and are provided with official stamped envelopes for the free transmission of correspondence through the post. With few exceptions all natural-born or naturalised persons, 21 years of age, who have resided 12 months in the State and three months in the electoral district, are entitled to the franchise, which was conferred upon women in 1902, and was first exercised by them in 1904.

Religion.—All religions are free. There is no establishment, and all payments are voluntary, with the exception of such as remain due by the State under former arrangements. About two-thirds of the people are Protestants, the members of the Church of England in New South Wales, according to the census of 1901, numbering 623,131; Roman Catholics numbering 347,286, Presbyterians 132,617, and Methodists 137,638. In 1904 the places of worship in the State numbered about 5,850.

Education.—Education is compulsory and free, school fees in State, primary, and superior schools being abolished in October, 1906. The total enrolment in 1908 in 3,135 State schools was 233,124, and the average daily attendance 156,000. The State expenditure on Education, Science, and Art was £1,191,617. The University of Sydney, with which 4 colleges are affiliated, including the Women's College, was incorporated in 1851. In addition to the State schools there are 752 private colleges and schools, with 57,111 scholars, and 20 other schools with 1,572 scholars.

Manufactories and Works.—In 1908 there were 4,453 manufactories and works; 80,098 hands were employed, 67,616 being males and 21,482 females.

Old Age Pensions.—Since July, 1901, Old Age Pensions amounting to £26 a year have been granted under certain conditions to persons over 65 years of age, who have been resident in the State 25 years, and are in receipt of an income of not more than £52 per annum.

Hospitals.—There are (31 Dec., 1908) 136 hospitals in the State, 20 of them being in the Metropolitan district, and 116 in the country.

Communications.—There were open on 30 June, 1909, 3,623 miles of Government railway, upon the construction of which £47,612,666 have been spent. In 1908-9 the net earnings amounted to £2,075,626. There are also 8½ miles of private railway lines. There are also 15¼ miles of Government tramways (upon which £4,252,731 were spent, the working expenses 79' 77, leaving a net profit in 1908-9 of £222,005), and 6¼ miles of private tramways. Of telegraphs there are 15,910 miles open, with 82,249 miles of wire and 1,278 stations; messages transmitted outside New South Wales numbering 1,743,988, inland 2,903,631, total 4,647,619, inclusive of 346,027 messages in transit; those received from outside New South Wales numbering 846,664, inland 2,903,631, total 3,750,295. The Post Offices and receiving offices numbered 2,319, the number of letters and postcards conveyed being 137,228,658; newspapers, 48,340,646; packets and book parcels, 35,816,853; and parcels, 1,374,701.

Shipping.—In 1908 the number of vessels entered and cleared was 6,415, with a total tonnage of 12,601,909.

Banking, &c.—There were (30 June, 1909) 141 banks of issue, with total assets £49,983,004, within N.S.W., and liabilities £46,768,133. The savings bank deposits on 30 June, 1908, amounted to £17,849,384.

Crime.—The number of prisoners of all kinds in goal on 31 December, 1908, was 4,420, a decrease of 42 compared with the same day of 1907.

Defence.—On 31 December, 1908, the strength of the military and naval forces in the State was as follows:—*Military:* Permanent 513, militia 5,449, volunteers 1,987, rifle clubs 14,250, cadets 8,778, unattached list of officers, reserve of officers and chaplains 212, total, 31,129. *Naval Forces:* 530.

SYDNEY, the chief city and capital, stands on the shore of Port Jackson, with a water frontage of over 200 miles, the finest harbour in the world, and is surrounded by scenery of surpassing beauty. The city extends four miles north and south by three miles east and west; and contains (1907) 116½ miles of streets, with 22,207 dwellings and a population of 127,460 on 31 December, 1908; or, including suburbs, 1,800 miles of streets, 117,955 houses, with a population of 552,100 on 31 December, 1908. In addition to the Government buildings, there are the Branch Royal Mint, the University, National Art Gallery, museums, free public library, observatory, two cathedrals, and numerous churches. The parks within the metropolitan area are 4,475 acres in extent, in addition to which the National Park measures 37,712 acres and Kuring-gai Chase 35,300 acres. Other towns are Newcastle (with incorporated suburbs) 64,270; Broken Hill, 32,020; Bathurst, 9,700; Goulburn, 10,700; Granville, 7,770; Parramatta, 13,800; Lismore, 7,100; Maitland, E. and W., 11,900; Grafton and South Grafton, 5,450; Albany, 6,980; Tamworth, 6,800; Lithgow, 8,160; Wagga Wagga, 5,800; and Orange and E. Orange, 7,180.

Net revenue	£13,960,763	1907-1908. 1908-1909.

[NORFOLK ISLAND, the residence of the descendants of the Mutineers of the *Bounty*, removed from Pitcairn Island, is attached to New South Wales, the office of the administration being at the Chief Secretary's Department, Sydney.—*Dep. Administrator*, W. Houston, C.M.G.; *Officer in charge*, M. V. Murphy. It was given a constitution with a resident magistrate and elective council in 1896. This was dissolved in 1903, when an executive council of a President, two elected and four appointed members, was constituted. Pop. (1908), males 520, females 420, total 940, including Melanesians. *Resident Magistrate*, Captain C. S. Elliot, R.N.]

Lord Howe Island (450 miles north-east of Sydney). Pop. (1908), males 61, females 40, total 101. *Visiting Magistrate*, Frank Farrell, J.P.

Sydney, *via* Suez Canal, is 12,043 miles from London; transit from 31 to 42 days.

II. VICTORIA.

This territory originally formed part of New South Wales (known as the Port Phillip district), from which it was severed, and erected into a separate colony in the year 1851. It comprises the south-east corner of Australia, at that part where its territory projects farthest into the southern latitudes: it lies between the 34th and 39th parallels of south latitude, and the 141st and 150th meridians of east longitude. Its extreme length from east to west is about 420 miles, its greatest breadth is about 250 miles, and its extent of coast-line nearly 600 miles. The entire area comprises 87,884 square miles, or 56,245,760 acres, of which 4,496,183 were under cultivation in 1908-9.

Population.—Its population at the census on 31 March, 1901, was 1,201,341 (603,883 males and 597,458 females), including about 7,349 Chinese and 652 aborigines. At the census of 1901 the native Victorians numbered 876,003; natives of other Australian States, 65,094; English, 113,432; Irish, 61,512; Scottish, 35,751; Welsh, 3,676; Chinese, 6,230; and other nationalities about 39,643. The Victorian aborigines at the

time of the first colonisation of the district were about 15,000 in number; in 1851 the official return gave 2,693, and in 1901 652 (367 males and 285 females). The estimated population on Dec. 31, 1908, was 1,273,313; males, 640,180; females, 633,133. The birth-rate of Victoria for 1908 was 24.58 per 1,000; the death-rate was 12.46 per 1,000; and the marriage-rate was 7.38 per 1,000.

Religion.—Members of the Church of England numbered 424,011, "Protestants" 8,693, Presbyterians 191,503, Methodists 180,272, Baptists 32,648, and Roman Catholics 263,710.

Minerals.—Victoria is one of the leading gold-producing States in Australia. From the discovery of gold in 1851 to the end of the year 1908, the quantity raised—70,677,667 oz.—amounted in value to £282,321,433, the amount produced in 1908 being 721,220 oz. The value of other minerals raised to the end of 1908, consisting principally of tin, copper, coal, and antimony, is estimated at about £6,698,131 (including building stone, &c., £3,628,260).

Communications.—There were 3,447 miles of railway completed at the end of June, 1908, all of which belonged to the Government, the capital cost amounting to £41,919,376. The gross receipts were £3,883,742, and the working expenses £2,450,318, leaving a net income of £1,433,424, or 3.43 per cent.

There were 1,212 stations for electric telegraphs, extending over 7,037 miles (poles), which produced a revenue of £136,041 in 1908, the total mileage of wire being 15,516, and the telegrams transmitted numbering 2,580,118. There were also 50,687 miles of telephone wire.

Trade and Industry.—Wool, gold (including specie), wheat, flour, biscuit, and butter are the staple productions of the State; and the manufactures (4,608 factories, &c., employing 93,808 hands in 1908) are mainly for home consumption. In 1908 the chief exports were: Wool, £6,059,914; gold (including specie), £4,263,078; butter, £1,354,067; wheat, flour, and biscuit, £1,268,036; oats, £37,829; leather, £413,480; skins and hides, £937,256; and live stock, £1,441,411. A trade is also springing up in preserved and frozen meats, the value of the exports (excluding bacon and hams) being £537,552 in 1908. The principal imports of the State in 1908 were wool, £2,836,666; live stock, £1,893,201; sugar and molasses, £820,684; gold (including specie), £920,075; cottons, £1,178,216; woollens, £922,113; and timber, £970,019.

Agriculture.—Agriculture has of late years much improved, wheat and oats chiefly being cultivated; the dairy industry has also made marked progress. Of the 4,496,183 acres under cultivation in 1908-9, 1,779,905 were wheat crops, and 419,869 oats, and 956,371 acres were cut for hay. In 1908-9, 1,437,106 gallons of wine were produced. There were in 1908 609,766 milch cows, producing 48,451,398 lb. of butter and 4,328,644 lb. of cheese.

Shipping.—The shipping statistics of the State furnish abundant evidence of the magnitude and value of its trade. In 1908 4,879 vessels, of 9,008,419 tons, entered and cleared.

III. SOUTH AUSTRALIA.

South Australia was established as a British Province by 4 & 5 Will. IV., cap. 95, but not proclaimed until 28 Dec., 1836, so that its history falls within Queen Victoria's reign. It is situated between 11° and 37° S. lat. and 120° and 141° E. long., and covers 12° of longitude and 27° of latitude. The total length is 1,850 miles, the extreme breadth 650 miles, with about 2,000 miles of sea-board, the total area being 903,690 sq. miles.

Population.—The population at the 1901 census was 362,604 (males, 184,422; females, 178,182); on 31 December, 1908, 403,819 (males, 214,105; females, 189,714); birth rate (1908) 24.73; death rate 9.72, and marriage rate 7.89 per 1,000.

Metecology.—The mean temperature of the original colony is 74°, with a mean rainfall of 16 inches on the plains and 42 inches in the hills, the 63 years' average at Adelaide being 20 inches. The winter temperature averages 53°, with 100° for summer, but the climate is so dry that the inconvenience is comparatively slight.

Government.—The government is administered by a Governor, the Legislative Council with 18 members, and the House of Assembly with 42 members. There are 6 Cabinet Ministers, members of the Legislature and *ex officio* members of the Executive Council, of which the Governor is president. Election is by ballot, with universal adult suffrage for the House of Assembly for all British subjects, male and female; there is a small property qualification for electors to the Legislative Council, who numbered 54,864 (14,494 women) in 1908, those for the Assembly numbering 191,129 (94,568 women).

Local Government.—There are 32 Municipalities and 144 District Councils, the aggregate assessment of property within their boundaries being £2,902,851, and the revenue (1907) £282,904, and expenditure (1907), chiefly on roads, £282,784.

Law and Justice.—The Supreme Court is presided over by the Chief Justice and two Puisne Judges; there are Courts of Vice-Admiralty and Insolvency, as well as Local Civil Courts, with stipendiary magistrates and the usual Police Courts. The Supreme Court convictions average about 112 annually, which is at the rate of 1 in every 3,360 of the population. The Real Property Act (1858) simplifies the transfer of land, and since the passing of the Act land to the value of £17,531,000 has been dealt with.

Religion.—In 1905 accommodation was provided for 32,811 members of the Church of England, 79,445 Methodists, 12,990 Congregationalists, 14,256 Baptists, 22,018 German Lutherans, in addition to about 50,000 Roman Catholics, in 1,121 places of worship.

Education.—There is an endowed university at Adelaide, founded in 1831, with 360 undergraduate all classes are open to women. A State school of mines and industries has also been established. Primary education is provided by the State, and controlled by a responsible minister; it is secular, compulsory, and free; there are 707 State schools, with 1,389 teachers and 54,560 scholars; the expenditure in 1907 was £156,358, the total capital outlay on school buildings amounting to £534,621. Private schools number 209 (1907), with 710 teachers and 9,381 scholars. The Public Library, Museum, Art Gallery and local institutes are supported or assisted by the State, the sum expended for 1907-8 was £13,737.

Banking.—There are 7 banking institutions in Adelaide, with 65 branches, having a total liability of £9,466,223 (including £3,272 Perpetual Inscribed Stock) and assets £8,468,165 in 1908; their note issue amounted to £495,079. The Government Savings Bank on 30th June, 1908, had 217 agencies, with 143,718 depositors (£5,803,301, bearing interest at 3 per cent.).

Commerce in 1908.—Total value, £25,010,004.
Imports from. Exports to.
United Kingdom £2,935,099 £3,495,235
British Colonies 6,883,545 7,422,419
Foreign Countries 1,412,826 2,860,880

£11,231,470 £13,778,534
Shipping.—The total tonnage inwards and outwards in 1908 was 6,106,148 tons; 5,181,244 tons were from British ports, and 924,904 tons from foreign.

Railways.—The length of Government lines open in 1908 was 1,879 miles (and 145 in the N.T.). The total cost to 31 Dec., 1908, was £13,098,680, or £7,449 per mile; the working expenses in 1908 were £986,008, and the receipts £1,702,410, the net revenue being 5.12 per cent. on the cost.

Agriculture.—Of the total area about two-thirds are farmed or grazed, and 3,442,295 acres cultivated—under wheat 1,693,501 acres, hay 424,924, oats 78,404, barley 44,911, and potatoes 8,083 acres, with 1,097,186 acres lying fallow. The quantity of wheat produced in 1908-9 was 19,397,672 bushels. English fruit, oranges, lemons, almonds, and olives are successfully grown, and fruit drying is profitable. There were 20,855 acres of vines, the export of wine being 760,536 gallons in 1908, of which 308,542 gals. (value £30,667) were sent to the United Kingdom in 1908. Brandy and other spirits are also produced. There were

6,898,451 sheep in 1908, and 46,334,258 lb. of wool (valued at £1,629,662) were exported; cattle number 340,376, and horses 213,385.

Minerals.—Copper and gold, silver, lead, manganese, bismuth, iron, and coal are found.

	1906-7.	1907-8.

IV.—QUEENSLAND

This State, situated in lat. $10^{\circ} 40'$ — 29° S., and long. 138° — $153^{\circ} 30'$ E., comprises the whole north-eastern portion of the Australian continent.

Queensland proper possesses an area of 670,500 square miles (i.e., equal to more than $5\frac{1}{2}$ times the area of the United Kingdom), of which the Government have parted with the fee simple of 15,108,439 acres; under a system of deferred payment, 6,200,930 more are in process of alienation out of the total of 429,120,000 acres, but an additional area of 272,800,385 acres has been leased out for sheep and cattle runs and grazing-farms, 258,208 acres as scrub selections, 114,234 acres under gold-mining and mineral lease, and 8,037 for special purposes, leaving 134,629,767 practically unoccupied. The estimated population, Dec. 31, 1908, numbered 558,237, of whom 303,887 were males and 254,400 females. Wheat, oats, and barley flourish on the Darling downs; while a still larger area is devoted to maize, which yields an average crop of about 22 bushels per acre. Both English and sweet potatoes are cultivated; as also are coffee, cotton, oranges, peaches, pineapples, grapes, bananas, cocoa-nuts, mangoes, plums, and various English fruits. In the year 1908, 151,058 tons of sugar were produced. The chief articles of export the produce of the State in 1908 were: Wool, £4,129,854; gold, £1,941,229; silver, £119,685; tin, £290,389; copper, £83,699; pearl and tortoise-shell, £52,622; meat, including extract, £850,772; green fruit, £161,027; sugar, £1,482,320; hides and skins, £293,442; tallow, £197,229; live stock, £1,999,381; butter, £623,143; timber, £130,794. At Brisbane the average temperature for 1908 was 68° ; the maximum in the shade was $101^{\circ} 8'$, and the minimum $36^{\circ} 3'$. Wool, gold, meat, butter, and sugar are at present the staple productions; rich gold, copper, tin, lead, silver, antimony, limestone, ironstone, wolfram, and coal deposits are found in several districts; timber also, of fine quality for cabinet manufacture, the Moreton Bay pine and the *Dammara robusta*, together with the cedar of Queensland, forming valuable products for export. At the end of 1908 the horses numbered 519,959, cattle 4,321,600, sheep 18,348,851, and pigs 124,749.

At the end of 1908 there were 3,498 miles of Government railway open. In 1908 there were 1,104 State schools in operation, with 2,413 teachers and an average daily attendance of 67,300 children; and 167 private and grammar schools, with an average attendance of 12,898.

The banking deposits on the 31st Dec., 1908, were £5,004,473, apart from the £15,440,427 in the hands of the Government Savings Bank.

The number of sea-going vessels entered inwards during 1908 was 881 (tonnage 1,601,107), and the number outwards 847 (tonnage, 1,563,911).

	1907.	1908.
Public revenue	£4,490,440	£4,608,956
Public expenditure	4,032,160	4,643,667
Public debt, 31 Dec.	39,068,827	39,568,827
Gold output	02 465,882	02 975,554
Total imports	£9,420,691	£9,471,166
Total exports	14,684,019	12,194,977

Apparel, &c.	£49,476
Cottons	395,378
Woolens	152,836
Machinery	£141,563
Iron	513,067
Spirits	82,354

Domestic exports to U.K., 1908 (B. of Trade):—	
Butter	£366,990
Copper	678,962
Lead	72,486
Meat, Fresh	295,153
Shells	79,475
Silver Ore	£136,421
Tallow and	
Stearine	169,911
Wool	1,651,419

The contour of the Queensland coast-line and the relative position of its inland parts operate against any centralisation similar to that at Melbourne, Sydney, or Adelaide, and numerous ports of considerable size extend along the coast:—Brisbane (pop. 137,670), Rockhampton (19,691), Maryborough (12,900), Townsville (15,506), Port Douglas, Mackay, Thursday Island, Cooktown, and Bundaberg. Other places of importance are Ipswich (15,246), Toowoomba (14,087), Charters Towers (20,976), and Gympie (14,430).

The Constitution comprises a Governor, Legislative Council of 45 members nominated for life by the Crown, and Assembly of 72 members elected by the people. There is a Supreme Court, with a Chief Justice, and four Puisne Judges; District Courts, presided over by District Court Judges; and Inferior Courts at all the principal towns, presided over by Police Magistrates.

V.—TASMANIA

is an island in the South Pacific Ocean, off the southern extremity of Australia, from which it is separated by Bass Straits, in which are situated the Furneaux Group and King Island, included within the colony. It lies between 40° 33'—43° 39' S. lat. and 144° 39'—148° 23' E. long., and contains an area of 26,215 square miles, or 16,778,000 acres of land, of which, on 1st March, 1909, 269,446 acres were under crop, and 491,423 under artificially-sown grass; wheat, 29,103; while 1,338,953 acres (exclusive of mineral land) were leased from the Crown principally for pastoral purposes, the terms of purchase being £1 an acre for cash, or £1 6s. 8d. in 14 yearly instalments. The population (31 Dec., 1908) was 185,824, of whom 90,310 belonged to the Church of England, 32,688 were Roman Catholics, 26,889 Methodists, and 12,413 Presbyterians. The aborigines have become quite extinct, the last—a female, "Truganini"—having died in 1876. The island was first discovered by Tasman, in December, 1642, and named by him "Van Diemen's Land," in honour of his patron, the then governor of the Dutch possessions in India. It was subsequently partially explored by Captain Cook, and in 1803 Lieut. Bowen, despatched from Sydney with a few soldiers and convicts to form a penal settlement, fixed upon the spot where Hobart now stands. In 1825 it was severed from New South Wales and formed into a distinct colony. Transportation of criminals was abolished in 1853, and the name officially changed from Van Diemen's Land to Tasmania. The climate is fine and salubrious, and well suited to European constitutions, and the hot winds of Australia do not reach the island. At Hobart in 1907 the mean

annual temperature was 54.2°, the mean summer temperature being 62.0°, and that of winter 45.3°; the average rainfall for Hobart, 1907, was 25.32 inches. The surface of the country is generally undulating forest land with mountains from 1,500 to 5,000 feet in height, and wide expanses of level, open plains. The chief products of the State are wool, gold, silver, copper, timber, tin, and fruit, and sheep; the two latter being among the principal industries. The amount of stock on 1 March, 1909, was sheep (and lambs), 1,723,503; cattle, 205,827; horses, 39,281; and pigs, 47,945. The forests of Tasmania abound in the most beautiful cabinet woods and the largest size timbers, adapted for every variety of purpose. The fauna include the Tasmanian devil and native tiger, and the curious duck-billed platypus; while the wombat, the wallaby, and the opossum supply valuable skins. There are silver and copper fields on the west coast; over 45,000 acres have been taken on mineral leases, and mines of both lode and stream tin are being worked in the north. The value of tin exported in 1908 was £400,196; of silver £370,477, and of copper £545,327; iron-ore exists, and the value of gold exported in 1908 was £292,691. Coal of a good quality, and in easily accessible positions, is very generally distributed over the island. There are in all 620 miles of railway open, including the main line running from Hobart to Launceston, through the island; and 328 telegraph stations, with 4,082 miles of wire, including a submarine cable (432 miles) communicating with the Universal Telegraph System; 1,850 miles of telephone wire; 414 post-stations, and 3,399 miles of post roads. On Dec. 31, 1907, the total registered shipping for the year was 65 steamers and 233 sailing vessels, with a total tonnage of 18,422 tons. The inward entries during 1908 were 1,034 (tonnage, 1,392,189), and the outward entries 1,075 (tonnage, 1,290,870). A Department of Agriculture was formed in 1902. Primary education is administered by a Department, and there are 356 State schools.

	1907-8.	1908-9.
Public revenue	£1,005,284	£924,405

Imports from U.K.	461,237	579,762
Exports to U.K.	553,223	555,768

By the Act of 1855 the Legislative Council and House of Assembly are constituted "The Parliament." The former consists of 18 members, elected for six years; and the latter of 35 members, elected for three years. The Governor, who is appointed by the Crown, is aided by a Cabinet of responsible Ministers. The franchise has been extended to women.

CAPITAL, City of Hobart. Population, with suburbs, 44,610. Other towns are Launceston (pop. 24,536), Zeehan, Ulverstone, E. Devonport, Latrobe, Waratah, Westbury, Longford, Burnie, and Queenstown.

Hobart, 13,250 miles; transit, 36 to 40 days.

VI.—WESTERN AUSTRALIA

includes all that portion of the continent west of 120° E. long., the most westerly point being in 112° 52' E. long., and from 13° 30' to 35° 8' S. lat. Its extreme length is, from north to south, 1,480 miles, and 1,000 from east to west, and its total area 975,920 square miles. The jarrah (*Eucalyptus marginata*), sometimes erroneously called mahogany, covers immense tracts of land in the S.W. portion of the State; its timber is extraordinarily durable, and as it resists the white ant and the *Teredo navalis* it is admirably adapted for railway sleepers, and for piles for bridges and harbour works. The sandalwood (*Santalum acuminatum*) has long been an article of export; the murt (*Eucalyptus gomphocephala*) and Karri (*Eucalyptus diversicolor*), eucalypti of enormous size, are valuable timber trees. A new industry is that of obtaining the bark of the mallet tree, exported for tanning purposes: exports (1907) £98,773; (1908) £79,934. The occupied portion of the State extends along the western coast for about 1,200 miles, while the mining population has penetrated over 500 miles into the interior, and the population on June 30 was, in 1907, 264,269; in 1908, 266,125; and in 1909, 275,267. The average temperature of Perth (lat. 32° S.) for the past 22 years was 65°, while the mean for the barometer for 22 years was 30.05 inches. There are wet and dry seasons, the former lasting from May to October. The total rainfall at Perth during 1907 was 37.91, and during 1908, 30.52, the average for the past 33

years being 33°. The chief products are gold, wool, timber, pearls and pearl-shells, silver, lead, copper, tin, coal, iron, sandalwood, mallet bark for tanning, cereals, fruit, wine, horses, cattle, and hides and skins. Cultivation in the past was retarded by want of sufficient labour and means of transport, but the conditions are rapidly improving, and the agricultural and pastoral pursuits are now among the most important industries of the State; sandalwood and other trees grow abundantly in the south western districts, and there were, in 1908, 3,221 acres of vineyards in the State. Large areas of good wheat-growing soil also exist in the southern division, and there were, in 1908, 279,609 acres, and, in 1909, 284,357 acres under cultivation for this cereal. Magnetic iron, lead, copper, and tin ores exist in large quantities.

Gold Statistics.—The groups of the Coolgardie goldfields (covering a vast portion of the interior and extending to the 125th meridian), as well as other fields, are being constantly worked, the production of gold being 207,111 fine oz. in 1895, 251,618 oz. in 1896, 603,847 oz. in 1897, 939,490 oz. in 1898, 1,470,605 oz. in 1899, 1,414,311 oz. in 1900, 1,703,417 oz. in 1901, 1,871,037 oz. in 1902, 2,064,801 oz. in 1903, 1,983,230 oz. in 1904, 1,955,316 oz. in 1905, 1,794,547 oz. in 1906, 1,697,553 oz. in 1907, 1,647,911 oz. in 1908, and 915,189 oz. in the first seven months of 1909. To the Coolgardie group belong the following goldfields: North Coolgardie, Broad Arrow, North-East Coolgardie, East Coolgardie, and Coolgardie. The largest amounts have been obtained from the East Coolgardie field, Murchison being next in productiveness. Gold is also found in the Kimberley, Pilbara, West Pilbara, Ashburton, Gascoyne, East Murchison, Dundas, Donnybrook, Peak Hill, Yalgoo, Mt. Margaret, Yilgarn, and Phillips River districts. The total amount produced in the State from 1886 to 31 July, 1909, is 20,926,887 fine oz.; of this amount 18,836,869 oz. were received at the Royal Mint, Perth.

There are 2,741 miles of railway open. A proposed trans-continental line is now under survey. There is direct telegraphic communication with England and with South Africa. The principal ports are Fremantle, Albany, Bunbury, and Broome. The imports chiefly consist of provisions, sugar, tea, tobacco, spirits, beer, soap, machinery, ironmongery, clothing of various kinds, &c. The principal exports are of wool, gold, jarrah timber, silver, tin, copper ore, sandalwood, mallet bark for tanning, pearls and pearl-shells, kangaroo skins, wheat, &c. The estimated value of the exports for 1908 was:—Wool, £637,008; timber, £813,591; sandalwood, £76,668; pearls, £100,000 (estimated); shell, £190,741; gold, £2,054,020; gold specie, £4,937,734; hides and skins, £137,931. The stock returns of the State are as follows:—Horses, 116,850; cattle, 742,110; sheep, 4,068,519; and pigs, 46,673. In 1908 the vessels entered inwards numbered 588 (tonnage, 1,819,492), and those outwards 592 (tonnage, 1,816,805).

	1907-8.	1908-9.
Revenue	£3,803,806	£3,816,271
Expenditure	3,807,785	3,906,839
Gross debt, 30 June ...	20,493,618	21,951,753
	1907.	1908.
Imports	6,522,998	6,178,797
Exports	9,904,860	9,514,000
Raw Gold exports ...	2,775,862	2,054,020
Imports from U.K.	2,267,411	2,122,304
Exports to U.K.	4,454,764	3,243,647

The State is ruled by a Governor appointed

by the Crown, a Legislative Council, and a Legislative Assembly.

Religious Statistics.—At the census of 1901, 75,654 belonged to the Church of England, and 40,584 were Roman Catholics.

Education.—Education is compulsory and free, and numerous elementary schools are under the control of the Minister of Education. There is a training college, a technical school, a school of mines at Kaigoorlie, and a school in Perth for the higher education of boys. The foundation of a University is under consideration. The total amount expended on education during the year ended 30 June, 1909, was £178,109.

The principal towns in the State are:—Perth (pop., including suburbs, about 54,000), on the right bank of the Swan River estuary, 12 miles from Fremantle; Fremantle (including suburbs, about 20,000), and the following municipalities: Albany (2,994), Coolgardie (2,829), Kaigoorlie (6,954), Boulder (10,357), Broomie (3,300), Bunbury (3,420), Claremont (3,699), Geraldton (2,593), Midland Junction (4,062), and Northam (2,813). Governor, H.E. Sir Gerald Strickland, C.M.G. £4,000

Private Sec., Capt. P. A. E. Spence.
A.D.C., Capt. J. P. Rhodes.

Lieut.-Governor, Sir Edward A. Stone, Kt.

Transit from London to Perth, 27 days.

Dominion of New Zealand.

The Dominion of New Zealand consists of three main islands in the South Pacific Ocean, known as the North, South and Stewart Islands, situate about 1,200 miles E. of New South Wales, between 33°—53° S. lat. and 162° E. long.—175° W. long., with several groups of smaller islands lying at some distance from the principal group. Portions of New Zealand were explored by Tasman, under the direction of the Dutch East India Company, in 1642, and visited at various times during the 18th century, and in 1777 by Captain Cook. The first settlement of Europeans was made in 1814, but no colonisation took place until 1839. In 1841 New Zealand was, by letters patent, erected into a separate colony distinct from New South Wales. The entire area (inclusive of the Chatham, Auckland, Kermadec, Cook, and other islands) is stated at 704,751 square miles, or 67,040,640 acres (being a little smaller than Great Britain and Ireland), of which two-thirds are fitted for agriculture and grazing. The North Island comprises about 44,468 sq. miles; South Island, 58,525; Stewart Island, 665, with only 288 inhabitants. An adjacent group, named the Chatham Islands, contain 375 sq. miles; and the Cook and other Pacific islands recently included within the boundaries of the dominion, 280 sq. miles. Kermadec and other islands 438 sq. miles.

The European population at the census of April 29, 1906, was 888,578 (471,008 males and 417,570 females). The native population (Maoris) in 1906, was 47,731 (25,538 males and 22,193 females), chiefly in the North Island, and 12,340, excluding 776 absent from the islands (6,224 males and 6,316 females) in the Cook and other Pacific islands, making the total population, including Maoris, &c., 948,649 persons. Since the census the estimated population on 30th June, 1909, is ascertained to have been 1,029,417 persons. In 1840 a treaty was concluded at Waitangi with the native chiefs, whereby the sovereignty of the islands was ceded to Great Britain, while the chiefs were guaranteed the possession of their lands, forests, &c., the right of pre-emption being reserved to the Crown if they wished to alienate any portion. This right was abolished by legislation in 1862, when the Crown relinquished its right of pre-emption, whilst at the same time the purchase of native lands for the Crown did not abate, but continued side by side with the private purchases until 1864, when the right of private purchase was withdrawn. The Maori Lands Administration Act of 1900 with its amendments restrains natives from pauperising themselves by parting with the freehold of the balance of their lands.

New Zealand in many parts is very mountainous; a mountain chain traverses the west side of the South Island, culminating in Mount Cook, 12,349 feet in height. The extremes of daily temperature vary throughout the year only by an average of 20°; London is 2° colder than the North Island and 4° colder than the South Island. The mean annual temperature of the whole dominion for the different seasons is:—Spring, 55°; Summer, 63°; Autumn, 57°; and Winter, 48°; and the climate is admirably adapted for raising every fruit, flower, and edible that flourishes in Great Britain. Amongst the productions are the Kauri pine (found only at the northern extremity of the islands), much

valued for shipbuilding, and for its resin (Kauri gum); and the native flax, which is used for the manufacture of ropes and twine. The principal exports in 1908 were wool (£5,332,781), frozen meat (£3,188,515), gold (£2,004,799), butter and cheese (£1,954,602), agricultural products, tallow, Kauri gum and timber. Coal-mining is one of the largest industries, the output in 1908 being 1,860,975 tons, the approximate total output to the end of 1908 being 27,108,517 tons. Gold-mining, both alluvial and quartz, is an important industry in many districts, and rich iron ore, in the form of iron sand, has been found in Taranaki, and in the form of brown haematite at Parapara, near Nelson; copper is also found.

The total extent of land under all kinds of crop (excluding lands in artificial grasses), and of land broken up but not under crop, is (1909) 1,890,630 acres, while there are 13,623,528 acres of land in sown grass, of which 8,868,205 acres had not been previously ploughed. In 1908 the number of sheep was 22,449,053; horned cattle, 1,773,326; and horses, 363,259. In March, 1909, there were 2,674 miles of Government railway lines in working order, and more under construction; and 29 miles of private lines, together with an excellent coaching system. During 1908 the vessels entered inwards numbered 658 (tonnage, 1,361,047), and those entered outwards 656 (tonnage, 1,331,305), exclusive of coasting vessels.

The general government consists of a Governor aided by a Ministry, a Legislative Council appointed by the Governor (prior to 1891 the appointments were for life; since that date for seven years only), at present consisting of 45 members, and a House of Representatives, consisting of 80 members elected for three years. Four of the members are Maoris elected by the natives. Women are entitled to register as electors and to vote at the elections for Members of the House of Representatives, but are not qualified for election nor for appointment to the Legislative Council.

The State system of education is free, secular,

* This amount, however, includes moneys spent under "Land for Settlements Acts," for purchases of private estates for settlement, and expenses in connection therewith, £577,221 in 1907-8 and £695,271 in 1908-9.

and compulsory. There were (December, 1908) 1,998 public primary schools, with 3,986 teachers and 147,428 scholars; there are also 307 private schools, with 18,367 scholars, and, in addition, 97 village schools for the Maoris. The higher education of boys and girls in the cities and large towns is carried on in 21 endowed colleges and grammar schools. The University of New Zealand has power to confer degrees. The annual postal circulation was (1908) 189,306,626 letters and post-cards, 41,358,913 newspapers, and 51,033,488 books and packets, and the work is effected by 2,133 post-offices. There are 10,404 miles of telegraph line with 32,564 miles of wire.

Defences.—New Zealand has torpedo-boats and submarine-mining steamers; the Calliope Dock, capable of docking two warships, was subsidised by the Imperial Government in 1898.

CAPITAL, Wellington, in the North Island.

The estimated population of the chief cities and towns on 1 January, 1909, was as follows:—Wellington (and suburbs), 73,697; Auckland (and suburbs), 93,544; Dunedin (and suburbs), 61,279; Christchurch (and suburbs), 76,709; Invercargill (and suburbs), 13,700; Napier, 10,459; Palmerston North, 11,650; Nelson, 8,650; Oamaru, 5,257; Petone, 7,200; Timaru, 8,100; Wanganui, 8,511; Masterton, 5,500; Greymouth, 5,079; and New Plymouth, 5,352.

Governor and Commander-in-Chief, H.E.

Secretary, C. Wmy Palliser.

Cook Islands Administration.—The Cook and other islands, annexed to the British Empire in October, 1900, and included in the boundaries of New Zealand since June, 1901, consist of the islands of Rarotonga, Aitutaki, Mangaia, Atia, Mauke, Mitiaro, Penrhyn, Manihiki, Rakahanga, and Niue or Savage Island, together with a few smaller islands, and are situated in the South Pacific, between 8° to 23° S. lat. and 156° to 175° W. long. The population consists of about 13,000 natives, and 150 Europeans and other nationalities. The chief products are bananas, oranges, and other tropical fruits, copra, coffee, pearl-shell, and ixta (Niue). The exports average about £50,000, and the imports about £45,000. Rarotonga is the chief island, with a native population of 2,300, and a European population of 107. The government is administered locally under the direction of New Zealand. The Federal Council of the Cook Islands, under the direction of the Resident Commissioner at Rarotonga, legislates for all the islands except Niue, which has a Resident Commissioner and an Island Council of its own. Makena Arikiki still remains as the head native chief of the Cook Islands, and receives an allowance from the Government.

Resident Commissioner and Chief Judge, Rarotonga, Capt. J. Ewan Smith, N.Z.M. £500

Resident Commissioner and Magistrate, Niue, H. G. Cornwall

Wellington, 16,000 miles; transit, 38 days.

Fiji.

This is a group of 200 to 250 islands (of which some are, however, mere uninhabited islets and rocks) in the South Pacific Ocean, about 1,100 miles north of New Zealand, which extend 300 miles from east to west, and 300 north to south, between 15° 45'–21° 10' S. lat. and 176° E.–178° W. long. The gross area of the group is about 7,435 square miles. The islands are of volcanic origin, with lofty mountains, and are well wooded. The principal are Viti Levu (G. ca. Fiji) and Vanua Levu (Great Land). The climate is equable and remarkably healthy for Europeans: the average temperature in the shade in the cool season is 72°, rising to 84° in the hot season, extremes lying between 60° and 94°. Vegetation is remarkably luxuriant, the chief productions being the bread-fruit tree, banana, plantain, pea-nuts, yams, and dalo (taro), coconut, sugar-cane, tea, cotton, maize, tobacco, and arrowroot. Sugar, pearl-shells, maize, beche-de-mer, copra, and coconut oil were for some time the chief exports, but the principal exports in 1908 were sugar, copra, green fruit, and coconuts. The Governor is appointed by the Crown, and is assisted by an Executive Council, consisting of seven official members. Laws are passed by a Legislative Council, of which the Governor is president, and which contains ten official and eight unofficial members, of whom six are elected and two (natives) nominated by the Governor. Native administration is carried on through the chiefs under the Governor's supervision. The population (31 March, 1902) was 120,124 (94,397 native Fijians, 17,105 Indian immigrants, 2,459 Europeans, and some Polynesians and others).

	1906.	1907.	1908.

Papua.

The territory of Papua, formerly known as British New Guinea, comprises the southern and south-eastern shores of the island, from the 141st meridian of east longitude eastward as far as East Cape, and thence north-westward as far as the 8th parallel of south latitude in the neighbourhood of Mitre Rock, together with the territory lying south of a line from Mitre Rock, proceeding along the said 8th parallel to the 147th degree of east longitude, then in a straight line in a north-westerly direction to the point of intersection of the 6th parallel of south latitude and of the 144th degree of east longitude, and continuing in a west-north-westerly direction to the point of intersection of the 5th parallel of south latitude and of the 141st degree of east longitude, together with the Trobriand, Woodlark, D'Entrecasteaux, and Louisiade groups of islands, and all other islands lying between the 8th and the 12th parallels of south latitude, and between the 141st and the 155th degrees of east longitude, and not forming part of the Colony of Queensland; and, furthermore, including all islands and reefs lying in the Gulf of Papua to the northward of the 8th parallel of south latitude. The ports of entry are Samarai, Port Moresby, Daru, and Bonagai.

There is an Executive Council of 6 members, who, with 3 non-official members, form also the Legislative Council.

CAPITAL, Port Moresby. Pop., about 1,500 natives and 100 Europeans.

Pacific Islands.

(1) *The British Solomon Islands*, protected since 1893, and consisting of Guadalcanar, Malaita, San Cristoval, New Georgia, and other islands situated in about 8° S. and 156° E., with a total area of about 8,500 square miles. The *Santa Cruz Group* and several other islands were incorporated in the Protectorate in 1898 and 1899; and in 1900 Choiseul Ysabel, with the islands in Bougainville Straits and Lord Howe's group, were transferred by treaty from Germany. The revenue in 1908-9 was £10,604, and the expenditure, £12,618; exports, 1907, £51,602; imports, £49,252. European residents, 230; native pop., 150,000. The seat of government is Tulagi.

Resident Commissioner, Charles M. Woodford £800

(2) *The Gilbert and Ellice Islands Protectorate.*

The Gilbert Group, situated between 4° N. and 3° S. latitude and 172° and 177° W. longitude, consists of 16 islands, with several small islands or islets depending upon them; and the Ellice Group, between 5° S. and 10½° S. latitude and 176° E. and 179° 58' W. longitude, consists of nine islands. Ocean Island (or Paanopa), in lat. 0° 52' S. and long. 169° 35' E., was included in the Protectorate in 1900. Total area, 166 square miles; population, about 35,000 and 80 Europeans. Revenue, 1907, £4,620; expenditure, £4,296; imports (1900), £20,369; exports (chiefly copra), £21,582.

Resident Commissioner, (vacant) £800

(3) *The Tonga or Friendly Islands.*—A protectorate over the Tonga Islands was proclaimed 19 May, 1900. These islands are situated in the Southern Pacific to the E.S.E. of Fiji, and 390 miles therefrom, with an area of 385 square miles, and a population on Jan. 1, 1905, of 21,103 natives of Tonga, 300 other natives, 151 British subjects, 89 foreigners, and 120 half-castes. The limits of the group are between 15° and 23° 30' S. and 173° and 177° W. Tongatabu is the seat of government, the king being Jioaji Tubou II. Soil generally is fertile; the principal exports are copra, fungus, green fruit, kava, and candle-nuts. Revenue, 1908, £33,592; expenditure, £42,142; imports, £98,166; exports, £133,272. Of the total shipping, 136,847 (1908), 132,098 tons were British.

Agent and Consul, W. Telfer Campbell £850

(4) *The Phoenix Islands* (Wilkes, Gardner, Birnie, Hull, Enderbury, Phoenix, and Sidney), between 2° 30' and 4° 30' S. and 171° and 174° W.

(5) *The Union, or Tokelan, Group* of six islands and some islets (Quiros, Fakaofo (3), Nukunono, and Atafu).

Deputy Commissioner, H. M. Agent, Tonga.

(6) *Pitcairn Island*, situated in lat. 25° 3' 30" S., long. 130° 8' 30" W. Pop. (April, 1907) 144, descendants of the mutineers of H. M. S. *Bounty*. Arrowroot is manufactured and exported.

Deputy Commissioner, A. L. S. Rowley (H. M. Consul for the Society Islands).

Chief Magistrate, Edmund McCoy.

(7) *Fanning Island*, in lat. 3° 51' 23" N., long. 159° 21' 50" W. Pop., 21 Europeans in connection with Pacific cable station, and about 200 Gilbert Islanders in copra industry.

Deputy Commissioner, William Bent.

(8) *The New Hebrides Group* lies between the 12th and 20th degrees of south latitude and the 165th and 170th of east longitude. In 1906 a Convention was signed under which the administration of the Group was assumed by Great Britain and France. British and French Resident Commissioners were appointed in 1907. Nat. pop. about 100,000, European 677. Principal exports, maize, copra, and bananas, also coffee, timber, and sulphur. A British steamer runs regularly between Sydney and the group, and French steamers from Sydney and New Caledonia.

High Commissioner, Sir Everard Im Thurn,

K.C.M.G., C.B.

Assistant to the High Commissioner, A. W.

Mahaffy £800

British Resident Commissioner, M. King ... 800

French Resident Commissioner, C. Noufflard

(9) There are also a large number of scattered groups and isolated islands.

High Commissioner, The Governor of Fiji... £300

Chief Judicial do., The Chief Justice of Fiji 300

Sec. to High Comm., A. Montgomerie (actg.) 450

THE West Indies are an immense number of islands and islets, some of them mere rocks, extending from 10° to 27° North, and from $59^{\circ} 30'$ to 85° West, comprising a total area of about 95,000 square miles, of which the Greater Antilles occupy not less than 83,000 square miles. The prevalent character of the islands is bold and mountainous. The highest points are about 8,000 feet above the sea-level, and several of the islands contain active volcanoes, while nearly all of them show signs of volcanic action. The mean yearly temperature of the islands is about 78° , but that of the higher lands is often much less. The seasons alternate from drought to moisture, and in most parts of the archipelago there are two wet and two dry seasons. On the whole it may be said that the climate is generally healthy, and between the months of November and May in many of the islands it is delightful. The vegetable productions are both varied and abundant, the principal articles of commerce including sugar, bananas, oranges, coffee, cocoa, cotton, pimento, nutmegs, indigo, tobacco, maize, guava, ginger, coco-nuts, annatto, aloes, sassafras, the castor-oil tree, cabbage-tree, and medicinal drugs. Of the more common fruits there are the pineapple, pomegranate, cocoa-nut, oranges, lemons, limes, citrons, the mango, shaddock, papaw, banana, and plantain. Yams, sweet potatoes, and manioc also grow freely. The mountains in the greater islands furnish a varied abundance of timber, including mahogany, cedar, lignum-vite, iron-wood, Indian-fig, well adapted for cabinet-work, shipbuilding, and other arts. Indian corn yields abundant crops almost everywhere; and rice in the island of Trinidad. The total population is nearly 4,000,000, of whom above half are negroes, while the remainder are chiefly mulattoes. The islands at the time of their discovery were inhabited partly by the Caribs, a fierce and warlike race, and partly by a less savage race known as the Arrowauks; but both these native Indian races are now practically extinct.

The first spot on which Columbus landed in the New World in 1492 was San Salvador, one of the Bahamas. On the same voyage Cuba and Hispaniola were discovered, and the other islands very shortly afterwards. For some time the West Indies remained in the undisputed possession of Spain, subject only to occasional visits from French and English ships. At the commencement of the 17th century, however, the English, French, and Dutch began to form settlements, and to import negroes from West Africa to work the plantations; and whenever war broke out in Europe it spread to the West Indies. They are now divided as follows:—*British*: Jamaica, Turks and Caicos Islands, Cayman Islands, and Morant and Pedro Cays; all the Bahamas: Antigua, Montserrat, Nevis, St. Christopher, Dominica, the Virgin Islands, Grenada, St. Vincent, St. Lucia, Barbados, Trinidad and Tobago; and the islands off the coast of British Honduras. *French*: Martinique, Guadaloupe, Desada, Marie Galante, Les Saintes, St. Bartholomew, and St. Martin (the last partly Dutch). *Dutch*: St. Eustatius, Saba, Bonaire, Curaçao, Aruba. *Danish*: Santa Cruz, St. Thomas, St. John. *U.S.A.*: Puerto Rico. *Venezuelan*: Coche Cuagna, Tortuga, and Margarita. *Independent*: Hispaniola (divided into Hayti and San Domingo) and Cuba. The British Islands have an area of about 13,750 square miles, and a population of 1,350,000. Disastrous hurricanes have from time to time visited the islands, and earthquakes have caused havoc in many of the towns, as reference to former editions will reveal.

Domestic Imports from United Kingdom, 1908 (Board of Trade):—

Apparel, &c.	£195,227	Machinery	£36,630
Beet and Ale	61,250	Manure	59,104

Leather	77,593	Woolens	124,866
			£2,235,524

Total Exports to United Kingdom, 1908 (Board of Trade):—

Asphalt	£32,867	Oranges	£73,222
Bananas	221,400	Rum	147,743
Cocoa, Raw	557,938	Spices	339,253
Cotton, Raw	126,990	Sugar	376,245
			£2,123,375

JAMAICA.*

aboriginally Xaymaca, or Land of Wood and Water—an island situate in the Caribbean Sea, about 90 miles to the south of Cuba, within $17^{\circ} 43' - 18^{\circ} 32'$ North lat. and $76^{\circ} 11' - 78^{\circ} 21'$ W. long. It is the largest and most valuable of the British West Indian Islands, being 144 miles in length and 49 in extreme breadth, containing an area of 4,193

* The Government of Jamaica publishes annually a Handbook of the Island, full of information respecting the history and personnel of the island.

square miles, and a population, in April, 1891, of 639,491, showing an increase during the previous decade of 58,687; in 1891 the whites numbered 14,692; coloured, 121,955; blacks, 488,624, and there were a number of coolies and Chinese. The estimated population on March 31, 1907, was 830,261.

Jamaica was discovered on May 3, 1494, by Columbus, who called it St. Jago. It was taken possession of by the Spaniards in 1509; but in 1655 a British expedition, sent out by Oliver Cromwell, under Penn and Venables, attacked the island, which capitulated after a trifling resistance. In 1670 it was formally ceded to England by the Treaty of Madrid.

From the sea-level on all sides of Jamaica a series of ridges gradually ascend towards the central ranges, dividing the large rivers, and attaining, in the culminating Peak of the Blue Mountains, in the eastern part of the island, an elevation of 7,423 feet. From these mountains at least 70 streams descend to the north and south shores, but none are navigable except the Black River, and that only for small craft. There are several excellent harbours, and the island is intersected by good roads. There are 18½ miles of railway open. Telegraph stations and post-offices

are established in every town and in very many villages; the number of accounts open in the savings banks was 39,446 (1909). Most of the staple products of tropical climates are raised. Sugar and rum are manufactured and exported; the latter is still counted the best in the world; and the coffee raised in certain districts of the Blue Mountains fetches the highest price that is given in the London market. There is an extensive trade in fruits, chiefly bananas and oranges, with the U.S.A. and U.K. Maize and Indian corn grow luxuriantly. The Guinea grass, from four to six feet in height, grows wild, and is superior to any other for pasturage, while the woods furnish an abundance of rich dye-stuffs, drugs, and spices, and the forests abound in the rarest of cabinet woods. The Governor is assisted by a Privy Council not to exceed 8 members; the Legislative Council consists of the Governor, the senior military officer, the Colonial Secretary, the Attorney-General, the Director of Public Works, and the Collector-General (all *ex officio*), and of such other persons, not exceeding 10, as the King or the Governor may appoint, called Nominated Members, and 12 elected by the people, being one for each parish of the island. The island is divided into three counties, Surrey in the east, Middlesex in the centre, and Cornwall in the west. The principal city is Kingston, the seat of government and the largest port and town, pop. 46,544; the next in importance are Spanish Town, pop. 5,019, and Montego Bay, 4,803. Chief exports: Fruit, 54.9; coffee, 5.5; sugar, 3.6; dye-woods, 2.4; pimento, 6.8; rum, 8.9; and minor products, 17.9. The chief customers are the U.S.A., 57.8, and the U.K., 21.5.

TURKS AND CAICOS ISLANDS.

These islands geographically form a sort of annexe of the Bahama group, from which Government they were separated in 1848. In 1873 they were annexed to Jamaica, from the north-west of which they are distant about 420 miles. They have an area of about 170 square miles. The population in 1901 was 5,287, of which the principal island, Grand Turk, contains 1,751. Salt is the principal industry of the islands, and Sisal hemp is grown and exported.

A Commissioner administers the government of the Dependency, assisted by a Legislative Board. This Board has control of local finance, and passes local ordinances, subject to the assent of the Governor of Jamaica, who is also the medium of communication between the Commissioner and the Colonial Office. The Legislature of Jamaica has the power to pass laws applying to the Turks and Caicos Islands, and the jurisdiction of the Supreme Court of Jamaica extends to the Islands in matters of divorce and matrimonial causes.

CAYMAN ISLANDS.

The Cayman Islands, forming a dependency of Jamaica, are situated between the meridians 79° 44' and 82° 26' W., parallels of 19° 44' and 19° 45' N., and consist of three islands, Grand Cayman, Cayman Brac, and Little Cayman. They are said to have been discovered by Christopher Columbus on his return voyage from Porto Bello to Haiti, and called "Las Tortugas."

The islands were originally a rendezvous for pirates, as is evidenced by the finding every now and again of "treasure" buried in the earth close to the sea coast.

During General D'Oyley's government of Jamaica measures were taken for the protection of the islands, but no attempt was made to colonise till 1734, when Daniel Campbell, John Middleton, and Mary Campbell took out a patent of land in Jamaica for all the land on the north side of Grand Cayman.

The climate is for the most part healthy. The population numbers about 6,000, the majority being whites. The principal occupation of the inhabitants is the seafaring life, there being no manufactures and no other means of livelihood.

The government is administered by a Commissioner, assisted by a Legislative Board, in the same manner as the government of the Turks Islands. The principal town is George-town, in Grand Cayman.

THE BAHAMAS.

a chain of islands lying between $21^{\circ} 42' - 27^{\circ} 34'$ N. lat. and $72^{\circ} 40' - 79^{\circ} 5'$ W. long. The group consists of about twenty inhabited islands, and an immense number of islets and rocks, comprising an area of about 5,794 square miles, and a population in 1908 of 50,283, the most part being descendants of liberated Africans. The principal islands are: New Providence (containing the capital, Nassau), San Salvador, Abaco, Grand Bahama, Long Island, Eleuthera, Exuma, Mayaguana Harbour Island, Great Inagua, Andros Islands, Watlings Island, Rum Cay, Long Cay (F.I.), Ragged Island and Bimini. Originally settled by Englishmen, the Bahamas were, in 1781, surprised by the Spanish, but at the peace of Versailles were restored to the English. The climate is salubrious, and in the winter Nassau, which is outside the tropics, is frequented by many Americans. The chief industry is sponge-gathering; the exports of sponge in 1908 being valued at £94,161. The fruit trade, principally with the United States, is also important, the total value of pineapples exported in 1908 being £11,856; bananas, coco-nuts, fruit and vegetables are also exported. Mahogany, lignum-vite, mastie, ironwood, ebony, logwood, and satinwood are found throughout the islands; tobacco, castor-oil plants, and cotton flourish, but enterprise is lacking to encourage these industries. A fibre industry is fairly established, the land under the fibre plant being 25,000 acres, and the value of Bahamas hemp fibre exported in 1908, £42,627. The imports are chiefly food-stuffs, wines, spirits, cotton, silk and worsted fabrics, and hardware.

The Government is vested in a Governor, aided by an Executive Council of 9 members, a Legislative Council of 9 members, and a Representative Assembly of 29 members.

THE LEEWARD ISLANDS.

The Leeward Islands under British authority consist of the 5 presidencies of (1) Antigua, with Barbuda and Redonda; (2) St. Christopher and Nevis, with Anguilla; (3) Dominica, under Administrators; (4) Montserrat; and (5) the Virgin Islands, all, except the latter, having their own local legislature. These 5 presidencies make up the colony of the Leeward Islands, which is administered by a Governor, to whom the Administrators and Commissioners are subordinate, and which has also a general Legislative Council, possessing concurrent legislative powers with the local Legislatures on certain subjects. The federal colony in 1901 contained 127,434 inhabitants

(56,952 males and 70,482 females). The General Legislative Council consists of 8 *ex-officio* and 8 elective members with the Governor as President. Gov., H. E. Sir Bickham Sweet-Escott, K.C.M.G. £2,600

(1) ANTIGUA (AND BARBUDA).

Antigua is the seat of government and residence of the Governor-in-Chief. It lies in $17^{\circ} 6'$ N. lat. and $61^{\circ} 45'$ W. long., and is about 70 miles in circumference. Its area is nearly 108 square miles, equal to 68,980 acres, of which nearly 17,000 are under cultivation. The population (with Barbuda) in 1901 was 34,953, including 15,861 males and 19,092 females. Settled by the English in 1632, and granted to Lord Willoughby by Charles II., this is one of those islands which has always been more distinctively English. It was at one time a naval and military station of some importance. It is much less hilly and wooded than the other Leeward Islands. It is largely given up to the cultivation of sugar, and two central sugar factories have been erected, sugar canes being purchased from surrounding estates and peasants. A considerable amount of cotton is being planted; it also exports molasses, tamarinds, and arrowroot. In March, 1898, the Crown Colony system of government was instituted.

1906-7, 1907-8, 1908-9.

Public revenue ... £44,175 £50,620 £51,502

Barbuda is situated 30 miles N. of Antigua, of which it is a dependency, in lat. $17^{\circ} 35'$ N., long. $61^{\circ} 45'$ W. Area, 75 square miles. Population, 775.

The island is flat and fertile in parts, producing cotton, corn, pepper, tobacco, and vegetables. It was formerly a possession of the Codrington family.

Magistrate, O. Nugent £50

Manager, H. G. S. Branch 150

Redonda, a small island with a phosphate industry, has a population (1901) of 18.

(2) ST. CHRISTOPHER (ST. KITTS) AND NEVIS

(WITH ANGUILLA).

The islands of St. Kitts, Nevis, and Anguilla were united in 1882 to form one Presidency, and taken together they had a population (1901) of 46,446, and a total area of about 150 square miles.

The climate is decidedly healthy for the tropics, the temperature being from 78° to 85°.

St. Kitts, the principal island of the Presidency, and the oldest colony in the West Indies, is situated in lat. 17° 18' N. and long. 62° 48' W., and comprises an area of 68 square miles, its greatest length being 28 miles, and greatest breadth about 5 miles. It is one of the most effectively cultivated sugar islands in the West Indies, a continuous line of green estates sweeping up all round the coast from the sea towards the central cone, which rises to a height of 3,711 feet (Mount Misery). The capital, Basseterre, pop. (1901) 9,962, is a port of registry, and had 64 sailing vessels of 1,135 tons in 1908.

Nevis (separated from *St. Kitts* by a strait some 3 miles wide) has an area of 50 square miles, with a population in 1901 of 12,774. Sugar-cane and cotton are grown. Its greatest elevation is 3,596 feet. Chief town, Charlestown. Pop. (1901), 1,050.

Anguilla is about 60 miles N.W. of *St. Kitts*, 16 miles in length, and varies in breadth from 1 to 3 miles, containing an area of 35 square miles. Population (1901) 3,890. Salt is the principal production, besides cattle, ponies, and garden stock, while cotton is extensively cultivated.

	1906-7.	1907-8.	1908-9.

(3) DOMINICA, the largest island of the colony, and the loftiest of the Lesser Antilles, is situated between 15° 20'–15° 45' N. lat. and 61° 13'–61° 30' W. long., 95 miles S. of *Antigua*, and is about 29 miles long and 15 broad, comprising an area of 291 sq. miles, or 186,240 acres, of which about 70,000 acres are under cultivation. The island is of volcanic origin and very mountainous and picturesque, abounding in streams fairly well stocked with fish, and the soil is very fertile. The temperature varies, according to the altitude, from 55° to 85°. The cultivation of sugar has been practically replaced by cocoa, limes, coffee, and fruit. The population numbered 29,000 in 1901. The climate is healthy, and during the winter months very pleasant. Yellow fever is unknown, and from November to June the island is suitable as a health resort for pulmonary and rheumatic invalids. There is an Executive Council composed of official and unofficial members, and a Legislative Council, consisting of the Administrator who sits as President, and 6 official and 6 non-official members nominated by the Governor. The principal towns are Roseau, on the south-west coast, population (1901) about 6,000, and Portsmouth, population about 2,500.

	1906-7.	1907-8.	1908-9.

(4) MONTserrat

is situated in 16° 45' N. lat. and 62° W. long., 26 miles S.W. of *Antigua*. It is about 11 miles in length and 7 in breadth, comprising an area of 32½ square miles, and in 1904 a population of 13,127 (6,087 males, 7,040 females). Discovered by Columbus in 1493, it was settled by Englishmen, but conquered and held by the French, and only finally assigned to Great Britain in 1784. It is justly considered the most healthy and beautiful of the Antilles; it contains three active Soufrières and several hot springs, while the scenery is charmingly diversified. About two-thirds of the island are mountainous, the rest well cultivated. The lime-tree is largely grown, and 227,000 lb. of Sea Island cotton, to the value of £13,325, were exported in 1908-9. A flourishing fruit and vegetable preserving industry has been started—jams, preserves and pickles, of various sorts, being made in considerable quantities, and shipped to the U.K. and Canada. The chief town is Plymouth, with a population (1901) of 1,461.

	1906-7.	1907-8.	1908-9.

(5) THE VIRGIN ISLANDS,

a group of islands belonging chiefly to Great Britain and Denmark, form a connecting link between the Greater and Lesser Antilles. Such of the islands as are British became so in 1666; the principal are—*Tortola* (the largest), situate in 18° 27' N. lat. and 64° 40' W. long., *Virgin Gorda*, and *Anegada*. The area of the British possessions is 58 square miles, and the population in 1901 was 4,908. There is good pasture for cows, sheep, and goats. Sugar and cotton are grown in increasing quantity; fishing and poultry-rearing are also carried on. A valuable mine of copper has been worked at *Virgin Gorda*. The capital of the group is *Road Town*, on the south-east of *Tortola*; population (1901), 352.

	1905-6.	1906-7.	1907-8.

Commissioner and Treasurer, R. S. Earl, M.B.			£300

THE WINDWARD ISLANDS.

The Windward, or Southern, group of the West Indian islands includes Barbados, *St. Lucia*, *St. Vincent*, the *Grenadines*, *Grenada*, and *Tobago*. Of these, Barbados is a separate colony with its own governor, and *Tobago* is attached to *Trinidad*. The Government of the Windward Islands is made

up of the three colonies of Grenada (the seat of government), St. Vincent, and St. Lucia, with their dependencies, the Grenadines being divided between Grenada and St. Vincent. There is one governor for the three islands; but there is no General Legislative Council as in the Leeward Islands, and no common tariff or treasury. There is a Court of Appeal, consisting of the judges of the three colonies and of Barbados, a common Audit, and a common Lunatic Asylum; but, with this exception, each island retains its own institutions, and in the governor's absence is governed by an Administrator subordinate to him. The aggregate population (1908) was 180,675, and the total area 508 square miles.

Governor and Commander-in-Chief, H. E.

Sir James Hayes Sadler, K.C.M.G., C.B. £2,500

Private Secretary, L. T. H. Leland 200

Transit, about 14 days.

GRENADA (AND THE GRENADINES).

Grenada is situated between the parallels of 12° 30'–11° 58' N. lat. and 61° 20'–61° 35' W. long., and is about 21 miles in length and 12 miles in breadth; it is about 95 miles north of Trinidad, 68 miles S.S.W. of St. Vincent, and 100 miles S.W. of Barbados. Area, about 85,120 acres, population (including some of the Grenadines), 72,988 (1908). The country is mountainous and very picturesque, and the climate is healthy. The Grand Etang, a lake on the summit of a mountain ridge about 1,740 feet above the level of the sea, and Lake Antoine, are the most remarkable natural curiosities; near the former a sanatorium, under Government auspices, has been established. Grenada was discovered by Columbus in 1498, and named Conception. It was originally colonised by the French, and was definitely ceded to Great Britain by the Treaty of Versailles in 1763.

The soil is very fertile, and cocoa, spices, rubber, cotton, coffee, and fruit are grown. The forests are rich in timbers, particularly bullet wood, locust, mahogany, white cedar, and gamba, and vanilla and several varieties of gum-yielding trees are indigenous. Turtles are caught and exported, and whales are met with, especially among the Grenadines. The imports chiefly comprise dry goods, bread-stuffs, hardware, &c. The Legislative Council consists of 14 members, seven of whom are officials.

St. George's, on the south-west coast, is the chief town, and possesses a good harbour.

Smith, N. Dist. & Commr. of Carriacou	350		
Postmaster, T. B. C. Musgrave	300		

THE GRENADINES are a chain of small islands lying between Grenada and St. Vincent (within which Governments they are included), comprising an area of 8,462 acres. The largest island is Carriacou, attached to the Government of Grenada, pop. (1908) 7,660.

ST. LUCIA,

the largest and most picturesque of the Windward group, situated in 13° 50' N. lat. and 60° 58' W. long., at a distance of about 90 miles W.N.W. of Barbados, 21 miles N. of St. Vincent, and 21 miles S.E. of Martinique, is 24 miles in length, with an extreme breadth of 12 miles. It comprises an area of 233 square miles, with a population (in 1908) of 56,095. It possibly possesses the most interesting history of all the smaller islands. Fights raged hotly around it, and it constantly changed hands as between the English and the French. It is mountainous, its highest point being 3,145 feet above the sea, and for the most part it is covered with forest and tropical vegetation. The principal exports are sugar (4,982 tons in 1908), rum (23,440 gals. in 1908), cocoa (1,355,000 lb. in 1908)—which is now being extensively cultivated—fuel, and sticks. The chief places are Castries, the capital (pop. 1901, 8,000), and Soufrière (pop. 2,300).

Port Castries, one of the finest in the W.I., is a coaling depot. In 1908, 577 steamers (tonnage 1,084,203) entered Port Castries.

Attorney-General, A. de Freitas 500 |

Treasurer, H. A. Smallwood..... 500 |

ST. VINCENT,

an island about 95 miles west of Barbados, situated in 13° 10' N. lat. and 60° 57' W. long., is 18 miles in length and 11 in breadth, comprising an area of 140 sq. miles, and an estimated population (1909), including dependencies, of 52,592. In 1846 a large number of Portuguese labourers, amounting to 2,400, immigrated hither, and proved a valuable acquisition to the island. St. Vincent is more thoroughly English than the two other islands of the group, though it has been the scene of warfare. In 1783 it was secured to Great Britain.

The chief products are sugar, molasses, rum, arrowroot, cassava, cocoa, coffee, cotton (for which a factory has been built by the Government), and spices. The St. Vincent arrowroot has a specially good name in London, and its Sea-island cotton is of particularly fine quality. Its chief imports are linen, cotton and woollen manufactures, American flour, fish, &c. The price of Crown lands (which are mountain lands only) averages from £1 to £3 per acre, according to locality and terms of purchase; steps have also been taken to settle the labouring classes on lands specially acquired for the purpose.

WHITAKER'S ALMANACK, 1910.

BARBADOS,

the most windward of the West India Islands, is situated in $13^{\circ} 4' N.$, and longitude $59^{\circ} 37' W.$ It is nearly 21 English miles long by 14 broad at the widest part, and comprises an area of 106,470 acres (about 166 square miles), about 100,000 acres being cultivated. The population in 1908 was estimated at 194,477, being about 1,200 to the square mile. The principal exports are sugar, molasses, rum and cotton; and the imports rice, salted meat, corn, salted fish, butter, flour, and Indian corn meal.

The deposits in the savings bank on March 31, 1909, were £306,282. Liberal provision is made for elementary education, and Harrison's College provides for higher education. Unlike most of the neighbouring islands, Barbados has always remained in the possession of Great Britain, by which it was settled in 1625. In 1885 it was constituted a distinct government, with a Governor, aided by an Executive Council and an Executive Committee, a Legislative Council of nine members appointed by the Sovereign, and a House of Assembly of twenty-four members elected yearly on the basis of a moderate franchise.

The CAPITAL and port is Bridgetown (pop., 1908, about 30,000), on the shores of an open roadstead (Carlisle Bay).

	1906-7.	1907-8.	1908-9.

Barbados, distant 3,635 miles; transit, 11 days.

TRINIDAD AND TOBAGO.

TRINIDAD is the most southerly of the West India Islands. It is close to the north coast of the continent of America, the nearest point of Venezuela being 7 miles distant. It lies between $10^{\circ} 3' - 10^{\circ} 50' N.$ lat. and $61^{\circ} 39' - 62^{\circ} W.$ long., and is about 55 miles in length by 40 in breadth, with an area of 1,750 square miles (382,473 acres cultivated), and an estimated population (1908-9) of 325,194. The island was discovered by Columbus in 1498, was colonized in 1588 by the Spaniards, and capitulated to the British under Abercromby in 1797. The chief town and port of entry, Port of Spain (pop. 60,000), is one of the finest towns in the West Indies, with electric

lighting, tram, and telephone services. Other towns of importance are San Fernando (pop. 7,610), about 30 miles south of the capital; Princetown (pop. 4,497), and Arima (pop. 4,076). A remarkable phenomenon is the pitch lake near the village of La Brea, 110 acres in extent, containing an apparently inexhaustible supply; in 1908-9, 133,208 tons (£151,026) were exported. The soil is rich and productive, the most important products being sugar, cocoa, molasses, rum, and coco-nuts, and various kinds of timber and fruits. The chief exports (1908-9) were:—Sugar, 39,618 tons; rum, 68,723 gals.; molasses, 358,936 gals.; bitters, 27,194 gals.; and cocoa, 49,137,088 lb. Coal is found in Manzanilla, and is indicated in other parts of the island. There are 89 miles of railway open, and waterworks and sewage operations are in course of construction. The island is crossed by the telegraph wire of the West India and Panama Company, by Government telegraph and private telephone wires. There is also wireless telegraphic communication between Trinidad and Tobago and between Trinidad and Demerara—the former owned by the Government, the latter by a private company. Thirty-eight steamers from Europe arrive every month, and six from the United States and Canada. The Government is vested in a Governor, an Executive Council, and a Legislative Council, all of whom are nominated by the Crown.

	1906-7.	1907-8.	1908-9.
Revenue	£765,272	£871,201	£834,745
Expenditure ...	810,474	781,038	855,050
Public debt ...	1,079,233	1,075,053	1,068,793

Exports	2,872,325	3,907,503	2,500,195

Tobago was annexed in 1839 to the Government of Trinidad, and on Jan. 1, 1899, it was constituted a ward of that island. It is between $11^{\circ} 9' N.$ lat. and $60^{\circ} 43' W.$ long., about 75 miles south-east of Grenada, 18 miles north-east of Trinidad, and 120 miles S.S.W. of Barbados; is 26 miles long, and from 6 to $7\frac{1}{2}$ broad, and has an area of 114 square miles, with an estimated population (1908-9) of 18,751. It is one of the most healthy of the West Indies; the temperature varies from 81° to 88° .

There are two towns in the island, viz., Scarborough (pop. 1,370) and Plymouth.

The Cape of Good Hope was discovered in 1486 by Bartholomew Diaz, the commander of one of the many expeditions sent out by successive Kings of Portugal to discover an ocean route to India. Diaz merely doubled the Cape and returned home. Eleven years later, in 1497, Vasco da Gama not only doubled the Cape and landed in what is now Natal, but successfully accomplished the voyage to India. The Portuguese, however, did not make any permanent settlement at the Cape, although it was used by their vessels, and subsequently also by those of England and Holland, as a place of call in going to and from the East Indies. In 1652 the Dutch East India Company took possession of the shores of Table Bay, established a fort, and occupied the lands adjacent, in order to be always ready with supplies for their passing ships. In 1814 the Cape was formally ceded to the British Crown.

*THE IMPERIAL GOVERNMENT.

<i>High Commissioner for South Africa (£3,000) and Governor of the Transvaal, The Rt. Hon. the Earl of Selborne, K.G. (1905)</i>	£3,000
<i>Imperial Secretary, C. H. Rodwell, C.M.G.</i>	1,200
<i>Private Secretary, Douglas O. Malcolm</i>	700
<i>Military Secretary, Major E. C. F. Garraway (S.A.C.)</i>	750
<i>Aide-de-Camp, Capt. E. C. Cameron (Lovat's Scouts)</i>	300
<i>General Officer Commanding, South Africa, General Lord Methuen, G.C.B.</i>	
<i>Assistant Military Secretary, Major C. J. FitzGerald (R.H.G.)</i>	
<i>Major-General in Charge of Administration, Maj.-Gen. C. A. Hadfield.</i>	

The High Commission.—The office of High Commissioner, which was formerly combined with the Governorship of Cape Colony, was by a Commission issued in 1900 vested in Lord Milner, and by a similar Commission, dated 15th March, 1905, in Lord Selborne, who is also Governor of the Transvaal. The High Commissioner is Governor of Basutoland, and supervises the affairs of the Bechuanaland Protectorate, and he exercises the control provided by Order in Council over the Administration of the British South Africa Company in Southern Rhodesia (*i.e.*, south of the Zambesi). The Southern Rhodesia Order in Council, 1898, provides for a control by the High Commissioner over legislation, important appointments, and Native affairs in Rhodesia, and for the appointment of a Resident Commissioner, who is paid from Imperial funds and acts as the local representative of the High Commissioner and the Imperial Government. The Administration of Barotsiland (North-Western Rhodesia) and Swaziland is placed under the control of the High Commissioner by Order in Council.

THE SOUTH AFRICAN CUSTOMS STATISTICAL BUREAU.

As a result of the conference of Customs Officers, held in March, 1904, the various Governments in the Customs Union agreed to the establishment as from July 1, 1905, of a South African Customs Statistical Bureau, whose headquarters are in Cape Town. This Bureau compiles all statistics relating to the imports into and exports from all the colonies and territories in the Customs Union, as well as those relating to inter-colonial trade. The Bureau is also charged with the apportionment of the Customs duties due to each colony or

territory on imported goods entered for consumption therein. The Bureau is governed by a Board consisting of the principal officers of Customs of the colonies and territories comprising the South African Customs Union.

<i>Principal, A. J. S. Lewis</i>	£1,000
<i>Customs Union Clerk, N. Dallas Forbes</i>	600
<i>Clerk and Accountant, F. Fisher</i>	475
<i>Clerk & Examiner of Accounts, A. G. Ashley</i>	425
<i>Senior Statistical Clerk, J. G. Bam</i>	450
69 clerks, £50 to £395.	

* By the South Africa Act (9 Edw. VII., cap. 9) the Cape Colony, Natal, the Transvaal, and the Orange River Colony are united as from a date within one year of the passing of the Act (Sept. 20, 1909). The seat of government is Pretoria; the seat of the Legislature is Cape Town.

CAPE COLONY.

The CAPE OF GOOD HOPE, strictly speaking, is a small promontory near the S.W. extremity of the continent of Africa; but the extensive colony of that name, in which are now included the Diamond Fields, the Transkei territories, Bechuanaland, and Pondoland, is washed by the Atlantic and Indian Oceans on the west and south and south-east, while upon the north and north-east it is bounded by the German Protectorate and each of the other colonies of South Africa. It reaches in S. lat. from 26° to 34° 50', and in E. long. from 16° 25' to 30°. Its extreme length from E. to W. is nearly 750 miles, and its breadth 550 miles, with a coast-line of nearly 1,200 miles, and an area of 276,995 square miles, or 177,376,660 acres, according to the latest estimate (1908), of which 42,210,382 acres were not disposed of in 1908. The territory of Walfish Bay, on the west coast, is also a portion of the Colony.

Cape Colony is divided, geographically, into two parts by the main range of mountains, which, as already mentioned, follows the line of the South African coast at a distance of 100 to 150 miles from the sea; and the southern portion is divided again by two other ranges which run across from W. to E., and are not quite so high as the first. Between the mountains and the sea, in the south-western portion of the Colony, are the chief grain and wine producing districts; in the south there are extensive forests; and along the south-eastern coast, where there are summer rains, tobacco and maize are successfully cultivated. Between the two upper ranges of mountains is an elevated tract known as the Great Karroo, which extends from W. to E. for 300 miles, and has a breadth of 70 miles. During a great portion of the year the Karroo is, as its name implies, a dry and barren district, but after rain it is covered with luxuriant vegetation, and supports countless flocks of sheep and many cattle and horses. It is here also that the important industry of ostrich-farming is carried on. The country to the north of the mountains is still more elevated, forming part of the great South African table-land. It supports, like the rest of the Colony, large numbers of sheep, and contains the chief mineral districts. The rivers of South Africa are numerous, but practically useless for either irrigation or navigation. Most of them flow in deep and precipitous ravines, and, except when swollen by the rains, are merely shallow torrents, even the largest having only sufficient water for the smallest craft, or bars at their mouths which render entrance both difficult and dangerous. The climate is healthy, and its peculiar dryness and the uniformity of the temperature cause it to be much favoured by Europeans suffering from pulmonary complaints. The vegetation of South Africa has a peculiar and distinctive character; flowers of great variety abound everywhere. The principal native flora are heaths, proteas, and stapelias (or carrion flowers), and dense thorny thickets of what is called *bush*, in which are several species of aloes. The native animals are either disappearing altogether or retreating northward owing to the rapid spread of civilization. But elephants and buffaloes are still found on the south coast, and springbok abound.

The Population of the whole Colony numbered 2,409,804 when the census was taken on 27 April, 1904, inclusive of the native territories, Griqualand West and Pondoland, the European population then being 579,741 (328,544 males and 251,197

females). The births registered in the ten years 1899–1908 were 54,548, 53,117, 53,468, 53,900, 56,278, 56,802, 53,028, 57,870, 60,415, and 60,524; the deaths in the same period amounting to 37,247, 47,604, 41,043, 41,207, 40,826, 40,695, 36,699, 35,609, 35,491, and 33,967. The Dutch preponderate in the western and the English in the eastern districts.

Education.—The number of schools in operation (June 30, 1909) was 3,681, attended by 172,225 children. There are also five colleges, with 842 students, and a University (Chancellor H. R. H. the Prince of Wales, K.G.), where 9,063 students have matriculated and 1,070 have taken direct degrees. The expenditure under the Education Vote in the year ended June 30, 1908, was £578,528.

Commerce and Industry.—The principal industries are the production of wool, wine, and ostrich feathers, and the rearing of horses and cattle; but great attention is paid to the culture of wheat, barley, and oats. The principal imports (1908) were: animals, living, £141,585; agriculture, articles for use in, £446,251; food and drink, articles of, £3,952,861; raw materials for manufactures, £1,830,725; manufactured articles, £9,381,087. The principal exports (1908) were: diamonds, £4,796,655; gold, £30,992,137; and other produce, £6,222,790.

Minerals, &c.—There are important mines of copper in Namaqualand, the ores being of the richest kind, and yielding a percentage of from 32 to 36. Gold is found in the Knysna division, and manganese in the Paarl. Coal of considerable value is also raised, the output in 1908 being 122,865 tons. The value of diamonds found at Kimberley in 1908 was £2,685,150.

Railways.—The railways are mostly the property of the Government, which on Dec. 31, 1908, owned and worked 3,265 miles. There were also 601 miles of privately owned railways in Cape Colony, Bechuanaland Protectorate, and Rhodesia, worked by Government, and 376 miles privately owned and worked in Cape Colony. The Cape to Cairo Railway scheme places Capetown in communication with Bulawayo, the commercial centre of Rhodesia; Salisbury, the capital of Rhodesia; Beira, the Victoria Falls, and Broken Hill. To the 31st Dec., 1908, the capital expended by Government was £32,155,156. The returns for 1908 show a profit of £1 17s. 8d. per cent. per annum on the capital expended.

Posts and Telegraphs.—There were (1908) 1,065 post offices open, and 64,461,572 letters, &c., were conveyed; money and postal orders issued, £1,376,953; savings bank deposits, £2,654,062; telegraph offices, 586, with 31,836 miles of wire; telephone wires, 5,751 miles, with 4,560 sets of instruments; postal revenue, £380,707; telegraph and telephone (1907) £191,444. There is cable communication with Europe *via* West Coast, *via* St. Helena and overland, and a direct line to Australia *via* Natal.

Defence.—The Colonial Forces in time of peace consist of Cape Mounted Riflemen (575 officers and men), and horse and foot volunteers (4,008 officers and men). There is also a body of Mounted Police, with about 767 officers and men. In cases of emergency every able-bodied man between 18 and 50 years of age may be called upon to defend the Colony, and there is an Imperial garrison stationed at Wynberg. For external purposes a Cape of Good Hope Squadron is stationed in these waters, having a naval depot in the Colony at Simon's Bay, where large naval works are being carried out.

Harbours.—Extensive harbour works have been constructed at Table Bay (Cape Town), Port Elizabeth, East London, and Mossel Bay. The administration of the first three was amalgamated with that of the Cape Government Railways on 1 January, 1909, while the last named has a board nominated by Government.

At Table Bay (£4,171,152 expended up to 31 December, 1908) the docks consist of an outer basin, area 64 acres, and inner basin, area 8½ acres. Depth of water from 20 ft. to 35 ft. (L.W.O.S.T.). Length of berthage 2½ miles, with good anchorage and graving dock.

The works at Port Elizabeth consist of two jetties 1,160 ft. long, which cost £260,000, and a third jetty 1,460 ft. in length, which cost £185,000. In addition, there is a jetty, 1,380 ft. from the shore, with an aerial ropeway, used principally for explosives traffic.

At East London, situated on the Buffalo River, extensive harbour works have been carried out, costing, including interest on loans, to 31 December, 1908, £2,254,462, and the improvements are still proceeding. The dock area is 100 acres, and present length of quay space 5,601 ft.

Cape Town, Port Elizabeth, and East London are connected by rail with all the railway systems of Cape Colony and other South African States.

Mossel Bay lies between Cape St. Blaize and the Great Brak River, and is about 6 miles wide with a harbour affording excellent shelter to vessels. Mossel Bay is linked with the main line from Cape Town to the northern colonies at Worcester, and is also connected by railway with George Town.

There are electric tramways in Capetown, Port Elizabeth, East London, and Kimberley.

BASUTOLAND.

Basutoland is an inland colony, lying between 28° 45' and 30° 40' South latitude and 27° and 29° 30' East longitude, with a computed area of 10,233 square miles. The census of 1904 showed 347,731 natives and 895 whites.

The territory is well watered, and enjoys a delicious climate. It is one of the finest grain producing districts in South Africa, and the abundant grass enables the Basutos to rear immense herds of cattle. The Maluti Mountains, forming a part of the great Drakensberg chain, occupy most of the country, which is elevated, broken, and rugged.

The territory is governed by a Resident Commissioner under the direction of the High Commissioner for South Africa, the latter possessing the legislative authority which is exercised by proclamation. The chiefs adjudicate on cases between natives, with a right of appeal to the magistrates' courts, where all cases between Europeans and natives are brought. The revenue arises from the Customs dues, the Post-office, native hut-tax, and the sale of licences. Telegraph offices have been opened at Leribe, Maseru, Teyateyaneng, Morija, Mafeteng, Mohale's Hoek, Quthing and Peka in connection with the Cape Colonial system. There are 248 schools, with 12,000 scholars, a large proportion being in the schools of the French Protestant Mission. Grants in aid of education to the extent of £10,630 were made in 1908-9. The chief articles of export are grain, wool, cattle, and horses, the imports being chiefly blankets, hardware and groceries.

THE BECHUANALAND PROTECTORATE.

The Protectorate is bounded on the south by Cape Colony, on the east by the Transvaal, on the north by Rhodesia and the Zambesi, and on the west by German South-West Africa. It is about 400 miles long and 130 miles broad; area about 275,000 square miles, and population about 134,000, of whom 1,000 are whites.

The climate is healthy during part of the year, but malarial fever is prevalent during February, March, and April. The country is essentially pastoral, although Kafir corn is sown and when the rainfall is adequate crops are reaped. Cattle thrive and are numerous. Much of the country is thick bush. The High Commissioner for South Africa has the power of making laws by proclamation for the Protectorate, where he is represented by a Resident Commissioner. The population is almost entirely a native one, the principal tribes being those of Khama (Bamangwato), of Linchwe (Bakathla), of Sebele (Bakweni), of Bathoen (Bangwaketsi), of Baitlotle (Bamaletle), and of Mafithe (Batawana).

The railway from Kimberley to Vryburg and Mafeking traverses the Protectorate on its way to Rhodesia. There is a telegraph line from Cape Colony through from Mafeking, *via* Gaborones, and Francistown to Bulawayo and Salisbury. The chief European centres are Gaborones, Francistown, and Serowe, whither the Chief (Khama) and all his people moved a few years ago from Palapye. The headquarters of the Protectorate Administration are at Mafeking, Cape Colony.

	1906-7.	1907-8.	1908-9.

<i>Assist. Com. and Magistrate in Northern Protectorate, R. M. Daniel</i>			£650 to £750

THE TRANSVAAL.

The Transvaal has a total area of 110,425-78 square miles (deducting the area of Vryheid and Utrecht, districts annexed to Natal), and consists of certain districts bounded on the east by Portuguese possessions, but touching Natal at the south-east corner; on the south by Natal and the Orange River Colony; on the west by Cape Colony and the Bechuanaland Protectorate; and on the north by Rhodesia; about 20,000 sq. miles lying within the tropics.

The larger portion lies to the west of the Drakensberg (Mt. Mauch, 8,725 feet) and slopes down to the Limpopo River and Bechuanaland; a smaller section lies to the east of that range towards the Indian Ocean, and along the greater part of its eastern frontier is closed in by Portuguese territory from having direct access to the sea.

Steppes and bush predominate and favour pastoral industries, whilst agriculture labours under many drawbacks. Gold, first discovered in 1871, constitutes the wealth of the country; diamonds, coal and silver are also found, whilst iron ores and other metals are known to exist. The Central South African Railways, which include the lines of the late Netherlands South African Railway, the late Orange Free State Government Railways, and the line known as the Pretoria-Pietersburg Railway, connect the colony with

Delagoa Bay, Durban, and the Cape; the total length open for traffic at the end of 1908 was 2,627½ miles, and 64½ miles were under construction. Of the commerce about 70 per cent. was with Cape Colony up to 1899. In 1908 the imports were distributed thus: 35·60 per cent. from Cape Colony, 29·12 per cent. from Natal, 27·67 per cent. from Delagoa Bay, and 0·12 per cent. from Swaziland, Rhodesia, Basutoland, and Bechuanaland Protectorate.

The population according to the census of 1905 was 1,268,716, of whom 299,327 were whites, 945,498 aboriginal, and 23,892 native natives.

In 1882 the revenue only amounted to £177,407; in 1893 this had increased to £1,702,685, and in 1897 to £4,480,218, owing to the increased prosperity of the gold-bearing districts; the expenditure was £4,394,066 in 1897, and the debt £2,675,690 in 1898. Municipal borrowings at 30 June, 1908, amounted to £5,795,718; Public debt in 1908: Transvaal and Orange River Colony, £35,000,000; Treasury Bills, £500,000; Railway Debentures, £786,600; total, £36,286,600. The trade of the country amounted in 1897 to about £24,500,000, of which £23,563,827 represented the value of imports. The output of gold in the year 1897 was valued at £11,653,727; in 1901, 231,076 oz. (£981,549); 1902, 1,718,920 oz. (£7,301,501); 1903, 2,972,897 oz. (£12,628,057); 1904, 3,773,517 oz. (£16,028,883); 1905, 4,909,540 oz. (£20,854,440); 1906, 5,786,617 oz.; 1907, 6,450,740 oz. (£27,400,992); 1908, 7,056,266 oz. (£29,973,115). The total value of the diamonds produced is as follows:—1905, 802,174 carats (£222,330); 1906, 1,066,392 carats (£1,563,141); 1907, 2,062,855 carats (£2,268,075); 1908, 2,022,687 carats (£1,549,815). The coal output was:—1898, 1,907,808 tons—of 2,000 lb.— (£668,346); 1900, 506,074 tons (£197,127); 1901, 797,144 tons (£329,112); 1902, 1,590,333 tons (£637,640); 1903, 2,253,677 tons (£877,976); 1904, 2,409,033 tons (£883,891); 1905, 2,606,799 tons (£846,272); 1906, 2,892,404 tons (£832,315); 1907, 2,883,423 tons (£773,649); 1908, 3,012,692 tons (£794,949).

The new Constitution, which was provided for by Letters Patent issued on Dec. 6, 1906, consists of a Legislative Council of 15 members elected by the Governor, and a Legislative Assembly of 69 members elected by the registered voters of the Transvaal. The Legislature is elected for a term of five years but may be prorogued or dismissed by the Governor. The executive is vested in the Ministers, not more than six, who are appointed by the Governor. Municipalities have already been created in all the most important towns.

The Capital is PRETORIA, pop. 1904, 56,700 (21,161 whites), the principal town being JOHANNESBURG (the centre of the Witwatersrand gold-fields); population in 1904, 158,580 (83,002 whites).

THE ORANGE RIVER COLONY.

The Orange River Colony is bounded on the east by Basutoland and Natal, on the north by the Transvaal Colony, and on the west and south by the Cape Colony. It was founded, in much the same way as the Transvaal, by Boer emigrants from Cape Colony, and its independence was granted in 1854, to be lost when thrown into the cause of its Boer neighbour in the war of 1899-1902. The total area is 50,392 square miles, with a population at the census of 1904 of 387,315, of whom 142,679 were whites (males 81,571, females 61,108).

It is essentially a pastoral country, but the eastern part is also admirably adapted for the cultivation of grain. Diamonds, garnets, and other precious stones are found, and rich coal-mines exist, while there are indications of gold. The chief exports are wool, ostrich feathers, hides, diamonds, grain, &c.

‡ And quarters. † Plus £150 personal allowance.

BLOEMFONTEIN, the Capital and seat of Government, had a population of 13,512 whites, 3,487 troops, and 16,033 natives in 1905. A new sewerage system and an additional water supply are in successful operation. Six new bridges of masonry, 85 ft. span, have been built over the Bloem Spruit, which has been straightened to avoid a repetition of the serious flood of Jan., 1904.

Other towns are Kroonstad (2,454 whites and 3,343 natives), Ladybrand (2,333 whites and 1,515 natives), and Harrismith (2,238 whites and 3,068 natives).

Under the Constitution of 23rd June, 1902, the Government consisted of a Governor and a Lieutenant-Governor, assisted by an Executive and a Legislative Council. By Letters Patent, dated the 5th June, 1907, a Responsible Government has been constituted for the Colony, and was promulgated on the 1st July, 1907, on which date also the Lieutenant-Governorship was abolished and Sir Hamilton Goold-Adams, who had held that office, was appointed Governor. The new Constitution provides for a Legislative Council of 11 members and a Legislative Assembly of 38 members. The latter number has been increased by Act of 1908 to 39, by the division of one of the larger country constituencies into two constituencies. The first general election was held on Nov. 20, 1907, and resulted in the return of 29 members of the "Orange Unie" party, 5 of the Constitutional Party, and 4 Independents.

Bloemfontein is distant from London 6,700 miles. Transit, *via* Capetown, 19 days.

NATAL.

Natal derives its name from its discovery by Vasco da Gama on Christmas Day, 1497. The first European settlement was formed (1824) by a small party of Englishmen, who came by sea and established themselves on the coast where Durban now stands. Natal was then a part of the great Zulu kingdom under T'Chaka. Between 1835 and 1837 another settlement was formed by a large body of Dutch Boers. In 1843 Natal was proclaimed as British and annexed to the Cape Colony. In 1856 it was erected into a separate colony, and in 1893 acquired responsible government. It lies on the south-east coast of Africa, Durban or Port Natal being about 800 miles from Capetown. Speaking roughly, it is in 30° E. long. and 30° S. lat. It comprises an area of 35,371 square miles, with a seaboard of 376 miles. No less than 35 distinct rivers run through it into the Indian Ocean, but not one of them is navigable. On the N.W., Natal is bounded by the

Transvaal Colony; and, as in the Cape Colony, the country rises from the sea to the mountains by a series of terraces.

Population.—The estimated population at 31 December, 1908 (exclusive of military), was: Europeans or whites, 91,443; mixed and others, 7,386; Indians and Asiatics, 116,679; natives, 990,878—a total of 1,206,386.

Production, etc.—The coast region, extending about 15 miles inland, is highly fertile, and has a semi-tropical climate. Maize is the most generally cultivated crop throughout the colony, and sugar, coffee, arrowroot, ginger, tobacco, bananas, vegetables, and pepper thrive in the coast region, and the pineapple ripens in the open air. Tea is also grown, and its cultivation has become a thriving industry. The midland district is more adapted for cereals and other European crops. The upper district is chiefly grazing land, and sheep-farming is the principal occupation of the inhabitants; horses and cattle are also reared in large numbers. The coalfields of the colony are of large extent, and are connected by rail with the seaport of Durban; the output for 1908 was 1,669,774 tons, and for 1907 1,530,043 tons; there is a considerable export trade in coal, 710,777 tons being bunkered and 553,157 tons exported in 1908, in addition to 254,166 tons consumed by the railway department. Asbestos, copper, fireclay, gold, graphite, gypsum, iron, lead and silver, limestone and marble, manganese, molybdenum, nickel, nitre and tin are also found. In the immediate vicinity of Pietermaritzburg iron ores, some of very high grade, have been found in immense quantities, and iron of excellent quality is being produced at a cost which ensures the establishment of an important industry. The coke used is manufactured on the premises, while fireclay, ganister, and remarkably good moulding-sand are obtained on the estate. Large forests of valuable timber abound in the kloofs, and many tracts along the coast are also well wooded. Cotton growing is being tried, and promises well. The chief exports are coal, wool, mohair, wattle bark, tea, sugar, tobacco, maize, fruit and preserves, hides and skins.

Education.—There are 2 Government high schools, at Pietermaritzburg and Durban; 41 primary schools, 2 art schools, 5 Indian schools, and 2 Government schools for coloured children; there are also 472 private Government-aided European, native, Indian and coloured schools.

Railways.—There are 935 miles of railway open, all constructed or worked by the Government. The main line extends from the Port of Durban to Pietermaritzburg (the capital of the Colony, 70 miles inland), and thence to Charles-town, on the border of the Transvaal (306 miles distant from the port), where it connects with the line to Johannesburg and Pretoria. Branch lines run from Thornville Junction (59½ miles from the port) to Richmond (17 miles), and from Pietermaritzburg a branch connects Greytown with the city (64½ miles); to Harrismith in the Orange River Colony, from the main line at the 190¾ mile-post, was opened on July 12, 1892, with a mileage of 59¾ miles, 35½ of which are in Natal, terminating at Van Reenen. This branch was extended to Bethlehem on May 1, 1905, a distance of 64¾ miles from Harrismith, and a further section of 88½ miles to Kroonstad in the Orange River Colony, which place is also served by the C.S.A.R. main line; from Glencoe Junction (231½ miles from the port) to Vryheid, a distance of 59½ miles, northwards from Durban

to Sonkele (167½ miles) in the Province of Zululand; from South Coast Junction to North Shepstone (77½ miles); this line is now being extended to Beach Terminus; from the South Coast branch at Alexandra Junction to Umzinto, 6½ miles, connecting the main line with the Bluff side (West); from Pietermaritzburg (the Natal trunk line junction) to Creighton, a distance of 95 miles. The total cost of construction of the railways up to the end of 1908 was £13,989,202. The receipts for 1908 were £1,832,862, and the expenditure £1,240,319. The net receipts were equal to £4 4s. 8.57d. per cent. upon the capital expended on open lines.

Zululand, annexed in 1897, comprises about two-thirds of the country formerly under Zulu kings, and is bounded on the south and south-west by the Tugela River; on the south-east by the Indian Ocean; on the north by the Portuguese possessions; and on the west by the new territory (formerly Utrecht and Vryheid districts of the Transvaal) and Swaziland. The Amaputaland Protectorate, created by proclamation of 22 Nov., 1897, was annexed to Zululand on 27 Dec., 1897, and now forms part of the Province. The Northern Districts, so-called, territory (consisting of the Magisterial Divisions of Vryheid, Utrecht, Paulpietersburg, and Babanango) was annexed to Natal on 27 January, 1903.

Defence.—On 31 Dec., 1908, the total defence force of Natal consisted of the Natal Police (mounted), 857 all ranks, exclusive of native and Indian constables, and an active militia force of 2,432 (1,356 mounted and 255 artillery). The Militia Act, which came into force during 1904, remodelled the Volunteer Force, and changed the title to Militia, giving the government power to call out all males between 18 and 60. There were also, at the same date, 122 rifle associations, with a total strength of 5,005, excluding Natal Police and Militiamen; besides 235 senior cadets, and 3,277 school cadets.

The Government of the Colony consists of a Governor, a Legislative Council, and a Legislative Assembly. The former consists of 13 members, nominated by the Governor in Council, one half of whom retire every 5 years. The latter consists of 43 members, including 2 each for the new districts of Vryheid and Utrecht, elected by popular vote. There are 25,463 electors on the register, and there is a property qualification.

PIETERMARITZBURG, the capital and seat of government, is situated about 54 miles inland from Port Natal. Population, exclusive of military (estimated at 31 Dec., 1908), 31,230.

In Durban (pop. 60,244, including 27,327 Europeans, 1,960 mixed and others, 15,900 natives, and 15,057 Asiatics as estimated 31 Dec., 1908), or Port Natal, is the only harbour of any importance on the south-east coast. The entrance is now safe and navigable for any vessel at any time; the average low-water depth at the entrance, the bar being no longer existent, for 1908 being 33 ft. 7 in.

Acting Commercial Representative, Bulawayo,
J. A. Stevens.
Director of Land Settlement, C. D. Wise, Salis-
bury.
Resident Engineer in Rhodesia, A. H. Acker-
mann, Bulawayo.

NORTHERN RHODESIA.

This territory, first opened to British influence by Dr. Livingstone, is divided into North-Eastern and North-Western Rhodesia, which are still occupied by the native tribes living under their own chiefs. Extensive mineral deposits, copper in particular, have been discovered. Indigenous india-rubber is found in large areas. Timber, cattle, and all agricultural produce abound.

SOUTHERN RHODESIA.

Railways.—The main arteries of communication are the Mashonaland and the Rhodesia Railways. The latter is a continuation of the line from Cape Town to Vryburg, *via* Kimberley, and was opened to Bulawayo in November, 1897, the distance from Cape Town being 1,362 miles. A line to connect Salisbury with Bulawayo (300 miles) was completed in Oct., 1902. From Salisbury the Mashonaland Railway runs eastwards to Umtali and thence to the port of Beira (Portuguese), a distance of 375 miles. The section from Bulawayo *via* the Wankie coal-

fields to the Victoria Falls (281 miles) was completed in June, 1904. The line crosses the Zambesi at the Falls, and has been opened to Broken Hill in N.W. Rhodesia. The railway is being extended to the Congo border (132 miles), and is expected to be completed by the end of 1909. A light railway (2 ft. gauge) has been completed between Salisbury and the Ayrshire Mine (84 miles), with a branch to the Eldorado Mine (12 miles). A line connects Gwelo with Selukwe (about 23 miles) ; a line from Bulawayo *via* Gwanda to West Nicholson (119 miles), opens up the gold and coal areas lying to the south-east ; and a branch to the Matopos, where the founder of Rhodesia is buried, was opened on Nov. 1, 1903.

The African Transcontinental Telegraph Line ("Cape to Cairo") has been constructed as far as Ujiji in German East Africa, about 3,250 miles from the Cape.

The Natives, enumerated in December 1903, at 682,000, have now settled down, content with their unwon prosperity and immunity from tyranny and pillage.

Industrial Progress.—Southern Rhodesia is rich in mineral deposits, and it abounds in traces of the ancient gold-workers. Though the climate is sub-tropical, the average altitude makes it well suited to European fruit-trees, cereals, and vegetables, in addition to the indigenous products of the country—*e.g.*, tobacco, rubber, cotton, and all kinds of grain. The country is being re-stocked, and inoculation upon a large scale is stamping out various descriptions of veterinary disease.

The first regular crushing returns began in September, 1898, and the gold produced to the 30 Sept., 1909, has an estimated value of £13,762,954. The output for the year ended 31 December, 1908, was valued at £2,526,007, an increase of £347,121 in value over the returns for 1907. The gold output for the nine months ended 30 Sept., 1909, is valued at £1,931,431. Silver, copper, coal, diamonds, lead, chrome, iron, asbestos, and other minerals have also been produced in considerable quantities.

Constitution.—Southern Rhodesia is administered by the Company under the Charter of 1889, as amended by the Orders in Council of 1894, 1898, and 1903. The Administrator is advised by an Executive Council of not less than four members, and there is a Legislative Council, consisting of the Administrator, the Resident Commissioner (*ex officio*), and 14 members, seven of whom are elected by the registered voters of Mashonaland and Matabeleland, and seven nominated by the Company with approval of Secretary of State.

The laws in force in the Cape Colony up to June 10th, 1891, have continued in force in Southern Rhodesia, so far as they are applicable ; whilst from 1891 to 1899, when the Legislative Council was first convened, laws were amended or enacted by the ordinances of the Directors, the regulations of the Administrator in Council, and the proclamations of the High Commissioner. Municipal self-government has been established in Bulawayo and Salisbury. Rev., 1907-8, £554,029 ; exp., £543,597.

The total white population of Southern Rhodesia at the census of 1907 was 14,007.

The political capital is SALISBURY, 4,880 ft. above sea-level, the chief town of Mashonaland (white population in 1907, 1,684). BULAWAYO, 4,456 ft. above the sea-level, the chief town of Matabeleland, is the commercial centre, with a white population of 3,491 in 1907.

* Including £400 travelling allowance.

British West Africa.

THE partition of West Africa among the various European Powers is now complete, and the British Dominions therein consist of the Colonies and Protectorates of the Gambia, Sierra Leone, the Gold Coast, and Southern Nigeria, which are all situated upon the coast of North-Western Africa, between the mouth of the river Senegal and the Cameroons, and of the Protectorate of Northern Nigeria. These Dominions were not originally colonies in the strict sense of the word, but merely trading settlements in which the products of the neighbouring countries were collected and exchanged for European goods with as little outlay as possible; but of late years a great part of the revenue has been expended on the development of the territories, the advancement of the education of the natives, and on the encouragement of the cultivation of natural produce. The climate is such that Europeans cannot live there permanently, and even the native inhabitants suffer from malarial fever. The West Coast of Africa has, however, been eagerly frequented by European traders since it was first explored by the Portuguese in the latter part of the 15th century, just before the discovery of America by Columbus. In the 17th century all the chief maritime nations of Europe, except the Spaniards, had forts or factories established on the coast, from which they used to supply slaves to their plantations in the West Indies and on the mainland of America. The importance of the coast was much diminished when these same nations agreed, at the commencement of the nineteenth century, to join in putting down the slave trade, and the Dutch and the Danes relinquished their possessions; but a healthier interest in the West Coast has since arisen in the development of a legitimate trade in tropical products, of which palm oil is the most important, to take the place of the trade in slaves. The Germans possess the territory of the Cameroons and Togoland, in the immediate neighbourhood of the British possessions; and, more to the south, the Congo Free State has been founded by the King of the Belgians. British authority has been extended, by means of the Colonies and Protectorates, and by the action of the Royal Niger Company, which exercised all the functions of government until the territories under its control were incorporated with Southern Nigeria in 1900.

GAMBIA.

The river Gambia was discovered by the Portuguese in 1447; and in 1588, the year of the Spanish Armada, Queen Elizabeth, being then at war with Spain and Portugal, gave a charter to a British Company to trade with the Gambia, and as early as 1618 an effort to do so was made, but it was not successful. In 1686 a fort was built upon a rocky island, and in honour of the new King, was named Fort James; but the English merchants had formidable rivals in the Portuguese and French, and it was not until 1783 that the river was recognised, by the Treaty of Versailles, as British. It had no regular political institutions until 1807 when it was put under the Government of Sierra Leone. The Colony of the Gambia was created in 1843, and was constituted a separate government in 1888. The colony now consists of the Island of St. Mary, British Combo Albreda, the Cedé Mlle, McCarthy's Island, and various other islands and territories on the banks of the river. The population (1 April, 1902) was 13,456 (excluding Protectorate, 140,000). The climate is unhealthy during the rainy season, viz., from June to October; but during the rest of the year it is fairly healthy. The chief export is ground nuts, which form nearly nine-tenths of the total exports. They are sent chiefly to Marseilles, where the oil is extracted and used for the same purpose as olive oil. Beeswax, rubber, and hides are also exported; and rice, cotton, maize, and a kind of millet called *kous* are produced in the countries bordering the Gambia, but not in sufficient quantities for export. The chief imports are cotton goods, kola nuts, rice, and tobacco. A Company of the W.A.F.F. (3 officers and 120 non-commissioned officers and men) is stationed in the Colony,

and there is an armed police force in the settlement (numbering 72 men), which performs both civil and military duties. There is also a volunteer artillery corps consisting of 3 officers and 25 rank-and-file. The government, which is that of a Crown Colony, is now vested in a Governor, assisted by an Executive Council, consisting of 3 official members (besides the Governor), and by a Legislative Council of 5 official members and 4 unofficial members, nominated by the Crown.

THE GOLD COAST COLONY.

This colony comprises the coast of the Gulf of Guinea from about 3° 7' W. to 1° 14' E. of Greenwich, with a protectorate extending inland to an average distance of 440 miles, or to the 11° of N. latitude, bounded on the west and north by the French colonies of the Ivory Coast and French Soudan, and on the east by the German colony of Togoland. The population of the colony is estimated at 895,350 (exclusive of Ashanti and the Northern Territories), of whom about 1,000 are Europeans. The natives are almost all Pagans, but the number of Mohammedans and Christians is steadily increasing. The Castle and settlement of Elmina was founded by the Portuguese and taken from them by the Dutch. In 1618, some English merchants built a fort at Kormantynne, and subsequently many forts and factories were established, not only by the English and Dutch, but also by the French, the Danes, and the Germans, for the purpose of supplying slaves to their West Indian and American possessions. The first English Company to trade with the Gold Coast was chartered in 1662. This was succeeded in 1672 by the Royal African Company, which enlarged and strengthened Cape Coast Castle until it was the best on the coast, and also built forts at Dixcove, Sekondi, Kommenda, Anamabo, Winneba, and Accra. This was again succeeded in 1750 by the African Company of Merchants, which was constituted by Act of Parliament, with liberty to trade and form establishments on the West Coast of Africa between 20° N. and 20° S. lat. The settlements were in 1821 transferred to the Crown, and placed under the government of Sierra Leone, from which they were finally separated in 1874 under the title of Gold Coast Colony. The Dutch and English forts were intermingled until 1867, when an exchange was effected which gave all those on the west of the Sweet River to Holland and those on the east to Great Britain. In 1872 the Dutch transferred all their forts to Great Britain, which had previously, in 1850, bought the Danish forts. It was out of this transfer that the Ashanti war of 1873-4 arose, as the King of Ashanti, who had always been on good terms with the Dutch, feared that he would be cut off from the sea. In this war, as in those of 1806 and 1800-1, the British arms were completely victorious, and the kingdom of Ashanti has now been added to the dominions of the British Crown.

The produce of the Gold Coast is chiefly sent to Great Britain. Gold is found in considerable quantities, and rubber, ivory, gum-copal, cocoa, cotton, lumber, Guinea grains, and oil are also exported to England. The principal exports in 1908 were: Gold £1,151,944, rubber £168,144, palm oil £129,535, palm kernels £77,821, and cocoa £540,821. The chief imports are textiles, alcohol, and hardware. The climate is damp, hot, malarious, and unhealthy. The Government assists the Roman Catholic, Wesleyan, and German missionaries in educational matters, and great efforts are being made to improve the sanitary condition of the coast towns. The Government has established schools of its own; the principal towns are lighted and policed, 1,129 miles of telegraphs have been established in the colony, of which 200 miles are in Ashanti and 135 miles in the Northern Territories. The Government railway from Sekondi through Tarkwa, the centre of the gold-mining industry, to Kumasi (168 miles), has been completed and opened for traffic. Another

railway is being constructed from Accra into the interior.

The seat of government is Accra (population 17,892). The other principal towns are Cape Coast (28,948), Ada (13,240), Elmina (3,000), Sekondi (4,095), Tarkwa (4,000), Kwitta (3,018), and Axim (2,189). The Legislative Council consists of 6 official and 4 unofficial members.

SIERRA LEONE.

The peninsula of Sierra Leone (Lion Mountain) was ceded to Great Britain in 1787 by the native chiefs, to be used as an asylum for the many destitute negroes then in England; and great numbers of liberated Africans from North America and the West Indies, besides those taken in slaves on the coast, have from time to time been settled there. In this respect Sierra Leone is really a colony, while it is also of commercial importance. The extreme length is about 185 miles, with an estimated area of 4,000 sq. miles. The population in 1901 amounted to 76,655, of whom 493 were resident Europeans. Of the rest, more than half were liberated Africans and their descendants, while the remainder belonged to the neighbouring tribes. The liberated Africans were brought from all parts of Africa,

and as the result no less than 60 different languages are said to be spoken in Freetown. The exports are palm-oil, palm-kernels and kola nuts; but benni-seed, cocoa-nuts, ginger, ground nuts, india-rubber, gum-copal, hides, beeswax, and rice are also exported. The principal imports are cotton goods, coal, apparel, hardware, provisions and tobacco. A railway (227 miles) has been constructed from Freetown into the interior, with terminus at Balmea near the Liberian frontier.

A Protectorate was proclaimed on August 31, 1896, over territory between 7° and 10° N., and 11° and 13° W., being bounded on the N. and N.E. by French Guinea, and on the S. and S.E. by Liberia. It has an area of about 30,000 square miles and a population estimated at 1,000,000. For administrative purposes it is divided into 6 districts under District Commissioners; the principal peoples being the Limbas and Kurankos in the north, the Timinis in the centre, and the Mendis in the south. The principal products are rubber, gum, palm-oil and palm-kernels, benni-seed, rice, ground and kola nuts.

	1906.	1907.	1908.
Public revenue.....	£305,074	£359,104	£321,000
Public expenditure	285,561	345,567	341,871
Total imports	885,851	988,022	813,700
Total exports	716,623	831,259	739,755
Imports from U.K.	657,661	708,765	579,908
Exports to U.K.	218,180	228,399	177,216

The Governor is aided by Executive and Legislative Councils, the latter consisting of 7 official and 4 unofficial members.

Freetown, the capital and seat of government, is the greatest seaport and has the finest harbour in West Africa.

SOUTHERN NIGERIA.

The Colony and Protectorate of Southern Nigeria now includes the territories situated on the Bight of Benin, between Dahomey on the West to the Cameroons on the East, the amalgamation of the administrations of Lagos and of the Protectorate previously styled "Southern Nigeria" having been carried out on May 1, 1906. The whole territory is now divided into three Provinces, of which the Western coincides with the former Colony and Protectorate of Lagos, and the Central and Eastern with the former Protectorate of Southern Nigeria. The headquarters of the Government are at Lagos, and the area of the whole territory is 77,260 sq. miles.

Governor and Commander in Chief, Sir Walter Egerton, K.C.M.G. £3,500

(And duty allowance £1,500)

General Manager of Railway, F. Bedford Glasier, C.M.G. £1,200 to 1,500

Conservator of Forests, H. N. Thompson 1,000

Director of Agriculture (vacant) £600 to 800

Insptr.-Gen. of Police, C. E. Johnstone £600 to 800

Director of Education, E. G. Rowden £600 to 800

The chief industry is agriculture, and crops consist of maize, plantains, earth-nuts, yams and cassava, while cocoa, coffee, and cotton are also grown. The natural products exported are palm oil and kernels, ivory, gum copal and rubber, and the export of cotton and maize is steadily increasing. A railway has been constructed from Iddo Island via Ilorin to Jebba on the Niger, a distance of about 304 miles, and is now being extended through Zungari, the capital of Northern Nigeria, to join the railway from Baro to Kano in that Protectorate, which is now under construction. Centres of trade are Lagos, Calabar, Opobo, Bonny, New Calabar, Brass, Benin, Warri, Sapele, Akassa, and Forcados, the two last named being situated at the Forcados and Nun mouths of the Niger, which, with the rest of the territories south of Idah on the Niger, passed on January 1, 1906, from the administrative control of the Royal Niger Company to that of Southern Nigeria.

The principal imports are cotton goods, cooper's stores, hardware, cutlery, and spirits.

	1907.	1908.
Revenue	£1,459,554	£1,387,975
Expenditure	1,217,337	1,357,763

Marine Supt., C. Elliott, R.N.R. £550 to 650

Director of Public Works and Railways, J.

E. Eaglesome, C.M.G. £800 to £1,000

This Protectorate was established on January 1, 1900, and includes the northern portion of the territories formerly administered by the Royal Niger Company. It is bounded on the south by Southern Nigeria, to the west and north by the French possessions in the hinterland of Dahomey and the Soudan, and on the east by Lake Chad and the German territory of the Cameroons.

Since the occupation of Kano and Sokoto in February and March, 1903, steps have been taken for the establishment of administrative control over the whole of the Protectorate, of which the area is about 255,700 square miles. The population has been estimated at about 8,000,000. The centre of administration is Zungeru, near the Kaduna River, a tributary of the Niger, and the Protectorate is divided for administrative purposes into 12 Provinces. The frontiers to the North and East were delimited during 1903 by Anglo-French and Anglo-German Boundary Commissions, and a further delimitation of the northern frontier in accordance with the Anglo-French Convention of May 29, 1906, has recently been completed. The frontier with the German possessions is about to be readjusted on a "natural feature" basis. The imports are much the same as in Southern Nigeria, and the principal exports are shea butter and shea nuts. The importation of spirits is prohibited. There is telegraphic communication from Lagos to Jebba, Zungeru, and Lokoja, and the line has been continued along the Benue, as well as in other directions. The construction of a railway from Baro on the Niger to Kano, *via* Zaria, has been completed for over 100 miles. Steam communication with England *via* Forcados.

The grant-in-aid from Imperial funds to N. Nigeria amounted to £290,000 in 1908-9, and to £237,000 in 1909-10.

IMPERIAL COINAGE, 1899-1908.

Year.	GOLD.			Silver.	Bronze.	Total.

1908	13,800,000	10,457,000	24,257,000	815,751	155,580	25,228,331

Note.—Since 1871, inclusive, the designs adopted for gold coins have been identically the same in the four Mints of London, Sydney, Melbourne, and Perth. They are distinguishable, however, in that the Australian coins bear minute "Mint Marks" immediately above the date on the reverse side, the letter S being borne by Sydney coins, M by those issued from Melbourne, and P by those issued from Perth. The letter C is borne on Imperial gold coins struck at the branch Mint at Ottawa, Canada.

THERE are no British Colonies on the East Coast of Africa to the north of Natal (already treated of under the head of "South Africa"). But a large portion of the Continent, both on the coast and inland, is under British protection and is administered directly by the Imperial Government, through the Colonial Office, which took over the administration of the E. Africa, Uganda, and Somaliland Protectorates on April 1, 1905. British Central Africa, now styled Nyasaland, was similarly transferred on April 1, 1904. The only Protectorate in Africa now under the control of the Foreign Office is Zanzibar and Pemba. Just as on the West Coast, the rivalry of European Powers has resulted in the division of the territory on the East into "spheres of influence," the definition of whose boundaries has given rise to much diplomatic negotiation, and is not yet finally completed. From the boundary of Amatongaland northward to Cape Delgado is *Portuguese*; from Cape Delgado to the river Umba is *German East Africa*; the islands of Zanzibar and Pemba form a British Protectorate; and the East Africa Protectorate extends from the Umba to the river Juba, which forms the southern boundary of the *Italian Sphere* extending northward as far as the British Protectorate on the Somali Coast. It will be observed that on this portion of the African Continent the French have made no acquisitions, but their annexation of the great island of Madagascar places them in a position of importance on the East Coast, although their influence does not extend to the mainland. The history of the European occupation of East Africa may be briefly stated thus:—The Portuguese acquired their rights by discovery and conquest. The Germans obtained a footing on the mainland opposite Zanzibar between 1880 and 1885, at which latter date the Sultan of Zanzibar recognised their Protectorate over Usagara, and in the same year they declared a Protectorate over Witu. In 1888 the Imperial British East Africa Company received a Royal Charter, having been granted a few years previously by Seyyid Barghash, Sultan of Zanzibar, administrative rights over his mainland possessions. In 1890 the respective spheres of Great Britain and Germany were settled by agreement. Zanzibar became a British Protectorate, and Germany withdrew from her Protectorate over Witu in favour of Great Britain. The boundaries of the *Italian Sphere* were agreed upon in 1891. The Imperial British East Africa Company transferred the administration of their territories to the Imperial Government in 1895, having done much to promote the advance of civilisation in the large tract of country now known as the "East Africa Protectorate."

THE SOMALILAND PROTECTORATE.

In 1884 a Protectorate was declared over part of Somaliland, a country now subject (except where reserved by Great Britain and Italy) to Abyssinia, and forming the north-eastern horn of the African continent. The British Protectorate contains about 68,000 sq. miles. The population, mainly consisting of Somalis, a Mohammedan tribe, is estimated at 300,000. The boundaries are defined by treaty with Abyssinia and Italy; the northern coast as far as 49° E. and the 8th parallel of N. latitude are the limits on the north and south.

The PRINCIPAL TOWNS are Berbera, Bulhar, and Zeyla.

The Protectorate was transferred in 1898 from the administration of the India Office to that of the Foreign Office, and on April 1, 1905, to that of the Colonial Office.

<i>Agent-General (Bombay), J. A. Simson</i>	700

The Imperial British East Africa Company was incorporated by Royal Charter, dated September 3, 1888; and under the control of the Secretary of State for Foreign Affairs, exercised sovereign jurisdiction over the territories leased to it by the Sultan of Zanzibar, or acquired by treaties entered into with native Chiefs. A British Protectorate was announced over these territories on

June 18, 1895, and the Company handed over the administration on July 1, 1895.

These territories are now comprised under the name of "The East Africa Protectorate," and include the whole of the coast from the Umba to the Juba River, granted on a 50 years' lease by the Sultan of Zanzibar, as also the vast territories in the interior bounded in part by international conventional lines. The southern boundary was defined by the Anglo-German conventions of 1886, 1890, and 1893; that on the east (along the Juba) and north-east, by an agreement with Italy (1891). On the west the Protectorate adjoins that of Uganda. The administration of the Protectorate is carried on under the Colonial Office.

The title of "Commissioner" was changed to "Governor" in 1907, and Legislative and Executive Councils were instituted.

A great portion of this vast region consists of pasture lands or barren wastes, but there are not lacking extensive districts of great natural fertility on the coast, as well as in the interior. The Protectorate is divided for administrative purposes into seven provinces, which are subdivided into districts and sub-districts: (1) Seyidie, (2) Ukamba, (3) Tanaland, (4) Jubaland, (5) Kenya, (6) Naivasha, (7) Nyanza, of which the centres of administration are respectively Mombasa, Nairobi, Lamu, Kismayu, Fort Hall, Naivasha, and Kisumu. Of the seven provinces Ukamba and Naivasha are best suitable to colonisation by Europeans. There is also a considerable region within the boundaries of the Protectorate which is still undeveloped, and has not yet been included in any administrative district. The population of the Protectorate has been estimated lately at 4,000,000, but no census has ever been taken.

The East Africa Protectorate also includes the Witu Protectorate, a small tract of country at the mouth of the river Tana. The British Protectorate was proclaimed Nov. 19, 1890. In March, 1891, the Imperial British East Africa Company undertook the administration of the country, from which they withdrew on July 31, 1893. Witu is now regarded for administrative purposes as part of *Tanaland*.

Mombasa, which is connected with Europe by telegraph, possesses perhaps the finest harbour on the east coast of Africa (population, about 30,000, of whom 200 are Europeans). There is also telegraphic communication along the coast between Mombasa and Lamu, and between Mombasa and Entebbe, the capital of the Uganda Protectorate. There are also extensions to Kiamhu, Nandi, Wadelai on the Nile, and Fort Hall. The Uganda Railway has its terminus at Mombasa, which is connected with the mainland by a railway bridge 1,732 feet in length. Nairobi, the capital of the Protectorate, and central station of the Uganda Railway, has a population of about 14,000, of whom 700 are Europeans. There are also some 400 European farmers in the immediate neighbourhood of Nairobi.

The principal exports are ivory, grain, rubber, and copra; the principal imports are piece-goods, rice, grain and flour, building materials, European provisions, &c.

The importation of arms and ammunition is prohibited, except under the most stringent regulations, and the introduction and local manufacture of spirits is also heavily checked.

	1906-7.	1907-8.	1908-9.
Imports	£765,407	£799,717	£797,158
Exports	440,705	515,052	436,313

Chief Engineer, Capt. P. O. G. Osborne, R.E.	750
Commandant of 4th Bn. King's African Rifles, Lt.-Col. B. E. Graham	700

A British Protectorate over the territory of Uganda was proclaimed in the "London Gazette" of June 19, 1894, and included only the country subject to King Mwanga, known as Buganda, bounded by the territories known as Busoga, Bunyoro, Ankole and Toro. This Protectorate has since been extended over Bunyoro and Busoga (see notice in "London Gazette," July 3, 1896). Buganda lies on the N.W. shore of Lake Victoria, between 500 and 600 miles in a direct line from the nearest point on the East Coast of Africa. It is situated on and to the N. of the Equator. Bunyoro lies further to the East, on the N. shore of the Lake. Busoga is to the N.W. of Uganda and extends to Lake Albert. Toro is to the S.W. of Uganda. The Protectorate is now divided into five provinces. The total population of the Protectorate may be roughly estimated at between 2 and 3 millions.

The capital town of Buganda is Kampala, but the centre of the Protectorate Administration is the neighbouring settlement of Entebbe. The population of the Uganda Protectorate is estimated at over 2,000,000. The principal exports are ivory, skins, chillies, and cotton. The export of cotton has increased from 858 cwt., valued at £1,089, in 1905-6, to 23,051 cwt., valued at £41,225, in 1908-9. Coffee is also exported. Principal imports are cotton cloths, prints, groceries, &c. Uganda is connected by telegraph with Mombasa (E. Africa Protectorate), and there are three Government steamers on Lake Victoria, two of them of 600 and one of about 1,000 tons displacement. Another steamer is being constructed.

In July, 1897, Mwanga left Uganda and headed an insurrectionary movement in Buddu, which was suppressed. He then fled to the neighbouring German territory, and his infant son was declared King of Uganda, with a native council of regency. King Mwanga died in May, 1903. In Sept., 1897, a mutiny broke out among the Sudanese troops in the Protectorate, which was only suppressed after several months' fighting, in circumstances of great difficulty and danger, in which several British officers lost their lives (Parly. Paper, Africa, No. 10, 1898). The military forces have since been completely reorganised.

The Uganda Railway.—A survey of the route to be followed by a railway to connect Uganda with

the coast at Mombasa was made in 1892. In 1895 H.M. Government decided to proceed with the construction of the railway, and in September of that year a Committee was formed, with the late Sir Percy Anderson, Assistant Under-Secretary of State for Foreign Affairs, as Chairman, to supervise the undertaking and organise details, under the authority of the Secretary of State for Foreign Affairs. On the completion of the railway, its management was transferred from the Committee to the East Africa Protectorate Administration.

The gauge of the railway is one metre. The chief engineer, Sir G. Whitehouse, and staff arrived at Mombasa in December, 1895, and a large number of labourers were imported from India for the work of construction, in addition to such local labour as could be engaged. The rails were laid to the terminus on Victoria Nyanza (584 miles) on December 20, 1901, on which date the first locomotive completed the journey from the sea to the lake. A three-wire telegraph line has been erected along the railway, and there is also telegraphic communication from the terminus on the lake to Nimule, on the Nile (a distance of about 500 miles), and will shortly be extended to Gondokoro on the frontier of the Sudan. Messages are accepted for Nimule, and sent thence to stations further inland by post. A volunteer corps has been organised.

THE ZANZIBAR PROTECTORATE.

Sultan, H.H. Ali bin Hamoud, succeeded his father, bin Mohamed, July, 1902.

Agent & Consul-General, E. A. W. Clarke £1,800

Judges of H.B.M. Court, Lindsey Smith,

J. W. Murison £700 to 1,000

H.B.M. Consul, J. H. Sinclair 600

Vice-Consuls, R. M. Kohan, H. S. London

£300 to 500

First Minister, Capt. F. R. Barton, C.M.G.

Legal Member of Council, Peter Grain.

The Zanzibar dominions became independent in 1856 under the rule of Seyyid Majid, a son of Seyyid Said, Sultan of Muscat and Zanzibar. They formerly extended along the mainland as far south as Tungli Bay and north as Warsheikh; but since the cession of the coast-line from Ruvuma to Wanga, including the island of Mafia, to Germany in 1890, and of the Benadir coast to Italy in 1904, they are now confined to the islands of Zanzibar and Pemba, a ten-mile coast-line from Wanga to Kipini, the islands of Lamu, Manda, Patta, and Siwa, together with the port of Kismayu, with a radius of 20 miles. As far as the mouth of the Juba, the Zanzibar dominions on the mainland are under the administration of H.M. Government through the Governor and Commander-in-Chief in the East Africa Protectorate (see p. 587). Zanzibar has been a British Protectorate since November, 1890.

By a decree of Sultan Hamoud (1897) the legal status of slavery ceased to be recognised in the islands of Zanzibar and Pemba.

The City of Zanzibar, on the island of the same name, is the largest in East Africa, and possesses a magnificent harbour, which presents great facilities for shipping and trade generally. The population of Zanzibar and Pemba is about 250,000.

The principal imports are piece-goods, ivory, hides, rice, and coal; the exports are ivory, cloves, copra, rubber, gum-copal, and many minor articles. The largest proportion of im-

ports (£344,538 in 1908) comes from British India, £184,175 from the United Kingdom, £110,838 from German East Africa, £32,600 from the United States, and £40,240 from Germany. The largest exports are made to British India, which in 1908 accounted for £265,387, the principal other participants being German East Africa (£197,658), France (£135,952), and the United Kingdom (£89,891). These figures refer to the port of Zanzibar, and not to the trade of the Zanzibar dominions. The large quantities of goods which pass through Zanzibar in mail and other steamers, and those which are transhipped to and from the coasting vessels in the harbour without being landed, are not included in the statistics from which the above figures are taken, which do not, therefore, give an adequate idea of the importance of the port of Zanzibar as the centre of trade in E. Africa. With the exception of a monthly cargo vessel from London, there is no direct steam communication with the United Kingdom, passengers, mails, and goods having to tranship at Aden, between which port and Zanzibar a regular monthly service is maintained by the British India Steam Navigation Company. There are through steamers to and from Europe of the Messageries Maritimes and the Deutsche Ost Africa Linie; and a three-weekly service to and from Bombay by the latter company.

The number of ocean-going steamers which entered the port in 1908 was—German 121, British 53, French 25, and other nationalities 3, the total tonnage being 445,350. This does not include the coasting and dhow traffic, which is a very large one, extending to Bombay, Arabia, the Comoro Islands, and Madagascar.

	1907.	1908.
Imports	£1,232,957	£969,841
Exports	1,070,067	977,628
Imports from U.K.	193,242	184,175
Exports to U.K.	142,474	89,891

Zanzibar is distant 8,064 miles; transit, 20 days.

NYASALAND PROTECTORATE

(BRITISH CENTRAL AFRICA).

Governor and Commander-in-Chief, Sir Alfred Sharpe, K.C.M.G., C.B. £2,000

Deputy Governor, Maj. F. B. Pearce, C.M.G. (personal allowance £100) 900

Assist. Dep. Governor, H. R. Wallis 700

Commandant of 1st Bn. King's African Rifles, Lt.-Col. H. A. Walker 700

Judge of High Court, C. J. Griffin £600 to 800

Vice-Consul and Agent, Chinde, S. Hewitt-Fletcher 600

Chief Asst. Secretary, A. Jay Williams

£450 to 600

Treasurer, W. Wheeler, C.M.G. 450 to 700

Principal Med. Officer, Dr. H. Hearsey 450 to 600

Supt. of Native Affairs, J. C. Casson 450 to 600

This country was proclaimed a British Protectorate on May 14, 1891. The Protectorate comprises the eastern portion of British Central Africa, and the control of the administration was transferred from the Foreign Office to the Colonial Office on the 1st of April, 1904. The remainder of the territory is administered by the British South Africa Company.

The population of the Protectorate is estimated at, roughly, 1,000,000, including 594 Europeans and 457 Asiatics.

The principal exports are coffee, cotton, chillies, and tobacco. The cultivation and export of

cotton and tobacco are considerable, and there are prospects of a steady development of these industries. Ivory, tea, ground nuts, and rubber are also exported. The principal imports are soft goods, provisions, and hardware. On Lake Nyasa there are seven steamers. There are also twenty-two steamers on the Zambesi and Shiré rivers. At Chinde, situated in Portuguese territory at the mouth of the Zambesi, is a piece of land leased from the Portuguese Government, where goods intended for the Protectorate may be transhipped free of duty.

Chief towns :—Blantyre (population about 200 Europeans and 6,000 natives) and Zomba, the headquarters of the Government. Communication is maintained between Chiromo (at the junction of the rivers Kuo and Shiré), and Chinde by the African Lakes Company's steamers and the British Central Africa Co.

Between Chinde and Europe, the means of communication are Messrs. Rennie's line *via* Natal, the British India Steam Navigation Co., and the German East Africa S.S. Co.

A railway, 113 miles in length, connecting Port Herald (the nearest port to the coast) with Blantyre, is open for traffic, and will probably be extended to Lake Nyasa *via* Zomba. The Protectorate is connected by telegraph overland with the Cape, *via* Fort Salisbury; and, with the Portuguese wires, to Chinde and Quilimane. The African Trans-Continental Telegraph Company's line has now been extended northwards as far as Ujiji on Lake Tanganyika.

	1907-8.	1908-9.
Imports (excluding transit)	£169,541	£140,916
Exports (excluding transit)	68,604	122,644

MAURITIUS.

Mauritius is an island lying in the Indian Ocean, 500 miles east of Madagascar, between 57° 18'—57° 49' E. long. and S. lat. 19° 53'—20° 32', and comprising an area of 705 square miles. The population at the census of 1901 was 375,385, of whom 261,191 were Indians (the majority originally Coolies imported for working the sugar estates), and the remainder mainly of French or mixed descent. The whole island is practically given up to producing sugar for export, and the necessities of life have all to be imported from abroad. Rice and grain are obtained from India, flour and frozen meat from Australia, oxen from Madagascar, and minor imports from South Africa and elsewhere. The chief trade of the island is with India. Being just within the tropics it has a hot climate; but, except in Port Louis and some of the low-lying districts, it is not unhealthy. The island is subject to cyclonic disturbances, and a hurricane in 1892 was particularly severe.

Mauritius was discovered about the year 1507 by the Portuguese, but they never formed any settlement on it. The Dutch visited it in 1598, and named it Mauritius, in honour of the Stadtholder, Prince Maurice of Nassau. In 1644 they established a small colony on the shore, but in 1710 or 1712 they abandoned the island, and in 1715 the French took possession of it and changed the name to Ile de France. Under the French it became a great centre of trade, but in 1789 the seat of French Government in the East was removed to it from Pondicherry, and it was taken by a British force in 1810. The French language and French law have been preserved under British rule when the ancient name, Mauritius, was restored. There is an excellent harbour on the N.W. coast, on which the

capital, Port Louis, stands, and the annual trade of the island passes almost entirely through Port Louis. In 1908 there were 129½ miles of railway (119½ of 4 ft. 8½ in. gauge and 10 of 2 ft. 6 in.), 63 post-offices, 57 telegraph and 13 telephone offices in the island, with 331 miles of telegraph and 55 miles telephone wires (Government).

The Government is administered by a Governor, aided by an Executive Council of 5 official and 2 elected members, and a Legislative Council of 27 members, 8 being ex-officio, 9 nominated by the Governor, and 10 elected by a moderate franchise. Port Louis has 2 members, and each of the country districts 1.

The inhabitants of European descent are mostly Roman Catholic. Education has two branches :—(1) *Superior or Secondary Instruction*, to which is attached the Government Royal College with its Schools; (2) *Primary Instruction*, consisting of the Government schools and the grant-in-aid schools. The total expenditure on education in 1908 amounted to Rs. 623,131. Of the pupils in the Government and aided schools, 63·82 per cent. are Roman Catholics, 2·58 per cent. Church of England, and 1·12 per cent. other Christian denominations; 9·58 per cent. being Mohammedans and 22·90 per cent. Hindoos and others. The troops in the Colony on 31 December, 1907, numbered 1,196.

DEPENDENCIES OF MAURITIUS.

(1.) RODRIGUES, 350 miles almost due east of Mauritius. Population (Census 1901) 3,162. Area, between 80 and 90 square miles. Cattle, beans, salt fish and goats are the principal exports. The island is under the administration of a magistrate who takes his orders from the Governor of Mauritius.

Magistrate, E. Rouillard	Rs. 7,000
--------------------------	-----------

(2.) OTHER DEPENDENCIES. Most of the scattered groups of coral islands belonging to Great Britain in the Indian Ocean are administered by the Mauritius Government, being visited periodically by two magistrates, whose duty it is to enquire into the condition of the labourers, and settle any disputes which may be referred to them. The chief product is cocoa-nut oil. The most important is Diego Garcia (pop. 1901, 489), one of the Chagos Archipelago, which lies on the direct route from the Red Sea to Australia, and; as it possesses a good harbour, has been much used of late years as a coaling station. The total population of the "Other Dependencies" (1901) is 1,597.

Transit, Mauritius, 27 days.

THE SEYCHELLES ISLANDS.

By letters patent of Sept., 1903, these islands, which number altogether 89, were erected into a separate colony. The principal islands of the group are Mahé, Praslin, Silhouette, Curieuse, and La Digue, and the total area of the islands, with dependencies, is estimated at 148½ square miles, of which, according to a recent survey, Mahé occupies nearly 56 square miles. The island of Coëtivy, formerly under Mauritius, was transferred to the Seychelles Government by Letters Patent in 1907. The seat of government is at Victoria, the capital, on the N.E. side of Mahé, which has an excellent harbour, and is constantly visited by men-of-war of all nations. The Admiralty have made Victoria a coaling station, and a depot for patent fuel; quarantine regulations are on a reasonable footing, and the harbour dues light. The Seychelles Islands were occupied by the French about 1742, captured by a British ship in 1794, and were finally assigned to Great Britain in 1814. Although only 4° S. of the Equator, the islands are very healthy, the death-rate in 1908 being 15·53 per 1,000. The population of all the islands on May 31, 1901, was 19,237 (Mahé 15,166, Praslin 1,621, and La Digue 1,074), an increase since the census of 1891 of 2,526. The estimated population, December 31, 1908, was 21,982. There are 24 Roman Catholic and Church of England primary schools, and a grant-in-aid of Rs.10,000 was voted for 1908. In addition there is a Government school (the "Victoria School"), maintained at an annual cost of nearly Rs.14,000, where education of a higher class is provided.

The principal exports are vanilla, cocoa-nuts, cocoa-nut oil, tortoise-shell, cacao, soap, and guano. Aldabra, one of the dependencies of the Seychelles, and about 680 miles from Mahé, is famous for the gigantic land tortoises, whilst the unique double cocoa-nut, *Coco de Mer*, is found in Mahé, and, in larger quantities, in Praslin, where there is a famous valley. Mahé is in telegraphic communication with all important parts of the world *via* Mauritius and Zanzibar. The Government, which is that of a Crown Colony, is vested in the Governor, assisted by an Executive Council composed of 3 *ex-officio* members, and by a Legislative Council consisting of 3 official and 3 unofficial members. The Governor is President of both Councils.

In the Southern Atlantic.

ASCENSION,

an isolated Island in the South Atlantic (3,417 miles from Plymouth, 760 from St. Helena, and 900 from Cape Palmas on the African Coast), is of volcanic origin, the peak rising to the height of 2,820 feet, situated 7° 55' 55" S. lat., and 14° 25' 5" W. long. It is said to have been discovered by a Portuguese named João de Nova Gallego, on Ascension Day, 1501, and two years later was visited by Alphonse d'Albuquerque, who gave the island its present name. Its extreme length is 7½ miles, and extreme breadth 6 miles, with a circumference of 22 miles and an area of about 38 square miles, and being situated in the heart of the S.E. trade winds, its climate is dry and salubrious up to 1,800 feet, but above that height to its limit it is damp and foggy. It remained uninhabited

till 1815, when the English took possession of it. It now possesses a steam factory, while there is also an excellent hospital and sanatorium. Partridges are being preserved for sporting purposes, and steps are being taken to exterminate the rabbits, which were formerly preserved and now prove a pest. The island is visited by the sea-turtle from January to May, which lay their eggs in the sand, 200 being "turned" during 1908, their weight being from 500 to 800 lb. The sooty tern, or "wide-awake," use the island as a nesting-place about every eighth month, their eggs being much appreciated by the inhabitants. In 1907 there were about 15 acres of ground under cultivation, producing vegetables and a small quantity of fruit, and there is also a small amount of

pasturage for sheep and cattle. The island is under the Board of Admiralty, by whom an officer is appointed as commandant. The inhabitants consist of officers and their families, seamen, marines, and Kroomen; a limited number of men also have their families with them, the full complement of the island being about 80 (exclusive of 25 members of the Eastern Telegraph Co.) with about 25 women and children. Georgetown, the garrison settlement, is situated in a small bay on the N.W. coast. The island is fortified, and is connected by the Eastern Telegraph Co. with St. Vincent, St. Helena, and Sierra Leone.

Domestic imports from U.K. 1907. 1908.
£4,980 £5,550

TRISTAN D'ACUNHA

is the chief of a group of islands of volcanic origin lying in lat. $37^{\circ} 6'$ S. and long. $12^{\circ} 2'$ W., discovered in 1505 by a Portuguese admiral, after whom they are named. The population numbers about 100, and the inhabitants are said to be very long-lived.

INACCESSIBLE ISLAND is a lofty mass of rock with sides 2 miles in length; the island is the resort of penguins and sea-fowl.

THE NIGHTINGALE ISLANDS are three in number, of which the largest is 1 mile long and $\frac{1}{2}$ m. wide, and rises in two peaks, 960 and 1,105 ft. above the sea-level respectively. The smaller islands, Stoltenhoff and Middle Isle, are little more than huge rocks. Numbers of seals and sea-elephants visit these islands.

FAULKLAND ISLANDS.

These, the only considerable cluster in the South Atlantic, lie about 300 miles east of the Straits of Magellan, between $51^{\circ} 15'$ – 53° S. lat. and $57^{\circ} 40'$ – 62° W. long. They consist of East Falkland (area 3,000 sq. miles), West Falkland (2,300 sq. miles), and upwards of 100 small islands (islets, rocks, and sandbanks), comprising in the aggregate 6,500 sq. miles, and a population in 1908 of 3,610. Mount Adam, the loftiest peak in the colony, rises 2,315 feet above the level of the sea. The Falklands were discovered by Davis in 1592, and visited by Hawkins in 1594. After having successively belonged to France and Spain, they were given up to Great Britain about 1777, but not actually occupied. In 1820 the Republic of Buenos Aires established a settlement in these islands, which was destroyed by the Americans in 1831. In 1833 they were again taken possession of by the English for the protection of the whale-fishery, and colonised, and from that time to the present have so continued, being, as a whole, the most southerly organised colony of the British Empire. The climate, though somewhat bleak, is usually considered healthy, and the temperature is on the whole equable, the thermometer ranging in winter from 20° to 50° , and in summer from 40° to 65° . The islands are chiefly bog-land, and have proved suitable for sheep; kitchen-gardens occupy the only cultivated part. The population is mainly British, and is principally engaged in sheep-farming and seafaring industries. The chief exports in 1908 were wool (£1,054,495) and sheepskins. The total tonnage of vessels entered in 1908 was 281,351. There are three places of

worship (one Church of England, one Roman Catholic, and one Baptist). The only important settlement is Port Stanley, at the head of Port William, on the coast of East Falkland.

There is a volunteer force of about 120 men.

SOUTH GEORGIA, an island 800 miles east-south-east of the Falkland Group, with an area of 1,000 square miles, is a dependency of the Falkland Islands. Among other dependencies are the South Shetlands, Graham's Land, the South Orkneys (on which the Argentine Government have, with the permission of H.M. Government, established a meteorological station), and the Sandwich Group.

CHIEF TOWN, Port Stanley.

Port Stanley is distant about 8,130 miles; transit, 27 days, monthly from Liverpool. Telegrams sent by post from Monte Video or Punta Arenas.

ST. HELENA,

probably the best known of all the solitary islands in the world, is situated in the South Atlantic Ocean, 955 miles S. of the Equator, 76° S.E. of Ascension, 1,140 from the nearest point of the American Continent, and 1,800 from the coast of S. America, in $15^{\circ} 55'$ S. lat. and $5^{\circ} 42'$ W. long. It is $10\frac{1}{2}$ miles long, $6\frac{1}{2}$ broad, and encloses an area of 47 square miles, with a population in 1908 of 3,553. St. Helena is of volcanic origin, and consists of numerous rugged mountains, the highest rising to 2,700 feet, interspersed with picturesque ravines. The climate vies with that of Madeira in point of salubrity and evenness of temperature. Although within the tropics, the south-east "trades" keep the temperature mild and equable. The thermometer goes up to 82° in the town at the sea-level; but in the country, 1,800 feet above the sea, the maximum is about 74° , and the mean temperature ranges from 57° in September to 66° in March, there being very little difference between night and day; the lowest temperature in winter is 51° , and the total rainfall (1908) 39.320 inches. St. Helena was discovered by the Portuguese navigator, Juan de Nova Castella, on 21 May, 1502 (St. Helena's Day), and remained unknown to other European nations until 1588, when it was visited by Captain Cavendish on his return from his voyage round the world. It remained uninhabited until the Dutch colonised it *circa* 1645. The English East India Company

seized it in 1651; but it was retaken by the Dutch in 1672. In 1673 it was again taken from the Dutch by Capt. Munden, of the English Navy, and was held by the East India Company, who had obtained a charter for its possession from Charles II., until 1834 (with the exception of the period 1815 to 1821, during which the British Government held it as a residence for Napoleon Bonaparte, who died there 5 May, 1821), when it was ceded by them to the Crown. In 1900 the island was used as a place of internment for prisoners of war from South Africa, the first detachment (consisting of General Cronje and 2,000 officers and men) arriving in April of that year. It was formerly an important station on the route to India, but its prosperity received a fatal blow by the cutting of the Suez Canal, and it is now frequented only by a few sailing ships homeward bound from the East Indies. The tonnage dues on calling ships were abolished in 1882, and the port is now free to all ships except when bringing or taking cargo to and from the port; the number which called in 1908 was 53. The phormium industry and lace-making, both under Government control, were established during 1907. It is of strategical importance as a coaling station, and

has recently been fortified by the Imperial Government. St. James's Bay, on the north-west of the island, possesses a good anchorage. The garrison was withdrawn in October, 1906.

The government is administered by a Governor, with the aid of an Executive Council of 4 members, the Governor alone making all ordinances.

In the Mediterranean.

CYPRUS

is an island in the Mediterranean Sea, between N. lat. 34° 30' and 35° 41', and E. long. 32° 15' and 34° 35'. It is about 60 miles distant from the nearest point of Asia Minor; and 41 miles from Latakia on the Syrian coast. The distance to Port Said, at the entrance of the Suez Canal, is 238 miles. The larger part of the island is an irregular parallelogram, 100 miles long and 60 to 30 broad; from which a narrow peninsula, 5 or 6 miles wide, runs out for 40 miles towards the north-east. The area is about 3,584 square miles. The population in 1901 numbered 237,022, of whom 21.64 per cent. were Mohammedans, and the remainder mostly members of the Orthodox Greek Church. Estimated population (1907) 249,250. The principal productions are grain of various kinds, sesame, linseed, wine and spirits, silk, olives, locust-beans (carobs), cotton, wool, hides, aniseed, sponges, sumac leaves, terra umbra, gypsum, and salt. The fertility of the soil has for centuries been proverbial. In 1908 the wine export was 887,545 gals., and that of spirits 49,230 gals., the bulk of wine going to Egypt and the spirits to Turkey. The climate varies in different localities. In the plains the summer heat is very great, and the British troops suffered when first stationed in the island. Excellent summer quarters were, however, found in the hills; and, owing to the enforcement of various sanitary measures, the death-rate of the whole island is nearly as low as that of any European country.

Cyprus still forms part of the Ottoman Empire; but by virtue of a treaty made between England and the Porte, dated 4 June, 1878, the government is administered by England for so long a time as Batoum and Kars may be kept by Russia. The inhabitants have been granted a political franchise, every man paying direct taxes having a vote. The government is administered, under the Colonial Office, by a High Commissioner, assisted by a Legislative Council composed of eighteen members, six being official and twelve elected. The island is divided into three electoral

districts, each returning one Mohammedan and three Christian members.

For administrative and legal purposes it is divided into six districts. In each district the executive government is represented by a commissioner; and each has a Court of Law presided over by an English judge, who is assisted by two native judges, one being a Christian and the other a Mohammedan. There is also a Supreme Court for the whole island, consisting of two English judges.

The amount payable to the Sublime Porte yearly is £87,800 for revenue, £5,000 in compensation for State lands, and 4,166,220 oke of salt in kind (an oke = 2.8 lb.). This sum is not actually paid to the Sultan, but is retained as part payment of the loss sustained by England and France in paying the deficiency on the Guaranteed Turkish Loan of 1855.

The capital is Nicosia (Lefkosia), near the centre of the island, with a population of 14,752 in 1901; the other principal towns are Larnaca (population 7,964), Limassol (8,298), Famagusta (3,825), Kyrenia (1,336), and Papho (3,134).

Important works at Famagusta have rendered the inner harbour accessible to steamers, and a narrow-gauge railway connecting the harbour with the capital (36 miles) was opened in 1905, and has been extended westwards to Morphou, a total of 60 miles. There is a regular service of steamers from Egypt, leaving Port Said every Wednesday

MALTA,

an island in the Mediterranean Sea, 58 miles from Sicily and about 180 from the African coast, about 17 miles in length and 9 in breadth, and having an area of 91½ square miles. The colony includes also the adjoining island of Gozo, with an area of 24½ square miles; COMINO—the site of the Sultan's disaster in 1889 and now a sanitary station—and several islets. The civil population of the whole group, 1 April, 1909, was estimated at 212,888. In religion the Maltese are Roman Catholics. The lower orders are mainly Punic in race. The Maltese dialect, which is generally spoken, is of Semitic origin, and is held by some to be derived from the Carthaginian and Arabic tongues. The upper classes are mostly descendants of those who sought the protection of the Order of St. John during the Middle Ages, from all parts of Southern Europe. They speak English and Italian. There is a Maltese order of nobility consisting of 29 families. The islands are highly cultivated. The chief products are corn, oranges, melons, grapes, forage, cummin seed, onions, and potatoes; figs and honey are plentiful. It was estimated that in 1908-9 the area under cultivation in Malta and Gozo was about 41,029 acres. On census day, 1901, 5,497 females were employed in making lace. The principal occupation of the people is in connection with shipping. In 1902 there were 30,768 persons living in Valletta, but the total population of the colony was 1,671 to the square mile. The principal harbour is one of the finest in the world; it is very deep, and large vessels can anchor alongside the shore. It is an important port of call for vessels passing to and from the East and the Suez Canal, being about half-way between Gibraltar and Port Said. There is an extensive arsenal and important dockyard, Malta being the headquarters of the Mediterranean Fleet; and an additional graving dock was opened on Feb. 12, 1892. There is also a hydraulic dock, originally constructed by private

enterprise, which has been taken over by the Admiralty. Two new dry docks and both arms of the breakwater at the mouth of the principal harbour have now been completed. The island is strongly fortified, and has a garrison which, on 31 March, 1909, consisted of 7,669 officers and men. The military expenditure for 1908-9 amounted to £477,521, of which £5,000 was contributed by the colony. The climate, although not tropical, is very hot in summer. The mean temperature for the summer months (June, July, August and September) is 75° 7". In winter the range is from 51° 3' to 58°. In 1908-9 the highest temperature in the shade was 92° 1", and the lowest 42° 0". Citta Vecchia, the former capital of the island, contains the ancient palace of the courts of justice, the Cathedral, and the Seminary; its population has now dwindled to about 300, but its suburb, Rabato, had 7,194 inhabitants in 1901. Citta Vecchia has been entirely eclipsed in importance by the modern capital of Valletta, which was founded in 1566. Malta possesses a University and Lyceum; 99 elementary schools, 2 secondary schools, and 38 night schools, maintained at a total cost to the Government of about £40,000; in addition to which there are garrison schools, a Dockyard school, and about 120 private schools which receive no grants-in-aid from the Government.

The island of Malta is said to have been converted to Christianity on the occasion of the shipwreck of St. Paul in 58 A.D. In the Dark Ages it was taken by the Moors, its commerce was destroyed, and it was used mainly as a base for piratical expeditions. In 1090 it was again brought under Christian rule, being conquered by the Norman Count Roger of Sicily. For 440 years it followed the fortunes of that kingdom, but was in 1530 handed over to the Knights of St. John, who made of it a stronghold of Christianity. In 1565 it sustained the famous siege, when the last great effort of the Turks was successfully withstood by Grand Master La Vallette. The Knights expended large sums in fortifying the island and carrying out many magnificent works, until they were expelled by Napoleon in 1798. The Maltese rose against the French garrison soon afterwards, and with the assistance of some British and Neapolitan troops, compelled the French to capitulate in 1800. The islands were then ceded to Great Britain, the cession being confirmed by the Treaty of Paris of 1814. The government is administered by a Governor, who is usually a distinguished General, assisted by an Executive Council consisting of 11 official and 2 unofficial members, and by a Legislative Council, called the Council of Government—10 official and 8 elected members. The Governor is President in both.

In 1908-9 the Port of Valletta was entered by 3,212 vessels (tonnage, 4,036,752).

CAPITAL, Valletta. Population, 30,768 in 1901.

Malta is 2,280 miles by sea, and *via* Naples
about 1,995; transit, 4 days.

GIBRAITAR,

a rocky promontory, 3 miles in length and $\frac{3}{4}$
of a mile in breadth, and 1,430 feet high at its
greatest elevation, near the southern extremity
of Spain, with which it is connected by a low
isthmus. It is about 14 miles distant from the

opposite coast of Africa. Gibraltar was captured
in 1704, during the war of the Spanish Succes-
sion, by a combined Dutch and English force,
under Sir George Rooke, and ceded by the Treaty
of Utrecht, 1713. Since that time it has remained
continuously in possession of the British. Of the
many attempts to retake it, the most celebrated
was the great siege in 1779-83, when General
Elliott, afterwards Lord Heathfield, held it for
3 years and 7 months against a combined French
and Spanish force. The town stands at the foot
of the promontory on the N.W. side. Gibraltar
is a free port, and enjoys the advantages of an
extensive shipping trade. During the year 1908
3,327 vessels entered, with a total tonnage of
4,586,142. The chief sources of revenue are the
port dues, the rent of the Crown estate in the
town, and duties on wine, spirits, tobacco, and
beer. An enclosed harbour with three graving
docks, capable of accommodating the largest
battleships in the British Navy, has been com-
pleted. The civilian population (1901) was 20,355,
and the actual strength of the troops 5,007.

The Governor is in command of the garrison,
and exercises all the functions both of govern-
ment and legislation; there being no executive or
legislative council.

Foreign Countries.

THE following articles provide, in a more or less permanent form, statistics concerning the Area, Population, Production, Finance, General Development and Commerce (stating the amount of Trade with the United Kingdom), with particulars of Government and Diplomatic and Consular Representation of the Principal Countries of the World.

Special Articles deal with *Naries*, 678-679, *Armies*, pp. 666-667, *Education*, pp. 668-670 and *Exploration*, pp. 671-675, and the Events of the year are chronicled in *Remarkable Occurrences*, pp. 440-450.

Many of the following Articles have been revised under the direction of the various Governments. The Editor is also greatly indebted to His Majesty's representatives at Foreign Courts, to His Majesty's Consuls, and to several of the Foreign Ministers and Consuls in London. In statistics of trade the term "Domestic" Exports signifies the produce and manufactures of the country whence they come, and does not include articles re-exported after having been already received there from abroad.

POSTAGE, PARCEL and TELEGRAPH RATES will be found in the Postal Guide, pp. 363-367.

ABYSSINIA OR ETHIOPIA.

Emperor (Negus Negusti or King of Kings),
Menelek of Shoa, G.C.B., G.C.M.G., b. 1843,
procl. 22 March, 1889.
Heir Apparent, Prince Lidj Eyassu.

Governors.

Harrar and Dependencies, Dejazmach Balcha Wollo, &c., H.H. Ras Michael.
Kaffa, &c., H.H. Ras Walda Georgis.
Gore, &c., Ras Tassama Nado.
Tigré, Dejazmach Gabra Selassi, and Dejazmach Siyoum Agami Desta.
Damot and Godjam, Ras Siyoum.
Equatorial Provinces, Fitaurari Habta Giorgis.
Bigimider, Ras Guksa.
Yeju, Ras Wole.

Abyssinia proper consists of four provinces—Tigré, Amhara, Godjam, and Shoa. The total area of Abyssinia and its dependencies may be reckoned at 350,000 square miles, with a population of three or four millions of Abyssinians. The boundaries of the empire are defined on the W., N., and N.E., where they touch, in order, the Sudan; the Italian colony of Massowah (Eritrea), the French colony of Djibuti; and the British Somaliland Protectorate. Northwards the boundary is about 15° 30' N. lat., falling just south of Kassala. By the Treaty between the U.K. and Ethiopia of 15 May, 1902, the frontier between Ethiopia and the Sudan was fixed as a line drawn from Khor Um Hagar on the river Sefti to Gallabat, thence to the Blue Nile, Baro, Pibor, and Akobo Rivers to Mellile, and onwards to the intersection of the 6° N. lat. with 35° E. long. The southern frontier, bordering the British East Africa and Uganda Protectorates, was defined by Treaty of December 6, 1907, and the frontier bordering the Italian Colony of Benadir, by Convention of 16 May, 1908.

Abyssinia proper is volcanic and mountainous. It contains little mineral wealth, though iron and coal are not uncommon. Gold is washed in various streams, and salt, saltpetre, sulphur, copper, and silver are also procurable. The lower country and deep valley gorges are very hot; the higher plateaus are well watered, with a genial climate. In the hotter regions, sugar-cane, cotton, coffee, indigo, banana, rubber, &c., flourish; in the middle zone the vine, palm, maize, wheat, barley, orange, peach, and other fruit trees, tobacco, potatoes, &c., are cultivated; and above 9,000 feet are excellent pastures with some corn cultivation. There are two seasons in the year,

a dry winter and a rainy summer from June to September. The chief river is the Blue Nile, issuing from the Tsana lake; the Atbara and many other tributaries of the Nile also have their rise in the Abyssinian highlands. Horses, mules, donkeys, camels, oxen, goats, and sheep form a large portion of the wealth of the people. The wild game consists of elephant, rhinoceros, hippopotamus, zebra, giraffe, antelope, ibex, buffalo, hyena, lynx, &c. To the north-east the people are more akin to the Caucasian and the Semitic, to the south-east more akin to the negro; on the west are the plain-dwellers who talk Amharic; on the east the mountaineers speaking Tigré, which is akin to ancient Arabic. The Abyssinians are Christian and their kings claim descent from Menelek, the son of Solomon by the Queen of Sheba. There is no popular literature, and no education. The Emperor's potential army probably numbers 200,000, armed with rifles. The principal pursuits are agriculture, cattle breeding and hunting; industry is looked down upon; the chief exports are coffee, honey, civet, wax, gums, spices, hides, rubber, ivory, and gold. The currency is the Maria Theresa (Austrian) dollar, but Indian rupees also find some circulation in Harrar, and a Menelik dollar (value 2s.) is in circulation. In 1905 a charter was obtained for a State bank, which was inaugurated at the end of that year. The import duty on all goods at Dire-Dawa and Harrar is 8 per cent. *ad valorem*; in the interior the duty is variable, and 3 per cent. addition is imposed on goods brought to the capital. The imports were valued at about £365,000 for 1908, the exports being about £375,000. A railway is being built under French auspices from Jibuti to the capital, of which the first stage is completed and open for goods and passenger traffic to Dire-Dawa, about 185 miles from Jibuti and 25 miles from Harrar, to which place a carriage-road has been built. The posts and telegraphs are under French management, and Abyssinia has been admitted to the Postal Union. Telegraphs and telephones have been constructed, and admission to the International Telegraph Convention has been sought. The principal towns of Abyssinia, besides Adis Ababa, are Adowa, the capital of Tigré, Gondar, Debra-Markos, Basso, Aksum, Antalio, Ankober, Goré, Dembecha, Jibubé, and Harrar, which is a dependency of Shoa. There are ancient architectural remains at Aksum, Gondar, and Ankober; modern architecture is very poor.

	1906.	1907.	1908.
Imports from U.K....	£14,056	£28,573	£11,752

Public Works, Señor E. Ramos Mexia.
War, General R. M. Aguirre.
Marine, Rear-Admiral Onofre Betbeder.

Minister in London, Don Florencio L. Dominguez, 2 Palace Gate, W.

1st Sec. of Legation, Vicente J. Dominguez.

2nd Secretary, Luis H. Dominguez.

Attaché, Carlos Dominguez.

Naval Attaché (vacant).

Consul-Gen., Dr. Sergio García Uriburu, 3 Budge Row, Cannon Street, E.C.

Vice-Consul, Capt. Don Estevan de Loqui.

There are also Consulates at *Liverpool*, *Southampton*, *Cardiff*, *Manchester*, *Newcastle-on-Tyne*, *Newport*, and *Glasgow*.

The River Plate was discovered in 1517, and settled by the Spaniards in 1535. It was temporarily occupied by a British force in 1806. In 1810 connection with Spain was severed and independence proclaimed. The Republic is composed of 14 provinces and 9 territories, comprising in all about 1,222,000 square miles, with a population of over 6,000,000. The constitution is modelled on that of the U.S. of America. The government has enjoyed considerable stability since 1880. The principal productions are wheat, maize, linseed, sugar, wool, cattle, sheep and horses. A census of cattle in 1908 showed cattle 29,116,000, sheep 67,211,000, horses 7,531,000, and there were also mules, goats and pigs, the total value being placed at £129,000,000. The exports of wheat, oats, and linseed in 1908 exceeded all records. The export of frozen meat to the United Kingdom is an important industry, the value being £4,000,000

in 1907 and £5,000,000 in 1908. There are seven factories in operation, of which three are English. The exports are made up entirely of pastoral and agricultural products, with the exception of quebracho, manganese, and wolfram. The imports from the United Kingdom are coal, machinery, linen and woollen goods. There are about 13,000 miles of railway open, and extensive construction is in progress and projected. The railways are almost entirely in the hands of British companies, and absorb about £150,000,000 of British capital. The total amount of British capital invested in the country is estimated at £500,000,000. Telegraphs about 32,000 miles, mostly government lines. Immigration is encouraged and comes principally from Spain and Italy, the immigration of the British working-man not being attended with success. The principal ports are Buenos Aires, Rosario, La Plata, and Bahía Blanca. 1,240 British ships entered Buenos Aires during 1908, representing 58 per cent. of the total, and an increase of 600,000 tons on 1907. Education (see p. 668).

Defence.—The navy consists of five small battle-ships (old), seven modern cruisers, and seventeen units of torpedo craft. Strength about 5,000 men. There is a naval port at Bahía Blanca. A naval construction scheme is on hand, comprising two Dreadnoughts. Army (see 666).

The climate is moderate and healthy. Spanish is the language of the country.

Secretary, Count Alexander Hoyos.

Secretary, Count Ivan Sekonics.

Attaché, Count E. Pejacevich.

Chancellor, Karl Pollak.

Military Attaché, Prince Frederick von und zu Liechtenstein.

Naval Attaché, Capt. A. Accurti.

Consul-General, Baron Alfred de Rothschild.

Acting Consul-General, Conte Dandini.

Vice-Consuls, Conte Dandini, Theophil von Jaeger.

Office of Consulate, 22 and 23 Laurence Pountney Lane, E.C.

The largest Empire, next to Russia, on the continent of Europe, situated between 42°–51° N. lat. and 9° 30'–26° 20' E. long. It embraces an area of 675,887 sq. kilometers, and a population (1905) of nearly 49,425,000.

The Austro-Hungarian Monarchy consists of two States, the Empire of Austria and the Kingdom of Hungary, and of the provinces Bosnia and Herzegovina. Each of the States has its own Constitution and Parliament, and for most branches of State affairs, its own Ministry and Administration, but they are closely bound together by the identity of the Ruler and by a permanent Constitutional Union, which, upon the common principle of possession and defence, was first proclaimed by the Pragmatic Sanction of 1723, and has since been regulated by the so-called "Compromise" (Ausgleich-Kiegyezés) of 1867. According to the Constitutional Union foreign affairs and the greater part of war affairs (Army and Navy), together with the finances concerning them, are dealt with by common ministries. The control of the official actions of these ministers and the voting of the common budget is exercised by two Delegations, each consisting of 60 members, of whom 20 are chosen from the Upper House of Austria (Herren-

haus) and of Hungary (Főrendiház), and 40 from the Lower House of Austria (Abgeordnetenhaus) and of Hungary (Képviselőház). In every other respect legislation concerning the common affairs belongs to the two Parliaments, and each State provides separately for its contribution to the common expenses. The proportion to be contributed by each State is fixed by mutual agreement, renewable every 10 years, and the last so made, which expired in 1897, was renewed in 1907. According to this agreement Austria contributes to the common expenses with 63.6 per cent., and Hungary with 36.4 per cent. From 1897 to 1907, no new proportion having been agreed, the quota was fixed by the Emperor-King's decision.

Common expenses were estimated (for the year 1909) at £37,764,262.

Commerce is carried on principally with Germany, Italy, Russia, France, and Switzerland, and through the ports of Trieste and Fiume, also direct with the transmarine world, including England. In 1907, 40,666 kilometres of railway were open for traffic, in addition to 2,787 kilometres for industrial purposes, and 1,023 kilometres in Bosnia-Herzegovina.

In connection with the Ausgleich-Kiegyezés the two States also entered into a commercial and customs union in 1867, by which the two States form one commercial and customs territory, and possess the same system of coinage, weights and measures, and a joint bank of issue. In the same way as the quota agreement, this union is renewable every ten years, and failing a renewal each State provides separately for these matters. The Union was so renewed in 1877, 1887 and 1907. In 1897, no agreement having been attained, the Union was provisionally maintained.

The principal articles exported from Austria-Hungary in 1906, 1907 and 1908 were:—

	1906.	1907.	1908.*
Cereals, &c. ...	£5,017,292	£6,551,629	£5,556,110
Eggs	4,639,458	5,134,809	4,840,784
Skinore	2,333,417	2,110,153	2,716,784
Sugar	8,223,875	8,277,916	9,487,379

Foodstuffs	24,377,000	24,537,554	26,032,799
Manufactures	44,430,333	46,854,590	42,885,526
Semi-manufactures ...	15,849,292	18,311,579	17,251,808
Total exports, A. & H.	£104,248,915	£105,517,744	
Total imports, A. & H.	102,386,904	96,874,379	
From U.K.	9,938,705	—	
To U.K.	9,260,271	—	

[In calculating the above amounts the *krone* or *korona* is reckoned at the rate of 24 to the £.]

Defence (for Army, see p. 666).—The navy consists of 189 vessels, including 12 battle-ships, 11 cruisers, 13 torpedo-boat destroyers, and 81 torpedo boats, with 10 vessels on the Danube. Pola is the naval arsenal.

Bosnia and Herzegovina.—These provinces are situated between 42° 40' to 40° 15' N. lat. and 33° 22' to 38° 45' E. long, and contain a total area of 51,028 sq. kilometres, and a population of 1,828,379 (1908). The seat of administration is Sarajevo. The local Revenue (1903: £1,921,825) suffices for the cost of administration (£1,893,721), but not for the maintenance of the army of occupation. CAPITAL, Sarajevo (Bosna-Serai). Population (1895), 38,083.

II.—AUSTRIA.

President of the Council, Dr. Rich. Freiherr von Bienerth.

Justice, Dr. R. v. Hochenburger.

Finance, Dr. Leon R. v. Biliński.

Interior, Freiherr von Hårdtl.

Agriculture, Dr. Albin Braf.

Commerce, Dr. Richard Welfskirchner.

Public Worship & Instruction, Graf Stürgh.

Railways, Dr. August Ritt.

Works,

Defence, Feldmarschallleutnant Friedrich von Georgi.

Without Portfolio, Dr. R. von Duleba; Dr. Zúček; Herr Schreiner.

Austria contains an area of 300,008 sq. kilometres, and a population of 27,995,896 (1907). The Central Government of the Empire is conducted by the Reichsrath, consisting of an Upper (Herrenhaus) and Lower House (Abgeordnetenhaus). There are 17 provinces, viz. 1.—Lower Austria, Upper Austria, Salzburg, Styria or Steiermark, Carinthia or Kärnten, Carniola or Krain, Coast Districts (Istria, Görz and Gradisca, Trieste), Tyrol, Vorarlberg, Bohemia, Moravia, Silesia, Galicia, Bukovina and Dalmatia, each possessing a separate Diet (Landtag) and also sending representatives to the Reichsrath. Of the inhabitants, there were in 1900, 9,371,614 Germans, 5,955,397 Bohemians and Moravians, 4,252,483 Poles, 3,382,570 Ruthenians, and 1,192,780 Slovenes. In addition to Vienna there are six cities with over 100,000 inhabitants and seven in addition with over 50,000. There are 23,797,000 Roman, Greek and Armenian Catholics, 607,000 Orthodox Greek, 454,062 Protestants and 1,225,000 Jews in the country.

The principal industry is agriculture, in which 13,700,000 were employed in 1900; trade and manufactures accounting for about 9,600,000, while mining occupied 538,829. The chief products are grain, cereals, wine (4,250,342 hectolitres in 1907), and minerals (coal, iron, lead, zinc, silver, quicksilver and copper); the manufactures being woollens, cottons and glass.

Education (see p. 668).
 Estimated revenue £89,479,212 £100,193,645
 Estimated expenditure 89,474,674 100,273,106

III.—HUNGARY.

President of the Ministry and Finance, Dr. Alexander Wekerle.

Minister a latere, Count Aladár Zichy.

Interior, Count Julius Andrássy.

Instruction and Religion, Count Ethelbert Apponyi.

Commerce, Francis de Kossuth.

Agriculture, Dr. Ignaz de Darányi.

Justice, Dr. Anthony Guenther.

National Defence, Lewis de Jekelfalussy.

Minister for Croatia, Géza de Jospovich.

Hungary, with its dependent states, has an area of 324,851 sq. kilometres, about 125,420 sq. miles, and is rather larger than the United Kingdom, with a population of 19,254,559 at the census of 1900: to this Croatia and Slavonia contribute 2,416,304. The country is divided into 77 counties with 474 districts for those of Hungary. Hungarian is the official language, except in Croatia and Slavonia, where Croatian is spoken. Croatia and Slavonia form an annex of the Crown of Hungary, with autonomy in home affairs, justice and public instruction. At the head of the Croatian Government is the Banus (Lord-Lieutenant), Baron Paul Rauch, who is responsible to both the Diet of Croatia and to the Hungarian Prime Minister. The Croatian Diet sends 43 members to the Hungarian Parliament, and the Hungarian Ministry contains a Croatian member. Parliament consists of a Lower House of 453 members, elected for five years; of these Croatia sends 40, but they have no vote on matters connected with justice, education, and home affairs. There is also an Upper House, consisting of the male members of the dynasty, the *Barones regni*, prelates, such members of the magnate families who contribute more than 6,000 crowns to the land-tax, the Banus, with three members of Croatia sent by the Diet, and fifty members nominated by the Crown.

Of the inhabitants in 1900, 8,742,000 were Hungarians, 2,799,000 Roumanians, 2,135,000 Germans, 2,020,000 Slovaks, 1,682,000 Croats and 1,049,000 Servians, the Hungarian-speaking population numbering 10,176,000. By religions (1900) there were 9,920,000 Roman Catholics, 1,854,000 Greek Catholics, 2,816,000 Orthodox Greeks, 1,289,000 Lutherans, 2,441,000 Calvinists, and 851,000 Jews. In addition to Budapest, which had, in 1900, 732,322 inhabitants, there are ten cities with over 50,000 inhabitants.

All the great plains produce grain of excellent quality. The returns for 1908 (including Croatia and Slavonia) give 57,537,122 hectolitres of wheat, 16,751,471 of rye, 19,608,666 of barley, 24,304,025 of oats, and 57,402,249 of Indian corn in 1907. The cattle number 6,738,000, sheep 8,123,000, horses 2,308,000, and swine 7,330,000. The total exports in 1908 were valued at £66,157,416, of which sum £34,699,000 was the value of raw materials, £7,448,000 of semi-manufactures, and £23,897,916 of manufactures. The imports in 1908 were valued at £64,884,458 (raw materials £12,733,375, semi-manufactures £9,183,058, manufactures £43,068,041). The chief mineral

products are gold, silver, copper, lead, quick-silver, antimony, iron, coal, and sulphur. The mines, however, are not well worked, and might be made a much greater source of income. Salt, which is a Government monopoly, was produced to the value of £1,282,176 in 1908.

Defence (for Army, see p. 666).

Consul-Gen., M. E. Pollet, 57 Gracechurch Street, E.C.

A Kingdom of Central Europe, anciently inhabited by the Belge (a Celtic-speaking German tribe), and part of the *Gallia Belgica* of the Romans. In 1815 the country was joined to the

Kingdom of the Netherlands, an arrangement which was upset by the Revolution of 1830. On Oct. 4, 1830, a National Congress proclaimed its independence, and on June 4, 1831, Prince Leopold of Saxe-Coburg was chosen hereditary King. In Sept., 1908, the Congo Free State was annexed by Belgium.

Belgium has a frontier of 831 miles, and is bounded on the north and east by the Netherlands (268 miles), on the south and west by France (381 miles), on the east by Germany (60 miles), and the Grand Duchy of Luxembourg (80 miles), with a seaboard of 42 miles. The Meuse and its tributary the Sambre divide it into two distinct regions, that in the west being generally level and fertile, whilst the table-land of the Ardennes, in the east, has for the most part a poor soil. The total area is 11,373 square miles, about equal to the four counties of Hertford, Lancashire, York, and Lincoln; its great harbour and commercial *entrepôt* is Antwerp, a strongly fortified city on the Schelde. The other harbours are Ostend, Nieuport, Blankenberg, and Zeebrugge.

The "polders" near the coast, which are protected by dikes against floods, cover an area of 193 square miles. The highest hill, Baraque Michel, rises to a height of 2,230 feet, but the mean elevation of the whole country does not exceed 536 feet. The principal rivers are the Schelde (Escaut) and the Maas (Meuse). Brussels has a mean temperature of 50° F. (summer 63°, winter 37°).

The population was 7,317,561 on Dec. 31, 1907, or 625 to the square mile; it is consequently one of the most densely peopled countries of the world. The decennial increase is about 10 per cent., and since 1867 there has been an annual excess of immigrants over emigrants. There were (1904) 3,550,419 females to 3,514,491 males; and annually 27 births and 17 deaths to every 1,000 inhabitants. There are nine provinces: Antwerp, Brabant, Flanders (E. and W.), Hainaut, Liège, Limburg, Luxembourg, and Namur. BRUSSELS (with suburbs, 730,000 inhabitants) is the capital. Other towns with over 100,000 inhabitants are Antwerp, the chief port (327,107 exclusive of suburbs), Ghent (173,036), and Liège (173,939).

French and Flemish are the joint official languages, but while French is the language of the upper classes, Flemish is spoken by the majority, preponderating in Flanders, Limburg, and Brabant, including Antwerp. In 1900, 42 per cent. spoke Flemish, 38 per cent. French, and 12 per cent. both tongues, the latter being a rapidly increasing class (423,752 in 1880 and 801,587 in 1900). Nearly all the inhabitants are at least nominally Roman Catholics, and in 1900 there existed 2,500 convents, inhabited by 6,237 monks and 31,668 nuns, this number being now increased owing to influx of monks and nuns from France.

Education (see p. 668).

Belgium is essentially a manufacturing country, and it is largely dependent upon foreign supplies for its food. The soil was divided (1865) among 829,625 proprietors. The mineral kingdom yields coal (1907, 23,705,190 tons), iron (1907, 316,250 tons), zinc, lead, and copper. The leading industries are collieries, quarries and metallurgic (Mons, Charleroi, Liège, Namur, Hainaut, and Brabant), glass, textiles (Verviers), lace (Brussels, Mechlin, Bruges, &c.), flour and starch mills, sugar, distilleries, breweries, &c. The follow-

* Austria and Hungary have no common debt, but in the expenditure of the Kingdom of Hungary the sum of £2,585,016 is set aside annually as a contribution to the service of the General Debt of Austria contracted before 1867.

ing table shows the distribution of Belgian commerce in millions of francs, 1907 and 1908:—

	Imports from		Exports to	
	1907.	1908.	1907.	1908.
Germany	460	449	701	680
France	652	516	530	464

Manufacts	126,954	" &c., Yarn	149,720
Fish	256,313	" Manufacts.	602,977

Most of the maritime trade of Belgium is carried on in foreign bottoms, the mercantile marine only consisting (1909) of 88 vessels (152,325 tons), in addition to which there were about 450 fishing boats. In 1905 a new port was inaugurated at Zeebrugge with a sea lock and inside dry dock. In 1907, 10,306 foreign vessels entered at Belgian ports (tonnage 13,465,447). In 1908 there were 4,604 kilometres (= 2,878 miles) of railway, (including branch lines and private lines rented by the State); the telegraphs had a length of 4,369 miles (1908), and the post-office carried 213,504,229 letters, 103,872,099 post-cards, while 7,700,000 telegrams were sent in 1908. The navigable rivers and canals have a length of 1,357 miles (1907), and there are 5,994 miles of roads.

The Belgian constitution of 1831 jointly vests the legislative power in the King, the Senate, and the Chamber of Representatives. The 110 senators (with the exception of 27 elected by the provincial councils) and 166 representatives are elected by the people, the former for eight, the latter for four years. Universal male suffrage, with plural voting up to three votes by property and educational qualifications, was introduced by the Electoral Law of 1894, proportional representation being secured by an Act of 1900. And the united constituencies numbered 1,625,876 voters, with 2,564,717 votes, in 1907-8.

There are in addition representative Provincial and Communal Councils, elected on a somewhat more liberal franchise.

Defence (for Army, see p. 667).

Antwerp is the principal fortress, and Liège and Namur are also fortified, forming "Têtes-de-pont" on the line of the Meuse against a violation of neutrality by either France or Germany. Belgium has no navy. (See above.)

**The Congo*.—The territory of the Congo includes the right bank of the Congo river from Manyanga to the sea, and 16 miles of sea-coast north of the estuary; the left bank from Noki (80 miles from the sea); and thenceforth both banks. The total area amounts to 802,000 sq. miles, with a native population estimated at 24,000,000 to 25,000,000. The total European population (Jan., 1903) was 2,365, of whom 221 were British, 41 Americans, 149 Italians, 108 Portuguese, 136 Swedes, 67 Germans, and 1,477 Belgians (mostly Government officials). The river is navigable for large vessels from its mouth at Banana to Matadi (95 miles), where the European steamers discharge and recharge their cargo; but between that place and Leopoldville, on Stanley Pool, there occur rapids and falls which have been avoided by a railroad 240 miles in length. There is also a second line, 60-centimetre gauge, from Boma to the Mayumbe country. The Great Lakes Railway is completed as far as Ponthierville, about 751 miles (1906). A line of telegraph is open to Kouilhatville. There is telegraphic communication with Europe. A terrible disease, called "Sleeping Sickness," for which no remedy has yet been discovered, has of late years made increasing ravages upon the native population, and threatens to depopulate large districts (especially in the Lower Congo) of a country in other respects capable of supporting with ease a large population. There are undoubtedly many fertile tracts, more especially along the rivers; but barren mountain-land shuts out the coast

* See also pp. 702-703.

from the more productive interior. The exports consist mainly of rubber (three-fifths of whole), palm-kernels, palm-oil, ivory, and a few minor articles. The coffee plant and cotton grow wild, and coffee, cocoa, and tobacco have been planted with success. Iron, copper, and other minerals have been found. Revenue (1906), £1,178,200; expenditure, £1,371,050; imports (1908), £1,290,833; exports (1908), £2,274,692. Capital, Boma (pop. 3,300); Matadi has about 4,000 inhabitants. Governor-General, Baron Wahis; Vice-Governors-General, M. Wangermée; M. Fuchs; M. Lantonnais; Secretary of State, Baron van Eetvelde.

This and Paraguay are the only States of South America without a seaboard. Antofagasta, its former port, having been ceded to Chile. It was formerly comprised in the Spanish Vice-royalty of Colombia under the name of "Alto Peru," and derives its present name from its great liberator, Simon Bolívar. It extends between lat. 8° and 23° S. and long. 57° 30' and 73° W., and its area is said to be 570,000 square miles. The estimated population in 1907 was 2,180,710. The peace army amounts to about 3,000 men, the war effective being about 90,000. The mineral productions are very valuable: the silver mines of Potosi are believed to be almost inexhaustible; while gold, partly dug and partly washed, is obtained on the Eastern Cordillera of the Andes: tin, copper, lead, antimony, wolfram, bismuth, salt and sulphur are also found. Its agricultural produce consists chiefly of rice, barley, oats, maize, cotton, coca, indigo, india-rubber, cacao, potatoes, the choicest fruits, cinchona bark, medicinal herbs, &c., which with tin, gold, silver and copper are its principal exports; its chief imports being iron, cotton and woollen goods, hardware, and silks. There are about 400 miles of trunk lines of railway and 2,866 miles of telegraph wire. There is direct railway communication with La Paz from Antofagasta (Chile), and branch lines are under construction from Oruro to Cochabamba and from Rio Mulato (near Uyuni) to Potosi. Communication with Peru is effected by rail to Guaquí and thence by steamer across Lake Titicaca to the railway at Puno. A line is under construction from San Antonio (Brazil) to Villa Bella in Bolivia; 65

miles are in operation and 150 left to complete, when it will connect with the steamers on the rivers Beni, Mamoré, and other tributaries. A line from Buenos Aires to Bolivia is complete to La Quiaca.

Consul-Gen. in Liverpool, Capt. J. C. da F. Pereira Pinto.

The Republic of the United States of Brazil was founded on the 15th of November, 1889, by a bloodless revolution which drove Dom Pedro from the throne. On February 24, 1891, a new Constitution was voted by the Constituent Assembly by which the President's term of office was fixed at four years; Church and State were separated, civil marriages only made valid, and education secularised.

Brazil, the most extensive State of South America, discovered in 1500 by Pedro Alvarez Cabral, Portuguese navigator, is bounded on the north by the Atlantic Ocean, Guiana, and Venezuela; on the west by Ecuador, Peru, Bolivia, Paraguay, and Argentina; on the south by Uruguay; and on the east by the Atlantic Ocean. This immense country extends between lat. 4°

* Bonds to value of £104,000 in circulation, for the redemption of which the Government have the necessary funds in the Treasury.

22° N. and 33° 45' S. and long. 34° 40' and 73° 15' W., being 2,600 miles from north to south, and 2,500 from west to east; with a coast-line on the Atlantic of 3,700 miles. It comprises an area of 3,218,166 square miles, and contains a population estimated at 20,000,000. Indians; 94,695 immigrants arrived in 1908, an increase of 27,000 over the previous year. For *Army* see p. 667; the *Navy* (1909) consisted of 3 Dreadnoughts, 3 old battle-ships, 3 protected cruisers and other smaller craft, including 11 torpedo boat destroyers, and 3 submarines. 3 first-class battle-ships and 4 cruisers are under construction. There are 42 ports along the coast, of which the principal is Rio, with a shore line of 123 miles. Brazil is unequalled for the number and extent of its rivers: the Amazon, the largest, though not the longest, in the world, with its immediate tributaries, and the Tocantins, San Francisco, and others. The minerals are very considerable and valuable, comprising gold, silver, iron, clainoids, topazes, and other precious stones. Its forests are immense, abounding in the greatest variety of useful and beautiful woods adapted for dyeing, cabinet work, or ship-building; among these are mahogany, logwood, rosewood, brazilwood, &c. In the extreme south towards the interior the land rises by gentle gradations to the height of from 2,000 to 5,000 feet above the level of the sea, and in those regions European fruits and grain are reared, while other parts are found extremely favourable for the raising of sugar, coffee, cotton, cocoa, India-rubber, tobacco, and tropical products, many of which are indigenous. Its agricultural produce is abundant; maize, beans, cassava-root, and nuts are very generally cultivated; also, in some parts, wheat and other European cereals. Cattle raising is an important industry. The number being officially computed at 18,000,000. Cotton is being largely cultivated for export, and is being used in growing quantities for home manufactures. Sugar-cane is grown in large and increasing quantities in the northern provinces, Pernambuco being the centre of the sugar-producing zone. India-rubber comes from the more northern provinces, especially the valley of the Amazon, and is shipped from Pará and Manaus; and coffee, though also grown in the north, comes chiefly from Rio de Janeiro, Minas, São Paulo, and Espírito Santo. Tobacco and cocoa are grown largely, especially in Bahia. The exports consist solely of the raw produce of the country, and the consequent very different peculiarities of the soil and climate, their nature varies considerably. The imports consist of every description of manufactured articles, but there were in 1908 no fewer than 1,541 industrial establishments including 161 cotton-mills, giving employment to 45,442 hands, and representing an invested capital of 234,422 of contos of reis. The enormous protective duties were again increased in 1887, 1893, 1896 and 1906. In 1907 there were 11,000 miles of railway open. Length of telegraph wires in 1907 42,210 miles.

For *Education*, see p. 668.

Bulgaria was created by the Treaty of Berlin,

13th of July, 1878, and is governed by a Prince

elected by the National Assembly or Sobranje,

with a popular legislature and constitutional

government; in 1908 the country threw off its allegiance to Turkey, and is now independent.

Eastern Roumelia, likewise a creation of the Berlin Treaty of 1878, has an area of 13,862 square miles, and 993,431 inhabitants; it was intended to form an autonomous province, but since the successful revolution at Philippopolis of September 18th, 1885, it has been incorporated with Bulgaria, under the name of Southern Bulgaria, and the accomplished fact was recognised by the arrangement of April 5, 1886; it now forms an integral portion of Bulgaria, with the same ruler, laws, and mode of administration.

By modification of the Constitution, 1893, there is now one deputy to each 20,000 inhabitants, 115 for the northern, and 51 for the southern province.

Defence (for Army, see p. 666).—The navy consists of a torpedo gunboat and a few small steamers.

Education (see p. 668).

United Bulgaria is bounded on the north by Roumania, from which it is separated by the Danube; on the west by Servia and Macedonia; on the east by the Black Sea; and on the south by the Turkish province of Adrianople. The exports consist principally of cereals (especially wheat), live stock, essence of roses, woollens, skins, cheese, eggs, timber, cocoons, and tobacco; the principal imports being textiles, metal goods and machinery, colonial wares, leather, building materials, petroleum and other oils, paper, salt fish, rice, and coal. The principal towns, with their populations in 1905, are Sofia (82,621), Philippopolis (45,707), Varna (37,417), Rustchuk (33,632), Silven (25,027), and Shumla (22,275). The principal ports are Varna and Bourgas. In 1908, 5,915 vessels (1,654,995 tons) entered and cleared at ports on the Black Sea. There are (1908) 605 miles of railway open; 3,688 miles of telegraph and 1,170 miles of telephone wires. North Bulgaria has an area of 24,237 square miles, and South Bulgaria an area of 12,706 square miles. Population according to language or nationality and religion (census of 1 January, 1905):—

A State of South America, of Spanish origin, lying between the Andes and the shores of the South Pacific, extending coastwise from the Rio Sama to Cape Horn south, between lat. 18° 28' and 56° 35' S., and long. 66° 30' and 75° 40' W. Extreme length of coast-line about 2,485 miles. Its extreme length is about 2,800 miles, with an average breadth, north of 41°, of 100 miles. The great chain of the Andes runs along its eastern limit, with a general elevation of 5,000 to 10,000 feet above the level of the sea; but numerous summits attain the height of 18,000 feet—the highest, Aconcagua, an extinct volcano, being 22,422 feet. The chain, however, lowers considerably towards its southern extremity. There are no rivers of great size, and none of them are of much service as navigable highways. In the north the country is arid. Chile is divided into 21 provinces and 3 territories, the aggregate area of which is estimated at 290,741 square miles, with a population (1900) of about 3,110,000, exclusive of Araucanians, Bolivian and American Indians, numbering about 50,000. The principal towns, with their estimated populations (1908), are:—Santiago (380,000), Valparaiso (190,000), Concepcion (62,000), Talca (45,000), Iquique (45,000), Chillan (34,000), and Antofagasta (26,500). The natural increase in the population is slow, but immigration is slowly redressing the balance, the majority of incomers hailing from Spain. Agriculture and mining are the principal occupations. Wheat, maize, barley, oats, beans, peas, lentils, wines, tobacco, flax, hemp, Chile pepper, and potatoes are grown extensively; the vine and all European fruit-trees flourish. The live stock includes about 1,000,000 cattle, 1,500,000 sheep, 200,000 horses, 170,000 goats and 150,000 pigs. The mineral wealth is considerable, the country being extremely rich in copper-ore, and some rich gold mines have been discovered. The mindless north yields more especially nitrate of soda. I mine, borate of soda, gold and silver, a large number of mines yielding both being in actual work in Tarapacá, Guanaco, and Cachinal in Atacama, and Caracoles in Antofagasta; the centre, copper and silver; and the south, iron and coal. There are smelting-works for copper and silver, tanneries, corn and saw mills, starch, soap, biscuit, rope, cloth, cheese, furniture, candle, and paper factories, breweries and distilleries, and the domestic industry furnishes cloth, embroideries, baskets,

and pottery. The many ports favour commerce, and six lines of steamers connect the country with Panama and the Magellan Strait direct with Europe, a passage to Liverpool occupying from 40 days. There are (1908) about 3,300 miles of railway open, nearly 15,000 miles of telegraph, over 850 post-offices, and 8,000 miles of telephone, the last worked by an English company. In 1904 a contract was signed for the completion of the Chilean section of the trans-Andean line, which it is hoped to complete in 1910. The commercial marine numbers 153 vessels (94 steamers), of 157,997 tons. In 1907, 2,900 foreign vessels of a total tonnage of 6,500,000 entered at Chilean ports. The staple articles of export are nitrate of soda, iodine, &c., copper bars and ores, silver ores, corn, flour, hides, and guano. The imports include silks, woollens and other textiles, food, and machinery. About 40 per cent. of the foreign trade is carried on with England. The paper currency was worth about 10d. in 1909; conversion to 18d. is stipulated by law to take place on Jan. 1, 1915.

Defence (for Army, see p. 665).—The navy consists of 1 battle-ship, 2 armoured cruisers, and 4 protected cruisers; two Dreadnoughts are projected.

Commercial Attaché, Cheo Fong Kong.

China proper (or the Eighteen Provinces) contains an area of over 1,500,000 square miles. Its length from north to south is 1,860 miles, and its breadth 1,520 miles, and its population, according to the latest Chinese estimates, exceeds 400,000,000.

On the north of the 18 provinces lie the vast regions of Mongolia and Manchuria, and on the west are Tibet and Turkestan, all of which are integral parts of the Chinese Empire; the area of these dependencies is over 2,500,000 square miles, with a scattered population of 19,000,000. The civil government of the 18 provinces is entrusted to viceroys and governors, and under them each province is subdivided into circuits superintended by tao-tais or intendants, and again into prefectures and districts. All the territorial officials are appointed by the Imperial Government, and the provincial viceroys and governors, though free to act independently in many matters of local detail and finance, are responsible to the central Government at Peking in all important questions, and especially so in foreign affairs. The administration of Mongolia and Turkestan is entrusted to Military Lieutenant Governors, who, with the Chinese officials in Tibet, are under the direction of the *Mongolian Superintendent*, or Colonial Office, in Peking.

FOREIGN RELATIONS with the Chinese Empire have existed for many centuries. In the 13th century the Venetian merchant-adventurer Marco Polo resided in Cambaluc (the present Peking), and was employed by the Mongol Emperor Kublai Khan as adviser. In the 17th century Jesuit missionaries had attained considerable influence, but their power aroused jealousy, and they were expelled. The Dutch and Portuguese traders had for centuries maintained commercial dealings with the port of Canton, but towards the end of the 18th century they were largely displaced by the British East India Company, and when the Company's monopoly was withdrawn, in 1833, the position of British merchants in Canton became a national question and contributed towards the first Chinese War of 1840. A treaty was signed at Nanking as the result of these operations, ceding Hong Kong to Great Britain and opening five ports to foreign trade and residence; but the principle of extra-territoriality was maintained, and foreigners remained amenable only to the laws of their own countries. The continued exclusiveness of the Chinese government led by a long chain of events to the war of 1860, when British and French troops captured Peking and burnt the Summer Palace. From this date the development of foreign trade began to be most important, and for many years Great Britain's share of it was greatly predominant. In 1894 China fought a disastrous war with Japan, resulting in the loss of Formosa and the

establishment of Korea as an independent state. An abortive attempt was made, in 1898, by the Emperor to introduce administrative reforms, but his reactionary ministers persuaded the Dowager Empress (his aunt) to reassume the reins of government. Under her rule a plot was hatched to rid the country of foreigners; and in the summer of 1900 the Legations in Peking and the foreign settlements in Tientsin were fiercely attacked and bombarded for many weeks. The situation was relieved at its most critical moment by the arrival of an allied army despatched by nearly all the Treaty Powers, and Tientsin and Peking were captured. The Imperial Court fled, and remained in voluntary exile until early in 1902. Meanwhile, a Peace Protocol was signed between the Envoys of the Treaty Powers and the Chinese Plenipotentiaries, Prince Ching and the late Li Hung Chang. This provides for an indemnity of £65,000,000, to be paid within the next 39 years. Subsequent negotiations resulted in 3 new commercial treaties:—(1) between the U.K. and China (5 Sept., 1902); (2) U.S. and China (8 Oct., 1903); and (3) Japan and China (9 Oct., 1903). Under the two last Mukden, Tatumkow, Chang-sha, and Antung in Manchuria, were made Treaty ports.

Initiatory measures have been taken by China, under the first of these Treaties, to introduce two important reforms—namely, the protection of trade-marks and the establishment of a uniform national coinage. As regards the former, provisional regulations have already been framed, and the latter was the subject of investigation by a joint American and Mexican Commission, which submitted a scheme to the Chinese Government for the adoption of a gold standard.

On the conclusion of the war between Russia and Japan in 1905, a Treaty and Additional Agreement relating to Manchuria were entered into between Japan and China. By the former the Chinese Government consented to all the transfers and assignments made by Russia to Japan in Manchuria; and the latter provides, *inter alia*, for the speedy opening by China of the following cities and towns in Manchuria as places of international residence and trade:—Feng-huang-ch'eng, Liao-yang, Hsishmintun, Tung-chiang-tzu (on the Liao River), and Fa-kumen in Fengtien Province; Chang-ch'un, Kirin, Harbin, Ninuta, Hanch'un, and Sansing in the Kirin Province; and Tsitsihar, Hailar, Aihun, and Manchuli in the Heilangchiang Province.

Latest estimates of the foreign residents at the open ports of China are as follows:—British, 9,043; Japanese, 44,143; Americans, 3,545; Russians, 9,520; Germans, 3,637; French, 2,029; Portuguese, 3,353; Italian, 554; the total being 77,660. Out of a total of 2,409 foreign firms in China, 487 are British, 1,149 Japanese, 274 German, 109 American, 88 French, 54 Portuguese, and 83 Spanish.

Defence (for Army, see p. 667).—The navy has not recovered from the effects of the Sino-Japanese war, when more than ten important war vessels were sunk or captured. China now possesses 2 second-class cruisers (4,300 tons), and 11 third-class cruisers (875–2,500 tons); 3 torpedo gunboats (349–1,000 tons), 4 gunboats (215–411 tons), 32 first-class torpedo boats, and 12 second-class torpedo boats. Most of these were launched between 1885 and 1902. Of the torpedo boats about half only are fit for action. Four destroyers, built in 1898–9, were captured by the Allied Forces in 1900, and were appropriated by

Great Britain, France, Germany and Russia respectively. Full complement of the navy is about 2,500.

SHIPPING.—The mercantile marine (1901) consisted of 46 steam vessels over 100 tons register, with a total net tonnage of 40,178 tons; in 1908 the total tonnage of vessels entered and cleared at the treaty ports was 83,991,289, the largest total yet recorded; of these 41 per cent. were British, 20 per cent. Chinese, 8 per cent. German, 21.5 per cent. Japanese, 6 per cent. French, 1 per cent. Norwegian, 1 per cent. American, and 1.5 per cent. other countries.

COMMERCE.—The total foreign trade of China in 1908 amounted to £29,482,784 (imports £52,600,730, exports £35,888,054), a decrease of £21,138,302 as compared with 1907. It was shared by the nations of the world as under in 1908:—

British.	%	Foreign.	%
Great Britain	12.68	Japan	1.3
Hong Kong	26	U.S.A.	9.7
India	5	Europe (exc. Russia) ..	12.72
Other British Terri- tories	1.88	Russia	5.68
% British	55.96	Other countries	5.34
		% Foreign	44.04

The principal exports to this country from China in 1908 were tea (£725,105), silk (£640,863), skins and furs of all kinds (£231,768), straw for plaiting purposes (£162,989), hair (£123,424), and bristles (£240,103); while the chief domestic imports from the United Kingdom were cottons (£5,172,700), woollens and worsteds (£338,632), iron, wrought and unwrought (£645,775), machinery (£402,777), candles (£85,501), chemicals (£121,320), cotton yarn (£158,753), tobacco (£265,180), and soap (£89,970).

EDUCATION (see p. 668).

RAILWAYS.—About 4,500 miles were open (1909) inclusive of the Manchurian lines. The following are the lines completed and working:—*Manchurian Railways* (Chinese Eastern Railway Co.)—(a) Manchuria station *via* Harbin to Dalny and Port Arthur (2,200 miles), with 157 miles of branch lines. (b) Harbin to Pogranitchnaya on the East Manchurian frontier. *Imperial Railways of North China.*—Earnings of intra-mural section mortgaged to British bondholders. (a) Peking to Newchiang (470 miles), with branch from Peking to Tungchow (12 miles). (b) Konpanctse to Mukden (102 miles), *via* Hsishmintun. (c) Chinchou-fu to the Nanp'iao coal mines (30 miles). (d) Kao-p'io-tien (on the Peihai line) to Hsiling Western Tombs, 30 miles. *Peihai Railway*, from Peking to Hankow (750 miles), with branches from Chingchow to Kiaifeng Fu (35 miles), Kaifeng to Honanfu (120 miles), and Chengtinfu to Taiyuanfu (150 miles). *Tsingtao-Chinanfu Railway* (250 miles). German direction. A branch line runs to Poshan (30 miles). *Taok'ou-Ch'inghsia Railway* (Honan), 90 miles, crossing the Peihai line. *Shanghai-Nanking Railway* (200 miles). *Canton-Samsui Railway* (30 miles). *Pinghsiang to Liding* borders of Kiangsi-Hunan (56 miles). *Suatoan-Chaochowfu Railway* (32 miles). Peking to Kalgan (125 miles). Peking to Mantokow (17 miles). Nanking to Chinkiang and Kungyik to Sunning (40 miles).

The following lines are under construction:—*Canton to Hankow* (650 miles). About 57 miles open from Canton to Yunnan. *Kungyik-Sunning* line to be extended to Kong Moen (26 miles). *Laokai to Yunnan-Fu* (390 miles). *Peking to Kalgan* (125 miles). *Kungyik (Kuangching), via Sunning, to Sankahoi* (59 miles). *Wuhu to*

Kuangtechow (90 miles). *Tientsin—Nanking Railway* (600 miles). *Canton to Kowloon* (100 miles). *Shanghai to Kashing. Hangchow to Shanghai. Amoy to Changchow* (30 miles). *Shanghai to Ningpo* (238 miles). 109 miles laid. Chinese capital and engineers.

The following lines are contemplated:—*British capital*.—Suchow to Ningpo, *via* Hangchow (170 miles). *German capital*.—Tchow to Chengtingfu (100 miles); Yenchow to Kaifengfu (150 miles). *French capital*.—Longsan to Nanning, *via* Lungchow (150 miles). *Japanese capital*.—Amoy to Foochow (150 miles). There are also projects for lines from Hankow to Chengtu (Szechuan), *via* Wanhien. *Chinese engineers and construction*; Canton to Amoy; Kalgan to Kulun (Manchuria); Launchou to Ili (Kansu); Kiukiang to Nauchang; Kuanchengtze to Kirin; Shihchiachuang (Chihli) to Tehchow (Shantung); Hsinmintun to Fakuman; and Loyang to Tungkuan (Honan); in Canton district—Fatsan to Kong Moon; Canton to Swatow; Samshui to Wuchow; line from Kua Chou at mouth of Grand Canal to Tsing Kiang P'u and Hsu Chou thence joining Peking-Hankow line *via* K'ai Fengfu—the Chinkiang-Hsuehou-Kaifeng portion to be first laid; line 47 miles long from coal mines at Tsao Chuang to Tai Chuang on Grand Canal; line to join Wei-Hsien on the Chinan-Tsingtao Railway with Chefoo; Chinese Eastern Railway Co., Ta Shih Chiaow to Newchwang (30 miles); ditto, Kirin to Kuanchengtze.

TELEGRAPHS are being rapidly constructed by the Imperial Government, and Peking is in communication overlaid with Europe and Tibet, the line being extended to Lhasa. The total length of line in operation at end of 1905 was 21,379 miles.

CUSTOMS AND POSTS.—The Imperial Maritime Customs is the controlling service; this body consists of nearly 1,000 Europeans, a large proportion of them British subjects, all under the control of Sir Robert Hart, G.C.M.G. By an Imperial Decree of May, 1906, the Maritime Customs Dept. was transferred from the Foreign Board to the Board of Revenue, and two Chinese Administrators-General were appointed. It is not yet exactly known how far this change will affect the powers hitherto exercised by the Inspector-General. In addition to the collection of dues at the Treaty Ports this service manages the lighting and navigation thereof, and keeps a small fleet of cruisers to enforce its regulations; it also manages the Imperial Post Office, whose operations have been much developed in the last two years. Already letters can be sent all over the 18 provinces at a uniform rate of 2 cents (or less than one halfpenny) per half-ounce. The number of Chinese post offices is 3,493; 252,000,000 postal packets and 2,455,000 parcels were handled in 1908.

FINANCES.—Sir R. Hart, in 1901, estimated the annual revenue as follows: Land tax, 26,500,000 taels; provincial duties and receipts, 2,600,000 taels; grain commutation, 3,100,000 taels; salt gabelle, 13,500,000; likin, 16,000,000; customs (maritime), 23,800,000, (native) 2,700,000; total, 88,200,000 taels. The expenditure was estimated at 101,220,000 taels.

*Total debt (about) £54,500,000
*Interest due (about) 2,500,000

* The tael reckoned at 3s. 3d.

COLOMBIA, REPUBLIC OF.

President, General Ramon González Valencia, elected 3 August, 1905 (for one year).

Foreign Affairs, Dr. Carlos Calderon.

Envoy Extraordinary and Minister Plenipotentiary in England, Don Santiago Perez Triana, 42 Holland Road, W.
Secretary of Legation, Pablo Lorenzana.

† The tael reckoned at 3s. 0½d., in 1905, 3s. 3½d. in 1906, 3s. 3d. in 1907, and 2s. 8d. in 1908.

Consul-General, Francisco Becerra, Friar's House, New Broad Street, E.C.
Consul in Liverpool, Victor M. Salazar.
Consul at Southampton, Jaime Gutiérrez.

Formerly New Granada—a Republic with Constitution, 5 August, 1886—consisting of the Capital District of Bogotá and 34 Departments created by a Law of 5 April, 1908. In the most North-West part of South America, having a coast-line on both the Atlantic and Pacific Oceans. It is situated between 2° 40' S. to 12° 25' N. lat. and 68° to 79° W. long., comprising an area of 473,000 square miles, and possessing an estimated population (1895) of about 4,000,000, of whom more than one-half are whites and half-castes. It has been frequently subjected to revolutionary changes and civil wars, and in December, 1903, the Department of Panama proclaimed its independence and now exists as a separate republic. The country is intersected by three great ranges of the Andes, known as the Western, Central, and Eastern Cordilleras; the second contains the highest peaks, but the latter is the more important as it consists of a series of vast table-lands, cool and healthy. This temperate region is the most densely-peopled portion of the Republic. Its forests are extensive; among the trees are mahogany, cedar, fustic, and other dye-woods and medicinal plants. Its mineral productions are gold, silver, platinum, copper, iron, lead, coal, and emeralds. Its principal agricultural products are coffee, cotton, plantains, and bananas, and in some parts tobacco, wheat and other cereals. Its manufactures, for home consumption, consist of woollen and cotton stuffs. The chief exports are coffee, precious metals, hides, and india-rubber. All religions are tolerated. The standing army consists of about 6,000 men; the navy has been abolished. Railroads are in their infancy, about 410 miles being open in 1907, with 8,680 (1907) miles of telegraph. The rate of exchange is about \$100 paper = \$1 gold; \$500 paper = £1 (approximately).

COSTA RICA, REPUBLIC OF.

President, Cleto Gonzalez Viquez, assumed office 8 May, 1906, for 4 years.
Minister of Foreign Affairs, Ricardo Fernandez Guardia.
Commerce & Finance, Alberto Echandi.

Interior, Alfredo Volio.
War and Marine, Vidal Quiros.

Chargé d'Affaires and Consul-Gen. for U.K., Wenceslao de la Guardia 58, Lombard Street, E.C.

The Republic of Costa Rica, the most southern State of Central America, extending across the isthmus, between 8° 17' and 11° 10' N. lat. and from 82° 30' to 85° 45' W. long., contains an area of about 23,000 English square miles, and a population (1908) of 361,779. The chief exports are coffee (146,320 bags, value £420,965, 1908), bananas (10,060,000 bunches in 1908, value £962,680), cacao, cedarwood, fustic, and hides. The imports are dry goods, hardware, provisions, railway material, machinery, paints, and general merchandise (in 1908, 46.5 per cent. from United States, 22.78 from United Kingdom, 15.05 from Germany, 7.77 from France, and 7.9 from other countries).

The chief ports are Limon, on the Atlantic coast, through which the whole of the important banana trade with the United States and England is done, as well as by far the larger part of the other exports and imports, and Puntarenas on the Pacific coast.

The Costa Rica Railway runs from Limon to the capital, San José (103 miles), and is continued 13 miles to Alajuela (Costa Rica branch lines 57 miles). The Northern Railway runs from Limon as terminus, and comprises 131 miles of main line and branches, running through the banana districts on the Atlantic coast; the services of the above two lines were amalgamated from 1 July, 1905. The Government own and operate the Pacific Railway, from San José to Orotina (46 miles), and the coast section of the same, Esparta to Puntarenas (13 miles); a new section from Orotina to join the Puntarenas section is expected to be open in 1910. The journey from Limon to the capital takes six hours, and from the capital to Puntarenas one day under ordinary circumstances. A considerable amount of English capital is embarked in the Republic.

CRETE (or CANDIA).

Suzerain, H.M. the Sultan of Turkey.
High Commissioner, Alexander T. A. Zaimis, assumed office 30 Sept., 1906, for 5 years.

Crete (or Candia) is an island in the Mediterranean, about 148 miles long and 7 to 30 miles in breadth, with an area of 2,950 square miles;

* 9 months ended 31 Dec., the financial year being now changed from 31 Mar. to 31 Dec.

the population is 303,543; of whom 269,319 are Christians, 33,496 Mussulmans, and 728 Jews. The island formed part of the early and later Roman Empires, and in 1669 was captured by the Turks.

The island now has impartial administration under the high suzerainty of Turkey, but independent of its suzerain under the High Commissioner appointed by the Powers. The climate is healthy, and a fine anchorage is presented by Suda Bay. The chief products are wheat and fruit; and wool, soap, olive oil, carobs, sallona, and cheese are the principal exports. The chief towns are Candia (pop. 22,331), Canea, the capital (pop. 20,972), and Retimo (pop. 9,308).

Chargé d'Affaires, Gabriel Zendegui.

The island of Cuba lies between 74° and 85° W. long., and 19° and 23° N. lat., with a total area of about 44,000 sq. miles and a population of 2,028,282 (1907). Cuba suffered many years of internal discord, from its discovery by Columbus until its liberation in 1898, having been a Spanish possession until the Spanish-American War, of which it was the main bone of contention. A Cuban constituent convention met at the end of 1900 and agreed upon a Constitution (1901), which was ratified on certain conditions by the U.S.A. in 1902. In 1906 disturbances broke out and resulted in the renewed occupation by American troops and the establishment of a provisional administration, which ceased when President Gomez took over the administration in 1909.

The chief products of the island are tobacco and sugar; 1,899 miles of railway were open on June 30, 1908, and 5,065 miles of telegraph line. The imports from the United States for 1907 were £10,689,435, and the exports to the United States were £18,932,103.

CAPITAL, Havana (pop. about 275,000); other towns are Santiago (40,000), Matanzas (37,000), Cienfuegos (30,000), Cardenas (22,000), and Camaguey (20,000).

Vice-Consul J. Sörensen.

Consul-General—Leith, W. O. Berry.

There are also Consuls at Hull, Liverpool, Manchester, Belfast, Falmouth, Guernsey and Newcastle-on-Tyne.

A Kingdom of Northern Europe, and the smallest of the Northern States, with a Constitution dated 28 July, 1866; consisting of the islands of Zealand, Funen, Lolland, &c., the peninsula of Jutland, and the outlying island of Bornholm in the Baltic. Denmark is situated between 54° 34'—57° 44' N. lat. and 8° 5'—12° 40' E. long.; its present contracted dimensions being the result of the Dano-German war of 1864, which stripped it of the Duchies of Schleswig-Holstein and Lauenburg. It comprises an area of 14,844 square miles (9,375,493 acres), with a population in 1906 of 2,588,919 (174 per square mile), nearly one-half of whom live exclusively by agriculture, and one-fourth by manufactures and trade. The common products are wheat, rye, oats, barley, potatoes, cattle, horses, pigs, sheep, and butter. Its manufactures are, for the most part, for home consumption. Its principal imports are coals, manufactured goods (woollens, silks, cottons), iron, hardware, wine, fruit, tea, maize, and colonial produce. In 1908, 2,871,590 acres were under corn crops and 3,103,519 permanent pasture. In 1903 the livestock numbered 486,935 horses,

1,840,466 cows, 876,830 sheep, 1,456,699 swine, and 38,984 goats. The corn crops in 1907 amounted to 100,508,892 bushels, of which over one-third was oats. Its chief exports are agricultural produce, including wheat and barley, bacon, hams, flour, butter, eggs, hides, skins, corn-meal and oil-cake, horses, and cattle. The value of butter exported to the United Kingdom in 1908 was £10,984,721, eggs accounting for £1,824,273, and bacon £5,685,526; the principal imports from the U.K. being coal and fuel (£1,785,782). There is a sea-going mercantile marine of 870 vessels, with a tonnage of 733,790. There are (1908) 2,090 miles of railway and 8,800 miles of telegraph line (1908).

Defence (for Army, see p. 667). The navy consists of 37 steam vessels (including 4 ironclads), mounting 227 guns, with 1,270 officers and men.

Cons. Gen. in London, Miguel Ventura, 17 Coleman Street, E.C.

Consul, Octavio Ventura.

Santo Domingo, formerly the Spanish portion of the island of Hayti, is the oldest settlement of European origin in America, having been founded in 1496 by Bartolomeo Columbus; it comprises an area of about 18,045 square miles, with an estimated population of nearly 600,000. Cocoa, is the most important crop, and sugar, coffee, and tobacco are grown in great quantities, the other products being mahogany, furniture woods, wax, honey, logwood, fustic, turtle-shell, hides, bananas, and divi-divi. Gold is found. There are about 120 miles of railway, and telegraphic and telephonic communication has been established throughout the Republic, which is connected by cable with North and South America. De Forest wireless telegraph installations have been erected at the capital and inland at Santiago de los Caballeros. The Customs are administered temporarily by officials appointed by the United States Government, under a Treaty by which the U.S. collects the Customs, assists the Government to maintain peace, and acts as intermediary between the Republic and its foreign creditors. Since April, 1905, 55 per cent. of the Revenues are being deposited in a New York Bank to the credit of the Foreign and Interior Debt.

British trade is hampered by the absence of direct maritime communication.

CAPITAL, Santo Domingo. Population, 20,000.

A State of South America, on its western side, being that portion of the original Republic of Colombia which lies on each side of the Equator, extending from lat. $1^{\circ}38'N.$ to $6^{\circ}26'S.$ (according to the Equatorial geography, but there are boundary disputes with Peru and Colombia), and between 70° and 82° W. long., comprising an area of 130,000 English sq. miles. It has a population of about 1,270,000, mostly descendants of the Spaniards, aboriginal Indians, and Mestizoes. The giant chain of the Andes here presents the Chimborazo, 21,525 feet, the Cotopaxi, 19,613 feet, the Antisana, 19,335 feet, Cayambe, 19,186 feet above the level of the sea, and others. Ecuador is watered by the Upper Amazon, and by the rivers Guayaquil, Mira, Santiago, Chones, and Esmeraldas on the Pacific coast. There are extensive forests, and the cinchona bark tree is common. Its chief products are cocoa, vegetable ivory, cotton, coffee, india-rubber, orchella weed, straw hats and hammocks, bark, yams, tobacco, fruits, sarsaparilla, wheat, &c. Its minerals consist of gold, quicksilver, lead, iron, and copper; emeralds and rubies are occasionally met with, and sulphur is found in many parts. The chief exports are—cocoa, caoutchouc, silver specie and gold, cinchona bark, Panama hats, coffee, and cattle. Ecuador is divided into 15 provinces and one territory. A railway connecting Guayaquil and Quito was opened in 1908. An arrangement was recently made with the bondholders for the conversion of the Debt, but the Dictator, in 1895, suspended payment pending a further and less onerous arrangement; meanwhile a 10 per cent. surtax upon import dues is being collected and deposited in a Guayaquil bank. Guayaquil is the chief port; population, 1908, about 60,000; other chief towns being Quito, 55,000; Cuenca, 25,000; and Riobamba, 12,000. The currency is a gold condor (of 10 *sueros*) value £1.

The GALAPAGOS ISLANDS (2,400 square miles) belong to Ecuador; only about 200 miles are susceptible of cultivation.

Director-General of Customs, A. King-Lewis.

Director-General of Ports and Lighthouses, Rear-

Admiral H. R. Robinson, R.N.

A country in the north-east corner of the Continent of Africa; was made part of the Turkish Empire in the latter part of the 12th century. Its history became interwoven with that of Europe when the army of Napoleon the Great entered into possession in 1801. British successes drove out the invaders, and in 1803 the newcomers also evacuated the country, which they endeavoured to restore to the control of the Sultan of Turkey; but after the abandonment by Great Britain a struggle arose between two Turkish parties, the Albanians and the Gluzz, the former being completely victorious under their leader, Mehemet Ali, who, in 1811, in spite of the attempted intervention of Great Britain, obtained the supreme power and ruled the country, agreeing to pay an annual tribute to the Porte of £682,052. His successors were Ibrahim (1818), Abbas (1818-1854), Said (1854-1863), whose reign was marked by the Suez Canal concession, and Ismail (1863-1879), who by a firman of the Sultan (14 Mar., 1867) was granted the title of KHEIDIV MISA, or Ruler of Egypt, the previous rulers having had the title of Vali, or Governor. In the early years of his reign the Egyptian dominions were very largely extended, until in 1875 its territories comprised an area of nearly 1,500,000 square miles, with a population of about 16,000,000. But on the heels of annexation and conquest followed misgovernment and financial embarrassment. At this point the Governments of France and Great Britain intervened, and forced Ismail to abdicate, appointing his son Mohamed Tewfik (1879-1892) to succeed him. By a decree of 10 Nov., 1879, a *Controller-General* was appointed by each Power. In 1882, however, their work of reform was interrupted by a military revolt, headed by

an officer of the Egyptian army (Arabi Pasha), and, the French Government declining to co-operate, a British expedition was despatched to re-establish the authority of the Khedive. The Dual Control was abolished by a decree of the Khedive (18 Jan., 1883), and a British financial adviser appointed as a member of the Khedivial Government. Meanwhile a revolt had broken out in the southern provinces, headed by Sheikh Mohamed Ahmed of Dongola, who proclaimed himself a Mahdi, or prophet, foretold by the Moslems. General Gordon, the hero of the Chinese rebellion, was despatched to Khartoum (Jan., 1884) as Governor-General of the Soudan, but this step was not followed by immediate movements of troops against the rebels, and in 1885 General Gordon fell at the capture of Khartoum (26 Jan.) before the Nile relief expedition reached him.

In 1883 the Khedive created a Legislative Council of 30 members, and a General Assembly, consisting of the Legislative Council, the seven Ministers of State, and 45 members elected by the people. These bodies, however, were, and still are, mainly consultative, the real legislative power resting with the Khedive and his Ministers. The command of the army is made by Khedivial decree with the consent of the British Government.

In 1892 (7 Jan.), the Khedive Mohamed Tewfik died, and was succeeded by his elder son Abbas, the present ruler.

For the purposes of local government the country is divided into governorships and provinces, the latter being sub-divided into districts. Justice is administered by (1) Religious Courts; (2) the Mixed Tribunals established in 1875, to deal with questions arising between foreign inhabitants of different nationality and civil suits between natives and foreign subjects; (3) the Consular Courts, by which criminal charges against foreign subjects are investigated; and (4) the Native Tribunals containing Egyptian and foreign Judges, dealing with criminal charges against natives, and with civil cases in which both plaintiff and defendant are local subjects. A British Judicial Adviser to the Khedive watches the proceedings of the latter.

The population in 1882 was 6,814,000, including 90,886 European foreigners (37,301 Greeks, 18,665 Italians, 15,716 French, 8,022 Austrians, 6,118 English, &c.); and by the census of 1907, Egypt Proper contains 11,287,359 inhabitants, of whom 62,973 were Greeks, 34,926 Italians, 20,653 British subjects, 5,000 British army, 14,381 French subjects, 7,704 Austrians, 2,420 Russians, and 1,847 Germans.

The cultivated portion of Egypt is confined to the country annually inundated by the Nile, or capable of being irrigated by canals. The great irrigation works, to which Egypt may be said to owe its existence, are being further extended by elevating dams across the Nile at Assuan, Assiut, Zifta, and Esneh (inaugurated in 1902, and completed in 1909) for raising the water.

Education (see p. 668).

Agriculture and Industry.—Its products consist of cotton, millet, maize, wheat, rice, melons, gourds, sugar, hemp, &c. No metals have been worked within recent times in any considerable quantity, but recently prospecting has been undertaken in the ancient mining districts for gold, copper, lead, sulphur, emeralds, &c., and several mines are being opened up. Salt is

plentiful, about 1,000,000 tons being extracted every year. Nitre, marble, red granite, Oriental alabaster, and limestone are found, in addition to indications of petroleum and coal. Most of the turquoises of the world come from the mines in the Sinai peninsula.

Trade.—The chief imports are cotton stuffs, coals, provisions, woollens, coffee, tobacco, indigo, hardware, timber, wine and spirits, and machinery. The exports consist mainly of cotton and cotton-seed (50 per cent.), beans, wheat, sugar, maize, rice, gums, hides, wool, barley, cigarettes, ivory, and ostrich-feathers. Of the entire trade over 42 per cent. is British, 9 per cent. being carried on with France, 8 per cent. with Turkey, and 6 per cent. with Germany and Austria.

Communications.—There is a network of railways in the Delta, the principal lines radiating from Cairo to Alexandria, Damietta, Ismailia (continuing northwards to Port Said and southwards to Suez) and Shellal. The total length of these lines (exclusive of the Wadi Halfa-Khartoum line) was 1,464 miles on 31 Dec., 1908, and 22,851,661 passengers and 3,927,644 tons of goods were carried in 1908, the net receipts being £13,353,220. From the terminus to Luxor the standard gauge is used, but thence to Shellal the gauge is 3 ft. 6 in., as in the extensions from Wadi Halfa to Kerma and Wadi Halfa to Khartoum. There are (1908) 2,907 miles of telegraph, with 12,480 miles of wire, over which 3,868,202 messages were transmitted in 1908, and 2,546 miles of telephone. The net postal revenue was £30,418 in 1908.

Defence.—The British army of occupation numbers about 5,000 men. The Egyptian forces number 27,507.

Finance.—The situation of the Debt on 31 July, 1909, was as follows:—

Guaranteed debt, 3%	£7,551,900
Privileged " 3½%	31,127,780
Unified " 4%	55,971,900
Domains " 4½%	664,140
	£95,315,780

By the agreement (8 April, 1904) between Great Britain and France, to which all the Powers subsequently adhered, the restrictions which, since 1876, have hampered the liberty of the Egyptian Government in financial matters were abolished. Though the *Caisse de la Dette* still exists, its duties are limited to receiving the revenues necessary for the interest and to the payment of the coupons.

	1907.	1908.
Public revenue	£16,367,818	£15,521,775

Detailed accounts of the various administrative and financial reforms which have been carried out since 1882, and have entirely changed the state of the country, may be found in the annual reports addressed to the Foreign Office.

* Exclusive of specie.

THE SUEZ CANAL.

The Suez Canal was opened in 1869, the British Government acquiring by purchase (25 Nov., 1875) shares to the amount of £4,000,000 (the value 31 March, 1908, being fully £37,000,000). The total length of the canal is 99 miles, with a width of 37 metres (121 ft. 5 in.), having cost £24,000,000 to construct and enlarge; the maximum draught of water allowed for vessels using the canal is 8' 53 metres (28 feet). By a convention, signed on 29 Oct., 1888, the canal was exempted from blockade, and vessels of all nations, whether armed or not, are to be allowed to pass through it in peace or war. The management of the canal is entrusted to a council of 32 administrators, of whom 20 are British (three representing H.M. Government and seven the shipowning interest). The British directors are Sir Henry Austin Lee, K.C.M.G., C.R., Henry Torrens Anstruther, and Sir W. E. Garstin, G.C.M.G., representing the Government; and R. Alexander, R. S. Donkin, F. Green, Sir J. L. Mackay, G.C.M.G., Lord Rathmore, J. W. Hughes, and Sir Thomas Sutherland, G.C.M.G., representing the shipping interest.

The transit receipts in 1869 were £2,178; in 1870, £206,273; in 1895, £3,124,148; in 1900, £3,624,944; in 1905, £4,554,672; in 1906, £4,326,476; in 1907, £4,640,000; and in 1908, £4,338,000.

The present rate of transit dues is 7fr. 75c. per ton.

The net dividends for the year 1908 amounted to 12fr., on the ordinary 500fr. shares, and 16fr. on the Actions de Jouissance.

The following table shows the number and tonnage of vessels which have passed through the Suez Canal at certain dates since 1869, with the percentage of British vessels.

Year.	No. of Vessels.	Net Tons.	% British Tonnage.
1869	10	6,576	95.6
1870	486	436,609	66.4
1890	3,389	6,890,094	77.3
1895	3,434	8,448,383	71
1900	3,441	9,738,152	57.6
1905	4,116	13,234,105	62.6
1906	3,957	13,445,504	61.7
1907	4,267	14,728,424	64.5
1908	3,795	13,633,283	60.9

Director of Repression of Slavery, Capt. A. McMurdo, D.S.O.

Assistant Director do., Maj. H. V. Ravenscroft.

The Sudan Provinces were recovered by Anglo-Egyptian expeditions, 1896-1899, and their extent is defined in a convention signed, on 19 Jan., 1899, by Viscount (now Earl of) Cromer and the Egyptian Minister for Foreign Affairs, laying down the principles of administration. The territories affected are all those lying south of the 22nd parallel of latitude, which have never been evacuated by Egyptian troops since 1882, and those which, if evacuated and temporarily lost, have since been, or shall henceforth be, reconquered by the two Governments acting in concert. The Government is to be administered by a Governor-General in supreme civil and military command, appointed and removable by Khedivial decree with the consent of the British Government. The Governor-General may legislate by proclamation with the consent of the Governments, and the territories do not fall under the jurisdiction of the Mixed Tribunals. The British and Egyptian flags together are used in the Sudan.

The seat of Government is Khartoum, where a palace for the Governor-General and Government offices and barracks have been built. The town has been lighted throughout by electricity and is provided with an efficient water supply, independent of the river. On 5 Jan., 1899, the foundation stone was laid of the Gordon Memorial College, for the establishment of which Viscount Kitchener obtained the necessary funds by public subscription. The College was formally opened by Visct. Kitchener on 8 Nov., 1902, and in 1906 the number of students amounted to about 500, the majority of whom pay small annual fees. There are also primary schools, where English is taught, at Omdurman (300 pupils in 1906), Halfa and Suakin, and small schools at Berber, Dongola, Wad Medani, Kassala, &c., also two industrial schools at Kassala and Wad Medani, and training colleges at Khartoum for teachers in English and the vernacular. One of the largest and finest of modern mosques has been built at Khartoum, as that city will be the centre of Mohammedan religion in the Egyptian Sudan. Two good hotels have been built at Khartoum, and *caissons* run on the Sudan Railway. Tourists can now perform the journey from Cairo to Khartoum *via* Shellal and Halfa in 95 hours in trains and steamers replete with every comfort. An alternative service has also been established *via* Suez and Port Sudan (Red Sea) by which passengers could travel between Cairo and Khartoum in 93 hours; and tourist steamers also run from Khartoum to Gondokoro (Uganda), *via* Kodok and the unique "sudd" region. The territories are divided into 13 provinces. The Sudan Railway reached Khartoum in 1899; a line from Athara to the Red Sea at Port Sudan and Suakin, and a branch to the Halfa Khartoum line from Abu Hamed to Kareima to tap the Dongola Province were opened in 1906. A bridge is being constructed over the Blue Nile at Khartoum in connection with the further extension of the railway southwards. South of Khartoum communication is established by

steamers and boats on the Blue and White Niles, Sobat and Bahr-el-Ghazal and inland chiefly by camels and donkeys. Kassala, Gallabat (on Abyssinian frontier), Roscires, Tantika (50 miles south of Kodok), El Obeid and Nahud (on the Darfur border) are in telegraphic communication with Khartoum, also Bahr-el-Ghazal Province, Mongalla Province and Gondokoro (Uganda) close to the Sudan-Uganda boundary. The cost of military operations in the Sudan in the years 1883-6 amounted to £7,091,310, and on the expedition by which these territories were recovered the sum of £739,802 only was expended, excluding the sum of £251,000 provided in 1897-8 by the Egyptian Government. The territories are not expected to provide an income equivalent to their cost for some time; long periods of war, famine, and disease have caused great ravages amongst the population, and some years must elapse before a substantial revenue may be expected, the cost of administration being meanwhile partly borne by the Egyptian Government. The population of the territories at the present time is roughly estimated at 2,000,000.

CAPITAL, Khartoum. Population 18,235, consisting of merchants, workmen, &c., and the garrison; the population of Omdurman, with the garrison, is about 42,780, and Khartoum North and suburbs 35,285, making a total of 96,300. Distance from London *via* Cairo, 4,196 miles.

Port Sudan. Vice-Consul, B. W. Echlin.

FRANCE.

President of the Republic, Armand Fallières, born at Mezin (Lot-et-Garonne), 6 November, 1841; elected 17 January, 1905 (in place of Emile Loubet, retired). Formerly President of the Senate £24,000
Premier, Minister of the Interior and Public Worship, M. Aristide Briand (24 July, 1909).
Minister of Foreign Affairs, M. Stephen Pichon.
Minister of Finance, M. Georges Cochery.
Minister of Justice, M. Louis Barthou.
Minister of Public Instruction, M. Doumergue.
Minister of War, General Brun.
Minister of Marine, Admiral Boué de Lapeyrière.
Minister of Commerce and Industry, M. Jean Dupuy.
Minister of Public Works, Posts and Telegraphs, M. Alexandre Millerand.
Minister of Colonies, M. Georges Trouillot.
Minister of Agriculture, M. Ruan.
Minister of Labour and Social Providence, M. Viviani.
Ambassador to Russia, M. Georges Louis; Austria-Hungary, M. Crozier; Germany, M. Jules Cambon; Italy, M. Barrère; Spain, M. Révoil; Turkey, M. Louis Bompard; U.S.A., M. Jusserand.

Ambassador in London, M. Paul Cambon, Albert Gate House, Hyde Park.
Minister Plenipotentiary, M. Daeschner.
1st Secretary, M. A. de Fleuriat.
2nd Secretary, Marquis de la Bégassière.
3rd Secretaries, Comte de Lastours; M. Sabatier.
Attachés, Comte de Montholon; Vicomte de Felcourt; M. Bérard.
Military Attaché, Lt.-Col. Huguot, M.V.O.
Naval Attaché, Capitaine de Frégate Baron Mercier de Lostende.

Commercial Attaché, M. Jean Périer.
Secretary Archivist, M. Joseph Knecht.
Consulate General, 4, Christopher Street, Finsbury, E.C.
Consul-General, M. Lawrence de Lalande.
Consuls (suppléants), M. de Sorbier; M. de Pognadorese.
Chancellor, M. Duchesne.

The most westerly State of Central Europe, extending from 42° 20' to 51° 5' N. lat., and from 7° 45' E. to 4° 45' W. long., bounded on the north by the Channel and Straits of Dover, which separate it from England. Its circumference is estimated at about 3,000 miles, and its present area at 207,218 square miles. The territory lost in 1871 amounted to 5,602 square miles. France is divided into 87 departments, including the island of Corsica, in the Mediterranean, off the west coast of Italy. The head of the Government is the President, elected septennially. The principal rivers are the Seine, Loire, Garonne, and Rhône; the principal forests Ardennes, Compiègne, Fontainebleau, and Orléans, consisting chiefly of oak, birch, pine, beech, elm, chestnut, and the cork-tree in the south. Fruit trees abound, and are very productive, the principal being the olive, chestnut, walnut, almond, apple, pear, citron, fig, plum, &c. The vine is cultivated to a very great extent (1,362,268,352 gallons of wine were produced in 1908), as the names Bordeaux, Burgundy, Champagne, &c., universally testify; cider-making is also an important industry, and the production in 1908 amounted to 371,219,200 gallons. The chief agricultural products are wheat, barley, rye, maize, oats, potatoes, beet-root, for the manufacture of sugar, hops, &c. Its mineral resources are comparatively small. They include, however, coal (1908, 37,622,556 metric tons), pig iron (3,412,393 metric tons), copper, lead, silver, antimony, and salt. The most important manufactures are of metals, watches, jewellery, cabinet-work, carving, pottery, glass, chemicals, dyeing, paper-making, woollens, carpets, linen, silk, and lace. The culture of oysters is an important industrial feature, and in the year 1905 952,121,735 oysters were produced, representing a value of £635,540. The increase of population is very slow, as will be seen from the following table:—

Year.	Population.	Year.	Population.
1700	17,660,320	1872	36,102,941
1801	27,349,003	1881	37,672,048
1821	30,461,873	1896	38,218,903
1831	32,559,233	1901	38,243,192
1841	34,209,176	1906	38,577,975
1856	36,039,364	1901	38,671,945
1866	38,057,064	1906	39,252,245

The movement of the population is practically stationary, as will be seen from the following table:—

Births.		Deaths.		Births.		Deaths.	
1804	855,393	815,620	1902	845,378	787,424		
1805	834,123	821,086	1903	836,712	793,606		
1806	856,586	777,886	1904	813,229	761,203		
1807	850,107	751,109	1905	807,292	760,171		
1808	843,933	810,073	1906	806,847	780,190		
1809	847,627	825,233	1907	772,969	793,589		
1890	827,207	823,285	1908	791,712	745,271		
1901	857,274	784,876					

France has always been attractive to foreigners, of whom (1906) 1,009,415 were resident there, or 2.51 per cent. of the legal population; this number included 330,465 Italians, 233,390 Belgians, 89,772 Germans, 36,048 English, 13,236 of the latter residing in the Department of

the Seine. 20 per cent. of the foreign population was born in France. In 1906, the total population of the French colonies (exclusive of Algeria and Tunis) amounted to 39,093,391 souls, of which 630,637 were French and 28,543 foreigners. About 26,000 Frenchmen are stated to be resident in England.

Defence (for Army, see p. 666).

The Navy consisted in 1909 of 25 battleships (and 6 building), 7 armoured coast defence vessels, 20 armoured cruisers (and 2 building), 23 protected cruisers, 1 unprotected cruiser, 13 torpedo vessels, 4 gunboats, 7 river gunboats, 56 destroyers (also 16 building and 5 ordered), 269 torpedo boats, 40 submarine boats (and 21 building, 34 ordered), with 2,879 officers and 53,906 men.

Education (see pp. 658-9).

Communications.—The system of railways in France is very extensive; they are almost entirely *concedés*, and become State property after the expiration of the concession. The length of lines of general interest, inclusive of local lines, open for traffic on 31 December, 1907, was 25,100 miles, the total receipts from passenger and goods traffic, &c., being £67,136,799. The length of telegraph wires is 354,874 miles. At the 1st of January, 1907, the mercantile marine, comprising boats of 2 tons and upwards, amounted to 16,999 vessels of 1,390,542 net tons (of which 15,488 were sailing ships, representing 677,055 net tons). The sums voted by Parliament for construction and navigation Bounties to Shipping in 1909 amounted to £1,616,000, and £1,059,428 for Postal Service Subventions.

Commerce.—The principal imports in 1908 were wool, cotton, coal, silk, oleaginous fruits and seeds, machinery, raw skins, copper, timber, wines, coffee, caoutchouc, cereals, and minerals. The principal exports were cotton tissues, silk tissues, wool, woollen tissues, wines, silks, smallwares, millinery and artificial flowers, automobiles, raw hides, tools and metal goods, dressed skins, machinery, ladies' made-up garments, chemical products, pig iron and iron and steel, woollen yarns, raw caoutchouc, butter and refined sugar.

The trade in 1908 was shared as under:—

Exports to (1903, £202,028,000)—

Great Britain	£47,134,000	U.S.A.	£12,583,000
Belgium	29,964,000	Russia	2,912,000
Germany	24,686,000	Holland	2,240,000

Imports from (1908, £256,620,000)—

Great Britain	£37,716,000	Belgium	£16,380,000
U.S.A.	26,284,000	Russia	9,534,000
Germany	24,300,000	Holland	4,008,000

The chief articles exported to the United Kingdom in 1908 were valued at:—

France.		France.	
Silk Tissues	150,766,000	Ornamental Feathers	11,250,000
Woollen Tissues	111,276,000	Potatoes	22,477,000
Millinery, &c.	119,644,000	Vegetables	12,734,000
Butter	46,359,000	Fruit (Table)	28,594,000
Wines	37,110,000	Copper	9,989,000
Dressed Skins	21,035,000	Raw Caoutchouc	13,605,000
Automobiles	61,083,000	Eggs of Poultry and Game	12,436,000
Wool and Wool Waste	23,622,000	Fresh and Salted Meat	6,996,000
Leather Goods	29,798,000	Refined Sugar	6,837,000
Parisian Articles	30,426,000	Raw Sugar	18,856,000
Smallwares	36,072,000	Clocks & Watches	3,450,000
Timber	22,786,000	Oil	9,773,000
Cotton Tissues	24,633,000	Preserved Fruits, Biscuits, &c.	2,956,000
Raw Hides, &c.	14,928,000		
Brandy and Liqueurs	18,348,000		

The chief articles imported from the United Kingdom in 1908 were valued at:—

	Francs.		Francs.
Coal	222,254,000	Leather Goods, &c.	5,758,000
Wool and Wool	85,088,000	Linen Tissues ..	5,091,000
Waste	51,579,000	Cast Iron, Iron	12,175,000
Machinery	45,050,000	Ships of Iron or	27,612,000
Ornamental	26,478,000	Cotton Yarn	20,779,000
Feathers	28,109,000	Metal Goods	10,567,000
Woolen Tissues	20,102,000	Copper	10,350,000
Chemical products	7,972,000	Rags	6,758,000
Prepared Skins	24,146,000	Raw tin	7,065,000
India-rubber and		Sweets, Preserves	1,885,000
Gutta-percha		& Biscuits	2,757,000
Cotton Tissues		Linen & made-up	2,588,000
Reyn Cotton		Garments	
India-rubber, &c.,		Sewing Machines	
Goods			

Shipping.—During the year 1908 the total number of British and foreign vessels entering French ports with cargo amounted to 26,985, representing a tonnage of 23,789,944 tons, of which only 24.44 per cent was French, while the total clearings with cargo amounted to 21,163 ships of a tonnage of 17,869,380 tons, of which 30.25 per cent was French. British tonnage entering amounted to 35.35 per cent against 31.24 clearing.

Debt.—The National Debt is stupendous, the nominal capital of the Funded Debt amounting in 1902 to £1,159,553,115, and the Floating Debt to £73,386,399, the heaviest debt ever yet incurred by any nation in the world. The Public Debt of France in 1870 amounted to £517,840,000.

The total service of the Public Debt in 1908 and 1909 was as follows:—

	1908.	1909.
Perpetual 3 per Cents.	£26,234,665	£26,233,664
Redeemable 3 per Cents.	12,703,971	12,481,855
and annuities.		
Pensions & other Credits 14,583,205	16,050,975	
Total	£53,521,841	£54,766,494
	1909.	1908.
Revenue	£156,423,347	£160,217,800
Expenditure	158,411,334	160,208,987
	1907.	1908.
Imports	£248,920,000	£225,620,000
Exports	223,644,000	202,028,000
Imports from U.K.	35,328,000	31,716,000
Exports to U.K.	54,752,000	47,184,000

Algeria.—The three departments of Algeria—Alger, Oran, and Constantine—form an integral part of France, under a Governor-General, assisted by a Consultative Council. These departments lie between 4° 53' W. to 6° 15' E. longitude, 37° 8' N. to an undetermined S. limit, about 37° N., covering an area estimated in 1906 at about 1,129,416 square miles, with a population of 5,231,850, of whom 729,950 were Europeans and 4,501,890 natives. The revenue in 1908 was estimated at £4,343,698, and the expenditure at £4,320,533; the imports in 1907 were valued at £15,377,000, and the exports at £16,126,232. The bulk of the trade is with France, and according to French statistics the imports into France amounted to £11,623,880, and the exports from France to £15,703,240; the trade with the U.K. in 1907 amounting in exports to £870,379, and in imports to £555,409. The exports consist mainly of wine, wheat and other cereals, sheep and oxen, skins, fruits, zinc and iron ores, olive oil, phosphates, cork wood, esparto grass, manufactured tobacco, and vegetables. The principal imports from the U.K. were coal and patent fuel, machinery, cotton oil, cotton tissues, tin plates, clothing, and prepared skins. Iron, copper,

quicksilver, zinc, and lead mines are being worked. In 1908 there were about 2,013 miles of railway open for traffic, and in 1907 the number of ships entering and clearing Algerian ports was 9,139, of a tonnage of 8,787,306 tons. The principal town is Algiers, the capital (population, 1906, 586,062), a most important coaling station and much frequented as a health resort; other large towns are Oran, Constantine, Bone, and Tlemcen.

FRENCH COLONIES AND DEPENDENCIES.

The total area of French Colonies and Dependencies (excluding Algeria, 1,119,416 sq. m., and Tunis, 46,300 sq. m.) was estimated at about 2,807,776 square miles in 1906, with a total population of 39,093,391.

French Colonial Office Expenditure.*

1891	£2,843,627	1901	£4,474,660

Imports*	£18,197,807	£21,279,024
Exports*	16,842,929	20,584,508
Total.....	£35,040,736	£41,863,532

* Exclusive of Algeria and Tunis.

Trade with the United Kingdom.

	1907.	1908.
Imports from U.K.* ...	£11,179,543	£11,578,812
Exports to U.K.*	1,822,974	913,700

Total £13,002,517 £12,492,512

Geographically, the French Colonies are divisible into four main groups, according to their situation in *Asia, Africa, America, Oceania*.

I. *Asiatic: French India*.—The area of the French possessions in India is 200 square miles; pop. (1908) 273,185; (1891, 282,923). *Pondicherry* (area 115 sq. miles, pop. 1908, 174,456), the chief of these dependencies, is on the Coromandel coast, 85 miles S. by W. from Madras. The town of Pondicherry has 46,887 inhabitants. The fortifications were once strong, but in the war with England they were destroyed, and under the Treaty of Paris (1814) they must not be rebuilt, while the French garrison must be only sufficient for police purposes. Rice and pulse are cultivated. The chief industry is cotton spinning. There are four cotton-mills, employing about 5,000 hands. In 1908 the sea-borne imports into French India were valued at £396,000, and the exports at £1,082,000. The chief exports are ground nuts, cotton goods, and oilcakes, the chief imports raw cotton, cotton goods, seeds, and pulse. There is no harbour, though the roadstead is good. The minor settlements are *Chander nagore*, on the Hooghly, 17 miles north of Calcutta (area 4 sq. ms., pop. 26,831); *Karikal*, in the Cauvery delta (area 53 sq. ms., pop. 56,595); *Yanaon*, in the Godavery delta (area 5 sq. ms., pop. 5,005); and *Mahé*, on the Malabar coast (area 26 sq. ms., pop. 10,296). There are 23 miles of railway, connecting Pondicherry and Karikal with the South Indian Railway. French India has an elective general council. The revenue (budget of 1909) amounts to £106,400, of which £10,000 is contributed by the Home Government. Governor, M. Angoulvant.

French Indo-China.—These possessions have an area of about 310,000 square miles and a population estimated at about 16,000,000 (including 15,500 French). Three-fourths are of the Annamite race. On the north and east they march with China. The river Mekong forms the western boundary. The coast-line on the south is about 1,560 miles long. French Indo-China comprises Cochinchina, and the four protectorates of Cambodia (enlarged in 1907 by the annexation of Siamese territory), Annam, Tonkin, and Laos. In 1898-9 Kwang-Chow-Wan (pop. 190,000), a free port on the Lien-Chow peninsula, was acquired on a lease of 99 years from China. French Indo-China has been rapidly developed since 1893 by the construction of public works, by the influx of capital and enterprise, and by the reorganisation of the finances. The financial and political unity of Indo-China was finally established in 1898. These reforms were chiefly the work of the late Governor-General, M. Paul Doumer. The revenue, about 47½ million piastres in 1909, is derived mainly from customs, excise, and other indirect taxes. The delta regions of Cochinchina and Tonkin are fertile. Annam, connecting them, is a long mountainous tract, with a narrow littoral, habitable and cultivable, on one side, and a wild, sparsely populated hill-tract stretching to the Mekong on the other. Laos, the largest of the five territories, is

* Exclusive of Algeria and Tunis.

very undeveloped and lacks population. It is practically inaccessible except by this river. The chief rivers are the Mekong (1,900 miles long), which, notwithstanding obstructions, has been navigated as far as Chinese territory; the Songkoi or Red River, navigable by small steamers as far as Laokai in Yunnan; and the Black River. Rice is by far the most important crop, while maize, silk, cotton, sugar, poppy, tea, seeds, tobacco and pepper are produced. The principal mineral product is coal, which is mined chiefly at Hongay on the Tonkin coast. Zinc is worked and exported. Laos has large forests. There are mills for rice, cotton, yarn, cement, &c. The principal harbours are Saigon, Haiphong in Tonkin (48 hours by mail steamer from Hong Kong), and Tourane in Annam. The length of railways is over 900 miles, including lines from Haiphong to Hanoi, and thence to the border of Kwangsi, China, and to Laokai on the Yunnan frontier. The latter is being extended to Yunnan-fu (about 296 miles) by a subsidised company. It will probably be completed early in 1910. The foreign trade in merchandise in 1908 was valued at—Imports, £11,393,000; and Exports, £9,677,000. About one-fifth is transit trade passing to and from the Yunnan treaty "port" of Mengtze through Tonkin. By far the largest export from French Indo-China is rice (chiefly from Cochin-China), fish, maize, and pepper coming next. The chief imports are metal manufactures, cotton manufactures and yarns, jute bags, liquors, machinery, petroleum, silk goods, paper, opium, &c. The yarns and jute bags are mainly from India. Saigon, in Cochin China, has the largest trade. The French customs tariff is in force, with some exceptions. The great bulk of the trade is with France, Hong-Kong, and India. The shipping is chiefly British, French, and German. The French army of occupation numbers about 12,000, in addition to 13,000 native troops. There is a French Bank of Indo-China. Exports from the United Kingdom in 1908, £126,773; Imports into ditto, £407,220. Capital, Hanoi, in Tonkin. Pop., 100,000. *Gov.-Gen. of Indo-China*—M. Klobukowski. *Sec.-Gen.*—M. Bruni. *Regent*—Hoang-lao-Khai. Capital of Cochin-China, Saigon. Pop., 20,000. *Lieut.-Gov. of Cochin-China*—M. Rodier. Capital of Cambodia, Phnom Penh. Pop., 40,000. *King*—H. M. Sisowath. Capital of Annam, Hué. Pop., 30,000. *King*—H. M. Duy-Tan, a minor (sue. in 1907). Capital of Laos, Luang Prabang.

II. *African*: The French African Empire consists of the colony of Algeria and the protectorate of Tunis in the north; in the north-west of an immense tract of country, in four main divisions, on the coast-line (Senegal, French Guinea, Ivory Coast, and Dahomey), penetrating inwards to meet the French possessions of Upper Senegal-Niger and Territory of Mauritania, which form a hinterland for all the colonies on the coast. In West Central Africa the French Congo joins, through protected territory, the French possessions which form the common hinterland of the north-western possessions. This common hinterland stretches northwards in the direction of Algeria and Tunis, so that the whole north-western portion of the vast continent, except where occupied by Morocco and Tripoli, and Spanish, Portuguese, British, and German possessions, is claimed by France. In the east France possesses a portion of Somaliland and the island of Madagascar in the Indian Ocean, with certain dependencies. Conventions have been signed

by Great Britain and France delimitating the boundaries of co-terminous territories in the west, and, owing to the British advance in the Nile region, delimitating their respective sphere in East and Central Africa.

On the East Coast is JIBUTI, the port and seat of government of the French Somali coast protectorate. The coast-line of this territory extends for 60 miles; the inland frontier is fixed at a distance of about 57 miles. The total area is about 46,300 square miles. The population is about 208,000. A railway from Jibuti to Harrar and thence to Adis Ababa, the present capital of Abyssinia, is being constructed, and has been completed as far as Diré-Daouah (190 miles). At Jibuti a jetty, 800 metres in length, has been erected and is used principally by small craft, and a second one of 900 metres in length is being constructed for the requirements of large vessels. The imports, which are principally in transit to Abyssinia (chiefly cotton goods) amounted to £734,224 in 1907, while the exports amounted to £923,640; the imports from France in 1907 amounting to £279,700, and the exports to France £52,980. There is an Anglo-French agreement defining the boundary of the French and English spheres of influence in the direction of Harrar, which place neither party is at liberty to annex.

Governor—M. Pascal. *Envoy to the Emperor Menelik of Ethiopia*, M. Brice.

Off the East coast, in the Indian Ocean, is the vast island of MADAGASCAR, the fourth largest island in the world, being 975 miles long and 350 miles broad at its greatest width. The total area is about 226,000 square miles, and the native population in 1906 amounted to 2,690,381, the Hova being the dominant tribe. In addition, there were 7,606 French and 2,088 foreigners, 1,255 being British subjects. Christian missions have been active in the island, and about 450,000 of the natives are Protestants, and about 50,000 Roman Catholics. A French colonial station was planted, under the protection of Richelieu, in 1662, since when the island has been almost continuously claimed by the French. Active steps were taken in 1885 to make their influence felt, and in 1894-1895 a military expedition captured the capital and deposed the queen, the island being declared a French possession in 1896. A railway from Brickaville on the coast to the capital (Antananarivo or Tananarive) is in course of construction; 166 miles of which were open to traffic in 1909.

In 1900 a loan of £2,400,000 was raised for the construction of railways, roads, telegraphs, &c. Fully 3,000 miles of telegraph lines have been constructed as well as two new telephone lines, one at Antananarivo of 27 miles, and the other at Tamatave of 10 miles. Gold reefs have been found in different parts of the island, and up to the end of 1904 there were 1,099 prospecting permits held by 317 different persons, 64 of which are British. Minerals are found in large quantities, and in the lowlands rice, manioc, arrowroot, sugar-cane, tobacco, hemp, cotton, vanilla, tea and coffee are successfully grown; caoutchouc and gum-copal are indigenous, and there is a wealth of timber. The revenue of the colony in 1904 amounted to £994,612, and the expenditure to £897,357. The principal exports in 1907 (£1,114,536) were gold (3,319 kilos, of the value of £319,280), rubber, hides, raffia-fibre, beeswax, bullocks, and straw hats; the imports, largely

reduced since the high protective tariff of 1897, are mainly cotton goods, wine, spirits, metal manufactures, foodstuffs, and building material, and amounted to £1,001,184. The total import, and export trade with France amounted to £1,623,796, and with the United Kingdom £1,662,000. The capital, TANANARIVE (called by the natives ANTANANARIVO), had in 1901 55,579 inhabitants. Tananarive is the chief port, others being Majunga, Tolia, Faradofay, Manakara, Mahanoro, and Vatomandry. Madagascar has immediate dependencies in the islands of NOSSI BE and SAINT MARIE, while further east (450 miles from Madagascar) is the island of REUNION (capital St. Denis, area of 965 square miles, population estimated at 177,677); imports in 1907, £579,638; exports, £559,974; with the COMORE Islands, halfway between Madagascar and the coast, and the islands of ST. PAUL and AMSTERDAM and KERGUELEN to the south-east.

Gov.-Gen. of Madagascar, M. Augagneur.

West Africa.—The administration of the French possessions in North-West Africa (exclusive of the French Congo), which has been in process of reorganisation since 1895, was completed and consolidated by a Decree of 18 October, 1904. The territories of Senegambia and the Niger have been converted into a separate colony under the name of Upper Senegal-Niger, and a commissioner attached to the general government has been appointed for the administration of the civil territory of Mauritania, or vast regions on the right bank of the Senegal River, and which will probably be eventually extended to the French possessions in South Algeria (estimated area, 344,975 square miles). A general budget has been created, to be settled by the governor-general in council, to which are devoted the funds derived from the customs and navigation duties of all the constituent colonies, and which provides for all expenses which interest all the colonies generally. The several colonies, therefore, can only reckon on the funds arising from their internal resources, such as capitation tax, trading licences, &c., but they are at the same time relieved of many expenses which have been transferred to the general budget. Provision is also made in the general budget for subventions to those of the colonies requiring financial help. The colony of UPPER SENEGAL-NIGER may be said to comprise the whole of the hinterland of West Africa, and includes the great bend of the Niger and the territories enclosed within it, but it has no seaport. It is divided into a civil and a military territory, and is administered by a lieutenant-governor, resident at Bamako, under whom is a superior officer entrusted with the administration of the Niger military territory. The total population in 1906 amounted to 5,088,656, and the area of the civil and military territories is estimated at 836,281 square miles. SENEGAL is the oldest and most important of the French possessions in West Africa. It is situated to the north of the British colony of the Gambia, and has an area of 73,974 square miles and a population estimated at 393,345; capital, St. Louis (local revenue in 1904, £280,918). The principal exports are gold, ground-nuts, gum, palm nuts and oil, and rubber. The exports from Senegal and Upper Senegal-Niger in 1907 were valued at £1,754,352, and the imports at £2,187,856; 546 ships (tonnage 707,603) entered, and 559 of a tonnage of 720,812 tons cleared at Senegalese ports in 1906.

A railway has been constructed from Dakar to Rufisque, and thence north-west to St. Louis at the mouth of the Senegal River, a distance of 165 miles, and from Kayes, on the same river, a narrow-gauge line has been constructed of 347 miles to Koulikoro, on the Niger. Next in order to the south comes FRENCH GUINEA (local budget in 1903, £160,000; imports, 1907, £1,653,768, exports, £630,588), comprising the settlements of RIVIERES DU SUD (capital, Konakri) and FUTA JALLON, and extending up the whole of the north-west coast (save where intercepted by Portuguese Guinea and the British colony of the Gambia) to join the colony of Senegal. Between the British colony of the Gold Coast and the Republic of Liberia is the FRENCH IVORY COAST (local revenue in 1904, £157,337; imports, 1907, £572,768, exports, £426,420), comprising the settlements of GRAND BASSAM and ASSINIE and the KROO country with the hinterland. To the south is DAHOMEY, between the British colony of Lagos and German Togoland (local revenue in 1904, £219,998; imports, 1907, £466,212, exports £386,856); it consists of about 95 miles of the Benue coast, where are the settlements of KOTONOU and GRAND POPO with the hinterland. The ancient capital of the colony is Abomey, which has now been transferred to Porto Novo. The chief port is Kotonou. The FRENCH CONGO borders the Congo Free State on the south and east, and the German Cameroons on the north and west, but undefined to the north-east, comprises the colony of the Gaboon, the middle Congo, the territory of Ubangui-Shari, and the Lake Chad territory (local revenue in 1904, £255,620). The principal exports are ivory, india-rubber, cocoa, coffee, ebony and other wood, gum-copal, palm oil, and amounted in 1907 to £783,768. The imports, consisting chiefly of cotton goods, spirits, ammunition, tobacco, rice, and salt, were valued at £606,454; the chief town and trading station being Libreville, on the coast.

III. **American.** France possesses two small groups of islands off the south-east coast of Newfoundland, of which ST. PIERRE and MIQUELON are the largest respectively; their combined area is about 93 square miles, with a total population in 1906 of 6,482, and they form an excellent basis for the French cod fishery. Local revenue in 1908, £19,112; importations in 1907, £201,277; exports, £220,540. In the West Indies two of the most fertile of the Lesser Antilles belong to France, viz. MARTINIQUE (capital, Port de France), area about 380 square miles; population in 1906 of 182,024 (local revenue in 1904, £206,184; total imports, 1907, £637,600, exports £759,888); and GUADELOUPE and BASSE TERRE (capital, Pointe-à-Pitre), area about 780 square miles, population 190,273, in 1906 (local revenue in 1904, £242,022; total imports, 1907, £537,024, exports £650,756). They have six dependencies: MARIE GALANTE and ILE DES SAUVAGES to the south and south-east, and PETITE TERRE on the east (part of the administrative island), with ST. BARTHOLOMEW and the northern half of ST. MARTIN, about 150 miles north-west and almost due south of Anguilla (British). In *South America*, CAYENNE or FRENCH GUIANA has an area of about 34,000 square miles, and an estimated population of about 39,117 in 1906 (town population 12,426). The local revenue of the colony in 1904 amounted to £137,216 (imports, 1907, £560,520, exports £493,268).

IV. In *Oceania*, France possesses the penal

colony of NEW CALEDONIA (capital Noumea), a large island containing an area of about 7,200 square miles (population, 1906, estimated at 55,886, of whom about 13,000 are of free and 11,000 of convict origin, whilst there is a native population of about 29,000), with its dependencies, Isle of Pines, Loyalty Islands, Huon Islands, Chesterfield Islands, and the Wallis Archipelago, annexed in 1853 (local revenue in 1904, £129,102; total imports into New Caledonia, 1907, £376,418; exports £340,166) and the SOCIETY ISLANDS, Tahiti, Moorea, &c. (local revenue in 1904, £77,257; imports into Tahiti, 1907, £133,272; exports £145,598), the LOW ARCHIPELAGO or Tuamotu, the MARQUESAS, and the AUSTRAL ISLES or Tubuai, and the GAMBIER ISLANDS, altogether amounting to about 1,182 square miles, with about 30,563 inhabitants in 1906. By a convention with Great Britain of 16 Nov., 1887, it was agreed that the protection of persons and property in the NEW HEBRIDES (5,106 square miles, population 70,000) should be secured by means of a mixed commission of naval officers belonging to the French and British naval stations in the Pacific. This arrangement has, however, been superseded by the conclusion of a convention signed on 20 Oct., 1906, by which the group of the New Hebrides, including the Banks and Torres Islands, shall form a region of joint influence under the administration of two High Commissioners appointed by Great Britain and France.

See also TUNIS, p. 654.

THE GERMAN EMPIRE.

Emperor, William II. (King of Prussia), son of the Emperor Frederick III. and the Empress Victoria, Princess Royal of Great Britain. Born 27 Jan., 1859; succeeded his father 15 June, 1888; married, 27 Feb., 1891, Princess Augusta Victoria of Schleswig-Holstein, born 22 Oct., 1858 (issue, 6 sons and a daughter).

Heir Apparent, H.L. & R.H. Crown Prince William, born 6 May, 1882; married (1905) H.R.H. Cecilie of Mecklenburg-Schwerin, and has issue, Prince Wilhelm, b. 4 July, 1906, and two other sons, b. 9 Nov., 1907, and 30 Sept., 1909.

Imperial Chancellor and Prussian Premier, Dr. von Bethmann-Hollweg.

Interior, Herr Delbrück.

Foreign Affairs, Herr von Schoen.

Colonies, Herr Dernburg.

Navy, Admiral von Tirpitz.

Justice, Dr. Lisso.

Imperial Treasury, Herr Wermuth.

Posts and Telegraphs, Herr Kraetke.

President, Imperial Railways Dept., Dr. Schulz. *German Ambassador to Austria*, Herr von Tschirschky und Bigendorff; *Italy*, Herr von Tagow; *France*, Prince von Radolin; *Turkey*, Baron Marschall von Bieberstein; *U.S.A.*, Count von Bernstorff; *Russia*, Count Pourtalès; *Japan*, Baron Mumm von Schwarzenstein.

Ambassador in London, Count Paul Wolff-Metternich, G.C.V.O., 9 Carlton House Terrace, S.W. *Councillor of Embassy*, Herr Richd. von Kühlmann. *and Secretary, Councillor of Legation*, Dr. Haniel von Haimhausen.

3rd Sec., Count Hans von Berchem.

Attaché, Dr. von Wesendonk and Herr von Goldschmidt-Rothschild.

Military Attaché, Major Ostertag.

Naval Attaché, Commander Widenmann.

Director of the Chancery of the Embassy, Hofrat C. Lentze.

Chancelliers, Herr Hans Meinck, Herr Ferdinand Carow, Herr Herrmann Dörner, and Herr Wilhelm Baath.

Consul-Gen. Dr. Johannes, 21A Bedford Place, Russell Square, W.C.

Consul, Herr Humbert.

Vice-Consuls, Herr Weidemann, Dr. Bittle, Herr von Ranke.

The Empire, according to the Constitution of April 16, 1871, is a Confederate League, bearing the name German Empire, under the hereditary presidency of the King of Prussia, who holds the title of German Emperor, and whose eldest son is styled His Imperial and Royal Highness. The Emperor as such represents the Empire in all matters affecting international law; in the name of the Empire he declares war and makes peace, concludes alliances and treaties with foreign States, and accredits and receives Ambassadors. Except to repel an attack on the territory or the coasts of the League, the Emperor cannot declare war in the name of the Empire without the consent of the Federal Council. The consent of the Federal Council and Reichstag is necessary in regard to certain specified treaties (cf. Art. 4 of the Constitution). The Emperor has the right to summon, open, adjourn, and close the Reichstag. The Federal Council and Reichstag must be summoned to meet every year; the Reichstag cannot be summoned without the adherence of the Federal Council. All bills are brought before the Reichstag in the name of the Emperor after acceptance by the Federal Council. Laws are promulgated by the Emperor in the name of the German Empire after acceptance by the Federal Council and the Reichstag. All edicts and orders of the Emperor made in the name of the Empire must be countersigned by the Chancellor, who is thereby responsible for them. The Emperor is the Bundesfeldherr, or Federal Commander-in-Chief of the whole German Army. In time of war he holds supreme command: in time of peace the Kings of Bavaria, Saxony, and Württemberg retain their sovereign rights as heads of their respective armies. In time of peace the Bavarian army administration is wholly independent of that of the rest of the German army, and only falls under the direct command of the Emperor when the army is mobilised for war. The rights of the Kings of Saxony and Württemberg in time of peace are not quite so extended as those of the King of Bavaria; but their armies remain distinct and form separate army corps. The contingents of all the other Federal States are under the direct command of the King of Prussia, and under Prussian administration. The troops of all the Federal States swear loyalty to their respective sovereigns and obedience to the orders of the Emperor—in the case of Bavaria this obedience is limited to war-time. On the other hand, the German Navy is Imperial (Kaiserlich), and the Emperor as such is the supreme Admiral-in-Command of the Imperial German Navy in peace as well as war. The Reichstag, or Imperial Diet, consists of 397 Deputies; the original idea was that there should be one deputy to every 100,000 inhabitants of the Empire. The Reichstag sits for a period of five years, unless previously dissolved by the Emperor. Amongst the matters belonging to the jurisdiction of the Empire are all those that refer to the army and navy; the common, civil and penal law of the Empire; posts and tele-

graphs (not including the special rights reserved by Bavaria and Württemberg); the railways (subject to Bavaria's rights); inland navigation; the Customs of the Empire; weights and measures; coinage; banking; patents; foreign trade; the German mercantile marine; the Press; everything relating to the right of forming corporations; colonisation. A majority of the Federal Council and Reichstag is necessary, and also sufficient, for the validity of a law. The laws of the Empire take precedence of the laws of the Confederate States within the scope of the Constitution of the Empire; they are compulsory on all Governments of the Empire.

The German Empire consists of the following 26 States:—Prussia (including Lauenburg, and since 1890—Heligoland); Bavaria; Saxony; Württemberg; Baden; Hesse; Mecklenburg-Schwerin; Saxe-Weimar; Mecklenburg-Strelitz; Oldenburg; Brunswick; Saxe-Meiningen; Saxe-Altenburg; Saxe-Coburg-Gotha; Anhalt; Schwarzburg-Sondershausen; Schwarzburg-Rudolstadt; Waldeck; Reuss (elder line); Reuss (younger line); Schaumburg-Lippe; Lippe; Reichsland; Lübeck; Bremen; Hamburg.

The census of 1905 shows a total population of 60,641,278, of whom 29,884,681 are males, and 30,756,597 females.

The religious confessions were divided in 1905 as follows:—37,646,852 Protestants (62 per cent.), 22,109,644 Roman Catholics (36·4 per cent.), 259,717 Christians of other categories, 607,862 Jews (1 per cent.), 17,203 adherents of other religions, or unknown.

There were in 1900 4,231,129 persons residing within the limits of the Empire who spoke a non-German language, viz.:—80,361 Dutch, 20,677 Frisians, 141,061 Danish (and Norwegians), 8,998 Swedish, 20,217 English, 211,679 French, 11,841 Walloons, 65,661 Italians, 2,059 Spanish, 479 Portuguese, 3,086 489 Poles, 142,049 Massurians, 100,213 Kassubians, 93,032 Wends, 64,382 Moravians, 43,016 Czechs, 9,617 Russians, 106,305 Lithuanians, 8,158 Hungarians, 14,535 not above specified.

There are 42 large towns with over 100,000 inhabitants, and of these 29 are in Prussia, 4 in Saxony, 2 in Bavaria and Baden, and 1 each in Hamburg, Württemberg, Bremen, Reichsland, and Brunswick.

Education (see p. 669).

EMIGRATION.—At the commencement of the nineteenth century few Germans emigrated, but about fifty years afterwards there was a strong desire to leave the mother country. The figures are as follows:—

1831-41 ...	152,000	1871-80 ...	623,000
1841-50 ...	435,000	1881-90 ...	1,342,432
1851-60 ...	852,000	1891-00 ...	529,875
1861-70 ...	822,000	1901-05 ...	146,540

Out of thirty millions of emigrants from Europe in the nineteenth century Germany contributed about five millions—viz., $\frac{1}{6}$ of the whole number.

In the eighties the average number per annum was over 100,000. In 1880 the number of emigrants was 117,097; in 1881 it rose to 220,902—the highest figure hitherto attained in one year. The statistics since 1880 are as follows:—

1881 ...	220,902	1886 ...	83,225
1882 ...	203,585	1887 ...	104,787
1883 ...	173,616	1888 ...	103,951
1884 ...	149,065	1889 ...	96,070
1885 ...	110,119	1890 ...	97,103

1891 ...	120,089	1900 ...	22,399
1892 ...	116,339	1901 ...	22,073
1893 ...	87,677	1902 ...	32,098
1894 ...	40,604	1903 ...	36,310
1895 ...	37,468	1904 ...	27,984
1896 ...	33,824	1905 ...	28,075
1897 ...	24,631	1906 ...	31,074
1898 ...	22,221	1907 ...	31,696
1899 ...	24,323	1908 ...	19,883

PRODUCTION AND INDUSTRY.—Germany is becoming more and more a manufacturing country. In 1907, 32·6 per cent. of the population were supported by agriculture, 37 per cent. by industry and mining, 11·5 per cent. by trade and traffic. Of the total area in 1900, 48·6 per cent. was under cultivation, 16 per cent. consisted of meadows and pastures, and 26 per cent. of forest land. Germany supports nine-tenths of her population by her own produce. The mineral produce was valued in 1907 at £92,246,000, and included 143,185,700 English tons of coal, 62,546,700 of lignite, 27,697,100 of iron ore, 5,749,400 of kali, kainit, and other kali salts. The total mineral produce amounted to 242,615,200 English tons, including, besides the above, rock-salt, lead-ore, gold and silver ore, graphite, asphalt, petroleum, Epsom-salts, boracite, tin-ore, quicksilver-ore, antimony-ore, cobalt-ore, nickel-ore, arsenic-ore, manganese-ore, bismuth-ore, uranium-ore, wolfram-ore, pyrites, vitriolic-ore, and alum-ore. Crefeld, Elberfeld, Barmen, Mülhausen, Chemnitz, and the provinces of Westphalia and Silesia are the great centres of the textile industries.

The chief articles of export to the United Kingdom in the year 1908 were the following:—

Sugar, raw and refined	£7,185,000
Woolen Cloth Stuffs	1,850,000
Cotton Gloves, Hair Nets	1,240,000
Port-Silk Stuffs	1,232,000
Billot Iron, Pig Iron, Ingots	1,735,000
Oats	1,015,000
Toys	886,000
Aniline Dyes	865,000
Upper Leather for Boots, Shoes, &c.	795,000
Saddle and Luggage Wares	739,000
Printed Cottons	650,000
Furs	640,000
Bicycle Parts	635,000
Women's Clothing	590,000
Pianos	570,000
Cotton, Woolen, and Linen Embroideries	475,000
Cotton Lace, Lace	375,000
Porcelain	370,000
Cotton Underclothing	360,000

The chief imports from the U.K. were:—

Coal	£7,290,000
Precious Metals	4,595,000
Woolen Yarn	4,015,000
Cotton Yarn	3,925,000
Woolen Stuffs	3,240,000
Salted Herrings	750,000
Pig Iron	610,000
Pelts	595,000
Timplates	490,000

MERCANTILE MARINE.—On January 1st, 1909, the Mercantile Marine consisted of 1,953 sailing steamers of 17·65 register tons and upwards (3,779,364 tons gross register), and of 2,361 sailing vessels (464,158 tons gross register). The gross tonnage of the British Mercantile Marine is about five times as great as that of the German Mercantile Marine.

The number of seamen in the German Mercantile Marine on January 1st, 1909, was 72,450 (January 1st, 1908, 71,853). Germany now ranks second in the list of the countries of the world that own shipping. In 1870 Germany's fleet of

merchant steamers was only half as large as that of France; now it is twice as large. During the last two years the shipping industry has undergone a serious crisis. There were completed in 1908 at German yards for German firms, 671 sea-going ships of 212,761 tons gross, and at German yards for foreign firms, 73 sea-going ships of 15,141 tons gross (1907, 673 ships of 308,034 tons gross for German firms, and 68 ships of 16,621 tons gross for foreign firms).

COMMUNICATIONS.—The total length of the *Railways* in the Empire at the end of 1907 extended to 55,191 kilometres = 34,956 miles, of which about 92 per cent. belong to the State; the total cost of construction was £20,918 per mile; the expenses in 1906 were £85,039,347, and the receipts £131,662,681.

IMPERIAL POST (including Bavaria and Württemberg), 1907:—Length of telegraph lines, 152,600 kilometres (length of wires, 598,200 kilometres); telegrams landed in, 45,818,000; post offices, 40,083; telegraph offices, 37,309; telephone call-stations, 30,901; letters delivered, 5,339,300,000; cash on delivery orders, £50,580,000; money orders, £637,320,000; telegrams despatched, 43,841,000; telegrams received, 45,818,000. The number of employes in the service of posts and telegraphs was 312,708.

DEBT.—The National Debt amounted at the end of 1908 to £206,175,000, of which £93,000,000 bears interest at 3½ per cent., £89,175,000 at 3 per cent., £18,000,000 are Treasury Bonds, and £56,000,000 are Bank Notes. The debt of the former Norddeutscher Bund was cancelled by limitation at the end of 1902.

DEFENCE (for Army, see p. 666).—The *Imperial Navy* consisted in May, 1909, of the following ships, built or building: 34 battleships, 7 ironclad coast defence ships, 12 large armoured and 6 large protected cruisers, 31 small protected cruisers (under 5,000 tons displacement), 6 gun-boats, 107 torpedo boats of over 200 tons displacement (30 under construction), 73 torpedo boats of from 80 to 200 tons displacement, and 11 special ships for mine-laying, repairing, and other technical purposes; 8 submarines are either built or in building. The personnel of the Imperial Navy consists of 1,735 officers, 263 engineer officers, 260 surgeons, 207 paymasters, 25 chaplains, 583 cadets, 175 technical and torpedo officers, and 45,469 petty officers and seamen—total, 48,817; in addition to which, charged upon the naval estimates, are 1,415 marines and 3,693 men belonging to the naval artillery and mining department, making altogether 53,925 officers and men.

OLD AGE AND INFIRMITY INSURANCE.—The German scheme of social legislation gives all subordinate bread winners in the Empire a legal right to pecuniary subvention when unfitted for work through sickness, accident, premature infirmity, or old age. Insurance is compulsory. The National Insurance is based on mutual insurance and self-administration. The Infirmary Insurance Act came into force 1 January, 1900. In 1907, a total of £8,644,565 was paid out under the Act, £6,334,575 being as pensions to invalids (i.e., persons unfit for work); £865,585 as old age pensions; £759,315 for medical assistance; £40,640 for support of dependents, &c.; £22,200 as home relief for infirm workmen; £179,505 for sick pensions; £442,745 refunded. Of the total the State contributed £2,451,030. The insured are divided into five classes, according to the

amount of their annual earnings, of £17 10s., £27 10s., £47 10s., £57 10s., and £100 respectively. Contributions are paid weekly, viz., 1*d.*, 2*d.*, 3*d.*, 3*d.*, and 4*d.* respectively—one half by the employer, the other by the employed: the State contributes a subsidy of £2 10s. to the pension. The *infirmary* pensions amount respectively (including the State subsidy) to £8 2*s.*, £11 5*s.*, £13 10*s.*, £15 15*s.*, and £18; the *old age* pensions to £5 10*s.*, £7, £8 10*s.*, £10, and £11 10*s.* respectively. The insured include all persons working for wages or salary as workpeople, artisans, journeymen, apprentices, domestic servants, laundresses, dressmakers, sempstresses, housekeepers, charwomen; overseers, foremen, engineers, assistants, clerks and apprentices in merchants' offices (excepting assistants and apprentices in chemists' shops), schoolmasters, schoolmistresses, tutors and governesses—in so far as the incomes do not exceed £100—including foreigners working in Germany under these categories. Pensions for premature infirmity are given to insured persons when unfit for work; old age pensions to all insured persons on attaining the age of 70, though still capable of work.

	1907-8.	1908-9.
Revenue, Ordinary and Extraordinary	£139,553,530	£142,500,695
of which Loans ...	13,047,050	10,113,380
Expenditure	139,553,530	142,500,695
of which Army ...	39,104,953	38,518,955
" Navy ...	13,609,378	14,937,455
Imports	1907. £478,410,000	1908. £415,095,000
from U.K.	48,830,000	34,845,000
Exports	372,070,000	350,930,000
to U.K.	50,302,000	49,875,000

The imports from the U.K. and the British Colonies formed 18½ of Germany's total imports in 1908 (1907, 18½); the exports to the U.K. and the British Colonies formed 20¼ of Germany's total exports for 1908 (1907, 22¼). The year 1908 witnessed a marked decline in Germany's external trade (the first decline on record in recent times), the imports from the U.K. and Colonies declining by about £15,500,000, while the exports from Germany to the U.K. and Colonies show a decline of over £1,400,000. The imports from Russia and the United States of America to Germany far exceeded those from the U.K. in 1908, but the U.K. remains Germany's best customer.

The Imperial War Treasury deposited in the Julius Tower at Spandau amounts to £5,873,715.

PRUSSIA.

King, William II., German Emperor (*q.v.*).
 President of the Ministry and Minister for Foreign
 Affairs, Dr. von Bethmann-Hollweg.
 Interior, Count Moltke.
 Finance, Baron von Rheinbaben.
 War, General von Heeringen.
 Public Works, Herr Breitenbach.
 Agric., Woods and Forests, Herr von Arnim-
 Kriewen.
 Trade and Commerce, Herr Sydow.

Instruction and Worship, Herr von Trotz zu Solz.
 Minister of Justice, Dr. Beseler.

Prussia comprises the larger portion of Ger-
 many, and consists of 13 provinces, with area and
 population in 1905:—

Provinces.	Sq. miles. English.	Population.
1. East Prussia	14,266 38	2,030,176
2. West Prussia	9,856 47	1,641,746
3. Brandenburg	15,377 09	3,531,948
City of Berlin	24 47	2,040,148
4. Pomerania	11,625 51	1,684,326
5. Posen	11,182 51	1,966,637
6. Silesia	15,563 21	4,942,611
7. Prov. Saxony	9,748 54	2,979,221
8. Schleswig-Holstein & Heligoland	7,335 65	1,504,248
9. Hanover	14,862 24	2,759,544
10. Westphalia	7,802 29	3,618,090
11. Hesse-Nassau	6,059 32	2,070,092
12. Rhineland	10,420 07	6,436,337
13. Hohenzollern	440 92	68,282
Total	134,558 34	37,293,344

Of the total population 18,368,903 are males
 and 18,894,421 females. According to Religions,
 Evangelicals (*i.e.*, National Church) number
 23,341,502; Roman Catholics 13,352,444; and Jews

409,501. There are 29 towns with over 100,000
 inhabitants.

Prussia possesses a large number of navigable
 rivers intersecting the country—*viz.*, the Niemen,
 Pregel, Vistula, Oder, Elbe, Weser, and Rhine.
 The coasts of the Baltic and North Seas form a
 number of gulfs and bays. Its principal moun-
 tains are the Harz and the Giant Mountains, the
 latter reaching an altitude of 5,255 feet. The
 forests are extensive, occupying an area of nearly
 20,435,491 acres, chiefly consisting of fir.
 Minerals consist of iron, copper, lead, alum,
 nitre, zinc, cobalt, sulphur, nickel, arsenic,
 baryta, amber, agate, jasper, onyx, &c., and to a
 small extent, silver. Salt (from the brine
 springs of Prussian Saxony) is abundant, also
 coal. Metallic ores, salt, precious stones belong
 partially, and amber totally, to the Crown.
 Agriculture and the rearing of cattle are the
 principal industries. Wheat, rye, oats, barley,
 peas, millet, rape-seed, maize, linseed, flax, hemp,
 tobacco, hops, &c., are extensively cultivated and
 are exported. Its manufactures consist chiefly
 of cotton goods, machines of all kinds. The
 cotton works are extensive, and there are
 numerous manufactories of silk, woollen,
 mixed cotton and linen fabrics, including
 shawls, carpets, &c., and woollens, with
 leather, earthenware, glass, paper, and tobacco
 manufactures, and working in metals. Brewing
 is a business of great importance. The principal
 imports comprise coffee, tea, cotton, and other
 produce of the colonies; wines, silk, fruit,
 manufactured goods, tin, furs, and dye-stuffs.
 The principal exports comprise linens, woollens,
 hardware, wool, timber, pitch, linseed, tobacco,
 mineral waters; to which may be added horses,
 horned cattle, hams, salt meat, and wine from
 the Rhenish provinces.

ALSACE-LORRAINE.

Statthalter, Count Carl von Wedel (1907).

Minister of State, Baron Zorn von Bulach.

The "Reichsland" of Alsace-Lorraine (Elsass-
 Lothringen), which was annexed by France from
 the old German Empire between 1648 and 1697,
 and restored to Germany in 1871, embraces the
 fertile plain between the Rhine and the Vosges,
 and stretches beyond these mountains as far
 as Luxembourg. Wine, tobacco, and hops, iron
 and coal are among its leading productions, and
 the cotton industry is most flourishing. There
 is an elective Provincial Committee of
 58 members. The area is 5,521 square miles,
 divided for administrative purposes into three
 districts, Ober- and Unter-Elsass and Lothringen.
 The population in Dec., 1905, was 1,814,564, of
 whom 935,807 were males and 878,757 females;
 while 1,387,462 were Catholics, 321,067 Pro-
 testants, and 31,708 Jews. French was spoken
 by about 200,000 persons. Principal towns,
 Strassburg (pop. 167,678), Mülhausen, and Metz.
 Revenue and Expenditure (1909-10)... £2,294,019
 Debt (1909)..... (Rentes £56,354) ... 1,878,455

ANHALT, Duchy of.

Duke, Friedrich II., born 19 August, 1856; suc-
 ceeded 24 Jan., 1904; married, 2 July, 1889,
 Princess Marie of Baden; born 26 July, 1865.

Heir Presumptive, Prince Edward, born 18 April, 1861; married, 6 Feb., 1885, Princess Louise of Saxe-Altenburg.

Prime Minister, Herr von Dallwitz.

A Duchy of Central Germany, in two principal portions, surrounded by Prussian Saxony, containing 906 square miles and a population of 328,029. Budget, 1909-10, £737,100.

Capital, Dessau. Population 55,134.

BADEN, Grand Duchy of.

Grand Duke, Frederick II., born 9 July, 1857; m. 20 Sept., 1885, Princess Hilda of Nassau, born 5 Nov., 1864; *Grand Duke*, 28 Sept., 1907.

Heir Apparent, Max, b. 10 July, 1867.

President of Ministry, Dr. Freiherr von Dusch.

A State of the German Empire, situate in the south-western part. The Rhine forms its southern and western boundary, separating it from Switzerland and Alsace. A great part of the surface is mountainous, and includes the Black Forest and Odenwald. It comprises an area of 5,888 square miles (3,253 cultivated—corn, wine, fruit, potatoes, tobacco, hemp, hops, and chicory being the chief produce—and 2,277 forests). The population in 1905 was 2,011,000, nearly two-thirds of whom were Catholics, more than one-third Protestants, and 25,893 Jews. Mannheim 164,000, Karlsruhe 120,000; Freiburg and Pforzheim have over 50,000 inhabitants. Principal industries are agriculture and manufactures (cigars, cotton and silk stuffs, straw hats, brushes, trinkets, clocks, chemicals, paper, and machinery). There are 1,250 miles of railway, of which 985 miles belong to the State, constructed at a total cost of £35,633,000.

Budget, 1909 (including railways).....£12,018,000
Debt, Jan. 1, 1909 (only railways).....24,096,000

CAPITAL, Karlsruhe. Population (1909), 131,000.

British Chargé d'Affaires, F. D. Harford, C.V.O. (Darmstadt).

Mannheim—Consul, Dr. Paul Ladenburg.

BAVARIA.

King, Otto, born 27 April, 1848; succeeded his late brother, Louis II., 13 June, 1886.

Regent and Heir Presumptive, Prince Luitpold, born 12 March, 1821, uncle of the late and present Kings; appointed Regent, 10 June, 1886; m. 15 April, 1844, Archduchess Augusta of Austria-Tuscany, who died 26 April, 1864.

Ministers of State—President and Minister of Foreign Affairs, Dr. Baron von Podewils-Dürnitz; *Justice*, von Miltner; *Interior*, von Brettreich; *Instruction*, Dr. von Wehner; *Finance*, von Pfaff; *Communications*, von Frauendorfer; *War*, Gen. Baron von Horn.

The second Kingdom in size and population of the German Empire. It is divided into two unequal parts. The eastern portion, comprising eleven-twelfths of the whole, is situated between 47° 16'–50° 34' N. lat. and 9° 13'–13° 50' E. long.; the western part, forming the Palatinate, on the left bank of the Rhine. Bavaria is divided into eight circles (Upper Bavaria, Lower Bavaria, Palatinate, Upper Palatinate, Upper, Middle, and Lower Franconia, and Swabia), comprising an area of 29,549 square miles, and a population (in 1905) of 6,524,372 (4,608,469 were Roman Catholics, 1,844,699 Protestants, and 55,341 Jews). The capital (538,983) and Nuremberg (294,426) are the largest towns. Bavaria contributes three corps d'armée to the forces of the

German Empire; their strength is fixed at 68,426 men on a peace footing. The rivers are the Danube, Rhine, Main, Lech, Isar, and Inn. Its forests are extensive, covering nearly a third of the country; the soil is highly productive, wheat, rye, oats, and barley being the chief products; buckwheat and maize are also grown, and tobacco is one of the staple articles. Wine is produced in the Palatinate, in Lower Franconia, and in Middle Franconia. The hop-plant is most extensively cultivated. The chief minerals are salt, coal, iron, copper, and pyrites; manganese is found in some places. Many important manufactures are carried on. The brewing of beer is carried to great perfection. The chief imports are sugar, coffee, woollens, silks, stuffs, drugs, hemp, cotton, tobacco, and flax; the chief exports are timber, grain, wine, hops, beer, leather, glass, jewellery, &c.

Budget, 1908 and 1909.....£31,562,755

Public debt, 31 Dec. 1908 (including railway debt, £77,570,974).....99,250,135

CAPITAL, Munich. Population (1905), 538,983.

British Minister Resident, Sir Ralph

Paget, K.C.M.G., C.V.O.....£1,500

Consul, Lucien Buchmann.....

Vice-Consul, W. E. Soltan.....

Nuremberg—Consul, S. Ehrenbacher.....

BRUNSWICK, Duchy of.

Regent, H.H. Duke John Albrecht of Mecklenburg.

A State of Northern Germany, consisting chiefly of three detached parts, comprising an area of 1,418 English square miles, and a population (1905) of 485,958, of whom 455,680 were Protestants, 26,376 Roman Catholics, and 1,815 Jews. Budget, 1909-1910: Income, £734,630; Expenditure, £756,525; debt, £2,460,553.

Capital, Brunswick; population (1905), 136,397.

HESSÉ, Grand Duchy of.

Grand Duke, Ernest Louis, born 25 Nov., 1868; suc. 13 Mar., 1892; m. 2 Feb., 1905, Princess Elenore zu Solms-Hohensolms-Lich, b. 17 Sept., 1871.

Heir Apparent, George, b. 8 Nov., 1906.

President of Ministry, K. Ewald.

A central State in the west of Germany, comprising two disconnected territories, nearly equal in size, containing an area of 2,966 square miles, and a population (1909) of 1,283,800, of whom two-thirds were Protestants. The surface of the eastern portion of both parts is mountainous. The country is fertile, and agriculture is in a flourishing condition. Fruit is abundant, and the vine highly cultivated. Darmstadt, Mainz, and Offenbach have over 50,000 inhabitants.

Budget, 1909.....£4,161,796

Public debt, 1909 (mostly for railways) 21,403,976

CAPITAL, Darmstadt. Population (1909), 90,800.

British Chargé d'Affaires, F. D. Harford,

C.V.O. (Darmstadt).....£500

Hon. Attaché, Douglas Rooke.

Consul-Gen., Sir Francis Oppenheimer (at Frankfurt).

LIPPE, Principality of.

Prince, Leopold, b. 30 May, 1871.

Area, 470 sq. miles; population (1905), 145,577; rev. (1909-10), £120,222; exp., £127,044; debt, £200,590. Capital, Detmold; pop. (1905), 13,272.

MECKLENBURG-SCHWERIN, Grand Duchy of.
Grand Duke, Frederick Francis IV., b. 9 April, 1832; *suc.* 10 April, 1857; *mar.* 7 June, 1904.
 Princess Alexandra of Brunswick and Luneburg, born 29 Sept., 1882.
Minister of State, K. H. L. Graf von Bassewitz-Letvetzow.

Comprises an area of 5,135 square miles on the Baltic, with a population of 625,045. The Legislative power is vested in representatives of the towns, and of the Knights' estates. Revenue (1908-9), £2,093,410; exp. £2,089,915; debt (1908), £6,771,230. Capital, Schwerin; pop. 41,628.

MECKLENBURG-STRELITZ, Grand Duchy of.
Grand Duke, Adolphus Friedrich, b. 22 July, 1848; *mar.* 17 April, 1877, the Princess Elizabeth of Anhalt, born 7 Sept., 1857.
Heir Apparent, Adolphus Friedrich, born 17 June, 1882.

Consists of two detached parts, separated by Mecklenburg-Schwerin. Area, 1,144 square miles; population, 103,451. No proper budget. Finances in good condition. Capital, Neu-Strelitz; pop. 11,668.

OLDENBURG, Grand Duchy of.
Grand Duke, Frederic Augustus, b. 16 Nov., 1852; *suc.* 13 June, 1900; *married* (1), Feb. 18, 1878, to the late Princess Elizabeth (second daughter of the late Prince Frederick Charles of Prussia), who died 28 August, 1895; and (2) to Princess Elizabeth of Mecklenburg-Schwerin, born 10 Aug., 1869.

Heir Apparent, Nicholas, b. 10 August, 1897.
 Situate on the North Sea and the Weser. Area, 2,508 square miles; pop. 398,500; rev. (1900), £491,603; exp. £460,947; debt, £2,804,511. Capital, Oldenburg; pop. 26,000.

REUSS, Elder Line.
Prince, Henry XXIV., born 20 March, 1878; *suc.* 19 April, 1902.
Prince Regent, Henry XXVII., b. 10 Nov., 1858.

Area, 120 square miles; population (1905), 70,603; revenue and expenditure (1909), £76,000. No debt. Capital, Greiz; pop. (1905), 23,118.

REUSS, Younger Line.
Reigning Prince, Henry XIV., b. 28 May, 1832; *suc.* 14 July, 1867; *mar.* Princess Agnes of Württemberg (died 10 July, 1886).
Heir Apparent and Regent, Henry XXVII.

Area, 320 sq. miles; pop. (1905), 144,584; rev. (1908-10), £131,939; exp. £128,787; debt (1908), £52,027. Capital, Gera; pop. (1905), 46,909.

SAXE-ALTENBURG, Duchy of.
Duke, Ernest, b. 31 Aug., 1871; *suc.* 7 Feb., 1908; *mar.* 17 Feb., 1898, Princess Adelheid of Schaumburg-Lippe, b. 22 Sept., 1875.
Heir Presumptive, Geo. Moritz, b. 13 May, 1900.
 Area, 512 square miles; population (1905), 206,508, of whom over 200,500 are Protestants; revenue and expenditure (1908-10), £234,928; debt (1908), £44,372; reserve fund, £219,360. Capital, Altenburg; pop. (1905), 38,818.

SAXE-COBURG AND GOTHA, Duchies of.
Duke, Charles Edward (H.R.H. Duke of Albany), born 19 July, 1884; (*mar.* 11 Oct., 1905, Prss. Victoria Adelaide of Schleswig-Holstein-Sonderburg-Glücksburg, and has issue 2 sons); *suc.* 30 July, 1900; assumed government 19 July, 1905.

Heir Apparent, H.R.H. Prince Johann Leopold, born 2 Aug., 1905.

Minister of State, Herr Dr. von Richter.

A State consisting of two principal and several smaller detached portions, with an area of 753 English sq. miles, and a population (1905) of 242,432, of whom 237,187 were Protestants. Capital, Gotha (pop. 36,947). Coburg (the other capital) has 22,488 inhabitants. The common state revenue is set down at £85,100; the state and domain revenues at £201,000 for Gotha and £87,585 for Coburg. There are 181 miles of railway open (1902), and at Gotha there is an English church.

British Minister Resident (see Saxony).

Hon. Attaché, Edward Trench.

Consul-Gen., Baron von Tauchnitz (Leipzig).

SAXE-MEININGEN, Duchy of.

Duke, George II., b. 2 April, 1826; *suc.* 20 Sept., 1866; *mar.* (1) Princess Charlotte of Prussia (d. 30 March, 1855), (2) Princess Feodora of Hohenlohe-Langenburg (d. 10 Feb., 1872), (3),morganatically, Helene, Baroness of Heildburg.
Heir Apparent, Bernhard, b. 1 April, 1851.

Area, 945 sq. miles; pop. (1905), 268,916; rev. and exp. (1908-10), £483,075; debt (1909), £361,500. Capital, Meiningen; pop. (1905), 15,945.

SAXE-WEIMAR.

Grand Duke, William Ernest, b. 10 June, 1876; *suc.* 5 January, 1901.

Minister of State, Dr. Rothe.

Area, 1,397 sq. miles; pop. (1905), 388,095; rev. and exp. (1908-10), £531,523. There is a British and American church at the capital. Capital, Weimar; pop. (1905), 31,117.

SAXONY.

King, Frederic Augustus III., born 25 May, 1865; *suc.* 15 Oct., 1904.

Heir Apparent, his son, Crown Prince George, b. 15 Jan., 1893.

Ministers of State, Dr. von Rüger, Dr. von Otto, Freiherr von Hausen, Dr. Beck, Graf Vitzthum von Eckstädt.

A Kingdom of Germany, the third in importance and population of the German Empire, comprising an area of 5,856 English square miles, with a population (1905) of 4,508,601, among whom 218,113 were Roman Catholics, and 14,699 Jews. More than one-half of the surface is arable, and has always been in a high state of cultivation, producing the usual cereals and leguminous plants, with rape, buckwheat, flax, and fruits. The forests supply timber of excellent quality; minerals are rich and abundant (coal, silver, tin, bismuth, cobalt, iron, zinc, lead, nickel, arsenic, &c., besides marble, porcelain, earth, and various gems); special manufactures of Saxony are:—Machinery, cottons, worsted yarns, soft wool tissues, carriages, furs, clothing, jute, furniture stuffs, hosiery, gloves, and other knitted goods, laces, embroideries, curtains, paper, wood and straw pulp, bottle glass, musical instruments, chocolates, sweets, cigars, and Meissen porcelain. The imports are chiefly corn, wine, salt, cotton, silk, flax, hemp, wool, coffee, tea, &c. Its chief towns are Dresden (pop. 516,996), Leipzig (pop. 503,672), the great book-market, with next to those of Berlin and Munich, the most frequented University of Germany (having 4,341 matriculated students in

1907); Freiberg (pop. 30,860), in the mining district; Zwickau (pop. 68,502), and Chemnitz (pop. 244,927), the Manchester of Saxony.

Revenue and expenditure, 1908-9 ... £17,000,000
Debt (railways), 1908 45,000,000

CAPITAL, Dresden. Pop. (1905), 516,996.

Brit. Minister Resident, A. C. Grant Duff £950

Hon. Attaché, Edward Trench.

Consul, H. Palmié.

Vice-Consul—C. W. Palmié.

Leipzig—Cons. Gen., Dr. Baron C. C. B. von Tauchnitz.

Vice-Consul, Dr. Curt Otto.

Chemnitz—Vice-Consul, F. H. Felkin.

SCHAUMBURG-LIPPE, Principality of.

Reigning Prince, George, b. 10 Oct., 1846; suc. 8 May, 1893; mar. Princess Marie Anna of Saxe-Altenburg.

Heir Apparent, Adolphus, b. 23 Feb., 1883

Area, 130 sq. miles; pop. (1905), 44,992; rev. and exp. (1909-10), £43,373; debt (1909), £17,002. Capital, Bückeburg; pop. (1905), 5,683.

SCHWARZBURG-RUDOLSTADT, Principality of.

Prince, Gunther, b. 21 August, 1852; suc. 19 Jan., 1890; mar. Princess Anna Louise of Schönburg-Waldenburg.

Area, 360 sq. miles; pop. (1905), 96,835; rev. and exp. (1909-11), £144,766; debt, £223,668. Capital, Rudolstadt; pop. (1905), 12,495.

SCHWARZBURG-SONDERSHAUSEN, Principality of. Prince, Gunther (see Schwarzburg-Rudolstadt above).

Area, 333 sq. miles; pop. (1905), 85,152; rev. and exp. (1909), £164,440; debt (1909), £271,043 (£112,000 for railways). Capital, Sondershausen; pop. (1905), 7,383.

WALDECK.

Prince, Frederick, Prince of Waldeck-Pyrmont, Count of Rappolstein, Seigneur of Hohenack and Geroldseck, Wasiegen, &c., born 20 Jan., 1865; suc. 12 May, 1893; mar. 9 Aug., 1895, Princess Bathildis of Schaumburg-Lippe, and has issue 4 children.

Heir-Apparent, Josias George William, b. 13 May, 1896.

Area, 438 sq. miles; pop. 59,127; income and exp. £69,612; debt, £81,795. Capital, Arolsen; pop. 3,000.

British Chargé d'Affaires, A. C. Grant Duff (Dresden).

WÜRTTEMBERG.

King, William II., born 25 Feb., 1848; succeeded 6 Oct., 1891; mar. (1) Princess Marie of Waldeck (died 30 April, 1882); (2) Princess Charlotte of Schaumburg-Lippe.

President of Ministry, Dr. von Weizsäcker.

A Kingdom of South Germany, with an area of 7,534 English square miles, and a population (in 1905) of 2,302,179, of whom 30 per cent. are Roman Catholics. Württemberg furnishes the 13th Corps to the German Army, consisting of 24,523 men on a peace footing. It possesses rich cultivated fields, orchards, gardens, and hills covered with vines; the forest, grain, and pastureland being nearly equally distributed throughout. Spelt, wheat, rye, oats, barley, hemp, hops,

potatoes, beans, maize, and turnips are the principal agricultural products. The minerals, consisting chiefly of salt, iron, granite, limestone, ironstone, fireclay, &c., abound in the kingdom; mineral springs are also numerous. The principal rivers are the Neckar and the Danube. The manufactures generally are linen, woollen and cotton fabrics, carpets, paper, leather, gunpowder, firearms, tobacco, iron and steel goods, pianos, clocks, pottery, cabinet work, &c. There are also many oil mills, breweries, and brandy distilleries. The principal exports are grain, cattle, wood, gunpowder, firearms, pianos, clocks, salt, oil, leather, woollen, hosiery, cotton and linen fabrics, staves, beer, wine, &c.

Brit. Minister Resident, Sir Ralph Paget, K.C.M.G., C.V.O.

(see Bavaria).

Consul, James Hardwyn Harriss Gastrell.

Vice-Consul, B. Ehrenbacher.

THE FREIEN UND HANSE TOWNS.

The Free Hanse Towns comprise the three cities of Hamburg, Bremen, and Lübeck, each with a small rural territory, retaining their sovereignty and local self-government, like the other States of the Empire, and are situated in the North of Germany, on the Elbe, Weser, and Trave respectively. Hamburg is the great emporium of Germany, and is 65 miles from Cuxhaven, to which port it is connected by railway. Bremen is much smaller, but very prosperous, and only second in commercial importance to Hamburg. It is connected by railway with the outport of Bremerhaven, 35 miles distant, and carries on a very extensive American trade. Lübeck is situate near the Baltic, and is connected with the Elbe by the Elbe-Trave Canal; its commerce is principally with Denmark, Norway, Sweden, and Russia.

HAMBURG, area 160 sq. miles, pop. (1908), 951,120.

GERMAN COLONIES.

The German Colonies have a total area of 2,658,440 sq. kils. = 1,028,182 sq. miles, and have a population of about 14,500,000, of whom 13,342 are whites. Of these whites about 9,735 are settled Germans.

AFRICA.—*Togoland*: Area, 87,200 sq. kils. = 33,650 sq. miles; population about 1,000,000. Capital, Lomé. Budget, 1909: Receipts, £116,700; expenditure, £116,700. 1907: Imports, £235,000; exports, £295,800. —*Cameroun*: Area, 495,000 sq. kils. = 191,074 sq. miles; population, 3,000,000. Capital, Duala. Budget for 1909: Receipts, £333,350, of which State aid, £113,350; expenditure, £333,350. 1907: Imports, £264,850; exports, £794,550. —*German South-West Africa*: Area, 335,100 sq. kils. = 322,348 sq. miles; population, 120,000. Capital, Windhoek. Budget, 1909: Receipts, £1,273,650; expenditure, £1,310,300. State aid, £856,250. 1907: Imports, £1,619,800; exports, £80,800. —*German East Africa*: Area, 995,000 sq. kils. = 384,079 sq. miles; population, 10,000,000. Capital, Dar-es-Salaam. Budget, 1909: Receipts, £687,350, of which State aid, £178,650; expenditure, £687,350. 1907: Imports, £1,190,300; exports, £625,000. —*German Australia*, under which name are now included New Guinea, Kaiser Wilhelm Land, Bismarck Archipelago, Solomon Islands, Marshall Islands, Caroline, Pelew, and Ladron (Marianne Islands). Total area, 482,481 sq. kils. = 186,249 sq. miles; population, 356,000. Budget, 1909: Receipts, £111,850, including State aid, £45,800; expenditure, £79,000. 1907: Imports, £285,900; exports, £173,500. —*Namua*: Area, 2,588 sq. kils. = 1,003 sq. miles; population, 37,000. Capital, Apia. Budget, 1909: Receipts, £39,400; expenditure, £32,550. 1907: Imports, £141,300; exports, £138,500. —*Kiao-Chao*: Leased for a period of 99 years from China in 1898. Area, 501 sq. kils. = 193 sq. miles; population (in leased territory), 33,000; in sphere of interest, 92,000. Chief seat of government, Tsingtau. Budget, 1908: Receipts, £608,300, of which State aid, £427,250; expenditure, £475,200. The German garrison in Kiao-Chao consists of 92 officers, 2,374 German non-commissioned officers and men, and one battalion of the East Asiatic Garrison brigade. It was further agreed that within a 50-kil. zone (31 English miles) from all points of the leased territory the Chinese Government should no longer, for the space of 99 years, be entitled to take any steps without previous authorisation from the German Government. Germany also received mining and railway concessions in the province of Shan-Tung, which is called "the sphere of influence," area about 2,750 English sq. miles, population 84,000. The leased territory, as it is called, comprises the bay up to high-water mark, its islands, and the north and

south tongues of land at the mouth of the harbour.

Germany's share in the trade with her colonies in 1908 was 35 per cent.

GREECE.

King of the Hellenes, George, second son of King Christian IX. of Denmark, born 24 Dec., 1845; elected 30 (18) March, 1863; married 27 Oct., 1867, Olga, eldest daughter of the Grand Duke Constantine of Russia, born 3 Sept., 1851 (issue, 5 sons and a daughter).

Heir Apparent, Prince Constantinos, Duke of Sparta, born 2 Aug., 1868; married 27 Oct., 1869, to the Princess Sophia, sister of the German Emperor, born 14 June, 1870.

Prime Minister and Foreign Affairs (August, 1909), C. Mavromichalis.

Finance, A. Eutaxias.

Interior, N. Triantaphilacos.

Marine, I. Danilanos.

Justice, A. Romas.

Education and Religion, P. Zaïmis.

War, L. Laphthiotis.

Envoy Extraordinary and Minister Plenipotentiary in London, Athos Romanos, 18 Grosvenor Gardens, S.W.

Secretary, Jean Dragounis.

Cons.-Gen., T. Stavridis, 40 Old Broad St., E.C.

A maritime Kingdom in the south-east of Europe, situate in lat. 35° 40'—45° 10' N. and long. 18° 20'—25° 50' E. comprising an area of 24,977 square miles (inclusive of the territory lost by the rectification of the Thessalian frontier after the war with Turkey in 1897), with a population (in 1907) of 2,631,952. The country is composed of a continental portion, almost separated into two parts by the Gulfs of Patras and Lepanto on the west, and the Gulf of Ægina on the east, the Archipelago of the Ægean Sea and the Ionian Islands, and is divided into twenty-six provinces, called Nomarchies. The surface is nearly all mountainous; the coasts are elevated, irregular, and deeply indented. The most important of the fruit trees are the olive, the vine, orange, lemon, fig, almond, citron, pomegranate, and currant-grape. The imports are cotton and other manufactures, corn, timber, cattle, hides, sugar, salt fish, and coal. Its exports consist of currants, figs, olive oil, wine, cognac, tobacco, hides, lead, magnesum, emery, marble, and sponges.

Defence (for Army, see p. 666). The navy consisted of 3 ironclads, 2 armoured vessels, 1 cruiser, 2 gunboats, 4 steam corvettes, 2 schooners, 7 torpedo boats, 3 transports, and 7 various vessels, mostly obsolete, in July, 1903.

Education (see p. 669).

Communications.—There are 830 miles of railway open for traffic. There is a ship canal cutting through the Isthmus of Corinth, but it is rarely used by foreign vessels. Telegraphs, 4,951 miles. The mercantile marine consists of 1,035 sailing vessels above 30 tons capacity, and 206 steamers (198,681 tons).

Finance.—On December 31, 1907, the public Gold Debt of Greece amounted to £28,703,300, involving an annual charge of £888,708, and the Interior Paper Debt to 166,891,073 drachmae, with a charge of 7,559,794 drachmae. In the Gold Debt is included the first portion (£880,000) of a 4 per cent. loan contracted in March, 1902, for the

construction of a railway from the Piræus to Demerly in Thessaly. The second portion (£870,000) was issued in June, 1904, and a further instalment (£230,000) for the extension of the railway to Larissa was issued in Jan., 1905, and the final instalment of £270,000 in 1906. The service of the Debt was entrusted (1898) to an International Commission, sitting at Athens, consisting of representatives of the Governments of Great Britain, France, Germany, Russia, Austria-Hungary, and Italy. To them are assigned the revenues from (1) the State monopolies (salt, matches, petroleum, playing cards, cigarette paper, and emery), (2) the tobacco tax, and (3) the stamp duties, together with the revenue from the Piræus Custom-house as a supplementary guarantee. The gross receipts from the first three sources mentioned are estimated at 28,900,000 drachmæ, out of which a minimum interest of 43 per cent. of the original interest on the Monopoly Loan (1887), and 32 per cent. of the original interest on all other loans contracted previous to 1898, as well as the full interest of $2\frac{1}{2}$ per cent. on the loan of 1898, is guaranteed. If the receipts exceed 28,900,000 drachmæ, the surplus, less 18 per cent. for expenses of administration, is divided between the Government and the bond-holders, in the following proportions: 30 per cent. for increase of interest, 30 per cent. for increase of sinking fund, and 40 per cent. to the Hellenic Government. Profit on exchange is distributed in the same proportions. If the receipts fall short of the estimate, the revenue from the custom-houses at Laurium, Patras, Volo, and Corfu are successively assigned to make good the deficit.

The trade of Greece is hampered by a forced circulation of about 150,000,000 drachmæ (nominally equal to the French franc) in a depreciated paper currency. The agio on gold has been steadily declining during the last few years, and the average exchange constantly improving.

GUATEMALA, REPUBLIC OF.

President, Manuel Estrada Cabrera, elected 2 Oct., 1898, and re-elected July, 1904, to serve from April, 1905, to April, 1911.

Min. of Foreign Affairs, Juan Barrios.

Consul-General, F. de Arce, 11 Queen Victoria Street, E.C.

Guatemala, the most northerly of the Republic States of Central America, is situated in N. lat. from 13° 40' to 17° 40', and in W. Long. from 88° 15' to 92° 30', and comprises an area of 47,424 square miles, and a population in 1908 of 1,991,261. The Republic is divided into 23 departments, and is traversed from W. to E. by an elevated mountain chain, containing several volcanic summits rising to 13,000 feet above the sea: earthquakes are frequent. The country is well watered by numerous rivers: the climate is hot and unhealthy near the coast, but more temperate and salubrious in the higher regions. The Northern Railway connects P. Barrios (Atlantic) with the capital. The Central Railway connects the port of San José (Pacific) with the capital. About 490 miles were open for traffic in 1907. There were 3,790 kilometres of telegraph working in 1905. The chief ports are San José de Guatemala, Champerico on the Pacific, and Livingston and Puerto Barrios on the Atlantic side. The principal export is coffee, valued at £1,139,437 in 1908; the other articles are sugar, rubber, hides, bananas, and timber.

HAYTI, REPUBLIC OF.

President, General Antoine Simon, assumed office as from 15 May, 1909, for seven years

Minister of Foreign Affairs & Public Instruction, Murat Claude.

War and Navy, General Septimus Marius.

Interior and Police, M. Jeremie.
Finance and Commerce, Candelon Rigaud.
Justice and Worship, J. C. Artaud.
Public Works, Pétion Pierre André.

Minister in London, M. D. Valat, 17 Tavistock Square, W.C.
Consul, Maurice Erdmann, 32 Fenchurch Street.

The Republic of Hayti is the western or French portion of the island of San Domingo, which, next to Cuba, is the largest of the West India Islands. It contains 29,830 square miles, of which 9,242 square miles belong to Hayti. It lies in N. lat. between $17^{\circ} 37' - 20^{\circ}$, and in W. longitude between $68^{\circ} 20' - 74^{\circ} 28'$; and belongs to the group of the Greater Antilles. The portion belonging to Hayti contains a population of 2,029,700 (1908). The mountains are richly and heavily timbered, and susceptible of cultivation nearly to their summits; it is probably the most fertile spot in the West Indies, whilst its harbours, especially Port-au-Prince, offer considerable facilities to foreign trade. The principal productions are coffee, logwood, cocoa, cotton, hides, sugar, honey, guans, these being the chief exports. It is said to contain mines of gold, silver, copper, tin, and iron. Its commercial prosperity has been almost annihilated by repeated revolutions. The principal foreign trade is carried on with the United States, Great and Greater Britain, France, and Germany.

HONDURAS, REPUBLIC OF.

President, General Miguel R. Davila, assumed office 18 April, 1907.

Consul-General in London, M. J. Kelly, 8 Idol Lane, E.C.

The Middle State of Central America, stretching in N. lat. between $13^{\circ} 10' - 16^{\circ}$, and W. long. between $83^{\circ} 10' - 88^{\circ} 40'$; containing 42,658 English square miles, including a small portion of the Mosquito Territory, and the Bay Islands in the Gulf of Honduras. The population in 1902 was 774,900, mostly of aboriginal blood. It has a coast-line of nearly 400 miles on the Caribbean Sea, chief ports, Truxillo, Puerto Cortez, Omoa, Roatan, and La Ceiba; but only about 40 miles on the Gulf of Fonseca, on the Pacific side, chief port, Amapala. The country is mountainous, being traversed by the Cordilleras. The products are mahogany, fruit, cattle, cotton, sugar, tobacco, coffee, indigo, sarsaparilla, hides and skins, india-rubber, cedar, fustic, rose, and Lima wool. Its mineral wealth is great. The only railway (42-inch gauge) runs from Puerto Cortez to Pimienta, 60 miles, which it is intended to develop into an inter-oceanic railway, connecting the Atlantic with the Pacific.

Truxillo—Consul, Alfred E. Melhado.

La Ceiba—Vice-Consul, A. R. Taylor.

Distance 5,930 miles; transit, 18 to 20 days.

HUNGARY. (See pp. 599-600.)

ICELAND (Danish Dependency).

Minister for Iceland (Resident), Björn Jónsson, appd. 31 March, 1909.

Iceland is a large, volcanic, and treeless island in the North Atlantic Ocean, extending from $63^{\circ} 23' - 66^{\circ} 33'$ N. lat., and from $13^{\circ} 22' - 24^{\circ} 35'$ W. long., with an estimated area of 40,497 square miles, or greater than that of Ireland. The population was estimated in 1898 at 76,237.

The present constitution was granted in 1904, and the assembly (Al-thing) is more or less controlled by the Government at Copenhagen. The principal products of the island are sheep, cattle, ponies, and fish, and the imports consist of almost all the necessaries of life, the chief items being grain and meal, sugar, coffee, salt, cotton goods, tobacco, spirits, hardware, and timber. Total imports (1907): £1,006,667; exports, £678,889. Iceland is now in direct telegraphic communication with this country.

CAPITAL, Reykjavik. Population, about 11,000.

Other towns are Isafjörður, Akureyri, and Seyðisfjörður.

Reykjavik—Consul, A. G. Coates, M.V.O. £600

Secretary, Luigi Vannutelli.
3rd Secretary, Count L. Nani-Mocenigo.
Military Attaché, Major Ugo Bagnani.
Naval Attaché, Commandante A. Resio.
Archivist, Signor Catani.
Consul, Marchese Faa di Bruno.
Vice-Consul, Cavaliere P. Righetti.

A Kingdom in the South of Europe, consisting of a peninsula, the large islands of Sicily and Sardinia, the island of Elba, and about 66 minor islands. It is situate between lat. 36° 38' 30"—46° 40' 30" N. and long. 6° 30'—18° 30' E., and comprises a total area of 110,623 square miles (91,277 mainland, 19,346 islands), with a population (1 Jan., 1908) of 33,910,000. Formerly it was composed of the various States of Sardinia, the Two Sicilies, the Pontifical States, the Lombardo-Venetian provinces of the Austrian Empire, the Grand Duchy of Tuscany, and the Duchies of Parma and Modena. In 1870 the unity of the country was finally effected, and Rome became again the capital of Italy, which is now divided for administration into 69 provinces. The coast-line of the mainland is estimated at 1,999 miles; of Sicily, Sardinia, and Elba at 1,389 miles; of the minor islands at 557 miles; in all 3,945 miles, having several large bays and gulfs. The peninsula is traversed throughout its length by the chain of the Apennines: the Alps form its northern limits, dividing it from France. The chief rivers are the Po, the Adige, the Tiber, and the Arno. The principal towns are Rome (452,783), Naples (564,000), Milan (over 500,000), Turin, Palermo (over 300,000), Genoa, Florence (over 200,000), and Bologna, Venice, Catania, and Leshorn (over 100,000 inhabitants), Ferrara and Padua (over 80,000), while there are twenty other towns with over 50,000 inhabitants. Its wines are numerous and celebrated, and olives and olive-oil are furnished by Tuscany, Liguria, and the province of Bari; while fruit abounds and is largely exported. The cultivation of silk forms an important agricultural industry. Among the principal minerals are iron, lead, zinc, copper, manganese, and antimony ores, sulphur, gypsum, amaranthus, alum, and boracic acid. Silver is found in Sardinia, and some gold in the Alps. Salt is a Government monopoly, and 219,343 tons were produced in 1906. The mineral produce in 1907 included iron ore (£360,000), zinc ore (£780,000), and crude sulphur (£1,300,000). The railway system is making rapid progress throughout the kingdom; in 1907 there were 10,712 miles open for traffic, and 29,788 miles of telegraph line. The sea-going commercial marine (1908) consisted of 1,403 vessels (419 steamers), of 1,225,225 tons. The imports chiefly consist of cotton, wheat, coal, coke, chemicals, colonial produce, yarns, jute and manufactured goods, woollens, raw silk, silkworms' eggs and cocoons, machinery, iron and steel in bars, plates and rails, hardware, raw hides, horses and cows, fixed oils, salt fish, dye-stuffs, tobacco, earthenware, &c. The principal exports are olive-oil, wine, candied citron, sienna earths, pastes, coral, rags, boracic acid, raw and thrown silk, hemp, cattle, straw hats, rice, iron, zinc and copper ores, sulphur, marble, fruit, vegetables, fresh and prepared meats, poultry, chemical products, woods, roots, &c., for dyeing and tanning, artistic works, &c.

The exports to the U.K. in 1908 were:—

Art. Works of other than Pictures		Hemp and Tow	£297,320
Chemical Manufactures and Products	£71,729	Hides, raw	365,758
Substances used in Tanning or Dyeing	252,023	Zinc Ore of	240,005
Fresh Fruit	275,739	Oil, Olive	106,093
	512,742	Stones, rough-hewn or manufactured	113,389
		Vegetables, preserved by canning	206,425
			224,712

The imports of British produce and manufactures (1908) include:—

Arms, Ammunition, and Military and Naval Stores	£577,007	Cotton Manufactures	£451,284
Copper, Sulphate of	508,643	Fish	240,005
Coal, Coke, and Manufactured Fuel	5,849,622	Machinery	1,903,162
		Iron and Steel	1,266,459
		Ships and Boats	754,753
		Wool	433,001
		Woollen and Wadded Manufactures	524,572

The manufactures are woollen, cotton, silk, hemp, and linen yarns and tissues, leathers, straw and felt hats, furniture, chemical products, paper, agricultural and other machinery, prepared meats, artistic works (such as mosaics, pottery, Venetian glass, alabaster ornaments), &c. Sugar is extracted from beet in large quantities for home consumption. There is a large settled and floating population of English and Americans, with churches (one costing £40,000) and chapels belonging to Methodists, Baptists, and others. *Defence* (for Army, see p. 666, for Navy, see p. 473). Spezia, the chief naval and military port of the kingdom, is securely fortified. *Education* (see p. 666).

Foreign merchants vessels of 18,122,826 total tonnage entered and of 18,125,437 tons cleared at Italian ports in 1907. Italian vessels of 24,432,175 tons entered and of 24,395,476 tons cleared in 1907.

Public revenue	£90,000,890	1908-9	£81,024,545*
Public expenditure	87,594,816		79,359,133*
Public debt	£524,787,001		£531,089,196
Interest on debt	19,239,407		19,458,637
Total imports	£96,671,520	1907	£110,419,000
Total exports	73,434,086	1907	74,059,554
Imports from U.K.	15,252,483	1908	16,066,875
Exports to U.K.	3,850,875		3,440,466

COLONIES.—Italy possesses the colony of
 Eritrea, and a protectorate over part of the
 Somali coast, extending from Cape Guardafui to
 the Juba river, on which they have a station; an
 annual rent is paid to the Sultan of Zanzibar for
 the Benadir ports leased by him to Italy. The
 Colony of Eritrea includes also the Dahlar
 Archipelago.

The protectorate includes Aussa and the
 Danakil country, the Somali countries of the
 Sultans of Migiurtini and of Obbia, as well as
 the Benadir, which is now a colony. By new
 conventions signed with the Emperor Menelek
 in May, 1908, Italy obtains a slight extension of
 frontiers, and obtains the country between Dolo
 and Bardera. The commencement of Italian
 influence was made in 1880, when the district of
 Assab was transferred from a trading company
 to the Government. The tract of land now
 known as ERITREA ("Red Sea") consists of a
 triangular portion of barren and sandy lowland
 between 12° and 18° N., containing in all a coast-

line along the Red Sea of about 700 miles, with
 a total area of 85,000 to 90,000 square miles, and
 a population of about 300,000, of whom about
 3,000 are Europeans. The capital is Asmara,
 Massowa being the chief port, where there is a
 good harbour, and the principal product, salt,
 of great value as being the monetary currency
 of Southern Abyssinia.

ROME—Sovereign Pontiff, Pius X., born 2 June,
 1855; elected 4 August, 1903.
 Secretary of State to His Holiness, The Cardinal
 Merry del Val, appointed 1903.
 Rome, transit, 44 hours.

JAPAN.

Emperor, Mutsuhito, born 3 Nov., 1852; suc-
 ceeded 13 Feb., 1867; crowned 13 Oct., 1868;
 mar. Haruko, 9 Feb., 1869, and has issue 1 son
 and 4 daughters.

Heir Apparent, Prince Yoshihito, born 31 Aug.,
 1879; installed Crown Prince 3 Nov., 1889;
 came of age, and took his seat in Upper House,
 1897; mar. 10 May, 1900, Sadako, daughter of
 Prince Kujo, and has issue three sons.

 E.C., and 72 Kensington Park Road, W.

Consul at Glasgow, A. E. Brown.

„ at Liverpool, P. E. J. Hemelryk.

„ at Middlesbrough, Wayman Dixon.

This ancient and extensive Empire, now in
 alliance with the United Kingdom, consists of
 four large and many small islands, said to com-
 prise in all above 4,223, the principal of which
 are Honshū (the name of the Empire being
 Nihon), Shikoku, Kiu-shū, Hokkaidō or Yezo,
 situate to the north of the main island, from
 which it is separated by the Tsugaru Straits, and
 Formosa, called by the Japanese, Taiwan. The
 Ainu, an uncivilised but harmless tribe, who in
 ancient times occupied the greater part of the
 country, are still found in Yezo. The Kurile
 Islands have belonged to Japan since 1875, and
 in 1876 she incorporated the Luchu (Kiu-kiu)
 Islands under the name of "Prefecture of
 Okinawa." The empire comprises an area of
 162,655 square miles, with a population of
 49,232,822, according to the last census, there
 being 24,864,385 men and 24,368,437 women. In
 addition, the Russo-Japanese war gave to Japan

the southern portion of the island of Saghalin, (Japanese, Karafuto).

Japan is said to possess a written history extending over 2,500 years, and its sovereigns to have formed an unbroken dynasty since 660 B.C., the present Emperor being the 121st of his race; but the authentic history begins about 400 A.D. Within the last 40 years Japan has made unparalleled progress in civilisation and the adoption of Western manners and customs. The feudal system, under which the country was governed by numerous lords under a supreme military governor, the "Shogun," has been abolished, and the Mikado is now absolutely the Sovereign of the State, which has since the revolution of 1868 shown a most remarkable power of adopting Western knowledge and experience. A wise and enlightened ruler is at the head of the nation, and the first national Parliament, the outcome of the constitution granted to the people by the Emperor, promulgated 11 Feb., 1889, met for the first time in November, 1890. The feudal lords, who have lost all their powers of government, still retain their high social positions, and a new aristocracy with these as its basis has been formed; it consists of five grades, corresponding to the European titles of Prince (not Imperial), Marquis, Count, Viscount, and Baron. The islands are eminently volcanic, and 18 of the summits are still active; the chief of these, Fuji-san, or Fuji-yama, the loftiest and most sacred mountain of Japan, about sixty miles from Tokio, is 12,370 ft. high, and has been dormant since 1707. Japan is also liable to frequent, and occasionally disastrous earthquakes. The country is very mountainous, and not more than one-sixth of its area is available for cultivation. It possesses numerous fine harbours. The soil is productive, teeming with every variety of agricultural produce. Copper, iron, and sulphur abound, whilst agate, cornelian, and rock crystal are also found. Gold is found in the island of Sado, and silver mining is prosecuted on a small scale; while there is a good supply of middling coal. Among the vegetable productions may be noted the camphor-tree, paper mulberry, vegetable wax-tree, and a lacquer-tree, which furnishes the celebrated "lacquer" of Japan. The principal timber trees are the *Cryptomeria japonica*, *Pinus Massoniana*, and *Zelkova Keaki*; the *Paulownia* imperialis is largely used for fancy boxes and works of art; the maple is merely for ornament. Chestnut, oak, beech, and elm are comparatively rare and little used. The tobacco-plant, tea-shrub, potato, rice, wheat and other cereals are all cultivated; agriculture, upon which the Japanese bestow great care, being their chief occupation. The coasts are extremely rich in fish. The floral kingdom is rich, beautiful, and varied, though scented flowers are comparatively few. Fruit, for the most part of inferior quality, is abundant; English fruits, such as apples, strawberries, pears, grapes, figs, and peaches are being produced.

Commerce and Industry.—The chief manufactures are silk and cotton, cotton yarn, matches, paper, glass, lacquer ware, porcelain, and bronze, and shipbuilding is an important industry in the yards. The chief imports are raw cotton from India, U.S., Egypt, and China; flour from the U.S.; and piece goods, metals, manures, woollens, wool, drugs, rails, locomotives, and machinery from Europe and the U.S.A. Sugar is largely imported from Java, Philippines, Germany, Austria, Hong Kong, and Formosa;

indigo from Germany, British India, and Java; kerosene oil from U.S. and the Dutch Indies; beans, peas, and pulse from China and Korea; and rice, principally from British India, French India, Korea, Siam, and China. The chief exports are silk, cotton yarns, rice, tea, fish, copper, matches, coal, camphor, straw plaits, and marine products.

Communications.—There were 4,899 miles of railway open in 1908. A Japanese line has been built in Korea from Fusan to Seoul, while the South Manchurian Railway is also under Japanese control. The gross receipts for passenger and goods traffic on all the lines in Japan during 1907-8 was £8,399,058. The mercantile marine consisted in 1908 of 870 vessels above 100 tons (865 steamers), 1,142,468 tons. Of the 13,029 vessels (tonnage 20,215,577) that entered Japanese ports (1908) 2,267 were British (tonnage 6,409,122).

Defence (for Army, see p. 667). The Navy as at 31 March, 1909, is given on p. 473; it was manned by about 34,000 officers and men.

Education (see p. 669).

Commerce.—The following table shows the distribution of the foreign trade in 1908 among the countries principally concerned:—

	Exports.	Imports.
British Empire	£7,206,814	£17,012,743
U.S.A.	12,199,658	7,763,655
China	6,050,699	5,096,688
France	3,374,575	524,644
Germany	797,581	4,627,861

The imports of British produce and manufactures (1908) include:—

Cotton Yarn	£123,411	Iron and Steel ..	£1,829,622
" Manufactures		Ships and Boats,	
"	1,778,014	with their Ma-	
Hats of all	48,943	chinery	252,860
Linen Manufac-		Woolen	
"	77,914	Worsted Manu-	
Machinery	2,137,662	factures	678,561
Manure	506,687		

The principal exports to the U.K. in 1908 were:—

Chemical Manufac- tures & Products £41,728	Oil, Seed	£167,360
Corn, Grain, Rice, and Flour	Plaiting of Straw and other Mate- rials	216,240
Curios	Plants, Shrubs, Trees, and Flower Roots	52,236
Copper, unwrought 728,616	Silk Manufactures 872,895	
Oil, Fish, Train, Blubber, &c.	87,890	

Revenue (Budget)	£48,563,000*	53,152,646*
Expenditure (Budget) ...	43,609,000*	53,151,809*
Total debt	232,425,000	229,718,821

Imports	£50,477,000	£44,684,728
Exports	44,142,000	38,742,804
Imports from U.K.	12,279,498	10,128,084
Exports to U.K.	3,241,568	2,922,515

The local exchange value of the yen is about 2s. 0½d.

Formosa.—The island of Formosa was ceded by China to Japan (2 June, 1895) in accordance with the Treaty of Peace. Its total area is 13,500 square miles, with about 3,080,000 inhabitants (1908).

KOREA.

Emperor, Chûk, born 1874, acceded 20 July, 1907.
Japanese Resident Gen., Viscount Arasuke Sone.
Chief Commissioner of Customs, T. Nagahama.

* Includes extraordinary expenses, which in 1909-10 are estimated at £4,975,432 (rev.) and £11,699,334 (exp.).

Korea is situated between 122° and 128° E. long., and between 34° and 43° N. lat., and the coast is fringed with innumerable islands, of which the largest is Quelpart. Total length, 600 miles from north to south, and greatest breadth 135 miles from east to west, with an area of some 171,000 square miles. Population estimated at about 12,000,000; there are about 115,000 Japanese in the country. Since the conclusion of the Russo-Japanese War in 1905 the administrative control of Korea has gradually passed into Japanese hands. In November, 1905, Japan assumed a protectorate over the country; and the powers thus obtained were strengthened by a second Convention on July 31, 1907. The soil is fertile, but mountainous except in the river valleys. About 4,500,000 acres are under cultivation, the staple agricultural products being rice and other cereals, beans, cotton, tobacco, and hemp; the other natural products are chiefly gold and hides. Ginseng, a medicinal root much affected by the Chinese, is largely grown under Government supervision in the province of Pyeung-An, and being a Government monopoly, forms a rich source of revenue. Gold, copper, coal, iron, and other minerals are distributed throughout the country. The principal exports are beans, rice, livestock, cowhides and ginseng. Manufactures are as yet in a primitive condition, the principal being hemp cloth, brass ware, and an excellent quality of paper resembling the Japanese article, but stouter. About 80 per cent. of the sea-borne trade is carried in Japanese bottoms. Considerable progress is being made in the direction of the proper lighting of the coast. The postal, telegraph, and telephone systems of Korea were placed under Japanese administration by an agreement signed in 1905, and the railways, two of which were Japanese companies and the third a Japanese military line, were transferred to the Japanese Government simultaneously with the nationalisation of the Japanese railways in 1906. The total railway mileage is 639 miles.

Revenue (Budget).....	1909-10.	
Expenditure	£2,143,372	2,226,865

JERUSALEM—PALESTINE.

Turkish Governor, Subhi Bey, appointed Sept., 1908.

Palestine, which occupies so prominent a place in the history of human kind, and in the affections of the Christian world, is a country capable of considerable development, and, although her ancient glories are departed, still produces wine and olives, corn and the most varied fruits. Its population is not far short of 700,000, of whom upwards of 150,000 are Jews. In and about Jerusalem, the Jews number from 60,000 to 65,000.

Geographically, Palestine consists of a maritime lowland, the mountain region of Judæa, which forms its backbone, the remarkable depression through which the Jordan wends its course towards the Dead Sea, and the elevated region lying to the east of the Jordan. It is barren only during the dry season, when the grasses are dried up, and the herdsmen retire with their flocks of sheep and goats to the loftier mountains, but the alluvial lowland to the south of Mount Carmel is as fruitful as ever, and it only needs an honest and vigorous administration to restore Palestine to its former prosperous condition. The entire area is computed to be about 11,000 square miles.

Palestine comprises the independent mutessarifik of Jerusalem (el Kud's), together with the mutessarifiks of Acre and Nablus, the two last named belonging, for administrative purposes, to the vilayet (province) of Beirut. Since March, 1906, however, the kaza (district) of Nazareth, in the mutessarifik of Acre, has been included in the mutessarifik of Jerusalem. The stream Auja, which enters the sea a few miles north of Jaffa, forms the boundary between the independent district of Jerusalem and the above-named vilayet, the country to the east of the Jordan and the Dead Sea being subordinate to the vilayet of Damascus. Arabic is the language commonly spoken, and 80 per cent. of the population are Mohammedans; in addition to Mohammedans and Jews there are many Orthodox Greeks and foreigners of all denominations. A railway was constructed connecting Jaffa (Joppa) and Jerusalem in 1892.

The principal ports of Palestine are Acre, Haifa, Jaffa, and Gaza, and their exports amount annually to over £600,000, consisting principally of sesame, oranges, fruits, barley, olive oil, maize, and articles of Christian veneration, these latter weighing 2,700 cwt. The imports are estimated at £800,000 annually. The U.K. and Austria-Hungary take the lead in this commerce.

Jerusalem—Consul, E. C. Blech £700
Jaffa—Vice-Consul, J. Falanga (acting) 300
Gaza—Cons. Agent, A. A. Kneschew *unp.*

Distant by overland route, about 2,300 miles,
 by sea 3,700 miles; transit, 8 to 10 days.

LIBERIA.

President, A. Barclay, born 1854, re-elected May,
 1907, until Jan., 1911.

Vice-President, J. J. Dossan.

Secretary of State, F. E. R. Johnson.

Treasurer, D. E. Howard.

Attorney-General, C. D. B. King.

Postmaster-General, S. T. Prout.

Chief Inspector of Customs and Financial

Adviser, William J. Lamont £1,000

Asst. do., J. M. Hamilton.

Commandant & Inspector-General Frontier

Force, (vacant) 600

Consul-General and Chargé d'Affaires in London,
 C. M. Higgins, 8 Crosby Square, E.C.

Consul, J. T. Grein, 29 Mincing Lane, E.C.

An independent Negro Republic of Western Africa, occupying that part of the coast of North Guinea which is between the river Cavalla, S.E., and Manna, N.W., a distance of about 350 miles, with an area of about 48,000 square miles, and extending to the interior to latitude 8° 50', a distance of 250 miles from the seaboard. It was founded by the American Colonization Society in 1820, and has been recognised by the United States and the European powers since 1847 as an independent State. The population numbers nearly 1,500,000, including about 10,000 American-Liberians. The principal exports are coffee, cocoa, palm-kernels, palm-oil, ivory, prassava, rubber, and camwood. The chief imports are cottons, haberdashery, salt, rice, provisions, arms and ammunition, tobacco, hardware, glass and earthenware, rum, gin, timber, and beads. The executive power is vested in a President elected for four years, assisted by a ministry; there are two houses of Legislature, the Senate, with eight members elected for four years, and the House of Representatives with fourteen members elected for two years. There is no regular army, but a frontier force under European officers is being raised. The organisation of the customs is being carried out by officers lent by the British Government with successful results. There are thirteen ports of entry along the 350 miles of coast, viz.: Robertsport, Monrovia, Marshall, Grand Bassa, River Cess, Greensville, Nanna Kroo, Harper, Half Cavalla, Jenne, Webo, Grand Cess, and Garraway. In 1908, 343 vessels (678,748 net tons) entered and cleared at Monrovia.

Exports	111,398	182,708

CHIEF TOWN, Monrovia. Population, 6,000.

British Consul-General, Major J. G. Baldwin £800

Vice-Consul, M. Y. H. Parks.

Monrovia, 3,650 miles distant; transit, English steamer *via* Liverpool, 14 days; German steamer *via* Southampton, 11 days.

LIECHTENSTEIN.

Prince, Johann II., b. 5 Oct., 1840; *sue.* 12 Nov., 1858.

A Principality on the Upper Rhine, between the Austrian province of Vorarlberg and Switzerland; area 59.6 square miles, pop. (1905) 9,650. The main industries are agriculture (chief products being corn, wine and turf), textiles and embroidery. Revenue (1908), 795,068 K.; exp. 739,223 K.; no debt. CAPITAL, Vaduz.

LUXEMBURG.

Grand Duke, William Alexander, b. 22 April,

1852; *sue.* 17 Nov., 1905; *mar.* 21 June, 1893.

Princess Maria Anna of Braganza (*Regent*).

Minister of State, M. Eyschen.

A Grand Duchy in Central Europe, bounded by Germany, Belgium, and France; it formed part of the Germanic Confederation, 1815-66, and is still included in the German "Zollverein." In 1867 the Treaty of London declared it a neutral territory under the sovereignty of the King of the Netherlands, on whose decease, Nov. 23rd, 1890, it passed to the Duke of Nassau. The area is 999 square miles; the population (1907) 250,911, nearly all Roman Catholics. The principality is rich in iron-ore. The revenue in 1908 was £637,464, expenditure £595,644; debt (Jan. 1, 1909) £420,460. There are 328 miles of railway. The army numbers about 300 men. The capital, Luxemburg (population 20,682), is a dismantled fortress.

British Envoy, Sir G. Buchanan, G.C.V.O., K.C.M.G., C.B. (The Hague).

Consul, N. le Gallais.

MADAGASCAR.

(French Possession—See pp. 618-9.)

MEXICO, FEDERAL REPUBLIC OF.

President of the Republic, Porfirio Diaz, born 15 Sept., 1830, acceded 1 Dec., 1884 (re-elected 7th time 1904 until 1910).

Vice-President, Ramon Corral (1 Dec., 1904).

Minister of Foreign Affairs, Ignacio Mariscal.

Minister in England, Miguel Covarrubias, 27 Cromwell Road, S.W.

1st Secretary, Luis Ricoy.

2nd Secretary, Luis S. Carmona.

Financial Agent, Luis Camacho, 85 Finsbury Pavement House, E.C.

Consul, Adolfo Bülle, Broad St. House, E.C.

Consul-Gen.—Liverpool, Emilio Alemán.

A country in the southern part of the continent of North America, with an extensive seaboard to both the Atlantic and Pacific Oceans, extending from 15° to 32° 30' N. lat. and 87° to 117° W. long., and comprising one of the richest and most varied zones in the world, but from various causes her resources have never been fairly developed. It comprises 27 states, 3 territories, and the federal district of Mexico, making in all 31 political divisions, comprehending an area of 767,005 square miles, with an estimated population of (1900) 13,545,462, of whom "only about 3,500,000 are taxable." The surface consists of an elevated plateau, commencing at a few miles from the coast, and containing several volcanic summits, the highest of which, Ixtaccihuatl and Popocatepetl, rise to 17,879 and 19,784 feet above the sea. Acapulco, Manzanillo, Mazatlan, Salina Cruz, and Guaymas are the chief ports on the Pacific; and

Vera Cruz, Tampico, Progreso, and Puerto Mexico on the Atlantic or Gulf of Mexico. There were 15,100 miles of railway open on Sept. 16, 1909, and 39,007 miles of telegraph. The railways have in a large measure been built by American and English companies. The "Mexican Central" joins El Paso (Texas) with the city of Mexico, by which passengers can travel in five days from New York without change of carriage. The National Railway *via* Laredo takes 4½ days to New York, and there is a third route *via* Eagle Pass (International Railway). The principal crops are maize, wheat, barley, Chile-pepper, sugar, coffee, cotton, tobacco, vanilla, flax, grapes, and all kinds of tropical fruit. The maguay, or Mexican ale, yields a favourite beverage, "pulque"; other species of the same plant supply pita-flax and sisal-hemp (henequen). The forests abound in mahogany, rosewood, ebony, and caoutchouc trees. The mineral wealth is very great; silver and gold, copper, lead, and quicksilver, iron and coal, are the leading products of the mines. Woollen and cotton spinning and weaving, and other branches of industry, are encouraged by high protective duties. The imports, nevertheless, consist very largely of textile manufactures. Of the exports 45 per cent. consist of silver and gold; sisal hemp (henequen), coffee, hides and skins, timber, logwood, vanilla, tobacco, dye-stuffs, sugar and drugs ranking next in importance.

The Navy is limited to 7 small vessels.

Education (see p. 669).

Finance, &c.—The following figures have been officially supplied, the value of the Mexican dollar being taken at 24d.:—

	1908-9.	1909-10.
Estimated revenue ...	\$103,385,000	\$97,261,000
Estimated expenditure ...	103,203,824	96,935,400
	1907-8.	1908-9.
Exports	\$242,738,906	\$231,101,795
Imports	221,535,993	156,504,447
	1907.	1908.
Imports from U.K.	£3,119,890	£2,386,620
Exports to U.K.	2,008,555	1,911,734

MONACO.

Sovereign Prince, Albert, born 13 Nov., 1848; suc.

10 Sept., 1889; mar. 1869, (1) Lady Mary

Douglas-Hamilton, daughter of 11th Duke of

Hamilton; (2) Oct., 1889, the Duchesse de

Richelieu, born 10 February, 1858.

Heir, Prince Louis, born 12 July, 1870.

Governor-General, Admiral Hanfstaëlle.

Secretary-General, M. Alatisière.

Consul-General in London, Theodore Lumley, 37

Conduit Street, Bond Street, W.

Vice-Consul, Paul Crémieux-Javal, J.P., 43 Hill

Street, Berkeley Square, W.

A miniature Principality on the Mediterranean, between France and Italy, consisting of the old town of Monaco, La Condamine, and Monte Carlo, where is the gambling establishment, and comprising a narrow strip of country extending from the Monaco Cemetery on the west to St. Roman on the east; it is about 3 miles long and 1½ miles broad, with (1904) 26,000 inhabitants, and a yearly average of over 1,250,000 visitors. The whole available ground is built over, so that there is no cultivation. There is an army of 126 men.

British Consul, Alex. McMillan (Nice).

British Vice-Consul, J. W. Keogh (Monaco).

English Chaplain, Ven. Archdeacon Spens.

MONTENEGRO.

Prince, Nicholas, born 25 Sept. (O.S.), 8 October

(N.S.), 1841; suc. his uncle, Prince Danilo,

14 Aug., 1860; m. 1860, Milena, daughter of

Voyevod Peter Vukotich, b. 4 May, 1847; issue

3 sons, 6 daughters.

Heir Apparent, Danilo Alexander, born 29 June

1871; m. 1899, Princess Jutta of Mecklenburg-

Strelitz.

Pres. of State Council and Minister for Foreign

Affairs, Dr. Tomanovic.

Consul-General Col. Sir J. Roper Parkington, J.P.,

D.L., 24, Crutched Friars, E.C.

A small Principality, which has always claimed to be independent, and recognised to be so by the Treaty of Berlin. It has an area of 3,486 square miles, and a population diminished by emigration to about 225,000, of whom 13,000 are Mussulmans, 14,000 Roman Catholics, and the remainder Orthodox Slavs. The surface forms a series of elevated ridges with lofty mountain-peaks, many of which are covered with forests. Chief products are maize, potatoes, sumac, cattle, castradina (smoked mutton), hides, and tobacco, which has been created a monopoly, and conceded for 25 years to an Italian company. The only manufactures are coarse woollens. Agriculture is the principal occupation. The ports are Antivari and Dulcigno. There is a railway from Antivari to Lake Scutari. A repre-

sentative parliament was granted 5 November, 1905.

	1906.	1907.
Revenue (estimated)	£116,000	£124,100
Public Debt „	70,000	70,000
Total Imports „	240,000	261,000
Total Exports „	81,000	56,000

CAPITAL, Cettinje. Population (1907) 5,000 (exclusive of permanent garrison of 600 men).
British Chargé d'Affaires, Henry D. Beaumont.

Distant about 1,100 miles; transit, average 5 days.

MOROCCO, EMPIRE OF.

Sultan, Muley Abdul Hafid, b. 1873, assumed power Aug. 1908; recognised by the Powers, Jan., 1909.

Grand Vizier, El Madani el Glawi.

Minister of Foreign Affairs, Sid Aissa ben Omar.
Commissioner for Foreign Affairs at Tangier, Sid Mohammed el Guebbas.

The largest of the Barbary States, situate in the N.W. of Africa, between 27°–36° N. lat. and 1°–11° 40' W. long. The Empire, which is an absolute monarchy, consists of the Kingdom of Fez and Morocco, to the north of the Atlas, and the territories of Sûs, Drâ, Wadi Taflet, Tuat, and others to the south, which are again subdivided into 33 districts, each under the superintendence of a "Kaid"; but the semi-independent tribes are ruled by their own chiefs, and scarcely acknowledge the authority of the Sultan. Morocco contains about 314,000 square miles, of which the "Tell," or fertile regions of the mountains and coast, contain 76,000, the steppe-land 26,000, and the Sahara 217,000, with a population variously estimated at from 4,500,000 to 8,000,000. The Jews number about 300,000, chiefly in the cities. Among the chief products of the country are wheat, barley, maize, beans, peas, oil, esparto, and hemp; among fruits, the fig, almond, pomegranate, lemon, olive, orange, and date are common; but agriculture is greatly neglected. Morocco is said to be rich in mineral treasures: antimony, iron, coal, copper, lead, tin—the last three in considerable quantities. Gold and silver also are found, and wool is plentiful. The chief ports are Tetuan, Tangier (where the Representatives of foreign nations reside), El Araïsh (Laraiche), Rabat, Casa Blanca (or Dar-al-baida), Mazagan, Safi, and Mogador. There are no railways, and telegraphic communication from Tangier is by submarine cable of Eastern Telegraph Company to Gibraltar, by Spanish Government telegraph to Tarifa, and by French cable to Oran (Algeria); there are wireless stations at Tangier, Rabat, Casa Blanca, and Mogador. The principal exports (1908) were barley (£631,851), oxen (£285,000), goat-skins (£178,217), eggs (£222,846), almonds (£101,103), and olive oil (£100,952); and the imports are cottons (£1,048,474), sugar (£701,428), tea (£221,216), iron and hardware (£121,238), linen, muslin and woollen goods, coffee, candles, cloth, silk, &c. The army consists of between 15,000 and 20,000, one-half of whom are negroes, Sultan's bodyguard, and a sort of militia, of various arms, amounting to 80,000 men. An English newspaper, *Al Moghreb-al-Akss*, several in French and Spanish and a German paper, are published at Tangier. There are three capitals, of which Fez, population 120,000, is the seat of government, and Morocco (Marrakesh), 50,000,

is the capital of the Moorish Empire; and Mequinez, 56,000.

	1907.	1908.
Imports	£2,692,325	£3,050,814
Exports	1,947,226	2,484,670

Chancellor, H. N. Brouwer, 2 Stevenage Road, Bishop's Park, S.W.
Consul-Gen., H. S. J. Maas, 12 Blomfield St., E.C.
A maritime Kingdom of Central Europe, situate on the North Sea, in lat. 50° 46'–53° 34' N. and long. 3° 22'–7° 14' E., consisting of 11 provinces, and containing a total area of 12,582 square miles, with a population, on Dec. 31, 1906, of 5,672,237. The majority, about three-fifths, belong to the

several Reformed Churches; and the remainder are Roman Catholics, with a small number of Jews, mainly in large towns such as Amsterdam, where there are about 70,000. The land is generally flat and low, intersected by numerous canals and connecting rivers—in fact, a network of water courses. The principal rivers are the Rhine, Maas, and Yssel, with the mouths of the Schelde. The chief native products are herrings and other fish, cattle, horses, swine, sheep, poultry, eggs, seeds, potatoes, oats, rye, wheat, barley, beans, peas, buckwheat, beetroot, chicory, flax, hemp, tobacco, and dairy produce. The principal manufactures are shipping, bricks, margarine, cocoa, chocolate, linen, rich damasks, cottons, woollens, cigars and other manufactured tobacco, candles, confectionery, earthenware and pottery, chemical and pharmaceutical products, sugar, printing, bicycles and automobiles, boots and shoes, starch, potato flour, engines, metal substances, oils, beer, "geneva," and other liquors. Diamond-cutting employs numerous hands in Amsterdam.

Communications.—There are 3,125 kilometres of railway open (31 Dec., 1907), and 34,369 kilometres of telegraph. The mercantile marine, on the 31st Dec., 1905, consisted of 271 steamers, tonnage 1,009,746 cubic metres, and 479 sailing vessels (170,524 cubic metres), employing 10,198 men on 31 Dec., 1905.

Defence (for Army, see p. 667). The royal Navy consisted, on July 1, 1908, of 109 vessels (8 of them ironclads, 7 protected cruisers, 15 coast and harbour defence vessels, 3 river gunboats, 45 torpedo-boats (6 for the colonies), 20 special service vessels and 11 for special service in the colonies).

Education (see p. 666).

Trade and Commerce.—Holland figures largely in the trade returns of this country, a quarter of the value of which is represented by agricultural produce, but much of the merchandise sent to Holland was for distribution in Germany and other parts. The following are the *Board of Trade* figures for imports from the United Kingdom in the year 1908:—

Clotheshouse	£120,267	Machinery	£610,200
Chemical products	250,560	Metals	1,569,870
Coal, coke, & fuel	1,221,811	Oil	353,744
Corn and grain	236,653	Oilcloth	126,125
Cotton yarn	1,684,676	Ships	781,162
Cotton manufactures	934,022	Wool	198,269
Grease, &c.	238,489	Woolen manufactures	493,463
Horses	128,099	Woolen yarn	122,635
Leather	169,128		

The exports* to the U.K. for 1908 stand at the following amounts in *florins* in the Netherlands Government return:—

Butter	fl. 22,653,793	Glass manufactures, &c.	fl. 8,195,627
Cheese	5,098,580	Hides & leather	4,839,281
Chemical manfs.	3,382,507	Iron & steel, &c., excepting ore.	75,091,702
China, &c.	258,790	Margarine	33,206,605
Cocoa, butter & chocolate	3,275,934	Mutton & pork	17,352,390
Cotton manfs.	22,866,050	Painters' colours, &c.	490,275
Dye stuffs, &c.	19,479,544	Paper	50,195,482
Farinaceous substances (bread-stuffs)	17,425,723	Margarine	33,206,605
Fish, including oysters, mussels, shrimps, and lobsters	3,284,437	Tobacco	800,480
		Mercery, including toys	5,446,540
		Wool manufactures	3,513,880
		Yeast	2,700,850

* In compiling this statement the classification followed is that obtaining in the British *Board of Trade* returns, except that "White Lead" is classed under "Dye Stuffs" and not under "Painters' colours."

DEPENDENCIES.—The Dutch possessions in the EAST INDIES are very considerable, comprising the whole of the SUNDIA ISLANDS, with the exception of a small portion of Borneo and Eastern Timor, together with WESTERN NEW GUINEA, with an area of 738,000 square miles, and a population (1905) of 37,875,400, of whom as many as 20,008,000 live in the islands of Java and Madura. JAVA and MADURA (customs receipts, 1909, £1,318,708) produce a sufficient supply of food for a dense population, besides furnishing sugar, tobacco, tea, coffee and other products for exportation to Europe. The "outlying" islands are frequently administered by their own princes, subject to the directions of a Dutch Resident. There is a colonial army of 1,396 officers and 25,183 men. The colonial revenue or 1909 was estimated at £15,128,343, and was largely derived from the sale of coffee, salt, bark, and tin; whilst the estimated

expenditure] was £16,161,549. The exports, in addition to the above, include also tobacco, indigo, gums, and spices, and amounted in 1907, for Java, Madura, and the other outlying islands, to £28,962,552, while the imports for the same year amounted to £19,387,166.

In South America the colony of SURINAM, or Dutch Guiana (imports, 1907, £313,800; exports, £257,662), embraces 46,072 square miles and contains 84,113 inhabitants; and in the West Indies, CURAÇAO (imports, £170,493; exports, £19,680; population 30,883) and five other small islands belong to Holland, having an area of 436 square miles, with a population of 53,065.

	1906.	1907.

Imports from U.K.	2,794,514	4,011,602

NICARAGUA, REPUBLIC OF.

President, José Santos Zelaya, born 1852, first elected June, 1893; re-elected 1906 for 6 years.

Minister in London, Gustavo Gomez.

The largest State of Central America, with a long seaboard on both the Atlantic and Pacific Oceans, situate between 9° 45'—15° N. lat. and 83° 40'—87° 38' W. long., containing an area of 51,660 English square miles, including a large portion of the Mosquito Territory, and a population of about 600,000 (1906), of whom about three-quarters are mixed blood and the rest Indians, besides the Mosquitos, who are mostly in a savage state. There are 172 miles of railway open, and about 250 miles under contemplation, with 1,591 miles of telegraph, connected with the Pacific cable from Mexico to Peru. A ship canal to connect the Pacific with the Atlantic was commenced in Oct., 1890, but the company collapsed in 1899; in 1899 a new company obtained the concession, but failed to comply with the terms obtained, and the concession was revoked in August, 1900. The canal, which had been begun in 1890, is now almost entirely filled up.

	1906.
Public revenue	£1,335,000

Managua—Consul, A. J. Martin

Corinto—Consular Agent, Henry Palazzo.

Greytown—Consul, Herbert F. Bingham.

Bluefields—Vice-Consul,

Distant 5,800 miles; transit, 25 days.

* In May, 1909, the Nicaraguan Government obtained a foreign loan of £1,250,000 issuing Gold Bonds with interest at 6 per cent. Of the product of the sale of these Gold Bonds, they are to pay of the English Loan of 1886 of about £245,000 and the American Loan of 1904 of £200,000. The sum of £450,000 is to be set aside for the construction of the new railroad from the Lake of Granada to Monkey Point on the Atlantic seaboard, about 120 miles.

NORWAY, KINGDOM OF.

King, Haakon VII., second son of the King of Denmark, born 3 Aug., 1872, accepted the Crown 18 Nov., 1905, married 1896 H.R.H. Princess Maud (b. 26 Nov. 1869), daughter of King Edward VII.

Heir-Apparent, Olav, Crown Prince, b. 2 July, 1903.

President of the Council of Ministers, Minister of State and Chief of the Ministry for Finance and Customs, G. Knudsen.

Defence, Col. A. G. Spørck.

State Secretary, N. Hesselberg.

Minister in London, Johannes Irgens.

Offices of Legation, 63 Eaton Square, S.W.

Secretary of Legation, E. Huitfeldt, 25 Harrington Gardens, S.W.

Consul-General, H. A. W. Eckell, 22 Great St. Helen's, E.C.

Vice-Consul, H. L. Bråkstad.

Norway, an independent kingdom, founded in 872 (fundamental law of 17 May, 1814), was united with Sweden under the same King from 4 Nov., 1814, to 7 June, 1905, when the union was dissolved. The Parliament of 123 members is called the "Storting," which is divided into two sections, chosen by itself to discuss projected Bills, called "Odelsling" and "Lagting." Norway, the western and northern portion of the Scandinavian peninsula, is about 1,200 miles in length, its greatest width about 250 miles. It is divided into 20 provinces, or amts, and comprises an area of 124,130 sq. miles with a population (1909) of 2,358,000. The coast-line is extensive, deeply indented with numerous fiords, and fringed with an immense number of rocky islands. The surface is mountainous, consisting of elevated and barren tablelands, separated by deep and narrow valleys. The cultivated area is about one-thirtieth part of the country; forests cover nearly one-fourth; the rest consists of highland pastures or uninhabitable mountains. Agriculture, though pursued with some vigour of late, is unable to furnish sufficient produce for home consumption; hence it has been necessary to import considerable quantities of corn, meat, and pork. The fisheries give employment to a large part of the population throughout the year. The most important are cod and herring; the exports of these with other sea-products and fish-oil were valued at 62,169,000 kroner* in 1908. The mineral products are of late increasing. Timber-dressing, mechanical engineering, textile manufactures, ship-building, and pulp-making are the principal departments of Norwegian industry. The exports of produce of the forests were valued at 75,465,000 kroner in 1908, the value of wood-pulp alone being 34,573,000 kroner. The imports consist chiefly of the necessary articles of consumption. The chief exports consist of timber, matches, fish, oil, and other products of the fisheries, pulp, paper, skins and furs, nails, minerals, stone, ice, calcium carbide, condensed milk, butter, margarine, tinned goods, &c. The

* 18 kroner = 1 £.

principal domestic exports from Norway to the United Kingdom in 1908 were paper and paper-making materials, timber, fish, and condensed milk; and the principal domestic imports from the United Kingdom in 1908 were coal, steamships, Manchester goods, metals, and woollens.

Defence (for Army, see p. 667). The Navy consists of 4 ironclads, 2 coast defence monitors, 38 torpedo vessels, 11 gunboats, 1 t.b.d., 1 submarine, and a few smaller vessels.

Education (see p. 669).

Communications.—The total length of railways open in 1909 was 1,803 miles, of which 293 miles were private lines. The length of telegraphs and telephones belonging to the State in June, 1909, was 11,725 miles. The mercantile marine, 31 Dec., 1908, consisted of 8,550 vessels, of 1,577,659 tons.

OMAN.

Sultan, or Sovereign, Seyyid Feysal bin Turki,

G.C.I.E., born 1864, suc. 4 June, 1888.

† Including loans, &c.

‡ At the end of the fiscal year.

Omān (area 81,000 sq. miles, pop. 400,000) is a Mohammedan State in N.E. Arabia with a coast-line of about 1,500 miles along the Persian Gulf, the Gulf of Omān, and the Arabian Sea from El-Katar to Ras Saïr. The country, much of which is arid and desert, attains in Jebel Akhdar an elevation of 10,000 feet. The rainfall averages only about 5 inches annually. Among the Bedouins the authority of the Sultan is nominally recognised, but in the interior his authority is slight, and trade is hampered by tribal warfare and robbery. The population is chiefly Arab, but includes also a considerable foreign element—Indians, Persians, Baluchis and Swahili negroes. The Sultan is in treaty relations with, and subsidised by, the Government of India, who have a political agent at his court. A joint Anglo-French declaration of 1862 guarantees his independence. Since 1798 the relations between Muscat and England have been friendly, and nine treaties and conventions have been made. British warships have upheld the Sultan's authority against rebellious tribesmen. The Sultan is pledged not to cede territory to any Power but the British Government. Omān has no independent coinage except copper pice; the Indian rupee is the chief currency at Muscat and the Maria Theresa dollar in the interior. Muscat, the capital, with its commercial suburb of Muttra (pop. 30,000), possesses the only good harbour, and has a considerable trade, amounting in 1907-8 to £939,500. About 76 per cent. of the foreign trade is with England and India, and 86 per cent. of the shipping is British. Indians (who numbered 1,300 in 1903) do most of the business, Bombay serving as an *entrepôt*. Dates, the staple food product, are the chief export, and rice, arms, sugar, petroleum, coffee, cotton and silk goods the chief imports. The imports from the United Kingdom were about £103,000 in 1907-8. An import duty of 5 per cent. is levied. There are four British steamship lines and a weekly mail service to Karachi and Bombay, and there are also German and Russian steamship services with Europe. There is a cable to India via Jask.

British Consul and Political Agent, Capt. F. McConaghey, I.A.

Transit, 18 to 20 days.

PANAMA, REPUBLIC OF.

President, José Domingo de Obaldia, born 1845, assumed office Oct. 1, 1908, for four years.

Vice-President, Dr. Carlos A. Mendoza.

Secretary of Government and Justice, Ramon M. Valdes.

Foreign Affairs, Samuel Lewis.

Treasury, Carlos A. Mendoza.

Public Instruction, Eusebio A. Morales.

Public Works, José E. Lefevre.

Minister in London, Ricardo M. Arango, 16 St. Helen's Place, E.C.

Consul General, C. R. Zachrisson, 35 Chapel Walk, Liverpool. (Vice-Consul, J. B. Chevalier.)

Consul at Manchester, F. A. Cortez-Leigh.

One of the nine Departments of Colombia revolted in Nov. 1903, and established a separate Government. A treaty was concluded with the United States which guarantees the independence of the Republic, and also paid ten millions of dollars, in return for which Panama grants to the United States, in perpetuity, a zone of land for the construction and operation of a canal, of the width of ten miles, extending to the

distance of five miles on each side, with sovereign rights within the strip. A new port has been established at Cristobal, in the Atlantic, and Port Ancon, on the Pacific, is also administered by American officials and laws. The area of the Republic is 31,890 square miles, the population (1904) about 330,000. There are 165 primary schools, at which 9,128 children attend; the present system of public instruction is to be thoroughly reorganised and reformed. The once famous pearl-fisheries in the Gulf of Panama yield now but little, but other beds are being worked along the North coast. The prosperity of the State depends upon its favourable geographical position, which facilitates transit from the Atlantic to the Pacific. The distance from Limon Bay to Panama on the latter is only 35 miles, and the highest elevation of the watershed does not exceed 278 feet. Until 1896 Panama and Colon were free ports. A general import duty is now levied at the rate of 10 per cent. gold on the value of all imports, except liquors, which are provided for separately. A special agreement between the U.S. and Panama was signed in December, 1904, establishing free trade between the Republic and the Canal Zone. Merchandise entering the zone for consumption pays import dues to the Panama Government identical with those levied on the importations into the Republic. All supplies imported for account of the Isthmian Canal Commission are exempted from all taxation. A railway 47 miles in length (fare, first class \$2.40, second class \$1.50) (luggage 2 cents a lb.) (U.S. gold) joins the two oceans. The imports in 1908 were valued at £1,561,362 (from U.S., £891,956, exclusive of canal materials; from U.K., £320,710; from Germany, £158,716), and consisted chiefly of manufactured goods and foodstuffs. The exports (principally gold dust and bars, hides, rubber, mother-of-pearl shells, cabinet woods, bananas, and medicinal plants) at £351,427.

The Panama Canal.—A ship canal was commenced in 1879 by Ferdinand de Lesseps, the diggings being begun in 1881, but in March, 1889, work ceased owing to lack of funds. A French syndicate then assumed charge of the property and continued the works at the Culebra cut until the sale of the property to the U.S. for forty millions of dollars in 1904. A lock canal has been definitely decided upon, in 85 ft. level, with 6 locks; 3 will be located at Gatun, 1 at Pedro Miguel, and 2 at Miraflores, all in duplicate. With the work already done it is estimated it can be completed by 1915. Total length will be about 46 miles, and at surface of water 300 to 500 ft.; depth, 40 ft.

Panama—Min. Resident and Con. Gen., Claude C. Mallet, C.M.G. (also to Costa Rica) £1,320
Vice-Consul, D. F. S. Pilliter £300 to 500
Bocas del Toro—Cons. Agent, P. P. Hamilton (acting).

Colon—Vice-Cons., H. O. Chalkley £300 to 500
 Panama, 5,466 miles; transit from Liverpool direct every ten days, 17 days, or from Southampton fortnightly, 18 days; *via* New York 14 days.

PARAGUAY, REPUBLIC OF.

President, Emiliano Gonzalez Navero, assumed office 5 July 1908 (for 4 years) £1,900
Foreign Secretary, Manuel Gondra.
Minister Plenipotentiary to London and Paris, Señor Eusebio Machain.

Consul-General in London, Alfred James, 18, Eldon Street, E.C.

Consul in London, (vacant).

An inland State of South America, situate between 22° 4'—27° 30' S. lat. and 54° 32'—61° 20' W. long. Its area is computed at 145,400 square miles, enclosed within the rivers Parana and Paraguay; and contains a population (1900) of about 635,600. The chief crops are maize, rice, coffee, manioc, tobacco, sugar-cane, and oranges. Among its principal trees are several species of dye-wood, and many yielding juices or gums, as the caoutchouc or india-rubber; the Quebracho, used for tanning, and the "Yerba Maté," or Paraguay tea-plant; there are also hardwood and other timber trees and medicinal plants. Stock-raising is the chief industry. The chief articles of export are oranges, hides, tobacco, yerba maté, and timber. The army numbers about 40,000 men; there is no navy. A railway, 155 miles in length, belongs to an English company.

Do. for Scotland, A. C. C. Schultz.

Persia—called by the natives Irán—comprises 630,000 square miles. The population, widely scattered, is estimated at 10,000,000. By the Anglo-Russian Convention of Aug., 1907, Great Britain and Russia mutually engaged to respect the integrity and independence of Persia, while marking out certain regions in S.E. and N.W. Persia respectively in which each had, for geographical and economic reasons, special interests. Russia engaged not to seek political or commercial concessions (for railways, mines, &c.) beyond a line running from the Afghan frontier *via* Gazik, Birjand, and Kerman to Bunder Abbas, while Great Britain made a like engagement as regards a line running from Kasr-i-Shirin *via* Isfahan, Yazd, and Kakhk to a point on the frontier at the intersection of the Russian and Afghan frontiers. Russia did not deny the special interests of England in the Persian Gulf, the result of British action in those waters for over 100 years. The ill-defined western frontier of Persia marches with Turkey, with which there have been serious boundary disputes since 1906.

Persia is mostly a bare and arid table-land, encircled, except on the east, by mountains, those in the north rising to 18,700 ft. The central and eastern portion is a vast salt desert. The only navigable river is the Karun, which was opened to foreign navigation from Moha-

merah to Ahwaz in 1888. Messrs. Lynch Bros., aided by a British-Indian subsidy, run a fortnightly steamer to Ahwaz, whence there is a new road to Isfahan made by British capital. The Upper Karun, navigable as far as Shuster, is reserved to the Persian flag. There is one (Belgian) railway of eight miles running south from Tehran. Most of the telegraphs are managed by the Indo-European Telegraph Department of the Government of India. The main telegraph is from Julfa, on the Russian frontier, to Bushire, whence there is a cable to Bombay. The convention for this telegraph lasts till 1925. A new land telegraph has been constructed by British agency from Karachi (India) *via* Quetta, Robat, Yezd, and Kerman, to Tehran. It is leased to the Persian Government, but maintained by British directors and staff. The chief routes to Persia are those *via* Batoum-Tiflis-Tabriz and Baku-Resht, constructed and controlled by Russians, and closed to non-Russian merchandise, except tea; the Trebizond-Tabriz route, long and costly; the Bunder Abbas route to Kerman, Yezd, and Seistan, liable to robbery; the Bushire-Shiraz-Isfahan route, long and difficult; the Bussorah-Baghdad-Kermanshah route, suited for bulky or heavy goods; and the increasingly popular Mohammerah-Ahwaz-Isfahan route, shorter, cheaper, and better than the Bushire route. Several good cart-roads have been made or are in progress. Travelling is mostly by caravans, and transport by pack-animals. The cost of carriage is, therefore, very heavy. The chief products are cereals, cotton, gums, dried fruits, silk, tobacco, and opium. The minerals (little worked) are salt, iron, coal, copper, lead, sulphur, &c., with turquoises. Oilfields in Southern Persia have been successfully worked by an English company since 1902. The only important manufacture is that of woollen carpets (mostly a domestic industry), but shawls, silks, and cotton fabrics are also produced. There are extensive forests in the north and west. Sheep and goats are numerous, and good wool is produced. The principal towns are Tehran (pop. 210,000), Tabriz (180,000), Isfahan (60,000), Meshed (80,000), Kerman (50,000), Yezd (60,000), and Shiraz (60,000). The Persians are mostly Shiah Muhammadans; but there are many adherents of Babism and Armenian Christians. The laws and popular education are based on the precepts of the Koran. Persia is divided into provinces, of which the principal are under Governors or Governors-General. Owing to increasing popular misery and to discontent with a corrupt and incompetent administration and an extravagant Court, a nationalist movement began in Dec., 1905. In Aug., 1906, the Shah, admitting the need for reforms, granted a Constitution. The *Mejliss* (National Council or Consultative Assembly) consists of 162 representatives of the princes (*kajars*), clergy, nobles, landowners and agriculturists, merchants and tradesmen, who are elected by their peers. The first elections were held in Oct., 1906. A new Cabinet of eight responsible Ministers was formed in Sept., 1907. In Oct., 1907, the Shah signed a new constitution, limiting the sovereign prerogatives and ecclesiastical authority, and granting liberty of conscience, of the person, of education, of the press, of association, and of speech. But he broke his pledges and violently dissolved the *Mejliss*. As a result a fresh nationalist movement sprang up, Tabriz being the centre of revolt. Owing to the vacillation of the Shah and the anarchical state

of affairs, England and Russia made strong representations in favour of the restoration of a constitutional régime. A Russian force eventually crossed the frontier, while the revolutionary bands concentrated on Tehran, which was occupied without much fighting on 13 July, 1909. The Shah was deposed by the National Council, and his son, aged eleven years, appointed to succeed him. Brigandage and disorder are still rife in the provinces. The newly-elected *Mejliss* was opened on Nov. 15. The revenue, estimated at £7,000,000 for 1907-8, is derived from land tax, Crown lands, customs, and lease of monopolies. Foreign trade is developing. The total imports of merchandise into Persia in 1907-8 amounted to 408,000,000 krams, and the exports to 317,000,000 krams. Russia had about 47 per cent. of the imports and 64 per cent. of the exports; the British Empire 41 per cent. of the imports and 12 per cent. of the exports. Turkey and France were the other chief participators. Proximity to the best cultivated and most populous provinces, railways in Transcaspiia, bounties on sugar, &c., and new roads from the frontier, have extended Russia's trade and influence. Persia's trade with Russia is chiefly through ports on the Caspian (on which only Russian vessels are allowed) or by the Trans-Caspian Railway, and with England and British India by way of the Persian Gulf. The sea-borne trade of Persia passes chiefly through the ports of Bushire and Bunder Abbas, and *via* Baghdad. There are several English firms at Bushire, the chief port on the Gulf and an *entrepôt* for trade with Shiraz, Isfahan, and Tehran, and many European business houses at Tehran, now the central exchange and money market, and at Tabriz, the *entrepôt* for European goods coming *via* Trebizond. The shipping of the Persian Gulf is principally British. A subsidised Russian line runs four steamers a year from Odessa, and a German line runs from Hamburg. Persia's chief imports are cotton piece-goods (mainly from England, India, and Russia) and sugar (from Russia, Austria-Hungary and France), with woollen goods, silk goods, cotton yarn, tea, metal wares, gold and silver, petroleum, and indigo. The principal exports are dried fruits, raw cotton, pearls, opium, rice, wool, fish, carpets, and silk cocoons. A new specific tariff on imports and exports was introduced in 1903, when vexatious internal dues were abolished. The customs (as also the post-office) have, since 1900, been managed by European officials. Native dealers are reputed to be dishonest, and legal redress is hard to obtain. The (English) Imperial Bank of Persia has its head office at Tehran, with branches in the chief cities, and issues notes. There are also one Russian and two native banks. A concession for a German bank was granted in 1907. A national bank is to be established. The foreign debt of Persia is about £3,400,000, at 6 per cent., borrowed in 1900 and 1902 from the Russian Banque d'Escompte for 75 years, and irredeemable for 10 years. It is guaranteed by the Russian Government, and secured on the customs.

Exports from United Kingdom, 1908 ... £482,171
Imports into ditto, 1908 289,786

PERU, REPUBLIC OF.

President, Señor Augusto B. Leguía, installed 24 Sept., 1908, for four years.
 Premier and Interior, Rafael Villanueva.
 Foreign Affairs, Meliton E. Porras.
 Justice and Public Instruction, J. Matias Leon.
 Finance and Commerce, Carlos Forero.
 War and Marine, Col. Ernesto Zapata.
 Agriculture and Public Works, David Matto.
 Minister in London (resident in Paris), Don Carlos G. Candamo. (Legation: 104 Victoria St., S. W.).
 Secy., Don R. E. Lembeke; Don E. Leguía.
 Attaché, Don P. E. Caballero.
 Chargé d'Affaires and Consul-Gen., Don Eduardo Lembeke, 104 Victoria Street, S. W.
 Consul at Liverpool, Don Bernardino Codesido.
 Do., Southampton, Carlos G. Estenos.
 Do., Glasgow, Don M. D. Derteano.

Peru is a maritime Republic of South America, situated between $10^{\circ} 31' 29''$ and $19^{\circ} 13'$ S. latitude and between $62^{\circ} 6'$ and $81^{\circ} 20' 45''$ W. The territory between $17^{\circ} 47' 8''$ S. and $19^{\circ} 13'$ S. is still occupied by Chili. The question of the provinces of Tacna and Arica is due to be settled by a plebiscite, which will determine to which of the two countries these territories are to belong, but it has not yet been possible to arrive at an arrangement for carrying out the stipulations of the Treaty of Ancon concerning these two provinces. Peru has a coast line of about 1,300 miles. It is bounded on the north by the republics of Ecuador and Colombia, as the latter claims a territory in the Amazonian basin; on the east by the Brazils and Bolivia, and on the south by Chile and Bolivia. Peru has boundary questions with all the neighbouring republics.

It is customary to estimate the area of Peru at about 500,000 square miles, but if the extreme claims of Peru be taken into consideration, the area is, of course, infinitely larger. The population is estimated at 4,000,000 by the Lima Geographical Society, but no census has been taken since 1876. The country is traversed throughout its length by the Andes, running parallel to the Pacific coast. The coast region is sandy desert, except where watered by transverse mountain streams, but capable of cultivation in the highest degree by irrigation. The valleys running to the coast are very fertile, and the mountains are rich in minerals, among which silver, quicksilver, copper and coal (of inferior quality) are conspicuous; while in the department of Tumbes, along the coast, there are important beds of petroleum. Gold is found in many districts, but especially in the province of Carabaya, where mining on an important scale is carried on. An American syndicate has bought four-fifths of the whole mineral zone of Cerro de Pasco, and many others in neighbouring mining districts, and has constructed a railway from Oroya to Cerro de Pasco. The eastern provinces are of vast extent and fertility, with a tropical climate. The medicinal productions of that region are of great value, comprising cinchona, or Peruvian bark (of which little is now exported), sarsaparilla, copaiba, &c. India-rubber is an important product of the country. Coca, cocoa, and coffee are grown on a small scale. Sugar is the staple agricultural article of the country. The Lobos and other islands on the Pacific coast provide the guano.

The total length of the railways open (1908) was 1,471 miles, and extensions are contemplated from Sicani to Cuzco and from Oroya to Juaja. There is also steam navigation on that lake and the River Desaguadero. The eastern rivers are also navigated to some extent by steam craft. Wireless telegraphy stations have been established in many places, and several are contemplated in the near future.

The Navy consists of six vessels, all in good condition, including two swift cruisers built at Barrow. The principal imports are coal, cotton, wool, linen, and silk goods, drugs, earthen and stone wares, machinery, explosives, metals and manufactures thereof, oils, stationery, paper manufactures, timber, and wheat. The chief exports are sugar, copper and other ores, guano, gold, silver, cotton, llama and alpaca wool, rubber, and cocaine. A small quantity of coffee is also exported.

For Education, see pp. 669-670.

Peru has no foreign debt. An arrangement was concluded in January, 1890, by the Peruvian Government for the cancelling of the external debt (which amounted, with arrears of interest, to over £50,000,000), under which the State railways, the guano up to 2,000,000 tons, certain rights in the Cerro de Pasco district, and vast tracts of land are vested in the Peruvian Corporation. The disputes between the Government and the Corporation were settled in June, 1907. A loan of £600,000 has been concluded with the German Bank, guaranteed by the salt tax.

The total amount of the capital of the interest-bearing funded debt is £2,660,645, bearing interest at the rate of 1 per cent. Claims of every kind upon the Government are being converted into a non interest bearing funded debt (called *Deuda de Amortización*), redeemed at a low rate, which fluctuates. On 30 June, 1907, the capital of this debt was £2,171,165.

Peru has now a gold standard. Exchange fluctuates at about 24d. to the \$.

	1907.	1908.

Commercial Attaché & Consul-General, J. Batalha Reis, M.V.O.

Financial Agent, B. Perestrello.

The most westerly Kingdom of Europe, and a part of the great Iberian Peninsula; it lies in 37° 42' 8' N. lat. and 6° 15' 9' 30' W. long., being 360 miles in length from N. to S., and averaging about 100 in breadth from E. to W. Continental Portugal contains an area of 34,254 square miles, with a population in 1900 of 5,016,267, exclusive of the colonies. The Azores and Madeira (1,237 square miles, pop. 406,865) form part of the kingdom, which thus has a population of 5,423,132. The chief products are wheat, barley, oats, maize, flax, hemp, and the vine in elevated tracts; in the lowlands, rice, olives, oranges, lemons, citrons, figs, and almonds. There are extensive forests of oak, chestnut, sea-pine, and cork, the cultivation of the vine and the olive being among the chief branches of industry; the rich red wine known to us as "port" is shipped from Oporto. Its mineral products are important—copper, lead, tin, antimony, coal, manganese, iron, slate, and bay-salt, which last, from its hardness and purity, is in demand. Its

manufactures consist of gloves, silk, woollen, linen, and cotton fabrics, metal and earthenware goods, tobacco, cigars, &c. The exports consist to the extent of 50 per cent. of wine, which is the chief industrial product of the country; others are cork, cattle, copper-ore, fruits, oil, sardines and salt. The imports are manufactured goods—hardware, cotton and woollen stuffs, machinery, wheat, sugar, dried fish, coal, &c. The commercial marine (1906) numbered 630 steam and sailing vessels, of which only 17 steam and 5 sailing vessels exceeded 500 gross tonnage. Railways 1,504 miles in extent were open for traffic in 1906, and there are 5,301 miles of telegraph wire in 1902. For many years the national income has been considerably less than the expenditure; this deficiency has added to the national debt.

Defence (for Army, see p. 667). The Navy consists of 39 steamers and 16 sailing vessels, many scarcely seaworthy, and about 4,958 sailors.

Education (see p. 670).

1907-1908. 1908-1909.

Lisbon, distance 1,110 miles; transit, 50 hours.

COLONIES AND DEPENDENCIES.

MADRID (imports, 1906, £454,506; exports, £232,840) and the AZORES are an integral part of Portugal proper; the CAPE VERDE ISLANDS, off the Cape of that name in Senegambia, consist of St. Antonio, St. Nicolas, Fogo, Santiago, Boavista, Sal, and some smaller islands, having a total area of 1,490 square miles, and a population of about 150,000; the capital is Porto Praia. In West Africa a portion of the GUINEA COAST, with the BISSAGOS ISLANDS, was acquired in 1885; the capital is Cacheo, and the territory has an area of 14,370 square miles with about 1,500,000 inhabitants. In the Gulf of Guinea the two islands of St. THOMAS (direct and transit trade with mother country, 1904, £1,715,000; principal export, cocoa) and PRINCE were obtained in 1879; area 420 square miles (population about 40,000). Between the French Congo and the Free State are the territories of LANDANA and CABENDA, area about 2,030 square miles (population 30,000); and extending from the left bank of the Congo river to the right bank of the Cumene river is the vast province of ANGOLA, *Gov.-Gen.*, Maj. H. de Paiva Conceiro (direct and transit trade with mother country, 1904, £2,163,000; principal export, rubber), with about 1,350 miles of coast-line and an area of 510,670 square miles (population about 4,000,000). The capital of Angola is St. Paul de Loanda; railways, 300 miles open, and about 250 miles of telegraph wires. LORENZO MARQUES and MOZAMBIQUE together constitute PORTUGUESE EAST AFRICA, *Gov.-Gen.*, Col. Freire d'Andrade; area about 297,750 square miles, population 2,000,000. In the southern province are the ports of Lorenzo Marques (Delagoa Bay) and Beira, and in the northern, Quilimane, Mozambique, and Ibo: the exports of Portuguese East Africa amounting to £1,500,000 in 1903, and the imports to £750,000. Parts of Mozambique are leased to the Mozambique Company and to the Nyassa Company; Railways—Delagoa Bay Railway from Lorenzo Marques north-west to join the Transvaal system on the frontier, about 60 miles, and the Beira Railway, from Beira to Umtali on the borders of Rhodesia, about 200 miles. PORTUGUESE INDIA.—The territory of GOA contains an area of 1,301 sq. miles, and a population of 475,513 (1902). The city of NOVA GOA (New Goa or Panjim), capital of that territory, and of all the Portuguese possessions east of the Cape of Good Hope, is situated on the Malabar Coast, about 265 miles S.S.E. of Bombay. Old Goa, five or six miles inland, has fallen into decay, but is still remarkable for its cathedral and ancient buildings. The Portuguese West of India Railway (51 miles) connects the rising port of Mormugao with the Madras and Southern Mahratta Railway in British India. The chief products are rice, coco-nuts, and salt. The direct foreign trade is small, but there is a large transit trade with British India. Commerce is chiefly in the hands of natives of British India. The principal imports are cotton piece-goods, rice, kero-

sene, sugar, tobacco, &c.; the principal exports are coco-nuts, manganese ore, salt, betel-nuts, &c. The other Portuguese possessions in India are DAMAUN (area 149 sq. miles, pop. 41,671), to the north of Bombay; and DIU, a town and fort on an island off the Gujarat coast (pop. 14,614, area 20 sq. miles). Of the total population (531,798) of Portuguese India, 262,648 are Catholics, 260,144 Hindus, and 8,431 Mohammedans. The revenue of the Portuguese possessions amounts to about £155,000.

Governor-General, H.E. Señor Horta e Costa.

Portugal also possesses rather more than half the island of TIMOR in the East Indian Archipelago and MACAO, an island near the mouth of the Canton river.

Imports from U.K.....	1905. £3,518,548	1906. £3,893,046
Exports to U.K.	341,208	394,777

RUMANIA.

King, Charles, second son of Prince Charles Antoine of Hohenzollern-Sigmaringen, born 20 April, 1839 (O.S.); elected Hereditary Prince 26 Mar., 1866; confirmed 24 Oct., 1866; proclaimed King by vote of both Chambers, 26 March; crowned 22 May, 1881; mar. 15 Nov., 1869, Elizabeth (Carmen-Sylvia), daughter of the late Prince Hermann von Wied, born 29 Dec., 1843.

Heir Presumptive (Nephew), Prince Ferdinand von Hohenzollern, born 24 August, 1865; proclaimed Heir Presumptive 26 March, 1889; mar. 10 January, 1893, to Princess Marie of Edinburgh, and has issue Carol, b. 15 (28) October, 1893, Elizabeth, b. 1894, Marie, b. 1900, and Nicolas, b. 5 (18) August, 1903.

Consul-General, Alfred Stead, 49, Parliament Street, S.W.

The Kingdom of Rumania consists of the Moldo-Wallachian provinces formerly belonging to Turkey, but which by the Treaty of Berlin, 13 July, 1878, were recognised as an independent State, and the territory of the Dobruja added to them. On the 26th March, 1881, Rumania was raised to a Kingdom. The entire area is 50,702 square miles, with a population of about 6,700,000. The dominating religion is that of the Greek Church (5,200,000); Roman Catholics, 114,200; Protestants, 13,800; Jews, 400,000. The soil is among the richest in Europe, and, but for the fearful summer droughts, would be also the most productive. The climate is extreme, for summer heats and winter colds are intense. The agricultural produce consists of wheat, maize, millet, barley, rye, beans, and peas. Vines and fruits are abundant. The forests are of great extent and importance, but the riches of the country consist mainly in its cattle and sheep.

Minerals and precious metals are said to be abundant, but only salt and petroleum are obtained. The imports are chiefly the manufactured goods of Western Europe; the exports consist principally of wheat, barley, maize, petroleum (over £1,000,000 in 1906), rock-salt, spirits, hides, wood and cattle. The total length of railways is 2,295 miles (1904), and there are 223 telegraph offices with 9,915 miles of wire.

An International Commission, created by the Treaty of Paris, 1856, and whose powers were enlarged by the Treaty of Berlin, 1878, has its seat at Galatz, and exercises sovereign powers over the navigation of the Danube. Its income, principally derived from shipping dues, amounts to about £60,000 per annum. On November 10, 1892, a large dock was opened at Ibraila, and in 1896 a canal through the "Iron Gates" rendered that hitherto dangerous part perfectly navigable.

Defence (for Army, see p. 667). There is a small navy of 45 vessels.

Education (see p. 670).

THE RUSSIAN EMPIRE.

Tsar, Nicholas II., Emperor of all the Russias, b. 6 (19) May, 1868; suc. 20 Oct (1 Nov.), 1894; m. 14 (26) Nov., 1894, Princess Alix of Hesse (Alexandra Feodorovna), grand-daughter of Queen Victoria, and has issue a son, Alexis Nicholaievitch, b. 30 July (12 Aug.), 1904, and 4 daughters, Olga, b. 15 (27) Nov., 1895, Tatiana, b. 10 (22) June, 1897, Marie, b. 26 June (8 July), 1899, and Anastasia, b. 18 June (1 July), 1901. Her Apparent, Grand Duke Alexis Nicholaievitch (Cesarevitch), b. 30 July (12 Aug.), 1904. President of the Council of the Empire, M. Akimov. Minister of Imperial Household, General Baron de Fredericks. President of the Council of Ministers, M. Stolypine (also Minister of Interior). Foreign Affairs, M. Iswolsky. Finance, M. Kokovtsov. Public Instruction, M. Schwarz. Public Works, M. Rukhlhoff. War, General Sukhomlinov. Marine, Vice-Admiral Voyevodsky. Justice, M. Stecheglovitoff. Commerce, M. Müller. Agriculture and Crown Domains, A. Krivosheyen.

Ambassador to France, M. Nelidoff; Germany, Count Osten-Sacken; Austria-Hungary, Prince Urusoff; Italy, Prince Dolgorouky; Turkey, M. Tcharykof; U.S.A., Baron Rosen.

Ambassador in London, Count Benckendorff, Chesham House, S.W. Councillor, M. de Etter.

1st Secretary, M. Sevastopoulo.

2nd Secretary, Prince Sviatopolk-Mirski, M. B. de Siebert.

Attachés, Baron Meyendorff; Count Alfred Tyszkiewicz.

Military Attaché, General Yermoloff.

Naval Attaché, Capt. Koerber.

Agent of Ministry of Finances, M. Rutkowski.

Consul-General Baron A. de Heyking.

An Empire comprising one-sixth of the territorial surface of the globe, stretching over a large portion of its northern regions, and approaching very nearly in extent to the dominion under British rule. In addition to Russia in Europe (exclusive of the Caucasus), situate between lat. 44° 28'—76° 33' N. and 17° 40'—64° 33' E. long., and embracing more than half of that continent, it comprehends one-third of Asia, and until 1867 included also a large section of North America. The empire comprises:

European Russia:	English Sq. Miles.	Population 1/4 Jan. 1908.*
Russia Proper (50 Provs.)	1,859,195	113,841,000
Poland (10 Provs.)	49,084	11,360,900
Finland (Grand Duchy)	144,211	2,968,600
Asiatic Russia:		
Caucasia (11 Provs.)	181,550	10,908,400
Siberia (8 Provs. and Regions)	4,817,687	7,049,200
Central Asia (10 Provs. and Regions)	1,327,317	9,365,200

(or 19,099,886·9 sq. versts) 8,379,044 155,433,300

Of the total population 77,666,400 were men and 77,735,900 women, and the population is 26·8 per square verst in European Russia, 10·8 in Poland, 26·2 in the Caucasus, 0·6 in Siberia, 2·9 in Central Asiatic possessions, 10·3 in Finland, and 8·1 for the whole Empire.*

In the European parts of Russia alone the population increases annually at the rate of nearly a million and a half. The largest towns are St. Petersburg (1,678,000), Moscow (1,173,427), Warsaw (756,426), Odessa (449,672), Lodz (351,570), Kieff (329,000), Riga (256,197), Kharkoff (197,405), Vilna (162,633), Saratov (143,431), Kazan (143,707), Ekaterinoslav (135,552), Rostoff (119,886), Astrakhan (121,580), Tula (109,279), and Kishineff (125,787); whilst Nijni Novgorod, Nikolaieff, Samara and Minsk have populations between 90,000 and 95,000. In Asiatic Russia the Caucasus contains two towns with over 100,000 inhabitants, Baku (179,133) and Tiflis (160,645); Turkestan contains five large towns, Tashkend (156,000), Namangan, Samarkand and Andjian; in Siberia Tomsk, Irkutsk, and Ekaterinburg have each about 50,000 inhabitants. Nijni Novgorod, though small, is a station on the Trans-Siberian Railway, and has annually the largest fair in the world.

Nationalities (1905)*.—The various nationalities were represented about as follows:—Russ, two-thirds of the whole population, or 65·3%; Poles, 6·2%; Lithuanians, 2·4%; Germans, 1·6%;

* Figures taken from the Annual (Official) Publication of Statistics, issued by the Central Statistical Committee of the Ministry of the Interior for the year 1908, and published May, 1909 (St. Petersburg).

Armenians, 0.9%; Jews, 3.9%; Caucasians, 0.9%; Finns, 4.5%; Turco-Tatars, 10.6%; Mongols, 0.4%; various, 2.0%.

Religions (1905).—The established religion of the empire is the Russo-Greek Church, officially called the Orthodox Catholic Faith. According to religions there were:—Orthodox, 69.9%; Mussulman, 10.83%; Roman Catholics, 8.91%; Protestants, 4.85%; Jews, 4.05%; other Christian beliefs, 0.96%; other non-Christian beliefs, 0.50%.

European Russia consists mainly of an immense plain; the Valdai hills in the west rise only to about 1,000 ft., and the Lublin hills in the south-west to about 1,500 ft. On the right bank of Lake Imandra, in the Kola peninsula, is an elevation of 3,300 ft. The Timanski range, in the province of Archangel, rises to about 3,000 ft., and Mount Lajaur-Ort in Finland to about 3,400 ft. In the Crimea and Caucasus various heights are over 4,500 ft., and the Obdorsk and Ural Mountains, which form the borderland between Europe and Asia, rise in many places to between 4,000 and 5,000 ft. In Siberia the principal ranges are the Altai, Sayansk, Baikal, Yablonoi and Verkhoiansk mountains, with a volcanic chain in Kamchatka. In Russian Turkestan are portions of the Thian Shan range, and in Bokhara are the Pamirs, the "Roof of the World," and in all these ranges are heights of over 5,000 ft. The principal rivers are the Volga, Ural, Dnieper, Dniester, Don, Dvina, Dnna, and Neva. The Volga is the largest river in Europe, and is navigable almost to its source. In Siberia, the Ob, Yenisei, Lena, and Amur are each larger than the Volga, with many important tributaries. The river Amur, dividing Manchuria from Eastern Siberia, is navigable from its mouth to Chita, in the Trans-Baikal province, by shallow draught steamers, and is of importance, together with the Trans-Siberian Railway, in spreading Russian influence in the outlying portions of the Chinese Empire.

Agriculture.—A great portion of Russia is unfit for cultivation; in the north the tundras are almost constantly frozen, but in a short summer provide good pasture and certain berries fit for human food; in the south, round the head of the Caspian Sea, is an immense sandy desert steppe; whilst some of the interior provinces; to the extent of about 450,000,000 acres) and nearly the whole of Siberia are clothed with forests, in which the fir, pine, birch, oak, lime, maple and ash predominate. The country between the Baltic and Black Sea, however, is eminently fertile, producing abundance of grain. †The chief cereals raised in 1908 were rye (winter-sown, 20,172,709 tons; spring-sown, 347,355 tons), wheat (winter, 3,022,007 tons; spring, 11,297,468 tons), barley (8,104,064 tons), oats (13,477,355 tons), millet (2,180,111 tons), maize (1,534,548 tons), buckwheat (980,549 tons); making a total, with other crops, of about 49,000,000 tons. Hemp and flax are extensively cultivated, and of late years potatoes (29,010,855 tons in 1908) and tobacco (100,000 tons in 1907).

Minerals.—The Obdorsk and Ural Mountains contain very great mineral riches, and, with the Altai range, are the principal seat of mining and metallic industry, producing gold, platinum, copper, iron of very superior quality, rock-salt, marble, and kaolin, or china-clay. Silver, gold, and lead are also obtained in large quantities

from the mines in the Altai Mountains. Russia is now the largest producer of petroleum in the world, the output amounting to 410,000,000 poods (of 36 lbs.) in 1905. An immense bed of coal, both steam and anthracite, and apparently inexhaustible, has been discovered in the basin of the Donetz (between the rivers Donetz and Dnieper). †The coal output for the whole of Russia in 1906 was 21,000,000 tons; other mineral products in 1907 were pig iron (4,227,419 tons); gold, 1904 (1,193,936 oz.); platinum (306 poods = 6 tons, being 95 per cent. of the world's output), steel and rails (1906, 2,000,000 tons), copper (14,401,000 pounds in 1907), and quicksilver (35 tons in 1904).

Ports.—The principal ports are Petersburg, the naval depot and fortress Kronstadt, Narva, Riga, Libau, Pernau and Vindau (Baltic), Hango (Gulf of Bothnia), Revel, Helsingfors and Wiborg (Gulf of Finland), Archangel and Ekaterinsk (Arctic and White Seas), Odessa, Nicolaieff, Sevastopol, Neva-Rossiisk, Berdiansk, and Batoum, Taganrog, Mariupol, Rostoffand Kerch (Black Sea and Sea of Azov), Astrakhan, Derbent and Baku (Caspian Sea), and Nicolaieffsk, Vladivostok, and Petropaulovsk in Kamchatka (Pacific).

Trade and Commerce.—Exports in 1908 were estimated at £8,996,019, and exhibits a decrease equal to 5.4% as compared with 1907, but the imports have increased by 6.5%. The chief imports are cotton, tea, and other colonial produce, iron and machinery, wool, wine, fruits and vegetables, oil, &c. The chief exports are grain (56 per cent.), raw and dressed flax, linseed, timber, hides and skins, hemp, tallow, wool, spirits, tow and bristles. †The trade of Russia in 1908 was divided among the principal commercial nations as follows (in millions of £ sterling):—

Imports from:—		Exports to:—	
	1907.		1908.
Germany.....	32.7	33.8	30.5
U.K.....	12.0	12.8	24.0
U.S.....	5.6	7.9	0.8
France.....	3.0	3.7	7.7
Finland.....	—	3.0	—
Austria-Hungary.....	—	2.6	5.1
			Holland..... 12.0

	1907.	1908.
Imports from U.K. ...	£12,029,894	£12,774,983
Exports to U.K.	24,081,052	23,225,221
Total Imports	£91,300,000	£97,940,578
Total Exports.....	113,900,300	106,246,300

†The chief Russian exports in 1908 to the United Kingdom were:—

Wheat	£1,687,593	Raw and half-	
Barley	2,739,945	manufactured	
Oats	2,228,115	goods	£747,212
Maize	759,787	Naphtha and	
Rye	434,622	products	493,718
Butter	2,473,243	Linseed	Cot. 386
Eggs	2,240,420	Oil Cane	330,700
Timber	4,174,979	Hemp	445,004
Flax	2,325,004	Hides and Skins	238,204

†The chief British imports into Russia in 1908 were:—

Coals and Coke ..	£2,260,155	Machinery	£1,764,333
Cotton yarn	1,689,654	Chemicals	154,510
Tallow	752,611	Herrings	401,581

Defence (for Army, see p. 667). The Navy (for which £10,125,000 was allowed in 1910) consisted of the Baltic Fleet, the Caspian flotilla, and the Black Sea Fleet, there being 17 battle-ships (of which 4 building), 16 cruisers (2 building),

* See footnote on preceding page.

† Figures so marked are from the Annual Consular Report on Russia for 1908.

† Figures so marked are from the Annual Consular Report on Russia for 1908.

73 "squadron" and 81 "numbered" torpedo boats, and other craft. Of these, 10 battleships, 16 cruisers, and 119 torpedo boats were in the Baltic; 12 battleships, 2 cruisers, and 35 torpedo boats in the Black Sea; and 1 transport and 3 steamers in the Caspian. The Navy was manned by 2,442 officers and 52,901 men.

Education (see p. 670).

†*Communications*.—The total length of lines open for traffic in 1908 was over 47,647 miles (28,266 Government, and 13,381 private lines), exclusive of 2,124 miles in Finland, and 1,078 miles of the Eastern China Railway. In 1908 the gross revenue amounted to £58,663,227, for Government railways, and £24,651,403 for private railways. The number of passengers carried was 102,903,971, and goods traffic amounted to 164,215,710 tons.

*There were (1906) 14,340 post-offices, carrying 1,528,574,412 letters, &c. Of telegraphs there were (1906) 7,153 offices, with 300,000 miles of line.

The sea-going commercial marine consisted in 1907 of 687 steamers, with a total tonnage of 720,198, and 672 sailing vessels of 217,713 gross tons; the ocean shipping of the Russian Empire is comparatively insignificant, but the internal (lake and river) shipping is considerable.

Finance.—The main source of revenue is the liquor traffic. The revenue (1907) from the Government spirits monopoly (which has now been introduced practically throughout the Empire) was, gross revenue £71,000,000, and net £51,000,000.

†Budget Revenue, 1909 and 1910 (estimated)—

	1909.	1910.
Ordinary.....	£263,511,000	£269,766,000
Extraordinary.....	181,000	1,064,000
To be raised by Credit operations.....	16,192,000	8,957,000

£279,884,000 £279,787,000

*Budget Expenditure, 1909 and 1910 (estimated)—

	1909.	1910.
Ordinary.....	£266,979,000	£267,021,000
Extraordinary.....	16,915,000	12,766,000

£279,884,000 279,787,000

National Debt.—The National Debt amounted in January, 1908, to £871,206,000 (about). The total of gold in the State Bank at the close of 1907 was £99,400,000, being an increase of £6,200,000 as compared with 1906. On the other hand, the gold deposited by the Bank abroad fell from £31,100,000 at the close of 1906 to £22,400,000 at the close of 1907. In the course of the year (1907) the value of the bank notes in circulation was reduced from £125,700,000 to £121,500,000.

THE GRAND DUCHY OF FINLAND.

Grand Duke, The Emperor of Russia.

Governor-General, General Beckman.

Adjutant, General Seyn.

A Grand Duchy on the gulfs of Finland and Bothnia, which was conquered by Russia from Sweden, and finally annexed in 1808. The area is 144,254 square miles, with a population of about 3,000,000 in 1907, of whom about 2,600,000

are Finns, 400,000 Swedes, 19,000 Russians, 3,000 Germans and 2,000 Laps, leading a nomadic life in the north. Nearly all the inhabitants are Lutherans. There is a university at Helsingfors, with 2,512 students, of whom 518 are women. The leading crops are rye, barley, oats, potatoes. Saw mills and paper manufacture provide the chief industry, and the forests are a great source of wealth, immense quantities of timber being prepared for export; dairy produce is also exported. There are 2,582 miles of railway; and a merchant fleet of 3,120 vessels (mostly small), of which 399 are steamers.

The country was formerly governed by the Imperial Finnish Senate, of 22 members, with a Diet of 4 estates elected by the people. This form of government gave way on Jan. 1, 1907, to a new Constitution involving a single Chamber elected by universal suffrage of both sexes. Women are likewise eligible for election to the Chamber. Finland is thus the first country to concede woman suffrage and representation, and it is noteworthy that it has been gained without agitation. The Finnish troops only exist in name, the Diet having voted £400,000 per annum to the Russian Treasury in lieu of furnishing Finnish recruits to the army or navy, and Finland has been made part of the Petersburg Military District. The estimated revenue in 1909 is £3,109,000, and the estimated expenditure £3,318,000; the debt amounts to £5,556,410. The imports in 1906 were £14,504,000 (of which 60 per cent. was timber), and the exports £9,728,000. The capital is Helsingfors; population, 160,000 (including Russian garrison).

Education, see p. 670.

CAPITAL OF THE RUSSIAN EMPIRE, St. Petersburg. Population (1905), 1,678,000.

British Ambassador, His Excellency the Rt. Hon. Sir A. Nicolson, Bart., G.C.B., G.C.M.G., G.C.V.O., K.C.I.E. £8,000

SALVADOR (REPUBLIC OF).

President, General Fernando Figueroa, b. 4
 March, 1849; installed 1 March, 1907, for
 four years.
Foreign Affairs, Dr. Salvador Rodriguez.
Public Instruction and Interior, Dr. Tomas G.
 Palomo.
War and Marine, The President.
Finance, Lopez Mencia.

Consul-General, M. J. Kelly, 8 Idol Lane, E.C.

Salvador extends along the Pacific coast for
 170 miles, with a general breadth of 43 miles, and
 contains an estimated area of 7,230 square
 miles, with a population estimated at 1,000,000.
 It is divided into 14 departments, and has four
 ports, Acajutla, La Libertad, La Union, and El
 Triunfo. The principal exports are coffee,
 indigo, tobacco, sugar, silver, balsam (known as
 balsam of Peru), rice, hides, cedar, and fustic.
 *A railway nearly 100 miles in length connects
 Acajutla with the capital and Santa Ana, the
 coffee centre. Earthquakes are frequent, and
 the capital (now rebuilt) was entirely destroyed
 by one in 1873; but the country has of late
 years suffered comparative immunity. There are
 85 post-offices and 168 telegraph offices, with
 2,800 miles of wire.

	1905.	1906.	1907.
Revenue	£682,917	£678,760	£820,160
Expenditure	762,024	979,746	1,000,750
Imports	869,214	832,738	301,420
Exports	1,127,907	1,304,684	1,409,300
Internal debt	832,431	893,049	...
*External debt	nil.	nil.	nil.
Imports from U.K. ...	306,341	268,888	239,290
Exports to U.K. ...	178,742	75,495	42,819

* The external debt was extinguished in 1899 by a
 Financial Syndicate, who also purchased the railway and
 obtained a concession to complete it as far as the capital.

CHIEF TOWN, San Salvador. Pop. *circa* 60,000.
British Minister, L. E. G. Carden (Guate-
 mala)
Consul, Walter E. Coldwell
Vice-Consul, W. Gibson
La Union—V. Cons., J. B. Courtade
 Salvador is 5,700 miles from London; transit,
 33 days.

SAMOS.

Prince Governor, A. Kopassy Bey.
Sensors, Th. Anezirinis, M. Carathanassis, T.
 Levendis, and S. Chastas.

A principality of the Ottoman Empire, more
 or less independent under the guarantee of
 Great Britain, France and Russia (1832), is one
 of the Anatolian Islands, with an area of 180 sq.
 miles and about 50,000 inhabitants, the capital
 (Vathy) having a good harbour. The whole
 island is fertile, and wine, raisins, olive-oil, and
 tobacco are produced and exported. The im-
 ports are valued at about £200,000 (of which
 about 25 per cent. are British), and the exports
 at the same figure, principally wine, and in-
 cluding cigarettes and tobaccos. The revenue for
 1906-7 was £25,500, and expenditure £25,000.
 Antimony, silver-lead, manganese, emery, and
 copper are known to exist in the island.

CAPITAL, Vathy. Pop. *circa* 25,000.

British Vice-Consul, Gregory D. L. Marc.

SAN MARINO.

A small Republic in the hills near Rimini,
 on the Adriatic, founded, it is stated, by a pious
 mason of Dalmatia in the 4th century, and
 governed by a Council of 60 (20 nobles, 20 town-
 men, and 20 peasants), of whom two are elected
 as Regents for six months (1 April and 1 October),
 being thereafter ineligible for office for three
 years. The area is 33 square miles, the popula-
 tion 11,000. There is an army of about 100.
 The village of San Marino (pop. 1,500) occupies
 the slope of Mount Titan, and has an im-
 pregnable castle, where King Berengar of Lombardy
 took refuge in 950 A.D., a fine church and
 Government palace, and a theatre. Agriculture
 and viticulture flourish. By a treaty concluded
 in 1872 the Republic has placed itself under the
 protection of Italy.

British Consul, Maj. W. P. Chapman (Florence).
Consul-General for Great Britain, Commenda-
 tore Arthur Serena, J.P., F.R.G.S., 34 Leaden-
 hall Street, E.C.
Consul, Commendatore William Le Quenx,
 Minorities Chambers, Birmingham, and Villa
 Renata, Florence, Italy.
Vice-Consul, Birmingham, E. Clutterbuck.

SERVIA.

King Peter I. (Karageorgevitch), b. 1844, elected
 15 June, 1903, married, 1883, Princess Zorka of
 Montenegro (who died 1890), and has issue
 Prince George, b. 1887, Prince Alexander, b.
 1888, and Princess Helene, b. 1884.
Heir Apparent, Prince Alexander, b. 1888.
Premier, Nikola Pashitch.
Interior, Lubomir Yovanovitch.
Foreign Affairs, Milovan Milovanovitch.
War, Colonel Velizar Marinovitch.
Justice, Kosta Timotievitch.
Public Instruction, Yovan Tuvovitch.

Commerce and Agriculture, Yasha Prodanovitch.
Finance, Stoyan Protitch.
Public Works, Velislav Vulovitch.

Minister in London, (vacant), 40 Pont Street, S.W.

Chargé d'Affaires, Slavko Y. Grouitch.

Secretary, Voislav Antonievitch.

Consul-General in London, Alexander Tucker, 17 Seymour House, Waterloo Place, S.W.

A Kingdom of Eastern Europe, separated from Hungary by the Danube and Save. By the constitution of 1889 a "Skupstchina," a parliament elected by ballot, represented the people; this constitution was re-established by the present king. By the Berlin Treaty, 1878, it received a large accession of territory, and now has an area estimated at 13,757 square miles, with a population in 1905 of 2,700,000. The surface of the country is mountainous, containing the remains of formerly extensive forests and uncultivated heaths. Agriculture is carried on in a somewhat primitive fashion. The principal crops are maize for home consumption, and wheat for export; flax, hemp, and tobacco are also grown, and silk-culture is carried on to a limited extent. The imports consist mainly of cottons, sugar, and colonial goods, hardware, woollens, &c.; the export, of dried prunes (11·6 per cent.), pigs, and wool, besides wheat, wine, hides, cattle, and horses. The bulk of the trade is with Austria. There were (1900) 400 miles of railway, and in 1908, 2,200 miles of telegraph, with 1,460 post-offices and 1,100 miles of telephone.

Consul-General (vacant).

The Kingdom of Siam, or Muong Tai, (area about 200,000 square miles; pop. about 6½ millions), is a buffer State between British Burma and French Indo-China. The boundary of Burma and N.W. Siam was demarcated in 1891. By the Anglo-French agreement of May, 1896, the main central part of Siam, including the basins of the rivers Menam, Petchaburi, and Petrit, was neutralised, the two Governments

agreeing not to send troops or obtain any exclusive advantages in it, while retaining freedom of action in the regions west and east of the neutralised zone. The western portion, adjoining British territory, included the Malay States dependent on Siam. The eastern portion, the Mekong Valley, including Battambang and Angkor, adjoined Cambodia and the territories acquired by France under the treaty with Siam in 1893. By the Anglo-French Agreement of April, 1904, both Powers disclaimed any intention of annexing the Siamese territory in their respective spheres of influence. By an arrangement with Siam France abandoned Chantabun and the 25-kilometre neutral zone of the 1893 treaty; but the port of Krat became French, thus giving Cambodia access to the sea, while France received trading concessions on the right bank of the Mekong and power to make railways where navigation of the river is impossible. The provinces of Melupre and Bassac were recognised as French. By a further treaty in 1907, the territories of Battambang, Siem-reap, and Angkor (total area 20,000 sq. kils., pop. 200,000), on the frontier of Cambodia, were ceded by Siam to France, which, in return, gave back to Siam the district of Krat, and made slight concessions in Dansai (Laos), at the same time concluding an arrangement for the gradual abandonment of the ex-territorial privileges hitherto enjoyed by French Asiatic subjects and protégés in Siam. In 1909 Siam transferred to Great Britain all rights over the Malay States of Kelantan, Tringganu, Kedah, Perlis, and adjacent islands. In future British subjects are to come under the jurisdiction of the ordinary Siamese Courts. The upper part of Siam is mountainous, the lower flat. Siam contains many Chinese (largely engaged in trade and industry), besides Shans, Laos, Malays, Burmese, and Cambodians, and over 1,200 Europeans. The principal religion is Buddhism, and education is mostly conducted by the Buddhist monks. Bangkok is the only much-frequented port. Over 80 per cent. of Siamese sea-borne trade, which centres at Bangkok, is with the British Empire, and is largely in the hands of British firms or of Chinese trading from Singapore and Hong Kong. German shipping now largely exceeds British through the purchase of certain British steamship lines. Norwegian shipping also exceeds British. The chief products of Siam are rice and teak. The area under rice is being much enlarged by irrigation. There are about 60 rice mills, mostly in or near Bangkok. The teak industry in the great forests of N. Siam is mainly in English hands. In 1908-9 rice constituted 79 per cent. and teak 12 per cent. of the exports; while pepper, hides, and marine products are also exported in considerable quantities. Among imports are treasure, cotton goods and yarn, silk goods, provisions, gunny bags, kerosene, sugar, opium, metals and metal wares, machinery, &c. The general tariff rate is 3 per cent. *ad valorem*. In 1908-9 the total imports by sea were £5,782,000, and the exports £7,583,000 (rice £5,975,000, and teak £887,000). Burma imports teak and cotton overland from Siam, and exports thither cotton and silk goods, &c. Except tin, rubies and sapphires, there are no important mineral products. The King is an absolute monarch. He appoints his successor. There is an Executive Council of Ministers with a general European adviser, and, since 1895, a Legislative Council of State, consisting of the Ministers, six royal

princes, and from ten to twenty members appointed by the King, who has an absolute power of veto. A number of English, French, Germans, Italians, Danes, and Japanese are employed in the various State departments. The administration of the revenue and of justice and the police has been improved. The revenue (about 50,000,000 ticals) is derived from opium and spirit monopolies, land, fishery, and capitation taxes, customs, &c. The first Siamese loan was raised in 1904 at 95, £1,000,000 being required for railways. A second loan of £3,000,000 was raised in 1907 at 93½. Siam has an army of about 26,000 men, and a few small gunboats. About 600 miles of railways (mostly State-owned) are now open for traffic. Bangkok is connected by rail with Petchaburi (95 miles to the west), and with Korat (165 miles to the north-east). The former is being extended southwards down the Malay Peninsula. The northern State line that is being constructed to Chiengmai (pop. 50,000), the second town in size and near the Burma-Siam frontier, has reached Utaradit. The eastern State line from Bangkok was opened as far as Petri in 1908. Good roads are few. There are 3,000 miles of telegraph lines.

The currency is the tical; the introduction of a gold standard is contemplated whereby the value of the tical will be fixed. The Mint was closed to the free coinage of silver in Nov., 1902. In N.W. Siam the Indian rupee is current. The Government issues notes.

Exports from United Kingdom, 1908... £891,415
Imports into United Kingdom, 1908... 683,845

Attachés, E. Martínez, E. Peña.

Military Attachés, Major Julio Vicens, Lieut.

Marquis de Campolloa.

Consul-Gen., J. M. Torroja, 40 Trinity Square, E.C.

Vice-Consul, Alfredo Amigo.

A Kingdom situate in the south-west of Europe, between 36°–43° 45' N. lat. and 4° 25' E.—9° 20' W. long., bounded on the south and east by the Mediterranean, on the west by the Atlantic and Portugal, and on the north by the Bay of Biscay and France, from which it is separated by the Pyrenees; and occupying the larger portion of the great Iberian Peninsula. Its coast-line extends 1,317 miles—712 formed by the Mediterranean and 605 by the Atlantic. It was formerly divided into 14 kingdoms (now forming 49 provinces); the ancient Provinces still best understood are New Castile, La Mancha, Old Castile, Leon, Asturias, Galicia, Estremadura, Andalusia, Murcia, Valencia, Aragon, Catalonia, Basque Provinces, with the Canary Isles and the Balearic Isles (Majorca and Minorca), comprising a total area of 196,173 English square miles, and an estimated population, 31 Dec., 1907, of 19,712,585. The principal towns are Madrid (pop., 540,000), Barcelona (533,000), Valencia (214,000), Seville (150,000), Malaga (130,000), Murcia (112,000), Carthagena (100,000), and Saragossa (100,000); and there are also eleven towns with over 50,000 inhabitants. The Constitution upon which the present government is formed is dated 30 June, 1876. The interior of the peninsula consists of an elevated tableland, surrounded and traversed by mountain ranges—the Pyrenees, the Cantabrian Mountains, the Sierra Guadarrama, S. Morena, S. Nevada, Montes de Toledo, &c. The principal rivers are the Douro, the Tagus, the Guadiana, the Guadalquivir, the Ebro, and the Minho. Spain is rich in iron, copper, and lead; its mineral resources are only partially exploited, and principally by foreign capital under foreign direction. The country is generally fertile, and well adapted to agriculture and the cultivation of heat-loving fruits—as olives, oranges, lemons, almonds, pomegranates, and dates. The agricultural products comprise wheat, barley, maize, oats, rice, with hemp and flax of the best quality. The vine is cultivated in every province; in the south-west, Jerez, the well-known sherry and tent wines are made; in the south-east, the Malaga and Alicante. The principal articles imported are raw cotton, spirits, fish, wheat and flour, sugar, coal, timber, woollen manufactures, machinery and railway materials, hides, &c. The principal exports are wine, copper and copper ores, lead, iron ores, olive oil, cattle, raisins, oranges, cork, esparto grass, wool, salt, quicksilver, grapes, &c. Trade was for many years mostly confined to France and Great Britain, but Germany and the United States are now competing for a share. Home manufacture is rigidly protected by high customs duties.

The sea-going mercantile marine in 1908 consisted of 469 steamers and 82 sailing vessels over 100 tons, of a total tonnage of 701,278; during 1907 vessels of 18,024,148 tons entered, and of 19,059,505 tons cleared at Spanish ports.

Nearly all the 49 Provinces are now connected by railways, of which about 11,268 miles of normal gauge were open in 1906; there are about 20,000 miles of telegraph.

The principal exports to the United Kingdom in 1908 were:—

Copper	£1,383,895	Raisins	£393,468
Cork	573,993	Pyrites	971,426
Fruit, Preserved	121,529	Quicksilver	289,500
Grapes, Raw	497,223	Esparto, &c.	228,368
Oranges	1,859,019	Onions	514,687
Iron Ore	3,509,790	Silver Ore	127,776
Lead	1,352,707	Wine	416,607
Nuts (inc. Almonds)	349,821		

And the chief domestic imports from the United Kingdom in 1908 were:—

Chemicals	£281,937	Manure	£724,571
Coal and Coke	1,450,242	Metals, all sorts ..	508,660
Cotton Manufacts.	239,310	Wool, &c.	269,125
Machinery	594,975	Warr. Jute & Linen	96,555

Defence (for Army, see p. 667).

The Navy was almost entirely destroyed during the war of 1897 with the U.S.A., and there now remain one second-class battleship of 10,000 tons, the *Pelayo* (1886); a cruiser of 10,122 tons, the *Carlos V.* (1895), and three of 7,000 tons, the *Cardinal Cisneros* (1897), *Cataluña* (1900), *Princesa de Asturias* (1896); two old armoured coast defence ships of 7,300 tons, *Nuñanca* (1863) and *Vitoria* (1865); the royal yacht *Giralda*, 2,057 tons; four cruisers of over 1,000 tons, four destroyers, three training ships, and small craft.

SPANISH OVER-SEA POSSESSIONS.

The over-sea possessions are regarded as an integral part of Spain, the head-quarters of the local administration being Tenerife, in the Canary Islands. In the Gulf of Guinea, the island of FERNANDO PO, and ANNOBOM, CORISO and ELOBY islands off the coast of French Congo. On the mainland CAPE SAN JUAN and the right of navigation over the rivers Benito and Muni, with the district bounded on the north by the German Cameroons, on the east by the 9th meridian E. of Paris, and on the south by the Muni river, while the district between Capes Bojador and Blanco is under protection. To the north-west are the CANARY ISLES (area about 3,000 square miles, population 334,521), the capital being Santa Cruz (Tenerife), in Morocco are several "Presidios"; and TETUAN and CEUTA (30 square miles, population 16,000), opposite Gibraltar, and the coast towns of Gomera, Alhucemas, Melilla, and the Zaffarin Islands. These possessions have drawn Spain into an expensive though not inglorious war with the Sultan of Morocco. The total area of Spain's African possessions is about 244,000 square miles, with a population of about 135,000.

SWEDEN, KINGDOM OF.

King of Sweden of the Goths and the Vandals, Gustaf V., born 16 June, 1858; suc. 8 December, 1907; mar. 20 Sept., 1881, Victoria, dau. of Grand Duke of Baden, born 7 August, 1862 (and has issue 3 sons).

Heir Apparent, Gustaf Adolf, Duke of Skane, Crown Prince, born 11 Nov., 1882; married 15 June, 1905, Margaret, daughter of H.R.H. the Duke of Connaught, born 15 January, 1882.

Prime Minister, S. A. A. Lindman.

Foreign Affairs, Count A. F. Taube.

Minister of Justice, G. A. Petersson.

War, Major-General O. B. Malm.

Marine, Commodore Count C. A. Ehrensward.

Interior, Count H. E. G. Hamilton.

Finance, C. J. G. Swartz.

Instruction, P. E. Lindstrom.

Agriculture, S. O. Nylander.

Ministers sans portefeuille, C. F. W. Hederstierna and K. H. von Sydow.

Envoy Ext. and Minister Plenipotentiary in London, Count H. Wrangel. *Legation*, 73 Portland Place, W.

Counsellor of Legation, Bon C. A. Beck-Friis.

Naval Attaché, Lieut.-Comm. J. C. Schneider.

Military Attaché, Captain E. de Linder.

Chancellor of Legation, J. G. Kihlman.

Consul-General, D. Danielsson, 10 Lloyds Avenue, E.C.

Vice-Consul, C. W. Espersson.

Sweden comprises the eastern half of the Scandinavian peninsula, and, except the capital, is divided into 24 governments, "Län," with an area of 172,876 square miles, and a population, 31 Dec., 1908, of 5,429,600, nearly all Protestant. Nearly 51 per cent. of the population are devoted to agriculture, about 299,000 being owners and 53,000 tenants of the land they cultivate. The country for the most part is flat, with pleasant undulations, rising in the north-west to the Kilen Mountains, which separate Sweden from Norway; and may be divided into three separate districts—the northern, forest; central, mining; the southern, agricultural. The lakes cover about one-twelfth of the surface. The climate in the south is favourable for producing grain. The principal articles of cultivation are the various cereals—oats, rye, barley, wheat—and potatoes. The forests are very extensive, covering one-half of the surface of the country, and consisting of pine, birch, fir; these are of great importance, supplying timber, pitch, and tar, and also the chief fuel. The mineral products are extremely rich; iron of excellent quality, that known as the Dannemora iron being converted into the finest steel; gold and silver in small proportions; copper, lead, nickel, zinc, cobalt, alum, sulphur, porphyry, and marble. There is a railroad opening up the rich iron-ore districts of Lapland, and mineral trains run from Gellivare and Kiruna to Luleå on the Gulf of Bothnia and to Narvik on the Atlantic. Considerable mines of coal are being worked in Scania. The chief imports are coffee, wine, tobacco, and other ordinary colonial produce, coal, cloth, yarn, wool, cotton, hides, manure, iron, fish, oils, wheat, rye, pork, and machinery. The chief articles of export are timber, butter, iron, steel, wood pulp, paper, matches, stone, iron and zinc ores, &c. The chief domestic exports to Great Britain in 1907 were butter, iron, paper and paper-making materials,

and timber; and the chief domestic imports from Great Britain in 1907 were coal, machinery, metals, wool and woollen manufactures.

Commercial travellers in Sweden are compelled to take out a licence, costing 100 crowns a month, or they incur the risk of being fined.

Railways 8,305 miles in length (of which 2,698 are the property of the State) were open at the end of 1908; and 19,313 miles of telegraph wires (exclusive of 14,777 railway telegraph wires), 178 stations, and 1,659 railway and 795 other telegraph stations (1907). There were at the same date about 190,000 miles of telephone wires.

Defence (for Army, see p. 667). The Navy consists of 82 fighting vessels (438 guns), 23 being ironclads, with submarines, submersibles and some training ships, &c.

The Helvetia of the Romans, a Federal Republic of Central Europe, situated between 45° 50'—47° 48' N. lat. and 5° 58'—10° 30' E. long. It is composed of 22 Cantons, of very dissimilar size, united under a Constitution dated 29 May, 1874, and comprises a total area of 15,469 square miles, with a population of 3,463,609 in 1905, who are divided between Roman Catholics, 40 per cent., and Protestants, 59 per cent., Jews numbering 7,400 and others 11,000. The population is formed by three nationalities, distinct by their language, as German 71 per cent., French 21 per cent., Italian 6 per cent., and Romanshe (in the Grisons), 1½ per cent. The most important cities are Zürich, pop. (1909) 190,000, Basle 130,000, Geneva 120,000, Berne 75,000, and Lausanne 56,000. It is the most mountainous country in Europe, having the Alps, covered with perennial snow and glaciers, rising from 5,000 to 15,213 feet in height, not only along its southern and eastern frontiers, but throughout the chief part of its interior; and the Jura mountains in the north-west. Agriculture is followed chiefly in the valleys, where wheat, oats, maize, barley, flax, hemp, and tobacco are produced, and nearly all English fruits and vegetables are grown. The forests cover about one-sixth of the whole surface. The manufactures consist chiefly of silks, cottons, linen, lace, thread, woollens, &c.; clocks and watches have long been the staple products of Geneva and Neuchâtel, while leather, gloves, pottery, tobacco and snuff, cheese, &c., are made. Being an inland country, the direct trade with the United Kingdom is comparatively small. In 1909 there were 3,200 miles of railway in working order, 5,500 miles of telegraph line, 11,000 miles of telephone line, and 1,850 post offices.

The legislative power is vested in a Parliament, consisting of two Chambers, a National Council of 147 members, and a Council of States of 44 members; both Chambers united are called the Federal Assembly, and the members of the National Council are elected for three years, an election taking place in October. The executive

power is in the hands of a Federal Council of 7 members, elected by the Federal Assembly, presided over by the President of the Confederation. The President has a salary of £720; the Vice-President and other members of the Federal Council £480 each. The members of the Federal Council are elected for three years; each year the Federal Assembly elects from this council the President and the Vice-President; they are elected for one year, the five other members for three years. Not more than one of the same canton may be elected member of the Federal Council. (For Defence, see p. 667; for Education, see p. 670.)

TRIPOLI.

Governor-General, Mosselm Musni Pasha, appointed August, 1909.

A Vilayet, or Province of the Ottoman Empire, on the northern coast of Africa, and the most easterly of the Barbary States, extending from the frontiers of Tunis to those of Egypt, a distance along the coast line of nearly 1,100 miles, and inland to the south a distance of about 800 miles. Formerly (1713-1835) it was under a native (Karamanly) dynasty, and passed under direct Turkish control in 1835. It comprises the four sub-provinces or Mutesarifliks of Tripoli, Khoms, Jabel-el-Gharb and Fezzan, and also of Benghazi or Cyrenaica, the latter being under the direct government of Constantinople since 1875. It has an area of 410,000 square miles, and a population of over 1,000,000 in Tripoli proper and Cyrenaica. There are no rivers in the country, and the rainfall being precarious, a good harvest can only be reckoned on every four or five years.

* The President is elected in December, and remains in office from 1 Jan.—31 Dec.; he is generally succeeded by the Vice-President.

The military force of the country now numbers 10,000 men. The revenue is chiefly raised by a poll-tax, regulated according to the wealth of each individual, and by tithes, but steps are being taken to co-ordinate the incidence of taxation with that obtaining in other parts of Turkey. Barley, dates, olives, oranges, lemons and vegetables are produced, and the principal imports are metals, British and other European manufactures, tea, beads, wine and spirits, besides a number of articles for barter in Wadai, Bornu, and the Western Sudan, whither caravans proceed from Tripoli; but the caravan trade, once the mainstay of the country, has seriously diminished of late years. The principal articles of exports are ostrich feathers, ivory, skins, sponges, hides, esparto grass, cattle and horses. The ancient ruins in Cyrenaica, i.e., at Cyrene, Ptolemais, and Apollonia, are interesting to explorers, as well as those at Leptis Magna, which is close to Khoms, or 70 miles from the city of Tripoli; agricultural colonies of Cretan Moslem refugees are being formed in the neighbourhood of Cyrene and Apollonia (Marsa Susa). The town of Benghazi has a population of about 21,000, consisting of Arabs, Greeks, Maltese, and a few Levantines. The commerce in cereals, wool, cattle for Malta, and other agricultural produce, is considerable, when a sufficient rainfall causes good harvests.

	1904.	1905.	1906.
Total imports	£361,000	£443,600	£429,800
Total exports	386,500	377,400	370,100
Imports from U.K. ...	84,500	67,800	86,200

TUNIS.

(French Protectorate.)

Bey, Mohamed en-Nasir Bey; born 1855; suc. 12 May, 1906.
Heir Presumptive, Mohamed Ben Mahmoun Bey, b. 1858.
French Resident-General, Gabriel Alapetite (7 Feb., 1907).

The Regency of Tunis—the ancient Lybia—was occupied (it is believed) by the Phœnicians so far back as the 14th century B.C.; by the Romans in 146 B.C.; by the Vandals in 439 A.D.; and by the Arabs in 698 A.D. This latter period witnessed a succession of powers—Berber (1048), Spanish (1535), Turkish (1573), and Husseinite (1705). Finally, by the Treaty of "The Bardo" (12 May, 1881), the Regency passed into the hands of France, and is under the control of a French Resident General. By its terms the occupation is to terminate when both French and Tunisian authorities mutually recognise that the local Government is capable of maintaining order. By a convention of 13 Sept., 1897, all previously executed treaties and conventions between the U.K. and France were extended to Tunisia, and Article 2 of this convention, dealing with British cotton goods, remains in force up to the end of 1912. By convention of 10 July, 1882, the Bey is granted a civil list of £37,500, and the Beylical princes £30,000. Area, 44,920 square miles. Population, 1,800,000. *Exports*: Barley, beans, blankets, bran,

carpets, cork, dates, esparto grass, Fez caps, goats, hides, lead, oats, olive oil, phosphates, sheep, silk goods, tan bark, tunny fish, wheat, wine, wool, zinc, &c. *Imports*: Alcohol, boots and shoes, building material, clocks and watches, coal, cotton goods, cars and carriages, flour, glassware, hardware, milk (condensed), motors, rail and tram cars, wrought iron, and steel.

The chief town, Tunis (pop. 227,519 composed of—Moslems 100,000, Jews 50,000, French 18,626 Italians 52,076, Maltese 6,174), is an inland port, with a basin of 1,800 square metres with 2½ feet of water, 1,875 feet of quays, cranes up to 20 tons, connected with the sea by a canal 10 kilometres long, 68 feet wide, and dredged to 2½ feet. Port dues 1 fr. per ton (phosphates 50 c.), harbour dues 30 c., sanitary dues 18 c. N.E. of Tunis is the site of ancient Carthage (15 kilometres). There are 713 miles of railroad and 3,906 of telegraph.

	1906.	1907.

3rd do., Danial Bey.

Hon. Attaché, Lucien Moril Bey.

Imam, Mehmed Redjaf Effendi.

Consul-General, Refet Bey, 140, Leadenhall Street Place, E.C.

Area.—The Ottoman Empire comprises an area of about 66,500 square miles in South Eastern Europe, about 680,000 square miles in Asia, and about 399,000 square miles in Africa, containing altogether about 25,000,000 inhabitants. The Sultan is also suzerain of Crete, Cyprus, Samos, and Egypt; and until the annexation of Bosnia and Herzegovina by Austria-Hungary, and the declaration of independence by Bulgaria in 1908, of those territories also.

Government.—A form of constitution modelled on that of Western European countries was suggested by various reformers from 1856-1878, but until 1908 the rule of the Sultan was based on the precepts of the Koran. On 24 July, 1908 an Imperial Iradé promulgated a constitution which embraced an elective legislature.

I. TURKEY IN EUROPE, formerly very extensive, is now reduced to 66,500 square miles, with a population (1901) of about 6,000,000, including about 700,000 Turks, 1,500,000 Albanians, and 1,300,000 Greeks, Bulgarians, and Wallachians. About 2,500,000 are Mohammedans. European Turkey comprises the vilayets of Adrianople, Salonika, Monastir, Kossovo, Scutari, and Janina, together with the administrative district of Constantinople and the separate sanjak of Chatalja. The principal towns are Constantinople, the capital (pop. 1,100,000), Salonika (120,000), and Adrianople (80,000). A great part of the surface is covered with mountains of moderate elevation. The principal rivers are the Vardar, the Struma, and the Maritza. The soil is for the most part fertile, but owing to various causes little progress has been made in agriculture. The cultivated products are maize, rice, barley, millet, sesame and other oil seeds and tobacco; the natural products are the pine, beech, Valonia oak, oak, lime, and ash, with the palm, maple, sycamore, walnut, chestnut, carob, box, myrtle, laurel, &c., south of the Balkans; large forests of pine and fir in the north-west; the olive, orange, citron, vine, peach, plum, and fruit trees in Albania. The breeding of sheep is carried on extensively, and wool constitutes an important article of trade. The mineral products are iron in large quantity, lead blended with silver, copper, sulphur, salt, alum, and coal. Its manufactures are almost entirely domestic, such as woollen and cotton stuffs, carpets, shawls, leather, firearms, with dyeing and printing works. About 1,200 miles of railway were open in 1907.

II. TURKEY IN ASIA, the larger of the two divisions, has a total area of 680,000 square miles, and an estimated population of nearly 17,000,000 inhabitants. *Asia Minor* (pop. about 9,400,000) comprises the following vilayets: Broussa, Smyrna, Castamouni, Angora, Konia, Adana, Sivas, Trebizond, the islands of the Archipelago, and the Mutessarifats of Ismid and Biglia; in *Armenia* (pop. about 2,500,000) the vilayets of Erzeroum, Mamouret-ul-aziz (Kharput) Diarbekir, Bitlis and Van; in *Arabia* (pop. about 2,500,000) Mossul, Baghdad, Basra, Hedjaz and

Yemen; in *Syria* (pop. about 3,250,000) Aleppo, Zor, Syria and Beyrout, with Jerusalem (see pp. 603-4) and Lebanon. The principal towns are Smyrna (200,000), Baghdad (145,000), Damascus (200,000), Aleppo (125,000), and Beyrut (120,000). Not far from Baghdad is Kerbela, the most sacred centre of pilgrimage for the Shia (Persian) Mohammedans. The trade of the Shat-el-Arab and its branches is considerable; much of it is carried by the vessels of the (British) Euphrates and Tigris Steam Navigation Company. The foreign trade, which passes chiefly through Bussorah, is mainly in the hands of the British India Steam Navigation Company. Beyond the Arabian desert, and lying along the N.E. coast of the Red Sea are the Turkish vilayets of the *Hejaz* and *Yemen*. The *Hejaz* includes the sacred cities of Mecca and Medina, the home of Mohammed, with the port of Jeddah (pop. 40,000), the mainstay of which is the pilgrim traffic. In *Yemen* are the towns of Sanaa, Assir, and Taiz. For some years past Yemen has been the scene of a serious rebellion. Hodeida (pop. 33,000), is its chief port. The Damascus-Mecca railway was opened for traffic as far as Medina in Sept., 1908. The Sinai peninsula belongs politically to Egypt.

In **AFRICA**, Turkey rules Tripoli and Barka (see p. 654).

Commerce.—The exports include tobacco, cereals, fruits, silk, opium, mohair, cotton, coffee, skins, wool, oil-seeds, valonia, carpets, &c., and are largely derived from the Asiatic provinces. Recently large quantities of wine and of raisins for the manufacture of wine have been exported. Among the imports, cotton and woollen manufactures take the foremost rank. Since the establishment of the Anatolian railway by German enterprise, the export of cereals, chiefly malting barley, has largely increased. The British Chamber of Commerce was established at Stamboul, Constantinople, in 1887, with branches at Smyrna and Salonica, and in the North of England (Manchester); *Pres.*, Sir Adam Block, K.C.M.G.; *Sec.*, H. E. Mountain. The commercial marine of Turkey consisted in 1901 of about 180 steamers, 60,000 tons, and 200 sea-going sailing vessels, 50,000 tons.

There are British Post-offices at Constantinople, Salonica, Smyrna, Beyrut, and Baghdad.

The principal domestic exports to the United Kingdom are corn, fruit, wool, and mohairs; the chief domestic imports from the United Kingdom are coal, Manchester goods, metals, and woollens.

Defence (for Army, see p. 667). In 1906 the Navy consisted of 50 ships (including 16 armoured vessels) and 40 torpedo craft; of which only 5 armoured and 2 unarmoured vessels, with 20 torpedo craft, are fairly modern and fit for service. It has a total peace force of about 15,000 men. Besides this, there is the Makhussa Fleet of about 75 steamers of various sorts, worked by the Government and available as transports, storeships, and coastguard cruisers. In 1909 Rear-Admiral Gamble of the British Navy was engaged, with six junior officers, to reorganise the Navy.

Education (see p. 670).

Finance.—The first official budget was published in March, 1900. By the Russo-Turkish agreement of the same year Russia relinquished 40 out of 74 annuities of £1350,000.

Estimated Revenue (1909-1910)	£125,294,151
Turkish Debt	104,108,136
Sinking Fund and Interest (1909-1910)	3,232,567
Total Imports, 1906	31,366,021
Total Exports, 1906	19,672,370
Total Imports from U.K., 1907	£7,545,000
Total Exports to U.K., 1907	£6,005,000

American Ambassador to France, Robert Bacon; Germany, David J. Hill; Italy, John G. A. Leishman; Russia, William Woodville Rockhill; Austria-Hung., Charles S. Francis; Japan, Thomas J. O'Brien; Turkey, Oscar S. Straus

Office of Embassy, 123 Victoria St., S.W.

Ambassador Extraord. & Plenipotentiary in London, Hon. Whitelaw Reid. Address, Dorchester House, Park Lane, W.

Secretary of Embassy, William Phillips, 123, Victoria Street, S.W. 600

2nd Secretary, Hugh Gibson, 123 Victoria Street, S.W. 400

3rd Secretary, Arthur Orr, 123 Victoria Street, S.W. 240

Naval Attaché, Com. Edward Simpson, 15, Chesham Street, Belgrave Square, S.W.

Military Attaché, Capt. Sydney Cloman... Consul-Gen. in London, John L. Griffiths and fees 2,400

Vice & Deputy Consul-Gen. in London,
Richard Westacott.....
Deputy Con.-General, Carl R. Loop.....
Consular Officer, 12 St. Helen's Place, Bishopsgate
Street, E.C.
Despatch Agent, R. Newton Crane, 4 Trafalgar
Square, S.W.

A Federal Republic, consisting of 45 partially independent States, 5 organized and a unorganized Territories, occupies the central portion of North America, between the Atlantic and Pacific Oceans, in lat. 25° – 49° N. and long. 67° – 124° 30' W., and also the territory of Alaska and the island of Hawaii. The area is estimated at 3,622,933 square miles, of which rivers and lakes cover 55,562 square miles, excluding the water area of Alaska and Hawaii. This area includes the vast district of Alaska, in the extreme northwest of the continent, purchased from Russia 18 October, 1867, comprising 590,884 square miles. About one-third of the country is estimated to be in a state of cultivation. The population of the whole of the States and Territories, according to the Census of 1900 was 76,355,000. In 1890 the Indians on reservation numbered 133,417; off reservation, 115,836 (including 58,806 civilised Indians); Chinese, 107,475; Japanese, 2,039; and Alaska, 34,052 (23,531 Indians). The increase in the ten years, 1880–1890, was 12,466,467, and 1890–1900, 13,218,609, exclusive of certain districts above alluded to.

Its coast-line on both oceans is reckoned to have a length of about 13,200 miles, besides 3,620 miles on the great lakes. The principal river is the mighty Mississippi-Missouri, traversing the whole country from north to south, and having a course of 4,500 miles to its mouth in the Gulf of Mexico; with many large affluents, the chief of which are the Yellowstone, Nebraska, Arkansas, Ohio, and Red rivers. The rivers flowing into the Atlantic and Pacific Oceans are comparatively small; among the former may be noticed the Hudson, Delaware, Susquehanna, Potomac, and Savannah; of the latter, the Columbia, Sacramento, and Colorado. The Mobile and Colorado of Texas fall into the Gulf of Mexico, also the Rio Grande, a large river partly forming the boundary with Mexico. The areas of the water-basins have been estimated as follows:—Rivers flowing to the Pacific, 644,040 square miles; to the Atlantic, 488,777; and to the Gulf of Mexico, 1,683,325 square miles, of which 1,257,547 are drained by the Mississippi-Missouri. The chain of the Rocky Mountains separates the western portion of the territory from the remainder, all communication being carried on over certain elevated passes, several of which are now traversed by railroads; west of these, bordering the Pacific coast, the Cascade Mountains and Sierra Nevada form the outer edge of a high table-land, consisting in great part of stony and sandy desert, and in which occurs the Great Salt Lake, extending to the Rocky Mountains. Eastward the country is a vast, gently undulating plain, with a general slope southwards towards the marshy flats of the Gulf of Mexico, extending to the Atlantic, interrupted only by the Alleghany Mountains, of inferior elevation, in the Eastern States. Nearly the whole of this plain, from the Rocky Mountains to some distance beyond the Mississippi, consists of immense treeless savannahs and prairies of luxuriant grass. In the Eastern States (which form the more settled and most thickly inhabited portion of the territory) large forests of valuable

timber, as beech, birch, maple, oak, pine, spruce, elm, ash, walnut; and in the south, live-oak, water-oak, magnolia, palmetto, tulip-tree, cypress, &c., still exist, the remnants of the wooded region which formerly extended over all the Atlantic slope, but into which great inroads have been made by the advance of civilisation. The Mississippi valley is eminently fertile. The mineral kingdom produces in great abundance copper, iron, coal, lime, salt and lead, which in Missouri, Colorado, and Idaho appears inexhaustible; there are also rich lead-mines in Illinois and Wisconsin. California produces silver, copper, and lead, and gold in large quantities. The petroleum output (mainly Pennsylvania and California, with growing importance in Mexico) in 1907 was over 165,000,000 barrels of 42 gallons, valued at \$120,000,000.

Finance.—The financial condition of the United States of America exerts a great influence on that of other nations. The following is a statement of the debt on 1 Oct., 1907 and 1908:—

	1907.	1908.
2 % bonds	\$676,250,150	\$700,882,130
3 % bonds	63,945,460	77,881,960
4 % bonds and certificates	118,489,900	118,489,900
On which interest has ceased	8,272,545	3,823,195
Bearing no interest	400,592,067	396,239,038
Certificates & Treasury notes offset by cash	1,200,319,869	1,335,020,869
Total debt	\$2,467,869,991	\$2,622,337,092
Less cash and reserve in Treasury	1,589,871,183	1,664,073,442
Actual indebtedness	\$877,998,808	\$968,263,650

The total decrease in the debt since 31 August, 1865, when, after deducting the cash in the Treasury, it amounted to \$2,756,431,571, to 1 Oct., 1908, has been \$1,788,167,921.

Balance Sheet for Years ending 30 June, 1907 and 1908.

	1907.	1908.
RECEIPTS:—		
Customs	\$332,233,363	\$286,113,130
Internal Revenue	269,666,773	251,711,127
Miscellaneous sources	61,240,198	63,301,862
	\$663,140,334	\$601,126,119
EXPENDITURE:—		
Civil & Miscellaneous	\$180,244,532	\$175,420,409
War Department	122,576,466	178,840,453
Navy Department	97,128,469	118,037,097
Indians	15,163,609	14,579,756
Pensions	139,309,514	153,826,467
Interest on public debt	24,481,158	21,426,138
For the sinking fund	30,590,889	34,342,600
	\$609,494,637	\$693,538,920

Defence (for Army see p. 667, for Navy see p. 473).

Education (see p. 670).

Constitution and Government.—The government of the United States is, by the Constitution, entrusted to three separate authorities—the Executive, the Legislative, and the Judicial. The Executive power is vested in a President, who is elected every four years, and is eligible for re-election. The mode of electing the President is as follows:—Each State appoints, in such manner as the Legislature thereof directs, a

number of electors, equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative, or anyone holding office under Government, shall be appointed an elector. The electors for each State meet at their respective State Capitals on a day appointed, and there vote for a President by ballot. The ballots are then sent to Washington, and opened by the President of the Senate in presence of Congress, and the candidate who has received a majority of the whole number of electoral votes cast is declared President for the ensuing term. If no one has a majority, then from the three highest on the list the House of Representatives elects a President, the votes being taken by States, the representation from each State having one vote. There is also a Vice-President, who, on the death of the President, becomes *ex-officio* President for the remainder of the term. In case of the removal or death of both President and Vice-President, a statute provides for the succession of the Secretary of State, Secretary of the Treasury, Secretary of War, and others, so that the State can never be without a Head or Ruler.

The Legislative power is vested in two Houses, the Senate and the House of Representatives, the President having a *veto* power, which may be overcome by a two-thirds vote of each House. Two Senators from each State are elected by the Legislature thereof for the term of six years; and Representatives are chosen in each State, by popular vote, for two years. The number of Representatives for each State is allotted in proportion to its population—at present 1 for 173,901. The Senate consists of 90 members, and the House of Representatives of 357 representatives and territorial delegates.

The supreme judicial authority is vested in a Chief Justice and eight Justices, who are appointed by the President, by and with the advice and consent of the Senate, to hold their offices during good behaviour.

TRADE WITH UNITED KINGDOM.

The imports from, and domestic exports to, the U.K. are given below (merchandise only):—

	Imports.	Dom. Exports.	Total.
1865	\$ 83,240,527	\$ 93,662,922	\$176,867,449
1875	142,445,648	271,101,911	413,547,559
1885	144,686,954	332,274,029	446,860,983
1895	134,577,520	341,339,703	475,917,223
1900	134,256,394	461,062,414	594,318,808
1905	147,259,920	485,418,985	632,678,905
1906	174,928,658	535,160,199	710,088,857
1907	205,443,333	593,202,827	768,646,160
1908	190,355,475	574,439,726	764,795,201

The chief exports to the United Kingdom in 1908 were (*B. of Trade*):—

Animals, living	£4,652,829
Apples	799,843
Bacon	6,035,498
" (Hams)	2,240,238
Beef (fresh)	1,326,584
Boots & Shoes	361,366
Cheese	302,662
Chemical Manufs.	467,676
Coffee	429,459
Copper, &c.	3,769,942
Corn, wheat	11,450,396
" Barley	743,373
" Oatmeal, &c.	242,697
" Maize	2,005,702
" Wheatmeal	—
" Flour	5,356,406
Cotton, raw	39,488,262
Drugs	266,697

Fish	£436,066
Hardware	106,107
Lard	3,661,264
Leather	3,973,524
Machinery	2,405,278
Oil seed cake	595,765
Oleo-manufg.	723,167
Paper, &c.	286,322
Paraffin Wax	672,597
Petroleum	4,537,120
Pork	351,456
Preserved Meat	639,369
Rosin	469,978
Skins and Furs	953,972
Sugar	737,040
Tobacco	4,348,879
Turpetentine	745,685
Wood, all kinds	4,417,122

And the chief imports of domestic produce from the United Kingdom in 1908 were (*B. of Trade*):—

Beer and Ale	£235,573
Books	369,462
Chemical products	205,760
Cotton manufs.	2,821,819
" yarn	428,679
Earth & chinaware	465,224
Fish	242,883
Hides, raw	256,168
Jute manufs.	866,295
Leather	291,769
Linen	£2,874,583
Machinery	572,221
Metals, all kinds	2,245,085
Rags, &c., for paper	285,457
Silk & manufs.	203,170
Skins and furs	595,172
Spices	440,729
Wool	614,225
Woolleens	1,025,686

MERCANTILE MARINE.—On July 1, 1908, it consisted of 25,425 vessels, of which 10,926 were steamers, and 14,499 other than steamers, the total gross tonnage being 7,365,445.

COMMERCE OF THE UNITED STATES.

Merchandise only.

YEAR.	EXPORTS.	IMPORTS.	TOTAL.
	Dollars.	Dollars.	Dollars.
1792	20,753,098

1895	807,538,165	731,969,965	1,539,508,130
1900	1,394,483,082	849,941,184	2,244,424,266
1905	1,518,561,666	1,117,513,071	2,636,074,737
1906	1,743,864,500	1,220,562,446	2,970,426,946
1907	1,880,851,078	1,434,421,425	3,315,272,503
1908	1,866,773,346	1,194,341,792	3,055,115,138

The total domestic exports for the last four fiscal years ending June 30 have been: 1904, \$1,435,179,017; 1905, \$1,491,744,641; 1906, \$1,717,953,382; 1907, \$1,853,718,034; 1908, \$1,834,786,357.

RAILWAYS.—For the year ending June 30, 1907, the length of single track mileage was 229,951 miles, an increase of 5,588 since 1906. The mileage of tracks of all kinds for which operations were reported (including 227,455 miles of single track) was 327,975, increase 10,892 miles, and the gross earnings \$2,589,105,578; the number of railway employees was 1,672,074.

POSTAL.—The number of Post Offices in the United States, June 30, 1908, was 61,153. The postal revenue (1908) was \$191,478,663. The number of inland money orders issued was 60,864,570, and the amount \$498,699,637. Of international money orders the number issued was 3,711,640, value \$88,972,388; postal expenditure, \$208,351,886.

PRECIOUS METALS.—The Director of the U.S. Mint estimates the (1907) production of gold at 4,274,827 fine oz. (\$90,435,700), silver 56,514,700 fine oz. (\$37,299,700 commercial value), the total value therefore being \$127,734,400.

TERRITORIAL EXPANSION.

In the year 1898 the U.S.A. became involved in war with Spain on account of the unsettled state of affairs in the neighbouring island of Cuba. The result of the war was the freedom of that island from Spanish control and the cession of the Philippine Islands and the Island of Guam, the Island of Puerto Rico, which was captured during the war, being retained; these conditions were confirmed by a Treaty of Peace signed at Paris (10 Dec., 1898). During the year the inde-

pendent islands of the Hawaiian group were annexed by a resolution of Congress, and in 1899, under the provisions of the Samoan Convention, those islands of the Samoan Archipelago not annexed by Germany fell to the share of the U.S.A.

In a few months, therefore, the U.S.A. assumed the responsibility of a vast over-sea dominion, with between 9,000,000 and 10,000,000 inhabitants.

Hawaii is a group of islands in the N. Pacific in lat. 19° to 22° 15' N., and long. 154° 48' to 160° 20' W., with a total area of about 6,449 sq. miles, and a population of about 170,000 (Orientals 95,000, Latins 27,000, Teutons 13,000, Hawaiians 35,000). The capital is Honolulu in Oahu, pop. about 39,300.

The Samoan Islands.—By the Anglo-German agreement of 14 Nov., 1899, the island of Tutuila and all other islands in the Archipelago east of 172° E. long. were reserved to the U.S.A.

In the West Indies: The island of PUERTO RICO, captured during the war, has an area of about 3,600 square miles, and 953,243 inhabitants; the capital, San Juan, has a population of 32,048, Ponce (27,052) and Mayaguez (15,187) being also towns of importance. The products are sugar, coffee, and tobacco.

In the East Indies: The PHILIPPINE ISLANDS have an area of about 121,395 square miles, with a population (1903) of 7,635,426 (civilised, or partly so, 6,987,686; wild and uncivilised 647,740). The capital is Manila, in the island of Luzon (population 219,928), other large towns being Iloilo (34,459), Lipa (37,943), Bauan (39,094), Batangas (33,131). The principal products are sugar, sugar, coffee, indigo, and copra, in addition to the tobacco plant, which is extensively grown in the island of Luzon. The total trade in 1907 was \$30,453,810 for imports, and \$33,097,867 for exports.

Guam, the largest island of the Ladrone (or Marianna) group, is situated in 145° E. and 14° N., and has an area of about 150 square miles, with about 11,490 inhabitants. The capital is Agaña.

FEDERAL CAPITAL, Washington (3,850 miles from London). Pop. 1900, including the District of Columbia), 278,718.

Ambassador Extraordinary and Plenipotentiary, His Excellency Rt. Hon. James Bryce, O.M. £10,000

Secretary of Legation (Chargé d'Affaires), Dr.

Alfonso S. de Zumarán, 12 King's Gardens, West Hampstead, N.W.

Consul-Gen., Carlos Nery, 5 Clements Inn, W.C.

A Republic in South America, on the east coast of the Rio de la Plata, situate in lat. 30°-35° S. and long. 53° 25'-57° 42' W., containing an area of 72,172 square miles, and an estimated population of 1,039,078 (1908); was formerly a dependency of Spain. United to the Argentine Confederation early in the present century, it was afterwards annexed by Portugal, and became later a province of Brazil; but through the bravery of the patriotic "thirty-three" it succeeded in throwing off the Brazilian yoke and declared its independence 25 August, 1825. A war in consequence ensuing between Brazil and the Argentine Confederation, both the Powers agreed, through the mediation of Great Britain, to recognise Uruguay as a sovereign and independent State. The imports from the U.K. are numerous, the principal being woollen and cotton goods, hardware, and coals. The chief exports are wool, hides, horn, hair, tallow, and jerked beef. Wheat, barley, and maize are cultivated, but the wealth of the country is obtained from its pasturage, which supports large herds of horned cattle (9,000,000 in 1908) and sheep (26,000,000 in 1908), the wool of which is of excellent quality. Gold mines exist at Curupí. The principal river is the Uruguay and its affluents, of which the Rio Negro is the chief. There are 1,220 miles of railway open (1907), all in British hands, and the prolongation of the Central Railway eastern extension from Nicoperez to Artigas on the Brazilian frontier is now completed, and 4,945 miles of telegraph in 1907. There are about 300 kilometers of electric tram lines in Monte Video.

	1908-9.
Revenue (Estimate)	£4,485,081
Expenditure	4,484,113
Total debt (31 Dec., 1907)	27,263,599

Development, General Rafael Maria Carabaño.

Minister to Gt. Britain, Dr. Rafael Villavicencio.
Consulate-General, Dr. Antonio I. Iturbe, 31
 King William Street, E.C.

Consul at Southampton, Andres Ybarra.

The most northerly Confederation of South America, situated approximately between 1°40' S. lat. and 12° 26' N. lat. and 59° 52'—73° 15' W. long. It consists of 20 States and 2 federal territories. The best authorities calculate the actual present area to be approximately 363,728 square miles. The census of 1891 gave the population as 2,323,527; it was estimated to be 2,661,569 at 31 Dec., 1908. The principal imports are cotton prints and cotton drill. The principal articles of export are, coffee (£1,355,490 in 1907-8); cocoa £804,967; balata gunn, cattle, and hides. The U.S. is the principal customer.

The decrees of ex-President Castro directed against trade with Trinidad and Curaçao were abolished at the beginning of the year 1909, but so far trade with those islands has not shown the improvement that was to be expected. This is no doubt due to the 30 per cent. differential

surtax which, in defiance of treaty stipulations, is still levied by the Venezuelan Customs on all importations from the Antilles.

The prevailing religion of the country is Roman Catholic, there being but few of the Protestant faith. Education, which is in a very backward condition, is nominally free. The State provides schools for primary instruction; there are also some secondary schools and two universities. The Army has a nominal strength of nearly 9,000 men, and service in the national militia is compulsory. The Navy is composed of 8 vessels (3 gun-boats, 1 tug, 2 transports, 1 torpedo boat destroyer, and 1 torpedo boat). The length of railways opened and under construction is 526 miles.

Foreign Measures and Weights.

THE following are the values, according to the British standard, of the commoner measures of length, surface, capacity (dry and liquid), and weight in use in foreign countries. Those measures which appear in italics may be regarded as obsolete. The chief authorities which have been consulted are Siegfried's "Münz-, Maass-, und Gewichts-Tabelle" (Leipzig), and Dr. W. A. Browne's "Merchants' Handbook" (Stanford, London). To the latter, inquirers may be referred for fuller information.

The Metric System is fully given on p. 430.

Annam (Cochin China).

1 Tak	=	1'92 inches.
1 Thuok	=	19'2 inches.
1 Truon (2 Ngu)	=	16'0 feet.
1 Saß	=	24'0 feet.
1 Maß	=	240'0 feet.
1 Li, or Mile	=	486'0 yards.
1 Dam	=	972'0 yards.
1 square Saß	=	64'0 sq. yards.
1 Haß	=	6'222 gallons.
1 Shita, or Taß	=	12'444 gallons.
1 Fan (10 Li)	=	6'015 Tr. grains.
1 Luong (10 Dong) ...	=	601'562 Tr. grains.
1 Khan	=	1'375 lb. av.
1 Yen	=	13'75 lb. av.
1 Binah	=	68'75 lb. av.
1 Ta	=	137'5 lb. av.
1 Kwan	=	687'5 lb. av.

Argentine Republic.

The Metric System.

1 Pie (12 Pulgada)	=	11'365 inches.
1 Vara (3 Pie)	=	2'841 feet.
1 Braza (2 Vara)	=	5'682 feet.
1 Cuadra (150 Vara) ...	=	142'065 yards.
1 Legua (40 Cuadra) ...	=	3'228 miles.
1 Quintal	=	90'251 lb. av.

Austria-Hungary.

Metric, by compulsory law of Jan. 1, 1876.

1 Faust or Hand	=	4'148 inches.
1 Fuss (12 Zoll)	=	1'037 feet.
1 Elle	=	30'613 inches.
1 Vienna Klafter ...	=	2'874 yards.
1 Post Mile	=	4'773 miles.
1 square Fuss	=	1'075 sq. feet.
1 square Klafter	=	4'301 sq. yards.
1 Joch	=	1'422 acres.
1 Metze	=	1'602 bushels.
1 Muth (30 Metze) ...	=	6'347 quarters.
1 Mass	=	1'246 quarts.
1 Bimer	=	12'463 gallons.
1 Loth	=	9'877 drams av.
1 Pfund (32 Loth) ...	=	1'234 lb. av.
1 Centner	=	123'472 lb. av.

Belgium.

The Metric System.

1 Pied (10 Pouce) ...	=	11'811 inches.
1 Aune (4 Pied)	=	3'937 feet.
1 Toise (6 Pied)	=	5'905 feet.
1 Perche (10 Pied) ...	=	9'842 feet.
1 Arpent	=	3875'02 sq. feet.
1 Pot	=	88'0 pint.
1 Muid	=	88'097 pints.
1 Boisseau	=	3'303 gallons.
1 Livre	=	1'102 lb. av.
1 Quintal	=	110'231 lb. av.

Bolivia.

As old Spanish (*q.v.*).

Brazil.

1 Pollegada (12 Linha) =	1'093 inches.
1 Pé (12 Pollegada)	13'123 inches.
1 Covado	26'247 inches.
1 Vara	1'215 yards.
1 Braca	2'430 yards.
1 Estadio	285'235 yards.
1 Milha	1'206 miles.
1 Legoa	3'889 miles.
1 square Vara	1'476 sq. yards.
1 square Braca	5'906 sq. yards.
1 Geira	1'476 acres.
1 Oitavo	380 gallon.
1 Alqueira (Bahia)	825 bushel.
1 Alqueira (Rio)	1'004 bushels.
1 Panga	1'523 bushels.
1 Quartilho	614 pint.
1 Canada (Rio)	2'444 quarts.
1 Almuda	3'684 gallons.
1 Oitavo	55'335 Tr. grains.
1 Onca	442'687 Tr. grains.
1 Arratel	1'018 lb. av.
1 Arroba	32'379 lb. av.
1 Quintal (100 Arratel) =	17'186 lb. av.

And the Metrical System.

Bulgaria, As Turkish (*q.v.*).

The Metric System is also used.

Burmah.

As Indian (*q.v.*), and,

1 Pulgat	=	1'0 inch.
1 Tain, or Malk (8 Thit) ...	=	5'5 inches.
1 Tounge or Saading (4 Tain) ...	=	22'0 inches.
1 Lan (4 Tounge)	=	88'0 inches.
1 Tha (7 Tounge)	=	154'0 inches.
1 Okethapah	=	85'56 yards.
1 Tain	=	1069'44 yards.
1 Dain (4 Tain)	=	2'430 miles.
1 Uzena	=	15'555 miles.
1 Lamyet	=	1'0 gill.
1 Salsy	=	1'0 pint.
1 Sah	=	1'0 gallon.
1 Saik	=	1'0 peck.
1 Teng	=	1'0 bushel.
1 Covan (100 Teng)	=	12'5 quarters.
1 Large Ruay	=	3'937 Tr. gr.
1 Bai, or Anna	=	15'75 Tr. gr.
1 Moo	=	37'5 Tr. gr.
1 Mat	=	63'0 Tr. gr.
1 Tikal, or Kyat	=	252'0 Tr. gr.
1 Viss, or Plakthah	=	3'6 lb. av.

Chile.

The Metric System, and,

1 Vara (3 Pie)	=	33'367 inches.
1 Cuadra	=	3'9 acres.
1 Arroba (wine)	=	7'749 gallons.
1 Quintal (100 Libra) ...	=	101'42 lb. av.

Also as old Spanish (*q.v.*).

China.		
1 Ts'un (10 Fan).....	=	1'41 inches.
1 Ch'ih (10 Ts'un).....	=	14'1 inches.
1 Chang (10 Ch'ih).....	=	141'0 inches.
1 Yin (10 Chang).....	=	117'5 feet.
5 Ch'ih.....	=	1'0 Kung.
1 Kung.....	=	1'0 Chang.
1 sq. Chang (1 Ch'ing)...	=	121'0 sq. feet.
15 Ch'ing (1 Ch'ito).....	=	1815'0 sq. feet.

1 Junkal.....	=	9'0 in.
1 Etto.....	=	18'0 in.
1 Halloh.....	=	1'0 yard.
1 Tung.....	=	4'0 yards.
And as in Netherlands.		

Ecuador.
Metric since 1857, and as old Spanish (q.v.).

Egypt.

1 Kirat.....	=	1'125 inches.
1 Rub (6 Kirat).....	=	6'75 inches.
1 Draa, or Pike.....	=	27'0 inches.
1 Draa Istambuli.....	=	26'654 inches.
1 Draa Belendi.....	=	23'736 inches.
1 Endasch.....	=	25'134 inches.
1 Pike Nili.....	=	21'287 inches.
1 Nubian Draa.....	=	26'654 inches.
1 Gasab.....	=	3'0 yards.
1 Feddan (400 sq. Gasab)...	=	1'1019 acres.
1 Ardeb (Alexandria).....	=	7'4457 bushels.
1 Ardeb (Cairo).....	=	4'9246 bushels.
1 Ardeb (Rosetta).....	=	7'8131 bushels.
1 Ardeb (Nubia).....	=	5'0069 bushels.
1 Mörrhi (12 Maud).....	=	7'703 bushels.
1 Dirhem.....	=	47'561 Tr. gr.
1 Uckieh (12 Dirhem).....	=	571'938 Tr. gr.
1 Rottolo (12 Uckieh).....	=	9804 lb. av.
1 Cantar (100 Rottoli).....	=	98'046 lb. av.
1 Oka (400 Dirhem).....	=	2'723 lb. av.
1 Trade Oka (420 Dirhem).....	=	2'850 lb. av.
1 Kirat (jewels).....	=	2'9788 Tr. gr.
1 Metikal.....	=	71'492 Tr. gr.

France.

Metric System, and old "Système Usuel."

1 Pied (10 Pouce).....	=	11'812 inches.
1 Aune (4 Pied).....	=	3'337 feet.
1 Toise (6 Pied).....	=	70'864 inches.
1 Perche (10 Pied).....	=	118'1123 inches.
1 Pot.....	=	88'60 pint.
1 Brandy.....	=	22'048 pints.
1 Muid.....	=	88'097 pints.
1 Livre.....	=	1'1023 lb. av.
1 Quintal.....	=	110'234 lb. av.
1 Barrique (Bordeaux).....	=	401'28 pints.
1 Barrique (Marseilles).....	=	394'24 pints.
1 Millerole.....	=	112'64 pints.
1 Pièce (Bordeaux).....	=	668'8 pints.
1 Pipe.....	=	1091'2 pints.
1 Tonneau.....	=	2204'6 lb. av.

Germany.

The Metric System was legalized throughout the Empire, Jan. 1, 1872, but French nomenclature is as far as possible avoided. The millimètre is also called Strich; the centimètre, Neu Zoll; the mètre, Stab; the décimètre, Kette; the litre, Kanne; the half-litre, Schoppen; the hectolitre, Fass; the décalitre, Neu Loth; the half-kilogramme, Pfund. The Centner is 50, and the Tonne is 1,000 kilograms. The chief obsolete measures are:—

Prussian Fuss (12 Zoll).....	=	1'0297 feet.
Elle.....	=	2'1881 feet.
Ruthe.....	=	4'1188 yards.
Meile.....	=	4'6805 miles.
Morgen.....	=	2'5207 roods.
Hufe (30 Morgen).....	=	18'520 acres.
Metze.....	=	3'024 quarts.
Scheffel (4 Viertel).....	=	1'512 bushels.
Tonne.....	=	756 gr.
Last (60 Scheffel).....	=	11'240 gr.
Ossel.....	=	1'007 pints.
Anker (60 Ossel).....	=	7'559 gallons.
Ohm (2 Eimer).....	=	30'237 gallons.
Fuder.....	=	181'422 gallons.
Zollpfund (30 Loth).....	=	1'1023 lb. av.

Germany—continued.

Prussian Old Pfund	= 7217·886 Tr. gr.
Saxon Fuss	= 11·1494 inches.
<i>Stab</i>	= 44·5976 inches.
<i>Scheffel</i>	= 2·892 bushels.
<i>Kanne</i>	= 1·647 pints.
<i>Fass (2 Ochoft)</i>	= 88·937 gallons.
Hanoverian Fuss	= 11·5 inches.
<i>Last</i>	= 10·284 qr. ⁷ .
<i>Anker (4 Viertel)</i>	= 8·570 gallons.
Brunswick Fuss	= 11·235 inches.
<i>Anker (10 Stubschen)</i>	= 8·24 gallons.
Oldenburg Fuss	= 11·649 inches.
<i>Anker (26 Kanne)</i>	= 7·860 gallons.
Baden Fuss	= 11·811 inches.
<i>Maass</i>	= 1·320 quarts.
<i>Pfund</i>	= 1·1023 lb. av.
Württemberg Fuss	= 1·9399 foot.
<i>Pfund (32 Loth)</i>	= 1·0311 lb. av.
Hamburg Fuss	= 11·2825 inches.
<i>Anker</i>	= 7·9735 gal.
<i>New Pfund</i>	= 1·1023 lb. av.
Bremen Fuss	= 11·3919 inches.
<i>Anker</i>	= 7·8 gallons.
Lubeck Fuss	= 11·323 inches.
<i>Anker</i>	= 8·006 gallons.
<i>Pfund (32 Loth)</i>	= 1·0725 lb. av.

Greece.

The Metric System was introduced by an ordinance of Oct. 26, 1832. In Greece, gramme = millimeter; daktulos = centimeter; palame = decimeter; pecheus = meter; stadion = kilometer; skionis = myriameter; stremma = are; kyhos = milliliter; mystron = centiliter; kotyle = deciliter; litra = liter; kolion = hectoliter; kokkos = centigram; obolos = decigram; drachme = gram; mna = 1½ kilogram.

Hayti, as in France.

India.—Bengal.

Under "The Indian Weights and Measures Act, 1870," the standard of weight is the Ser (Kilogramme) = 2·20462 lb. av.; the standard of length is the metre = 3·28089 feet; and the standard of capacity is the Ser (litre) = 1·760773 pints, or 61·027046 cubic inches.

1 Moot (4 Ungulee)	= 3 inches.
1 Hath (21 Ungulee)	= 18 inches.
1 Hyderabad Hath	= 35·334 inches.
1 Guz	= 1 yard.
1 Coss	= 2000 yards.
1 Jojun	= 8000 yards.
1 Beegah	= 1600 sq. yards.
1 Beegah (N.W. Provs.)	= 3025 sq. yards.
1 Ser	= 2·20462 lb. av.
1 Ser	= 1·76195 pints.
1 Tola	= 180 Tr. grains.
1 Seer (16 Chittaks)	= 2·059 lb. av.
1 Factory Maund	= 74·66 lb. av.
1 Bazaar Maund	= 72·33 lb. av.
1 Imperial Maund	= 82·287 lb. av.
1 Masha (8 Ruttee)	= 15·0 Tr. grains.
1 Seer (4 Povah)	= 1·965 pints.
1 Maund (40 Seer)	= 9·8093 gallons.

Bombay.

1 Guz (24 Tussoo)	= 27 inches.
1 Beegah (30 Pund)	= 3927 sq. yards.
1 Seer (72 Tank)	= 7 lb. av.
1 Maund	= 23 lb. av.
1 Candy	= 560 lb. av.
1 Sattara Candy	= 3055 lb. av.

Madras.

English Measures, and,

1 Kole or Guz	= 33 inches.
1 Moolum	= 19½ inches.
1 Puddee	= 2·882 pints.
1 Mercal	= 2·882 gallons.
1 Parah	= 14·4261 gallons.
1 Tola	= 180 Tr. grains.
1 Cutcha Seer,	= 4320 Tr. grains.
1 Viss	= 3·0857 lb. av.
1 Maund	= 24·6857 lb. av.
1 Candy	= 493·7142 lb. av.

Italy.

The Metric System.

1 Roman Miglio (1000 Passo)	= 1627·783 yards.
1 Roman Scorzio	= 1381·648 sq. yd.
1 Roman Quaterello	= 1·012 bushels.
1 Roman Foglietta	= 8·015 pint.
1 Roman Boccale	= 3·2101 pints.
1 Roman Denaro	= 18·2 Tr. gr.
1 Roman Oncia (24 Denaro)	= 436·2 Tr. gr.
1 Roman Libbra (12 Oncia)	= 7477 lb. av.
1 Naples Miglio	= 1·1507 miles.
1 Naples Oncia	= 412·512 Tr. g.
1 Sicilian Miglio	= 1625·793 yards.
1 Tuscan Miglio	= 1·0275 miles.
1 Lombard Miglio	= 1093·63 yards.

Japan.

1 Bu (10 Ring)	= 1·193 inch.
1 Sun (10 Bu)	= 1·1931 inches.
1 Shaku (10 Sun)	= 11·931 inches.
1 Ken (6 Shaku)	= 5·965 feet.
1 Jo (10 Shaku)	= 3·314 yards.
1 Cho (60 Ken)	= 119·305 yards.
1 Ri (36 Cho)	= 2·44034 miles.
1 Kujirad Shaku	= 14·913 inches.
1 Chō	= 2·4507204 acres.
1 Tan	= 32·211526 sq. poles.
1 Se	= 118·61486 sq. yd.
1 Tsubo	= 3·953289 sq. yd.
1 Shaku	= 98845723 sq. ft.
1 Sai (10 Sat)	= 003176 pint.
1 Shaku (10 Sun)	= 03176271 pint.
1 Gō (10 Shaku)	= 3176271 pint.
1 Shō (10 Gō)	= 3176271 pints.
1 To (10 Shō)	= 3703389 gallons.
1 Koku (10 To)	= 4·9629237 bushels.
1 Fun (10 Rin)	= 5797 Tr. grains.
1 Monme (10 Fun)	= 5797 Tr. grains.
1 Rin (10 Mo)	= 0·5797 Tr. grains.

Malta.

1 Piede	= 11·166 inches.
1 Palmo	= 10·2757 inches.
1 Misura	= 41·103 inches.
1 Canna	= 2·283 yards.
1 Salma (16 Tumuio)	= 4·964 acres.
1 Salma	= 7·9372 bushels.
1 Pint	= 8331 pint.
1 Barile (wine)	= 9·35 gallons.
1 Libbra (12 Oncia)	= 4886 Tr. grains.
1 Rotolo	= 1·745 lb. av.

Mexico.

As old Spanish (q.v.).

Netherlands.

Since 1820 the Metric System. Streep = millimeter; Duim = centimeter; Palm = decimeter; El = meter; Roede = decameter; Mijle = kilometer; Wisse = Stere; Vingerhoed = centiliter; Maatje = deciliter; Kan = liter; Vat = hectoliter; Korrel = decigram; Wigtje = gram; Lood = decagram; Onze = hectogram; Pond = kilogram.

Norway.

The Metric System since 1878.

Persia.

1 Zer (16 Gereh)	= 38 inches.
1 Persakh (<i>Parasang</i>)	= 4½ miles.
1 Chenica	= 289 gallon.
1 Capicha	= 578 gallon.
1 Collothun	= 1809 gallons.
1 Artata	= 1809 bushels.
1 Seer (16 Miscal)	= 284 Tr. grains.
1 Ratel	= 1014 lb. av.
1 Batman, or Maund.	= 6491 lb. av.
1 Karwar	= 649142 lb. av.
1 Batman Rei	= 27 lb. av.

Peru.

Metric, old Spanish, and British; but Vara (3 pie) = 2780 feet; Fanega (wheat) = 135 or 140 libra; Carga = 150 libra.

Philippine Islands.

1 Pulgada (12 Linea)	= 927 inch.
1 Pie	= 11125 inches.
1 Vara	= 33375 inches.
1 Gantah	= 8796 gallon.
1 Caban	= 21991 gallons.
1 Libra (16 Onzo)	= 10144 lb. av.
1 Arroba	= 25360 lb. av.
1 Catty (16 Tael)	= 1394 lb. av.
1 Pecul (100 Catty)	= 139482 lb. av.

Poland.

As in Russia, and,

1 Cwierc (6 Cal) = 5606 in.	1 Szynrow = 47245 yds.
1 Stopa	= 11212 in.
1 Mifa	= 5304 mls.
1 Lozice	= 22425 in.
1 Morgone	= 1382 acs.

Portugal, Rumania, and San Domingo.

The Metric System.

Russia.

1 Stopa (3 Vershok)	= 14 inches.
1 Arschine (16 Vershok)	= 28 inches.
1 Saschen (3 Arschine)	= 7 feet.
1 Verst (500 Saschen)	= 116666 yards.
1 Desatine	= 13066½ sq. yards.
1 Vedro (100 Tscharkay)	= 2704 gallons.
1 Anker	= 8114 gallons.
1 Chetvert	= 462 gallons.
1 Sarokowaja	= 108196 gallons.
1 Tschetwerik	= 2885 pecks.
1 Pajak	= 1442 bushels.
1 Last	= 11540 quarters.
1 Zolotnick (96 Doli)	= 65830 Tr. gr.
1 Funt (12 Lani)	= 9028 lb. av.
1 Food (40 Funt)	= 361127 lb. av.
1 Berkowitz	= 361273 lb. av.
1 Pucken	= 1083382 lb. av.

Servia.

The Metric and Turkish Systems.

Siam.

1 Niw	= 83 inch.
1 Kū'p (12 Niws)	= 10 inches.
1 Sawk (2 Kū'ps)	= 19½ inches.
1 Wah (4 Sok)	= 80 inches.
1 Sen (20 Wahs)	= 44½ yards.
1 Yot (400 Sens)	= 9½ miles.
1 Rōeneng	= 2525 milos.
1 Thang	= 375 gallons.
1 Coyan	= 375 gallons.
1 Tael (4 Bat)	= 92625 Tr. grains.
1 Chang, or Catty	= 2675 lb. av.
1 Hap, or Pecul	= 13375 lb. av.
1 Kean (20 Piculs)	= 1675 lb. av.

Spain.

The Metric System was made compulsory on July 1, 1868. In many countries that were

colonised by Spain some of the old Spanish measures are still used, e.g.:

1 Pulgada (12 Linea)	= 927 inch.
1 Sesma (6 Pulgada)	= 5564 inches.
1 Vara (6 Sesma)	= 2784 feet.
1 Estado (2 Vara)	= 5564 feet.
1 Legua (of Castile)	= 456666 yards.
1 Fanegada	= 16374 acres.
1 Cuartillo (4 Capa)	= 1109 gal.
1 Cuartilla (2 Azumbre)	= 8899 gal.
1 Arroba Mayor (or Cantara)	= 3557 gal.
1 Mayor (16 Cantara)	= 56276 gal.
1 Medio (2 Cuartillo)	= 6621 bushel.
1 Almude (2 Medio)	= 1256 bushel.
1 Fanega	= 15076 bushel.
1 Cahiz	= 180919 bushel.
1 Tomin (12 Grano)	= 62113 oz. av.
1 Onza	= 6624 lb. av.
1 Libra (of Castile)	= 1014 lb. av.
1 Quintal	= 101442 lb. av.
1 Tonelada	= 101442 lb. av.

Sweden.

The Metric System since 1875.

1 Fot (10 Tom)	= 11683 inches.
1 Mil (350 Ref)	= 6646 miles.
1 Kannu	= 4668 pints.
1 Skoal pund (100 Ort)	= 937 lb. av.

Switzerland.

The Metric System since Jan. 1st, 1873.

1 Fuss (10 Zoll)	= 118112 inches.
1 Stunde (1600 Ruthe)	= 29826 miles.
1 Maller (10 Viertel)	= 4126 bushels.
1 Maass (4 Schoppen)	= 2641 pints.
1 Pfund (16 Unze)	= 11023 lb. av.

Tripoli.

1 Pike	= 26416 inches.
1 Draa	= 1913 inches.
1 Orbah	= 1476 gallons.
1 Hueba (4 Temen)	= 2952 bushels.
1 Seechie (4 Bozze)	= 2361 gallons.
1 Oka (40 Uekieh)	= 269 lb. av.
1 Centner (100 Rottoli)	= 10766 lb. av.

Turkey.

1 Pike or Arshen	= 27¼ inches.
1 Pike or Arshen (land)	= 29¾ inches.
1 Halebi or Archim	= 279 inches.
1 Endazeh (Silk)	= 25¼ inches.
1 Agatsch (12 Berri)	= 31155 miles.
1 Jubbeh (11 Rottoli)	= 4851 bushel.
1 Fortin (4 Kilow)	= 38809 bushels.
1 Rottoli (12 Okieje)	= 2513 pints.
1 Almud (8 Oka)	= 11529 gallons.
1 Cantar (100 Rottoli)	= 31417 gallons.
1 Cantar (dry)	= 12408 av.
1 Okieje (100 Dirhem)	= 70824 lb. av.
1 Kélé or Oke (4 Okieje)	= 21975 lb. av.
1 Batman (dry)	= 1692 av.

United States.

The Metric System, authorized 1866; also weight, length, and surface measures as in England, and old Winchester measure.

1 Pint (dry)	= 6694 pint.
1 Gallon (dry)	= 3694 gallon.
1 Bushel	= 3694 bushel.
1 Quarter	= 6694 quarter.
1 Pint (wine or spirit)	= 6231 pint.
1 Gallon (wine or spirit)	= 6231 gallon.
1 Pint (beer)	= 1017 pints.
1 Quintal or Centner	= 100 lb. av.
1 Barrel (of flour)	= 196 lb. av.
1 Barrel (of beef)	= 200 lb. av.

Uruguay.

Metric System, introduced 1864; also as in Argentine Republic. Venezuela, the Metrical System, since 1857; and old Spanish.

Military Systems of the World.

BELOW will be found reproduced, in a succinct form, the detailed account of the military systems of foreign countries originally given in the ALMANACK for 1906.

Whilst the figures given may be accepted as substantially accurate, they cannot be used to determine by simple division the cost per head of the soldier, inasmuch as some States, for example Belgium, rely and expend relatively a great deal more than others, for example Japan, upon fixed defences and fortifications. The system of accounting, too, varies, some States providing for pensions and other non-effective services in separate Budgets, some charging their Army estimates with items reckoned by others in Naval votes.

The essential difference between "universal service" and "conscription" requires emphasis. The former involves the liability of all able-bodied males, and (where thoroughly administered) confines exemption to individual cases, e.g., only sons of widows, young men entering upon a learned profession, clergy, &c.

The latter involves the choosing by lot of a regulated annual conscript contingent from amongst a considerably larger number of young men of military age, and the possibility of exemption on payment, or on finding a substitute.

This latter system has been almost universally abandoned.

In "Militia" armies and forces the training is intermittent only, and, as it is now recognised that troops thus maintained lack the solidity and moral essential for great or long-sustained operations in general, and for offensive warfare in particular, this system is relied upon only by States whose exterior policy is avowedly neutral, or by those whose neutrality is safeguarded by their more powerful neighbours.

Explanations.—Where two periods of service in an active army are mentioned, the shorter is that of the dismounted, the longer that of the mounted branches, the relative lengths being usually reversed during reserve service. A.A. = Active Army. A.R. = Reserve of Active Army. T.A. = Territorial Army. N.G. = National Guard. Trg. = Training. P.E. = Peace Establishment. W.E. = War Establishment. Formations legally available for interior defensive action only are enclosed in square brackets.

The Budgets are stated for 1909.

N.B.—Special attention is invited to the fact that, with the exception of Great Britain and the United States, no country recruits *ad hoc* for its Territorial or Home Defence Force.

(x). Countries that have adopted Universal Service:—

Argentina.—National Militia; A.A., 10 yrs.; Initial trg. 3-12 mos., a subseq. trgs. each 1 mo.; then, N.G. 10 yrs., 4 trgs. each 15 dys., and [T.G., 5 yrs. no trg.]. P.E., 1,560 offrs., 16,000 others. W.E., 125,000 (excl. N. & T. Gs.). £1,981,700.

Austria-Hungary.—(i.) A.A., 3 yrs. (2 yrs. projected); A.R., 7 yrs., 3 trgs. each 1 mo. Res. of Landwehr, 2 yrs., 1 trg. of 1 mo. Or, (ii.) direct to Landwehr, 2 yrs., max. trg. in Austria 20 wks., in Hungary 25 wks.; then Land. Res. 10 yrs., 1 trg. of 1 mo. Or, (iii.) to Ersatz Res. trg. 2 mos.; then to age 42 in [Landsturm 1st Ban and do. and Ban]. P.E. Common Army, 26,664 offrs., 4,652 officials, 285,259 others (combt.), and 626 non-combt. Ord., £13,442,050. Entry, £513,280. **Bosnia-Herzegovina** (Army of Occupation), 176 offrs., 3,354 others. *Native Contingent*,

350 offrs., 6,734 others. £338,625. **Austrian Landwehr**, P.E., 3,324 offrs., 1,393 officials, 39,041 others. £2,602,105. **Hungarian** do., 2,700 offrs., 26,000 others. £2,019,000. W.E., Mobilised Field Army, 890,000. Other formations abt. 1,000,000. Military activity in Austria-Hungary has for the past two years been most remarkable.

Bulgaria.—A.A., 2 or 3 yrs.; A.R., 18 or 16 yrs.; [T.A., 1st Ban, to age 44, T.A. and Ban, to age 46]. P.E., 3,532 offrs., 54,146 others. W.E., Orgd. formations only, 375,000. £1,542,225.

Chile.—National Militia; A.A., Initial trg. 6 mos.; A.R., 9 yrs. [2nd Res. to age 45]. P.E., 850 offrs., 10,800 others. W.E., 95,000. £1,220,000.

Denmark.—National Militia; A.A., 8 yrs. Initial trgs. 6½-19 mos.; then, [T.A., 8 yrs., 2 trgs. each 25 dys.]. P.E., 14,000. W.E., 75,000. £736,240.

France.—A.A., 2 yrs. (rigorously enforced, no exemption save for physical unfitness). A.R., 11 yrs., 2 trgs. each 1 mo.; then, [T.A., 6 yrs., 1 trg. 2 wks., and T.A. Res. 6 yrs. no trg.]. P.E. (not legally limited as in Germany), and excl. officers, &c. A.A., in France, 496,970; in Algeria, 55,110; in Tunis, 20,000 (one-third natives). "Colonial Army" (in France), 27,580. W.E., excl. "Col. Army" and Algeria and Tunis, also excl. some 30,000 gendarmes, &c. Mobilised Field Army, 725,000; 1st Res., 475,000; Dépôts, 625,000. [Organised T.A., 550,000; unorgd. do., 700,000.] Oversea Garrisons, Indo-China, 14,000 Europeans, 18,000 natives; Madagascar, 4,000 Europeans, 8,000 natives. Minor forces in W. Africa, &c. Home, ord., £29,181,650; entry, £2,500,000; Colonial, £1,440,000; Algeria-Tunis, etc., £3,020,000.

Germany.—(i.) A.A., 2 or 3 yrs.; A.R., 5 or 4 yrs., 2 trgs. each 2 mos.; then, Landwehr 1st Ban, 5 or 3 yrs., 2 trgs. each 14 dys. for dismtd. branches only; 2nd Ban to age 40, no trg.; then, [Landsturm, and Ban to age 45]. Or, (ii.) to Ersatz Res., 3 trgs. of 10, 6, and 4 wks.; then to Landsturm. Or, (iii.) to Landsturm 1st Ban to age 39, 2nd Ban to age 45; 1st Ban incl. all able-bodied males age 17-39 not otherwise serving). "One-year volunteers" accepted, pay all expenses. P.E., 25,559 offrs., 529,185 combt. N.C.O.'s and men, 6,409 non-combts., 11,000 1-yr. vols. W.E., Mobilised Field Army, 1,105,000; Orgd. Landwehr, 600,000; Ersatz and [Landsturm] abt. 2,000,000. Permanent charges, £35,046,400; Non-recurrent, £5,152,200; Entry, £2,172,700. Oversea Garrisons, Kiau-Chan, 2,700; S.W. Africa, 4,600; Minor Colonies, 425 Europeans, 3,800 natives.

Greece.—(i.) A.A., 2 yrs.; A.R., 10 yrs. [T.A., 8 yrs.; T.A. Res. 10 yrs.]. Or, (ii.) Ersatz, at present untrained. P.E., 1,875 offrs.; 20,187 others. W.E., orgd., 50,000; unorgd., 70,000. £758,610.

Italy.—Extensive re-organisations projected. (i.) A.A., 2 or 3 yrs. (frequently curtailed); "on leave" (A.R.) 7 or 6 yrs., 1 trg. of 2 wks.; Mobile Militia (Landwehr), 3 or 4 yrs.; and [T.A., 7 yrs., or to age 39]. Or, (ii.) Complementary Res., 8 or 9 yrs., 2 to 6 mos. trg.; then, to Militia, &c., as above. Or, (iii.) to [T.A.] direct, no trg. P.E., 13,750 offrs., 225,000 others. W.E., Mobilised Field Army, 400,000. 1st Res., 350,000. Militia, 250,000. [T.A., unorgd. and partly-trained, abt. 2,000,000]. Ord., £11,484,260; Entry, £961,540.

Japan.—(i.) A.A., 2 or 3 yrs.; A.R., $5\frac{1}{2}$ or 4 $\frac{1}{2}$ yrs., 2 trgs. each 60 dys.; then, Kobi (Landwehr), 10 yrs., 2 trgs. each 60 days; then, [Kokumin or T.A. 1st Ban, 2 $\frac{1}{2}$ yrs., no trg.]. Or, (ii.) Hoju (Erstatz), $7\frac{1}{2}$ yrs., 3 trgs. of 90, 60, and 60 dys.; then, to Kobi, &c., as above. Or, to [Kokumin 1st Ban direct]. One-year vols. as in Germany. P.E., A.A., 225,000. W.E., (A) fully trained, Mobilised A.A., 740,000; Depôts and Kobi, 780,000; [Overseer garrisons, 34,000]; [Kokumin 1st Ban 115,000]. (b) Partly trained, Hoju, 400,000; Kobi, 445,000; [Kokumin 1st Ban, 55,000]. (c) Untrained, [Kokumin 2nd Ban, abt. 3,000,000]. Ord., £7,020,900. Entry, £3,880,600.

Norway.—National Militia. A.A., 6 yrs.; initial trg. 48-102 dys.; 3 subseq. trgs. each of 24 dys.; then, [Landvärn. 6 yrs.; 2 trgs. each 24 dys.; and Landstörn, 4 yrs., no trg.]. P.E., 18,000; W.E., all branches, 165,000. £759,900.

Rumania.—Re-org. in progress. A.A., 2 or 3 yrs. "On leave" 5 or 4 yrs.; Res. 5 yrs.; then, Militia 3 yrs.; and [T.A., unorganised, 4 yrs.]. Intermittent serv. in Calarashi cavalry only, initial trg. 60 dys., subsequently periodic. P.E., 3,831 offrs., 584 officials, 89,227 others. W.E. [excl. T.A.], abt. 175,000. £2,246,900.

Russia.—(i.) European Army, A.A., 3 or 4 yrs.; A.R., 14 yrs., 2 trgs. each 6 weeks; then, [T.A., 5 yrs.]. Caucasian Army and Finland, A.A., 3 yrs.; A.R., 15 yrs.; [T.A. to age 44]. Asiatic Army, A.A., 4 yrs.; A.R., 13 yrs.; [T.A., to age 44]. Or, (ii.) to T.A. direct. Cossack services, prelim. trg. 1 yr., act. service 1st category 4 yrs., and do. 4 yrs., 3rd do. 4 yrs. Res. 5 yrs. Details of org. are too elaborate for inclusion. Approx. W.E., European and Caucasian Armies, 1,500,000. Central Asiatic and W. Siberian Armies, 250,000. East Siberian Army, 250,000. [Orgd. T.A.'s Europe, 700,000. Remdr. ?]. Ord., £50,097,190. Entry, £6,860,000. Supply, £4,213,400. Manchurian War etc £1,686,000.

Servia.—A.A., $1\frac{1}{2}$ or 2 yrs.; A.R., 9 yrs.; then, Landwehr, 5 yrs.; and [T.A., 7 yrs.]. P.E., 35,000. W.E., Field Army 100,000, others imperfectly orgd. abt. 150,000. £869,720.

Switzerland.—National Militia. Prelim. trg. in schools. A.A. (Elite) age 20-32. Initial trg. 65-90 dys. Annual courses 11-14 dys., and musketry. Landwehr, age 33-40, 1 trg. of 11 dys. dismt. branches only. Landsturm (in process of re-org.), age 41-48, no trg. P. and W.E., Elite, 138,252. Landwehr, 66,317. Do. Sedentary, 20,000. Landsturm, combt., 54,450. Non-combt., 249,978. Ord., £1,600,437; Entry, £152,000.

Turkey.—Re-org. in progress, but many difficulties experienced. Proposed to revoke the exemption hitherto accorded to the Christian population and that of Constantinople. (i.) A.A. (Nizam), 3 or 4 yrs. A.R., 6 or 5 yrs., 1 trg. of 6 wks.; then, Redif (Landwehr), 9 yrs., 2 trgs., each 1 mo., and [Mustafiz (Landsturm), 2 yrs., no trg.], or (ii.) to Redif and Ban direct (Inf. only). Irreg. Hamidieh (tribal) Cav. in Anatolia. P.E., Europ. and Anatolian Ordns, 42,106 offrs., 281,658 others. Hamidieh Cav., 16,000. Arabia, 30,000. Tripoli (Militia), 10,000. W.E., Field Army Europe and Anatolia, 375,000. Redif and Ban, 375,000. [Mustafiz unorgd., 90,000.] £9,933,500.

(c) Countries relying upon voluntary enlistment, supplemented by conscription:—

Belgium.—Recruiting highly unsatisfactory. Nominal periods, A.A., 8 yrs.; A.R., 5 yrs. Actually, vol. enl. for 5, 4, or 3 yrs. Conscrip-

trg., 20-36 mos. P.E., 3,424 offrs., 43,061 others (but av. strength is only 36,800). W.E., Field Army, 100,000; Sedentary, 75,000. £3,548,000 (incl. Pensions and Gendarmierie).

Brazil.—A.A., 2 yrs.; A.R., 7 yrs., 1 trg. of 1 mo. 2nd Res.: 1st Ban, 3 yrs., 1 trg. of 1 mo.; 2nd Ban, 4 yrs., no trg. N.G., 4 yrs. [Res. of N.G., 4 yrs.]. P.E., 25,000; W.E., 45,000, excl. N.G. £3,916,270.

Netherlands.—National Militia: A.A., 8 yrs.; initial conscrip. trg. 4-24 mos.; 3 subseq. trgs. of 8-12 wks. [Landweer, 7 yrs., dismt. branches only, 2 trgs. each 1 wk.]. P.E., 542 offrs., 20,645 others. W.E., 175,000. £2,290,440.

Dutch E. Indies.—Vol. eng.: Europ. 12,200. Natives (in the same units) 25,000. Abt. £3,000,000.

Sweden.—National Militia. Universal liability recently introduced. A.A., 8 yrs., initial trg. 150-280 days; 3 or 2 subseq. trgs. of 1 mo.; A.R., 4 yrs. [Landstörn, 8 yrs.]. P.E., 2,300 offrs., 35,000 others; W.E., all formations, abt. 100,000. £2,676,500.

(3) Countries relying upon conscription:—

Portugal.—A.A., 3 yrs.; A.R., 5 yrs.; 2 trgs. each 20 dys. 2nd Res., 7 yrs., 2 trgs. or more. [T.A. to age 40]. P.E., 30,000. W.E., 150,000, excl. unorg. T.A. Colonial Army, 3,400 Europ., 9,000 natives. Ord., £1,735,990; Entry, £164,500.

Spain.—A.A., nominally 3 yrs., actually 2; A.R., 3 or 4 yrs., annual trg. 1 mo.; 2nd Res., 6 yrs., no trg. No T.A. P.E., Peninsula and Islands, 91,000. N. Africa, 6,000. W.E., Field Army, 200,000; Res. formations, 100,000. Ord., £5,140,700; Entry, £125,000, excl. Riff war charges.

(4) Countries relying upon voluntary enlistment:—

China.—Lack of a competent governmental and military directorate, and of a central control, absence of any organised financial machinery, want of trained instructors and leaders, diversity of population, inherent distaste for discipline and military service, and prevalence of "secret societies," must for many years to come exclude China from the category of military Powers. An ambitious project provides for the formation, by 1920, of 37 Act. Divns., 37 Res. Divns., and 74 Res. Bdes. (1,150,000 combts.), and the eventual adoption of *univ. comp. serv.* So far to Divns. and 10 Bdes. have been raised (6,000 offrs., 190,000 others). These, though a notable advance on the old-time forces, are as a whole ill-articulated and unavailable for employment in any one theatre. The best troops are quartered near Peking and the several provincial capitals.

U.S.A.—Recruiting highly unsatisfactory and desertions frequent. Reg. Army, 3 yrs. No Reserves. State Militias, of varying efficiency, are, since May, 1908, available for exterior war. Serv. in [Unorganised Militia] is legally comp. for all able-bodied males aged 18-45. Authorised P.E., (1) Reg. Army and Porto Rico Rgt., 4,307 offrs., 77,743 others (strength actually 4,116 offrs., 68,512 others). (2) Philippine Scouts, &c., 166 offrs., 5,508 others (strength 114 offrs., 5,424 others). State Militias, abt. 100,000 (of whom 75,000 considered available). Cuba was evacuated in 1909. Ord., £21,676,900; Entry, £248,000. Pensions, &c., £32,610,000.

P. R. COLES.

The following summaries present in as brief a form as possible the various educational systems of the countries of the world.

Argentina.—(i.) *Primary*: Age 6-14; *Secular, free, and nominally comp.* (but only some 45 p.c. attend). Schools maintained by provincial taxation and controlled by provincial boards (in capital by National Council) with grants from Central Govt. (ii.) *Secondary*: Control by Central Govt.; lycæums, and normal schools. Average attendance, over 6,000. (iii.) *Special Govt. Schools*: 1 naval, 1 military, 1 mining, 1 agricultural. (iv.) *Universities*: National, Buenos Aires, Cordoba; Provincial, La Plata, Santa Fé, Paraná.

Austria.—(i.) *Primary*: Age 6-12, 13, or 14; *free and comp.* (50 p.c. attend). Schools maintained by local taxation. State grants exceptional. (ii.) *Secondary*: Controlled by Central Govt., including private schools; Gymnasias (8-yrs. course) and realschulen (7-yrs. course) prepare for the Universities and Govt. technical high schools. Attendance, over 135,000. Pupils attaining a prescribed standard qualify for military service as 2-yr. volunteers. (iii.) *Special*: 8 Govt. engineering, 1 Govt. agricultural, 2 higher, 7 lower mining, numerous technical institutes, commercial, art, music, and industrial schools. (iv.) *Universities*: State-maintained, Cracow, Czernowitz, Graz, Innsbruck, Lemberg, Prague (2), and Vienna.

Hungary.—*Primary*: *Free and comp.* Maintained by local taxation. *Infant Schools* (numerous), with nursing staffs; ages 3-6. *Lower Elementary*, 6-12; repetition courses, 12-15. *Higher* do. (sexes separate) with 3 yrs. course for boys, 2 yrs. for girls; *City High Schools*, 6-yrs. course for boys, 4-yrs. for girls; average attendance, over 77 p.c. (ii.) *Secondary Schools* not State-maintained are State-aided; their 8-yrs. course prepares for University and Budapest Polytechnic. (iii.) *Special Schools* are less numerous than in Austria, but well attended. (iv.) *State Universities*: Budapest, Kolozsvár, Zagrab. Both in Austria and Hungary there is an extraordinary diversity of language—in the former German, Czech, and Slav dialects predominate; in the latter Magyar.

Belgium.—(i.) *Primary*: *Comp. and free*; schools maintained by communal taxation with provincial and State grants; in addition, many are under ecclesiastical control, Roman Catholic predominating. (ii.) *Secondary*: 128 State high schools (40 for girls), and numerous private institutions. (iii.) *Special schools*, communal and private, abound; music and fine arts schools a special feature; 35 Royal Atheneums. (iv.) *Universities*: State, Ghent and Liège; *free*, Brussels and Louvain.

Brazil.—(i.) *Primary*: *Secular and free*, but not *comp.* Greater portion of population is illiterate. (ii.) *Secondary*: Controlled by Central Govt.; national gymnasium. (iii.) *Special*: 1 naval, 1 military, 1 mining, 1 polytechnic, 4 law, 2 medicine. (iv.) No universities.

Bulgaria.—(i.) *Primary*: Age 8-12, *free and nominally comp.*, fees in higher grades only. State bears two-thirds, local taxation one-third cost. Attendance good. (ii.) *Secondary*: State bears one-half cost. Foreign schools numerous. (iii.) Very few special or technical schools. (iv.) *University*: Sofia.

Chile.—(i.) *Primary*: *Free*, but not *comp.* A large proportion of the population is yet illiterate. Nevertheless, existing schools have a good attendance. (ii.) *Secondary*: State lycæums (sexes separate) in provincial capitals. (iii.) Numerous special and technical schools. (iv.) *Universities*: State, Santiago; one private do.

China.—Persistent missionary zeal and imperative necessity of military re-organisation must share the credit of substituting occidental learning for the time-honoured study of Chinese classics, which, until the Imperial Edict of 1905, formed the only passport to State employment. Chinese Imperial Edicts, however, even if strongly worded, often fail to produce a full measure of results. Schools, nevertheless, spring up daily, the study of Japanese and European languages naturally assuming a peculiar importance in view of the lack of scientific textbooks in the vernacular. Japanese influence is strong, particularly in the now numerous military institutions, whilst there are many medical schools.

Denmark.—(i.) *Primary*: *Free and comp.* Age 7-14. Schools maintained by local taxation. (ii.) *Secondary*: Schools that are not State-maintained are State-aided. (iii.) *Special schools* are numerous, horticulture and agriculture predominating. (iv.) *University*, Copenhagen.

Egypt.—Of the ancient village schools, those proving most progressive are State-aided, and primary education is being greatly developed. (i.) *Govt. Primary Schools* (34 in 1907) with 4-yrs. course, prepare for admission to minor Govt. posts, the secondary schools, the agricultural college, &c. English predominates, and is ousting French. Majority of pupils pay small fees. (ii.) *Govt. Secondary Schools*, also a 4-yrs. course, admit to intermediate Govt. posts, or the three Cairo Colleges of Law, Medicine, and Engineering. Staff usually English. (iii.) *Special schools* are numerous, keeping pace with the rapid development of the country. Private enterprise and benevolence does much, and foreign schools abound.

France.—Education system highly developed. *Central Administration* comprises (a) Ministry of Public Instruction; (b) Superior Educational Council, charged with the actual administration; (c) Consultative Committee (advisory); (d) Educational Bureaux and Inspecting Staffs, whose heads report direct to the Minister. *Local Administration* comprises (a) Territorial Academies, with inspecting staffs for all grades, and (b) Departmental Councils, presided over by the *préfet*, charged especially with *primary* education. By the Law of July, 1904, all congregationist institutions are to be suppressed within 10 years, and many were at once closed, some re-opening under lay management. (i.) *Primary*: *Secular, comp. and free*. Age 6-13. Schools include (a) infants; (b) lower primary; (c) higher do. Supplementary courses, and courses for adults. Lower and higher primary certificates granted. Numerous private courses are aided from local funds. Schools are for boys, for girls, or mixed. (ii.) *Secondary*: State lycées, communal colleges, and many private establishments, 7-yrs. course, either (a) purely classical; (b) purely modern; (c) Latin and sciences; or (d) Latin and modern

languages. Degree of Bachelor conferred on completion. For females, a similar organisation, course 5-6 yrs. *Sèvres* school and the Sorbonne Association well-known. (iii.) *Special Schools* are very numerous, many public institutions being dependent on ministries other than that of Public Instruction. (iv.) *Universities* (State universities alone grant degrees, but numerous private faculties and private institutions further higher education): Aix, Algiers, Angers, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseilles, Montauban, Montpellier, Nancy, Nantes, Paris, Poitiers, Rennes, and Toulouse.

Germany.—Educational system is remarkable for the ease with which it meets the requirements of every social class. Its efficiency is best exemplified by the annual military recruiting statistics, which in 1907 disclosed a proportion of only .02 p.c. of illiterate recruits. It is, moreover, practically homogeneous in all branches throughout the empire. The Prussian administration may be cited as typical, comprising (i.) a general control by the Minister of Public Instruction over all educational establishments, public or private, save those special Schools dependent on other ministries, (ii.) a provincial organisation charged with management of public elementary schools, and (iii.) Special Provincial Boards charged with the management of Secondary and Normal Schools, their curricula, appointment of teachers, and leaving examinations. (i.) *Primary: Comp. and free, age 6-14.* Average attendance, 94 p.c. Maintained by local taxation, with State grants. (ii.) *Secondary:* Evening continuation schools for children of working classes; city intermediate schools in two grades; gymnasias (some State-maintained) preparing for university and learned professions with a 9-yrs. course. The standard to qualify for military service as a 1-yr. volunteer is that for advancement from the lower to the upper second class of a State gymnasium; progymnasia, similar, but lacking the highest class of the gymnasium; Real gymnasias confining classical instruction to Latin; real progymnasias similar, but lacking higher classes of the foregoing; Oberrealschulen and Real-schulen making a special feature of modern languages; Lehrer-Seminarien and Fachschulen supplying specialised instruction. Private institutions are comparatively few. For girls, special tüchterschulen (high schools). Here private establishments predominate. (iii.) *Special Schools* are very numerous throughout the empire, special attention being devoted to agriculture, commerce, mining, forestry and music. *Polytechnica* grant degrees in engineering, &c. *Secondary Education* generally is neither free nor comp., but abatement or remission of charges is discretionary. (iv.) *Universities,* State-maintained and administered, are: Berlin, Bonn, Breslau, Erlangen, Freiburg, Giessen, Göttingen, Greifswald, Halle, Heidelberg, Jena, Kiel, Königsberg, Leipzig, Marburg, München, Münster, Rostock, Strassburg, Tübingen, and Würtzburg.

Greece.—(i.) *Primary: Free and nominally comp.; age 5-12.* Maintained by local taxation, with State grants. (ii.) *Secondary:* State-controlled, backward, especially in country districts. (iii.) *Special:* Ill-attended. Private Trade and Industrial Academy at Athens instructs in local agricultural and commercial pursuits. (iv.) *Universities,* Athens, largely attended by Turkish subjects.

Italy.—The law of July, 1904, imposing special

disabilities on the illiterate, has afforded a needed stimulus. Prior to that date 49 per cent. of the population over age 20 were thus classed. (i.) *Primary: Secular, free and comp.* in the lower of two grades (age 6-9), where only lower grade schools exist, but comp. also in the higher grade (age 9-12) where schools have been provided. Evening continuation courses are compulsory for military recruits drafted to Territorial Army (see *Military Systems*), and illiterate recruits of the Active Army are instructed in their corps. Maintained by local taxation, with State grants. Private establishments must conform to State curriculum. (ii.) *Secondary:* Lyceums and gymnasias supply classical education and prepare for university, mainly State-maintained. (iii.) *Special Schools,* State-maintained or State-aided, are increasing in numbers and attendance. (iv.) *Universities, State:* Bologna, Cagliari, Catania, Genoa, Macerata, Messina, Modena, Naples, Padua, Palermo, Parma, Pavia, Pisa, Rome, Sassari, Siena, and Turin. Many of these are of very ancient foundation (e.g., Bologna, A.D. 1200). *Free:* Camerino, Ferrara, Perugia, Urbino.

Japan.—*Primary: Lower grade, comp., and free. Age 6-10.* Kindergarten and Schools numerous and well attended (82 p.c.). Some 55 p.c. complete the higher primary course, age 10-14, for which a small monthly fee of 30-60 sen (*7d.-1s. 2d.*) is required. (ii.) *Secondary:* State-aided public intermediate schools, 5-yrs. course. High schools prepare for the Universities with a 3-yrs. course, largely devoted to study of European languages. For girls, high schools, course 4-5 yrs., with extensions of 2-3 yrs. for special subjects. (iii.) *Special Schools* of industries, commerce, and technics are well attended. (iv.) *Universities:* State, Tokio and Kyoto.

Mexico.—Large numbers of the partially civilised native Indian races and many half-castes, are entirely illiterate, and these categories comprise some 80 p.c. of the total population. (i.) *Primary: Free and nominally comp.;* maintained by local taxation, with Federal grants. Many private schools, mostly under clerical control. (ii.) *Secondary Schools* are not numerous, and attendance is not high. (iii.) *Special Schools* are better attended. (iv.) No University.

Netherlands.—System peculiar, in that private State-aided primary instruction is encouraged rather than public, though latter is provided by local taxation where private institutions are lacking. (i.) *Primary: Age 7-13, comp., and free* in public schools, maintained jointly by State and communes. Average attendance, 95 per cent. Disciplinary schools for neglected children. (ii.) *Secondary: Not free,* numerous adult schools for working classes, others not numerous, but well-equipped and attended. (iii.) *Special Schools* make a feature of agriculture and horticulture. (iv.) *Universities:* Amsterdam, Groningen, Leiden, Utrecht, and a small private university.

Norway.—(i.) *Primary: Comp. and free, age 6½ (town) or 7 (country) to 14.* Schools maintained by local taxation, with State grants. (ii.) *Secondary* schools are State, local, or private; latter mainly for girls, many of the others are mixed. A complete and practical reformatory system, age 6-18 or 12-21, is State-aided. (iii.) *Special Schools:* Chiefly industrial and technical institutes. (iv.) *University:* Christiania.

Peru.—(i.) *Primary: Only nominally comp.,*

free in towns. Average attendance scarcely 20 per cent. (ii.) *Secondary:* Govt. high schools in provincial capitals, charging small fees. A few private schools controlled by foreigners. (iii.) *Special Schools:* Confined to Lima Schools of Art, Mines and Engineering. (iv.) *University:* St. Mark's (Lima).

Portugal.—(i.) *Primary:* Nominally comp. and free, but over 70 per cent. of population over 6 yrs. of age remains illiterate. (ii.) *Secondary:* A State lyceum in each of the provinces, and a few municipal schools, also a good many private institutions. (iii.) *Special:* Fairly numerous, but attendance small. (iv.) *University:* Coimbra.

Rumania.—(i.) *Primary:* Free and nominally comp., but number of schools is quite inadequate. Nearly 80 per cent. of population over 7 yrs. of age remains illiterate. (ii.) *Secondary:* Considerable number of high schools tolerably well attended. (iii.) *Special Schools:* Mainly of agriculture. (iv.) *Universities:* Bucharest, Jassy.

Russia.—(i.) *Primary:* Very backward, especially in country districts. Probably not more than 10 per cent. of total population have received instruction of any kind. Control and maintenance of primary schools divided nearly equally between Ministry of Public Instruction and the Holy Synod (governing body of Orthodox Church). To the latter is allotted a large proportion of the sum annually voted for education by the Central Govt. In many of the remoter district schools are said to exist only on paper, and the qualifications of teachers are frequently nil. However, a distinct advance is perceptible. (ii.) *Secondary Institutions* comprise gymnasia and progymnasias and realschools (main features similar to Germany, *q.v.*), both for girls and boys, but numbers and attendance are alike small considering the enormous territorial area and population. The foundations of the Empress Marie (mother of the Tsar Nicholas I.) are administered by a private Imperial cabinet, providing gymnasia and institutes. The Holy Synod has numerous seminaries and intermediate schools for both sexes, and there are a few private schools. The Cossack *voiskos* (districts) maintain their own gymnasia and progymnasias. A Bill recently laid before the Duma should materially assist the progress of both elementary and secondary education. (iii.) *Special Schools* are few, and confined to the principal cities of European Russia. (iv.) *Universities:* Kazan, Kiev, Kharkov, Moscow, Odessa, St. Petersburg, Tomsk, Yuriev, and Warsaw.

Finland.—(i.) *Primary:* Comp.; age 7-15 yrs.; well-attended. (ii.) *Secondary:* Lyceums (half being State-maintained); realschools and country high schools for both sexes, also well attended. (iii.) *Special Schools* make a feature of cattle-farming, dairy and agricultural instruction. (iv.) *University:* Helsingfors (admits women).

Servia.—(i.) *Primary:* Free and nominally comp., but attendance does not exceed 25 p.c. State-aided. (ii.) *Secondary:* Gymnasias and progymnasias, and girls' high schools, State-maintained. (iii.) *Special:* Schools are few. (iv.) *University:* Belgrade.

Spain.—(i.) *Primary:* Nominally comp. and mainly free, public schools maintained by local taxation. Many private schools are under clerical control, and recent legislation provides for closer supervision of their curricula, condition, and

staffs. (ii.) *Secondary:* A high school in each province, curriculum defective. (iii.) *Special:* Schools few. (iv.) *Universities:* Barcelona, Granada, Madrid, Salamanca, Santiago, Saragossa, Seville, Valencia, and Valladolid.

Sweden.—(i.) *Primary:* Comp. and free. Illiteracy rare. Maintained by local taxation, with State grants. Attendance good. (ii.) *Secondary:* Well-developed, schools numerous and efficient. (iii.) *Special schools* make a feature of technics and navigation. (iv.) *Universities:* Lund, Upsala, and a few private faculties.

Switzerland.—Control by cantonal and communal authorities. No central organ. Illiteracy rare in Protestant cantons. (i.) *Primary:* Free and nominally comp., but attendance is not strictly enforced in the essentially Roman Catholic cantons. School age varies. (ii.) *Secondary:* Age 12-15 for boys. Schools numerous and well-attended, and there are many private institutions. (iii.) *Special schools* make a feature of commercial and technical instruction. (iv.) *Universities:* Bale, Berne, Fribourg, Geneva, Lausanne, Zurich, and the Neuchâtel.

Turkey.—(i.) *Primary education* (nominally comp.) takes the form of instruction by Mahomedan priesthood attached to principal mosques, and is consequently deficient. (ii.) *Secondary:* Schools far from numerous; in a few, French or English is taught. (iii.) *Special Schools* scarcely exist. (iv.) The University of Constantinople, supposed to have been founded in 1500, has not yet materialised. Under the new régime conditions may improve.

United States of America.—System of public instruction extends from the kindergarten to the university. Control is vested in the State and local authorities, the only Central Organisation being the Bureau of the Educational Commission, charged with statistical and advisory functions only. The number of illiterates is swollen by immigrants, and by the fact that some 44 p.c. of the coloured population receive no instruction. It is said that no home is beyond reach of a school, whilst in some cases pupils are conveyed to and from public expense. (i.) *Primary:* Age 8-14 yrs., free and comp. in majority of States, though in all the machinery is fully maintained. Eight grades of public primary schools, numerous kindergartens, and evening continuation classes in towns. Very many and well-equipped private institutions. Public schools are maintained by local taxation, Federal subsidies taking the form of income derived from grants of land. (ii.) *Secondary:* Numerous high schools, both public and private, including many so-called "colleges" and "universities," whose curriculum corresponds rather to that of a German gymnasium, or an English public school. A salient feature of the American system is co-education of the sexes throughout, there being comparatively few institutions where the tuition is not dual. The advantages of this have recently been strenuously disputed. Powerful aid is afforded by private and philanthropic initiative. (iii.) *Special Schools and Professional Establishments* are too numerous to mention, well-equipped and well-attended. (iv.) *Universities:* Those corresponding most closely to the British definition are California, the Catholic University of America, Chicago, Clark, Columbia, Harvard, the Johns Hopkins, Michigan, Pennsylvania, Princeton, Stanford, Wisconsin, and Yale.
P. R. COLES.

Polar Regions.—The most striking events in the geographical world have in 1909 been all connected with the Polar regions, with which our survey may thus appropriately begin. Towards the end of March came the news of the return of Mr. (now Sir E.) Shackleton's Expedition, after a remarkable success had been achieved; the advance into the unknown area around the South Pole, begun by Capt. Scott during the National Antarctic Expedition of 1901-4, having been carried forward at one step no less a distance than 430 miles, to a point little more than 100 miles from the Pole itself. So near an approach to that point was not known to have been previously made by man in either hemisphere. This achievement, performed amidst immense hardships and dangers, was the work of Sir E. Shackleton himself and two companions, who, during their dash south early in 1909, having reached the point where the coast of South Victoria Land trends to the east, struck inland into the heart of the Antarctic continent, climbing its mountain fringe until the great plateau, 9,000 to 10,000 feet in altitude, apparently stretching to the Pole itself, was gained. The three explorers only turned in 88° 23' S., when their strength was rapidly failing, and the return to the base was a constant struggle against famine and illness. During the same time another important expedition was carried out by Prof. David, the chief scientist of the

the Antarctic lands south of South America began its work at the close of 1908, when it took in its last supplies of coal at the South Shetlands before proceeding towards its field of action in Alexander Land, where, if the programme has been carried out, the southern winter of 1909 will have been spent. If all goes well news of the expedition may be expected by April, 1910.

Since Sir E. Shackleton's return, Capt. Scott has once more come forward with plans for a new British Expedition to continue the attack on the South Polar area. He has secured a vessel for the purpose, and hopes to start in August, 1910; his aims being, firstly, to attempt to reach the South Pole, and, secondly, to continue the scientific exploration of the Ross Sea area.

The Arctic region has been fertile in still more sensational occurrences, if less valuable from a scientific point of view. Within a week, in the early days of September, 1909, came two distinct reports that the North Pole, for generations the object of so much eager striving on the part of explorers, had at last been reached. Both claimants for the honour were Americans, the first being Dr. F. A. Cook, whose expedition, begun with some amount of secrecy in 1907, has been referred to in the two last issues of this ALMANACK. Dr. Cook had arrived at Lerwick, in the Shetlands, on a Danish steamer from Greenland, and announced that, having crossed to the west side of Ellesmere Land, accompanied only by Eskimos, early in 1908, he had started on a dash for the Pole on March 18, and after a remarkably quick sledge journey over the polar ice, had attained the object of his hopes on April 21. The return journey was a long and circuitous one, and after reaching Jones Sound it was necessary to winter on North Devon island, so that Greenland was not reached until early in 1909. The next announcement came from Commander Peary, whose untiring efforts for the conquest of the North Pole have been frequently referred to in this ALMANACK. He reported that, after wintering at Cape Sheridan, and pushing forward in various detachments early in 1909, his now reduced party reached lat. 89° 48' N. at the end of March. Peary then sent back the last of his white companions, Capt. Bartlett, and pressed forward by forced marches, with his negro servant Henson and four Eskimos, over a featureless and level plain of ice, reaching the Pole on April 6, 1909.

A bitter and most regrettable controversy has arisen regarding these rival claims, on the merits of which no opinion can be expressed here. Even before Peary's news arrived Dr. Cook's claim had been received with some scepticism, owing to the supposed improbabilities of his story, and in part to the fact that there had been some disposition to discredit the traveller's previous claim to have reached the highest point of Mount McKinley. Peary at once protested vigorously against the acceptance of his rival's claim, asserting that he possessed various proofs of its falsity, including the testimony of Dr. Cook's own Eskimos. On the other hand, the latter, who has found many supporters, professes to have scientific observations absolutely substantiating his statements, and to be anxious to submit these to the judgment of experts. Until this has been done, no final verdict can be possible.

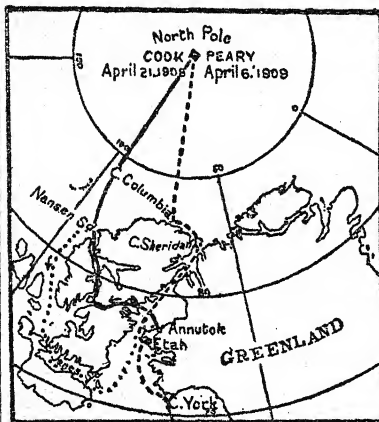

Of other expeditions, that of Captain Bénard

party, in a N.W. direction to the site of the southern magnetic pole, the position of which was fixed for the first time on a sure basis. Much other valuable scientific work was accomplished by the expedition, and during the voyage home the *Nimrod* (Sir E. Shackleton having returned to Europe by the shortest route) did a further piece of work in searching for reported groups of islands in the Southern Ocean, none, however, being found to exist anywhere near their supposed positions. Soundings were carried out, so far as was possible, in the several localities.

The French expedition under Dr. Charcot to

to Novaya Zemlya, after spending the winter of 1908-9 on the northern coast of Russia, has continued its oceanographical and other scientific work during 1909. The Danish explorer, Capt.

Mikkelsen, has led an expedition to the east coast of Greenland in the hope of recovering the journals of his ill-fated predecessor, Mylius Erichsen (see last year's summary). The Norwegian Arctic voyager, Capt. Roald Amundsen, has continued his preparations for his proposed drift, in the *Fram*, across the North Polar area, while plans for a sledge-expedition across the same area have been put forward by Mr. A. H. Harrison, and a proposed voyage in an airship of the Zeppelin type has found support in Germany. Dr. Bruce and Capt. Isachsen have both continued their researches in North-West Spitsbergen during 1909.

One of the rare political questions affecting the Polar regions was brought to the front in 1909 by the Norwegian proposal for an international conference to discuss the status of the hitherto ownerless land of Spitsbergen, where the establishment of some sort of government has been rendered desirable by recent mining developments. But the opposition of Russia and Sweden has caused the idea to be abandoned.

Europe.—That some small amount of actual exploration is still possible in Europe is shown by the results of a visit to the Frostisen glacier in Norway (68° N. lat.) by Adolf Hjel, who found existing maps inaccurate, and the knowledge even of the people of the district imperfect. Elsewhere exploration in this continent is mainly restricted to work underground. The Mitchells-town caves in co. Tipperary were for the first time mapped with approximate accuracy in the autumn of 1908 by a party consisting of Messrs. Hill, Brodriek, Rule, and Praeger, and a full description of their wonders has since appeared in the *Proceedings* of the Royal Irish Academy. On the Continent, Mr. E. A. Martel has added to his previous services by exploring the caves of the northern versant of the Pyrenees, while the "Wasserschlinger" of Dane in the Austrian Coast-land, which is traversed by an under-

ground river, was for the first time explored to its end during the summer of 1909, the task being accomplished by a party including Messrs. Mühlhofer, Bock, and others. Of researches in physical geography, some progress has been made in this country with investigations into past changes on the Yorkshire coast by Mr. T. Sheppard, and with an inquiry into the relations between rainfall and run-off in the basins of certain rivers of the West of England, by Drs. Strahan, Mill, and others. The question of the distribution of rainfall in Wales, of much importance from the point of view of water-supply schemes, has been discussed by Mr. G. B. Williams, such an inquiry having been made possible chiefly by the excellent work of the British Rainfall Organisation, now under Dr. H. R. Mill. During 1909 a thick volume embodying the results of the survey of a large number of Scottish Lochs, under the direction of Sir John Murray and Mr. L. Pullar, has been issued.

Events involving territorial changes have been the acquiescence of Turkey in the Austrian annexation of Bosnia and Herzegovina in return for a money payment; the recognition by Turkey of the independence of Bulgaria; and the declaration by the Cretans of the union of their island with Greece, though the last has not been formally approved by the Powers. A small boundary question, between Norway and Sweden, has been settled by the award of The Hague tribunal in regard to some small islands at the seaward end of the frontier, the Griseboerne being assigned to Sweden, the Skjoette Grund to Norway.

Asia.—The two distinguished explorers of Inner Asia, Dr. Stein and Dr. Hedin, whose latest journeys were referred to in these columns a year ago, described their adventures before European audiences during 1909. The Russian explorer Kozloff and his coadjutors have continued their researches in the borderlands of Tibet and China, while further reports of their work in 1908 in the Gobi desert and the region of the Kuku Nor have been received. In the former, the most important discovery was that of the ruins of Khara-Khoto, identified by Russian savants with the capital of a Tangut kingdom which flourished from the 11th to the 14th century, A.D. During the stay near Kuku Nor, this elevated alpine lake was navigated for the first time by Europeans, soundings being taken, and the pilgrims' resort, the island of Kuisu in its centre, visited. After further scientific work in this region, the expedition proceeded to the upper basin of the Hwang-ho. The French expedition under Capt. D'Ollone was brought to a close in the autumn of 1908, the latter part of the leader's route taking him through southern Mongolia (where he carried out some archaeological researches) to Peking.

An English traveller, Mr. J. W. Brooke, who since 1906 had been wandering in various parts of Western China and Tibet, met his death at the end of 1908 at the hands of the wild Lolos, whose little-known country he was making a bold attempt to penetrate. Somewhat further south a German expedition, under Dr. Brunhuber, to the upper basin of the Salwin (Western Yunnan) has had an equally disastrous ending, the leader and his companion, Dr. Schmitz, having been murdered by the Lisus of that region. A successful expedition in the upper valley of the Lohit branch of the Brahmaputra, carried out

by Mr. N. Williamson in 1907 and 1908, has only lately been described.

The German expedition to the great range of the Tian Shan, under Drs. Merzbacher and Groeber, was brought to a successful conclusion at Kulja in November, 1908, the travellers having overcome many difficulties while exploring some of the inner recesses of the range, making valuable observations on the orography, geology, and climatology. In the North-West Himalayas, an expedition to the region of Mount Godwin Austin (possibly the second highest mountain in the world) was carried out during the summer of 1909 by the Duke of the Abruzzi, who established a record in mountaineering by ascending to a height of 24,600 feet on a neighbouring peak. Further east in the same range Dr. T. G. Longstaff (accompanied for a time by Dr. A. Neve) effected an important exploration in the region of the Bilaphond or Satoro glacier and pass. The latter was crossed at an altitude of 18,700 feet, and an enormous glacier, never before seen by Europeans, was found on the farther side, in the district of Terim. This glacier, which seems to be the largest yet described in the Himalayas, proved to flow to the Nubra valley, and thus to belong to the Indian system of drainage.

In Western Asia, an interesting journey in Northern Arabia was made early in 1909 by Mr. D. Carruthers, a young English naturalist, who pushed south to Teima, and on the return journey explored the western borders of the great Nefud plain, hitherto almost unknown ground. In Southern Arabia an expedition organised by Mr. G. W. Bury met with opposition from the natives, and had to be abandoned. A small tract of previously unvisited country near the great western bend of the Euphrates was examined in 1908 by Mr. Mark Sykes, who has recently given a map of the area, with plans and descriptions of the medieval castles of Jaaber and Kelat Nejm, in the *Geographical Journal*. Lastly, the American geographer, Prof. Ellsworth Huntington, has been engaged during 1909 in researches in the neighbourhood of the Dead Sea and elsewhere, with a view to throwing light on climatic changes in Western Asia within the historic period.

At the opposite extremity of the continent, an important expedition sent out at the charges of a wealthy Russian, M. Riabuchinsky, has been engaged in researches (geographical, geological, meteorological, &c.) in Kamchatka. Two other expeditions, supported by the Russian Government, are at work on the northern coast of Siberia, east of the Kolyma River, with a view (among other objects) to studying the possibilities of navigation along that coast.

A territorial change of some importance took place early in 1909 in the Malay Peninsula, where, by an agreement signed on March 10, the former Siamese States of Kelantan, Trengganu, Keda, and Perlis were transferred to Great Britain in return for the abrogation of certain extra-territorial rights in Siam. (See sketch map.)

Africa.—An important journey was made in 1909 by Dr. Karl Kumm, of the Sudan United Mission, who, starting from Nigeria, traversed the little-known southern borderlands of Wadai and Darfur, emerging in the Anglo-Egyptian province of the Bah-el-Ghazal. A detailed report of the journey has not yet been received. In Northern Wadai, where the French had been engaged in hostilities with the native rulers, a forward movement in 1909 resulted in the occupa-

pation of Abeshe, the capital, the country being thus at last brought under French control.

The Central Sahara has been once more crossed by the French explorer, Capt. Cortier, who, after

carrying out surveys in the Ahaggar region, made his way south, in part by a new route, to Air, which was reached on February 14, 1909.

In Southern Nigeria some hitherto unknown ground was covered by a military expedition under Col. Trenchard, brought to a successful close in April, 1909. The sphere of operations lay between the lower Niger and the Cross River, and many of the tribes are described as naked cannibals.

The islands in the Gulf of Guinea have been visited, mainly for ornithological purposes, by the English explorer, Lieut. Boyd Alexander, who afterwards proceeded to the Kamerun, where he was witness of the unwonted phenomenon of a volcanic eruption on the Kamerun peak. He has since gone further inland to the Maenguba range, and it is understood that he contemplates extending his expedition still further into the interior. Another English expedition is that of Dr. Seligmann, known for his ethnological researches in New Guinea, who started with Mrs. Seligmann early in November, under a commission from the Sudan Government, for further work of the same kind on the Upper Nile, beginning with a study of the Dinkas and Shilluks.

Further west, between the Senegal and the Gulf of Guinea, three recent expeditions, two French and one German, deserve mention. Lieut. Desplagnes, known for previous archaeological and ethnological research on the Middle Niger, carried out (1907-8) an expedition for similar investigations from French Guinea, through various little-known districts, to Dahome. In 1909, the well-known explorer, M. Chevalier, crossed from the coast of French Guinea to the Ivory Coast Hinterland, paying especial attention to the economic botany of the region, and exploring the mountainous districts separating the upper Niger basin from the

streams flowing southward to the Gulf of Guinea. The German expedition, under the ethnologist, Dr. L. Frobenius, crossed from Senegal to Togo, by way of the Upper Niger, Wagadugu, and the Hombori mountains.

During 1909, military operations were undertaken under Col. Gouraud, for the purpose of bringing the territory north of the Senegal, officially known as Mauritania, under French control. This has hitherto been one of the least-known districts on the West African coast, even the coast-line having been imperfectly surveyed. Some rectifications of the map and other additions to knowledge have resulted from a journey undertaken in 1908 by MM. Chudeau and Gravel, the former of whom had previously done excellent work in the Sahara.

In East Africa, valuable meteorological observations have been made by a German expedition, under Dr. Berson, which completed its labours early in 1909. By means of kites and captive balloons, a much-needed light was thrown on the distribution of temperature and the air-currents of the upper layers of the atmosphere in that part of the equatorial regions. Further inland, in the debatable ground between Uganda and the Belgian Congo, the operations for the measurement of an arc of the 30th meridian, to form part of the great arc, from end to end of the continent, which has been in course of measurement for some years, was completed in February, 1909, by a party under Captain Jack, R.E., working in conjunction with the Anglo-Congolese Boundary Commission. The surveys of this Commission have done much to rectify the map of this part of Africa, and some of the general results were described by Major Bright, the British Commissioner, in a paper read before the Royal Geographical Society in June, 1909. The results of a survey of Lake Kioga in Eastern Uganda by Lieut. C. E. Fishbourne have been published during 1909.

In South Africa an interesting journey, primarily for the study of the plant associations, has been made by Professor H. W. Pearson, of Cape Town, through German South-West Africa and neighbouring portions of Angola. The German ethnologist, Dr. Pösch, has completed his expedition for the study of the Bushmen and other races, having made his way across the southern part of the continent from west to east. During the last stage of the journey he visited the much-discussed ruins of Zimbabwe.

Territorial changes have been unusually few during the year. Two declarations, signed on December 23, 1908, defined the boundary between French and Belgian Congo, firstly across Stanley Pool, and secondly between Manyanga and the Ocean. The median line of the Pool is accepted as the frontier on either side of Bamu Island, the southern shore of which is adopted in the intermediate section, so that it falls wholly to France, though placed under perpetual neutrality. In South Africa the most important event has been the completion of an arrangement for the union under a federal government of the four British Colonies—Cape Colony, Natal, the Orange River Colony, and the Transvaal.

The northward extension of the South African Railways reached the Congo frontier towards the close of 1909.

America.—In North America, the survey of the boundary of Alaska with Canada has been continued. Surveys have also been carried out by officers of the Geological Survey of Canada

along the Churchill River and the lakes connected with it; on the southern shores of Hudson's Bay; and elsewhere. In the extreme north, Mr. Leffingwell has undertaken further researches in various departments of science, and the work is likely to occupy several years.

In Arctic America formal possession of various hitherto unoccupied islands has been taken on behalf of Canada by a second expedition under Capt. Bernier, which returned after fourteen months' absence in October, 1909.

A treaty between Great Britain and the United States, regarding the use of waterways along the Canadian-United States boundary, was signed on Jan. 11, 1909, and during February the long-standing question regarding the fisheries in Newfoundland and Canadian waters was referred to arbitration with the consent of all parties concerned.

In South America, the first ascent of Mount Huascaran, in Peru, probably the second highest of all the Andean peaks, was accomplished in 1908 by an American lady, Miss Annie S. Peck, accompanied by two Swiss guides. In Dutch Guiana explorations in the basins of the Surinam and Corentyn rivers have been executed by Lieut. Eilerts de Haan. Surveys on the frontier between Argentina and Paraguay, in the swampy region traversed by the middle course of the Pilcomayo, were carried out in 1908 by a joint commission, with a view to supplying an accurate basis for the definition of the frontier. Similar operations on the frontier between Bolivia and Brazil were continued in 1908 by Major Fawcett, Chief Commissioner for Bolivia, who, having completed his work in the region of the Acre, was invited to undertake an exploration of the unknown course of the Rio Verde, a tributary of the Guapore—a task which he carried out amid extraordinary difficulties and hardships. The Swedish expedition under Dr. C. Skottsberg has continued to do excellent work among the channels and islands of Southern Chile. Besides studying the botany, geology, &c., of Chiloe Island, it extended its work to the Juan Fernandez group, and concluded by a difficult journey overland from the Pacific coast across the Andes and by the Patagonian lakes to Punta Arenas in the Strait of Magellan.

Two disputed boundaries between South American States have come a stage nearer final settlement during 1909. The arbitrator between Peru and Bolivia—the President of the Argentine Republic—gave his award in July, but it was considered to be so markedly in favour of Peru that it aroused great indignation in Bolivia, and has since been the subject of negotiation between the two States. It was announced during October that an agreement had been arrived at, Bolivia accepting the award, though apparently with some slight modifications. It is not yet possible to trace the exact line decided on, owing to the imperfections of existing maps.

By an agreement signed on January 9, 1909, between Colombia and Panama, the independence of the latter was formally recognised and the line of frontier laid down. It leaves the Atlantic coast at Cape Tiburon and ascends to the head of the Rio de la Miel, afterwards following various ranges of the Cordillera to the Altos de Espave, not far from the Pacific coast; the exact course of the final section being left to the decision of an arbitration tribunal.

Australasia and Oceania.—Considerable activity has been displayed in the exploration of

the great islands of the New Guinea group. In British New Guinea the Purari River, which debouches near the head of the Gulf of Papua, has been ascended by Mr. Donald Mackay beyond the highest point previously known. The Dutch have continued their efforts for the exploration of the southern part of their section of the island, the most important recent work having been done by parties acting under the orders of Mr. Resident Hellwig. Mr. H. A. Lorentz has also undertaken a new expedition towards the partially snow-covered range visible from the coast. A British expedition to the same region, under Mr. W. Goodfellow, organised mainly for ornithological work, started in October, 1909. Its members include Capt. Rawling, the Tibetan traveller, and Dr. Eric Marshall, one of Mr. Shackleton's companions on his dash for the South Pole, and it is hoped that their surveys will yield valuable geographical results. On the north or German side, the Kaiserin Augusta River has been ascended by an expedition under Mr. Full, a German official, while somewhat earlier a new route behind the Finsterer range had been explored by Messrs. Danköhrer and Fröhlich.

In the islands to the east of New Guinea, several German expeditions have lately done good work. That under Drs. Sapper and Friederici carried out (1908) explorations both in the long, narrow island of New Mecklenburg (formerly New Ireland) and in Bougainville in the Solomon Group, which was crossed for the first time. Later, Dr. Friederici made an attempt to cross the eastern part of New Pomerania

(New Britain), but, much of the way lying through uninhabited bush, he was obliged to retrace his steps. During the early part of 1909, an expedition sent out from Hamburg under Dr. Fülleborn visited the little-known southern coast of the same island, and succeeded in crossing to and fro from coast to coast in its western portion—a feat not previously achieved. The German surveying ship *Planet* has continued its work in this part of the Pacific, a resulting discovery being that of a deep trough, with a depth exceeding 8,000 metres (4,375 fathoms), in the immediate neighbourhood of Bougainville Island. It is one of the eight deepest depressions so far known. Lastly, details have been published of track-cutting work carried out in south-west Tasmania in 1908, which has opened up some of the least-known parts of that island.

The question of the capital of the Australian Commonwealth has at last been decided in favour of the Yass-Canberra site, in New South Wales.

In the Indian Ocean, the work of the Percy Sladen Trust Expedition, carried out by Prof. J. S. Gardiner, of Cambridge, and various coadjutors, has been brought to a close by a further examination of the Seychelles by Messrs. Gardiner and Scott, and an exploration of Aldabra and other small islands by Mr. Fryer.

In the Atlantic, a first cruise by the specially constructed magnetic survey vessel *Carnegie* has been begun in connection with the magnetic research department of the Carnegie Institution at Washington.

EDWARD HEAWOOD.

The League of the Empire.

THE League of the Empire was founded in 1901. Its work is entirely non-political and non-sectarian. Its practical work has been to promote co-operation between the different Countries and Colonies of the Empire, mainly in affairs connected with education, and to afford full and correct information regarding them, so that the duties of citizenship may be better understood and appreciated, and personal and active interest inspired in the great problems connected with our Empire's conditions and progress. The official relation of the League to the Education Departments and Governments throughout the Empire has been regularised (a) through the recommendation of its work to the Governments concerned by the Colonial Office of the Imperial Government and by the Agents-General in 1902-3; (b) by the active and wide-spread acceptance of its schemes by the different Educational Authorities and Governments. In 1907 the League carried through the first Conference between the Education Departments of the Home and Colonial Governments. One of the effects of this Conference was that the Imperial Government undertook to call the next Imperial Conference on Education in 1911. The Official Conference passed the following resolution:—"That the delegates desire to express their appreciation of the value of this Conference to the work of the Education Departments throughout the Empire." The League received a benefaction of £5,000 on condition that it produced a graded series of Text-Books on the Empire. The first of these books, "The British Empire: Its Past, Its Present, and Its Future," has been issued under the editorship of Professor Pollard. The book has taken two years to produce, and every proof has been corrected on the spot—indeed, about a third

of the book has been supplied by those responsible for the government of our Empire. Two other books are in hand, one suitable for higher grade schools, and the other for elementary schools. Another piece of practical work performed by the League in 1907 was the establishment of a Lace and Needlework School in St. Helena, for which the Colonial Office gave a grant. Cordial acknowledgment of the services of the League have been made by the Colonial Office, by His Excellency the Governor, and by the workers. About thirty teachers from all parts of the Empire have been accredited to the League for courses of lectures and study in the schools. The thanks of several of the Colonial Departments have also been received. The School Affiliation and Comrades' Correspondence Sections were established in 1902-3. The latter numbers now over 17,000 members. Other work undertaken are the giving of lectures, the establishment of a bureau of information, essay competitions, exhibitions, and the furthering of the keeping of Empire Day. It should be added that the League of the Empire is constitutionally an Imperial Institution, having a Council of representative men, Governors and others of authority in all parts of the King's Dominions.

Amongst those who are Vice-Presidents and Councillors are Earl Grey, the Earl of Meath, Lord Curzon, the Agents-General, Sir F. Pollock, Professor J. B. Bury, Sir Gilbert Parker.

Chairman of Executive, Sir Philip Hutchins, K.C.S.I.

Hon. Treasurer, Sir Charles Lyall, K.C.S.I.

Hon. Secretary, Mrs. Ord Marshall.

Organ of the League, "The Federal Magazine." Address, Caxton Hall, Westminster, S.W.

The leading reforms of 1909 have been:—(1) A gradual redistribution of peace-stations in the United Kingdom, directed to (a) solidifying the higher units of the Expeditionary Force, and (b) facilitating their training in peace by the Staffs that would direct them in war. (2) Notable advances in musketry instruction, the provision of improved accoutrements and a new bayonet. (3) The development of aeronautics, and improvements in the field services of intercommunication. (4) The issue of a more powerful field howitzer. (5) The replacement of two squadrons of Yeomanry by two companies of Regular Mounted Infantry, in the Divisional organisation (see ALMANACK of 1909). (6) The formation of six Cavalry Depôts charged with (a) *in peace*, the reception and instruction of recruits during their first three months' service; (b) *in war*, the duties of mobilisation centres, and the formation of 14 Reserve Cavalry Regiments (a wholly praiseworthy departure, in view of our notorious deficiency of trained mounted troops). (7) An experimental adoption of the German system of provision of cavalry remounts, in which the regimental authorities train young horses, and pass them into the care of farmers, who use them and keep them, subject to the condition of placing them at military disposal for three weeks or a month in each year. It seems doubtful if this scheme can be extended to meet effectually the alarming deficit of suitable remounts. (8) The addition to the Expeditionary Force of 63-battery howitzer brigades, involving the transformation of 6 18-pdr. gun batteries. (9) Reorganisation of the Field Artillery surplus to the actual bare requirements of the Expeditionary Force. The latter needing but 18 gun-brigades, of the 9 brigades remaining, 6 are constituted as Training Brigades (1 per Division), with the peace-function of training Special Reservists, and the war-function of supplying the divisional ammunition column. The balance of 3 brigades is *temporarily retained*. This reform has involved the disbandment of the Special Reserve Field Artillery units, which experience proved could not be maintained, and the grouping of the suitable *personnel* they contained, into masses of 1,000 men, each affiliated to a Training Brigade (which can scarcely cope with so great a number). Further, to maintain the establishment of trained reservists, *short service* had to be re-introduced for Regular Field Artillery (3-year enlistments without option of extension). The critic will observe that whilst the provision of the divisional ammunition columns is thus for the first time placed upon an assured basis, the change indicates the imminence of a further regrettable reduction of the Regular Field Artillery, whose *moral* and efficiency can scarcely fail to be affected by reduction to *cadres*, or disbandment. Moreover, the instruction of the Territorial Field and Horse Artillery will in future devolve upon the service batteries throughout the U.K., and it is difficult to see how this can be accomplished without serious inroads upon time and energy that should be expended in upholding the reputation for zeal and efficiency that characterises our Regular gunners above all others. (10) In the Army Service Corps there has been an extended introduction of mechanical transport, limited, however, by financial considerations. (11) In the Army Medical Corps, recent improvements in the pay, status, and educational facilities of Officers are bearing excellent fruit. Probably no other army is as

well equipped in this branch, and the nation at large has to thank the Corps for researches resulting in the practical extermination of more than one deadly disease. (12) In the Army Accounts Department the ill-advised and unpopular amalgamation of the civil and military branches has been rescinded, and the Army Pay Dept., recruited from combatant Officers, is to be reconstituted as a separate branch. (13) In the Regular Army Reserve, the strength has been abnormal, thanks to the transitory effects of recent disbandments, and so far as the actual requirements of the Expeditionary Force go, there is an *excess* of Cavalry and Infantry reservists, a *deficit* of Field Art., A.S.C., and R.A.M.C. (serious in the two former branches). Gaps in the R.A.M.C. reserve are being filled by the dubious expedient of transferring Infantry reservists, and giving them a brief special instruction, whilst short-term enlistments are being tried in the R.F.A. and A.S.C.

In certain of these reforms there is evidence of a new and grave danger, namely, that the *bare requirements* of the Expeditionary Force may come to be accepted as decisive of the *maximum* limitation of our establishment of fully-trained men. This, as a principle, is indefensible. It cannot for a moment be supposed that the Expeditionary Force represents the limit of our needs or aspirations.

Much interest attaches to the development of the Special Reserve, whose functions are (1) to furnish certain non-combatant elements in the Expeditionary Force, (2) to make good the estimated wastage of that force in the first six months of a campaign, (3) to form Special Reserve battalions on mobilisation. Of 66,949 militiamen serving on 1 Jan., 1908, 48,745 accepted transfer to the new branch, and recruiting has not been worse than under the old conditions despite the more serious liabilities. Since, however, recruits are accepted at the age of 17, at least 25 per cent. of the *personnel* cannot be regarded as available for exterior war, whilst the strength on 1 Jan., 1909, showed a deficit of 12,386 on the authorised establishment of 80,166 (exclusive of elements borne supernumerary to the Territorial Force).

Turning to the Territorial Army, a genuine advance has been made in organisation and homogeneity, but competent observers call attention to the immaturity of much of the *personnel*, the numerical deficiency of Officers, and of Officers qualified to instruct, and to the brief periods of training, which, for example, can hardly be expected to provide sufficiently-prepared Horse and Field Artillery units. Nevertheless, as regards recruiting, finance, equipment, and general solidity, the improvement is obvious, whilst the good spirit of individuals is certain. Nucleus Divisional Staffs are in process of organisation, the Commanders and principal Staff Officers being (as in the Brigade units) normally Regular or ex-Regular Officers. During the summer, two Yeomanry Brigades and a Territorial Division were assembled for training at Salisbury Plain and Aldershot respectively, creating a favourable impression.

The presentation of colours, at Windsor, on 19 June, by H.M. the King, was an important landmark, the memory of which will live long with those who had the honour of attending it.

The formation of a Territorial Reserve (in two categories) has been mooted. Its purpose would be to embrace in some recognised organisation the very large number of men who, having at

one time or another served in some portion of the Land Forces, would be sure to come forward in an emergency. The first category would fill gaps on mobilisation; the second would, in a measure, correspond to the Swiss unarmed Land-sturm. The establishment of the Territorial Army being 11,267 Officers and 302,473 others, the strength (on 1 June, 1909) was 9,313 Officers and 259,463 others, the deficits being most pronounced in the Infantry and auxiliary services.

Very significant is the reorganisation of the Reserve of Officers, and the constitution of the Officers Training Corps. The former Reserve of Officers existed solely for the Regular Army, and from the circumstances of its constitution, comprised a great number of seniors for whom no employment could be found, with a wholly exiguous number of juniors, who were sorely needed. The new formation includes (1) *The General Reserve*, composed wholly of ex-Regular Officers, (2) *The Special Reserve*, composed of (a) Officers on the roll of Special Reserve units, and (b) supplementary Officers, borne on the Special Reserve lists, but attached to regular units. The General Reserve includes Officers of all grades, class (a) of the Special Reserve, all grades to Lieut.-Colonel inclusive, class (b) consists of Captains and Lieuts. only, aged under 35 years. All alike are available for service with the Regular Army on mobilisation, though a considerable time must elapse, and the present difficulty of obtaining Special Reserve Officers must disappear before the organisation can fulfil its task. The difficulty of providing Reserve Officers is common to all Continental armies, but in their case is solved by the stimulus afforded by universal service, and the consequent social value of the designation "Reserve Officer." In our case there is no such stimulus, the social advantage is dubious, and *inducement* has to be relied upon. Commanding Officers of Regular and Special Reserve units are recommended to seek suitable candidates, who receive an outfit allowance of £40, an annual retaining fee of £20, army pay and allowances, *plus* 4/- a day when at duty, and £50 gratuity if called upon on mobilisation. Such candidates normally undergo a probationary training of twelve months with a regular unit.

Closely connected with the Reserve of Officers is the newly-formed Officers Training Corps, which, though it does not form part of the Army, has been evolved from the former school cadet

corps (junior division) and the university corps (senior division).

Its primary object is to induce young men to accept commissions in the Special Reserve. Youths join the corps voluntarily, and do not thereby assume any military liability whatever. After two years' service in the junior division a cadet may obtain a certificate ("A") on passing an elementary examination in military subjects. After two years in the senior division he can obtain certificate "B." Possession of both certificates entitles an aspirant Special Reserve Officer to a reduction of probationary training (see above) from twelve months to four, and to a gratuity of £35. The "A" certificate alone carries a reduction from twelve months to eight, with no gratuity. The corps is supervised by the General Staff at the War Office, which provides instructors, and it is financed to a large extent from Army Funds (£estimates 1909-10, £37,000), and this notwithstanding the fact that there is no certainty of any cadet eventually accepting service at all or even attempting to obtain a certificate. In view of the fact that the net votes for the R.M. Academy (Woolwich) and the R.M.C. (Sandhurst) amount only to £14,250 and £16,820 respectively, this is startling proof of the straits in which we stand for Special Reserve Officers. Many of these school contingents are particularly smart and workmanlike, but the scheme as a whole appears to require something more substantial and more definite than the provisions above outlined, which involve an outlay from Army Funds out of proportion to probable returns.

The Army Estimates for 1909-10 contain little of note. As forecasted in the ALMANACK for 1909, a large decrease in the expenditure on Regular Services is balanced, or nearly so, by considerable additions to the expenditure on the Special Reserve and Territorial Army. A material increase in the Indian contribution results in a net reduction of £24,000 on the Estimates for 1908-09 (£27,435,000 against £27,459,000). The Army in India, where Field-Marshal Viscount Kitchener of Khartoum has been succeeded by General Sir O'Moore Creagh, V.C., after a tenure of command remarkable for its achievements, remains substantially as stated last year. The garrison of South Africa has been materially reduced, both in units and in establishment of units remaining.

P. R. COLES.

The Union Jack Club.

Patrons, H.R.H. THE PRINCE OF WALES, K.G.

H.R.H. THE DUKE OF CONNAUGHT, K.G.

Patronesses, H.R.H. THE PRINCESS OF WALES.

H.R.H. THE DUCHESS OF CONNAUGHT.

The Union Jack Club was founded by Miss Ethel McCaul, R.R.C., and the foundation-stone was laid on 21st July, 1904, by H.R.H. the Prince of Wales, the Club buildings in the Waterloo Road being opened by H.M. the King on 1st July, 1907. Its objects are to promote the welfare and ameliorate the condition of sailors in the British Navy and soldiers in the British Army and Royal Marines, and with this object in view to provide a club-house and all conveniences in connection therewith. The accommodation pro-

vided includes 200 bedrooms; lounge hall, with music, games, &c.; dining-room; library and reading-room; billiard room, 6 tables; lavatory and toilet rooms; barber's shop, foot-baths and "kit-room." *President of Council and Chairman of Committee*, Sir Edward W. D. Ward, K.C.B., K.C.V.O. *Vice-President*, F. C. Wallis, F.R.C.S. *Comptroller and Secretary*, Major E. F. O. Gascoigne, D.S.O. *Offices*, 91A, Waterloo Road, S.E. *Telegrams*, "Anchorable, London." *Telephone*, 24,298 Central.

THE naval affairs of the world during 1909 have been chiefly remarkable for the recrudescence, either actual or promised, of minor navies, and the universal adoption of the Dreadnought type, or of some modification of it. There will not be more than sufficient space briefly to record the main outlines of the work done and of the programmes adopted by the various nations.

Great Britain.—Four Dreadnoughts have been passed into service, the *Bellerophon*, *Téméraire* and *Superb*, battleships, of 18,600 tons, 21 knots and ten 12-inch guns, and the armoured cruiser *Invincible*, of 17,250 tons, 25 knots and eight 12-inch guns. During 1910 the battleships *St. Vincent*, *Collingwood* and *Vanguard*, of 19,250 tons, will be passed into commission, raising our total of completed ships of the Dreadnought type to ten by the end of 1910. The *Neptune*, battleship (20,250 tons), and the *Indefatigable*, armoured cruiser (19,000 tons), have been launched, and will be completed in the spring of 1911. Two battleships of the 1909-10 programme were laid down in July and August (*Hercules* and *Colossus*), the *Orion* (battleship) and *Lion* (armoured cruiser) following in November. The four "conditional" battleships will be laid down in April, 1910. They belong, of course, to the 1909 programme. There will thus be a fleet of twenty Dreadnoughts and improved Dreadnoughts at sea by the early summer of 1912.

An experimental gun of 13.5 inches calibre is under trial, and it is anticipated that it will be mounted in the four ships to be laid down early in 1910 and in subsequent ships. This gun will fire a 1,250-lb. shell compared with the 850-lb. shell of the 12-inch gun. Ten will be mounted in each battleship and eight in armoured cruisers.

A naval agreement (which has yet to be ratified) has been made with the self-governing Colonies, as a result of which the three squadrons in the Far East will be reorganised so as to consist of a Dreadnought cruiser and a number of protected cruisers and torpedo craft. These squadrons—one in the Far East, one in Australasian waters, and one in the East Indies—will be used as the foundations for Colonial navies. The dockyards in the East and in Canada will be placed on an efficient basis, and the latter Dominion will confine her attention for the present to this and the construction of small cruisers.

United States.—The eight-gun ships *Michigan* and *South Carolina*, 16,000 tons, have been completed, being the first all-big-gun ships other than British to reach that stage. The *North Dakota* was launched in November, 1908, and the *Delaware* in February, 1909. The former is practically completed. Both are 20,000-ton ships, carrying ten 12-inch guns. The *Florida* and *Utah*, with the same armament but 2,000 tons larger, were laid down in March and February, 1909, respectively. Two new ships have been ordered, the *Wyoming* and *Arkansas*, of 26,000 tons, armed with twelve 12-inch guns, all mounted in turrets on the centre line, and twenty-two 5-inch.

An experimental gun of 14 inches calibre, firing a 1,660-lb. shell, has been constructed. Plans have been prepared by the Bureau of Construction for the ships to be laid down next year. They show a ship of 30,000 tons, armed with twelve 14-inch guns, giving a weight of gun-fire of 19,200 lbs., compared with the Dreadnought's

8,500 lbs. It remains to be seen whether the design will be adopted.

At a time when the British Admiralty has ordered the Curtis (American) turbine for three small ships, it is interesting to note that the American Board, after experimenting with both types, has ordered Parsons turbines for the two 1909 ships.

Germany.—The two first ships of the Dreadnought type, the *Nassau* and *Westfalen*, have been completed. They are of 18,500 tons, and carry twelve 11-inch and twelve 5.9-inch guns, and have a speed of 19.5 knots. The *Westfalen*, built at Bremen, was detained for some time in the river owing to there being insufficient water to float her out. This could not have been expected by the builders, as they tried to get her out, running the ship aground. This has given rise to a rumour that both of these ships draw considerably more water than they were designed for; but as both vessels made over 20 knots on trial this does not seem likely. The battleship *Posen* (late *Ersatz Baden*) was launched in December, 1908, being, with her sister the *Rheinland*, similar to the *Nassau*. The battleships *Helgoland* and *Ostfriesland* were launched in September, 1909, and the *Thuringia* in November. These belong to the 1908-9 programme, and are reported to be of 19,000 tons, and to carry twelve 12-inch guns, of a new design by Krupp, firing a shell of 982 lbs. Of the 1909-10 battleships, the *Ersatz Westfalen* was laid down in March, 1909, and the two others (*Ers. Hildebrand* and *Ers. Heimdall*) in the late autumn. They are believed to resemble the *Helgoland*. The armoured cruiser "P" (1906-7 programme) was launched in March, 1909, and named *Von der Tann*; the "G" was laid down in September, 1908; and the "H," of the 1909-10 programme, in December of that year. This ship and the battleship *Ers. Frithjof* were the accelerated vessels which created such a disturbance in this country. None of the details of these cruisers is known for certain, but it is reported that the *Von der Tann* will carry ten and the "G" and "H" twelve 11-inch, the speed of the first being 25 and of the others 28 knots. It is probable that the two last will carry 12-inch guns. At any rate, the First Lord of the Admiralty has referred to them as being "faster and more powerful than our *Invincibles*."

The official (German) dates for the completion of the ships now under construction are as follows:—Autumn, 1909, *Westfalen* and *Nassau*. Spring, 1910, *Rheinland* and *Posen*. Summer, 1910, *Von der Tann*. Summer, 1911, *Helgoland*, *Ostfriesland*, *Thuringia*, and "G." Spring, 1912, *Ers. Frithjof* and "H." Winter, 1912, *Hildebrand* and *Ers. Heimdall*.

France.—There has been little progress in shipbuilding, but Admiral Boné de Lapeyrière, the new Minister of Marine, has reorganised the fleet in commission, and is overhauling the administration from top to bottom. This was a very necessary preliminary to the expansion of the navy. Five of the six ships of the Danton class have been launched, the latest, the *Mirabeau*, taking the water on 28 October, 1909. It is estimated that all the class will be in service by the middle of 1912. They are of 18,400 tons, and carry four 12-inch and twelve 6.4-inch guns. A new programme of six battleships has been drawn up, but no money for them will be voted until the plans are definitely fixed, much of the

delay in construction in the past having been due to constant alterations in design while the ships were still building. The Superior Council has prepared plans showing a ship of 23,400 tons and 21 knots, armed with twelve 12-inch and eighteen 5.5-inch guns. It is expected that all will be laid down during 1910.

Each of the squadrons in home waters (Channel and Mediterranean) consists now of six battleships, four armoured cruisers and twelve destroyers, the most modern ships being in the Mediterranean. The Far Eastern fleet is to be raised to three armoured cruisers, and the flotillas of submarines and destroyers in home waters are being strengthened and reorganised.

Italy.—A programme of four large ships has been adopted, two (*Dante Alighieri* and *Cavour*, ex-*Leonardo da Vinci*) having been laid down during the summer, and two others (*Michelangelo Buonarroti* and *Gabileo Galilei*) towards the end of the year. The first two are of 18,300 tons, steaming 23 knots and carrying twelve 12-inch guns in triple turrets. The others are of 21,000 tons, and will, it is stated, carry eight 14-inch, and steam 22 knots. The end of 1912 is the expected date of completion.

Austria.—It was stated early in the year that Austria had adopted a four-Dreadnought programme in reply to Italy. Financial difficulties, however, have arisen, and it is doubtful whether, even if all the ships are built, they will be completed before 1915. One ship may be laid down after the launch of the *Zrínyi* at Trieste in January, 1910, but the fate of the others is doubtful. The naval preponderance of Italy over Austria seems assured for a generation. Austria's ships will be of 19,250 tons and 22 knots, armed with ten 12-inch guns. According to the "Zeit," an ultimate strength of sixteen Dreadnoughts is to be attained by the Austrian fleet, but no date is given for the completion of such a programme.

Russia.—Four battleships of the Dreadnought type were laid down in the Baltic yards on 16 June, 1909. They are being built under the supervision of Messrs. John Brown & Co., of Clydebank. The ships, which are named *Poltava*, *Gangut*, *Sevastopol* and *Petrovsk*, will be of 23,000 tons and 23 knots, carrying twelve 12-inch and sixteen 4.7-inch guns. They will be completed by the late summer of 1912.

Turkey.—The reorganisation of the Turkish navy has been taken in hand by Rear-Admiral Sir Douglas Gamble, who has already effected great improvements in the efficiency of such material as Turkey possesses. A new building programme is spoken of, comprising six battleships, twelve torpedo-boats and twelve destroyers, to be completed in eight years, but nothing further seems to have been done.

Spain.—A syndicate, comprising the British firms of Armstrong Whitworth, Vickers, Sons & Maxim and John Brown & Co. and the Spanish Naval Construction Co., has been entrusted with the execution of the programme decided on by the Cortes in January, 1908. In addition to the reorganisation of the dockyard at Ferrol there are to be built three battleships, each of 14,760 tons and 19.5 knots, with an armament of eight 12-inch and twenty 4-inch guns, four gunboats, three destroyers and twenty-four torpedo-boats.

It will be noticed that there is a decided progressive movement on the part of the Mediterranean Powers, France, Spain, Italy, Austria

and Turkey having in contemplation programmes involving the construction of twenty-three first-class armoured ships.

Japan.—This Power remains the most secretive of the maritime nations, even the number of ships she is building being a matter of some doubt. At least two ships known to have been laid down in 1908 are not included in the last issue (31 March, 1909) of the British Admiralty's official return. These are the armoured cruisers *Iruki* and another unnamed. They are of 18,650 tons and 25 knots, and will be armed with six 12-inch and fourteen 6-inch guns. The estimated date of completion is the end of 1911. The battleships *Kawachi* and *Settsu* were laid down early in 1909. They are of 20,800 tons and 20.5 knots, and will carry twelve 12-inch, ten 6-inch and twelve 4.7-inch guns, the summer of 1911 being the estimated date of completion. A third battleship of the same type was laid down at the end of 1909. The Japanese Government claims to be able to complete a Dreadnought in two years from the date of commencement.

The destroyer *Unikaze*, of 1,100 tons and 35 knots, has been passed into commission after successfully completing her trials.

Brazil.—Of the three battleships ordered in England in 1907 the *Minas Geraes* is completed; the *Sao Paulo* was launched in April, 1909, and the *Rio de Janeiro* has recently been started. The trio should be completed by the middle of 1912, and it is believed that a further programme will subsequently be adopted by the Brazilian Government.

Argentina.—The Argentine Republic has expressed its intention of building two or perhaps three Dreadnoughts, to be completed by 1912. The ships are to be of 19,000 tons and 21 knots, and to be armed with ten 12-inch and fourteen 6-inch guns. They have not yet been laid down.

China.—The Chinese Government is credited with the intention of building (in Japan) three 15,000-ton battleships, armed with eight 12-inch guns.

Chili.—Two ships of 19,000 tons, armed with ten 12-inch guns, have been spoken of, but not laid down.

The following table has been prepared to show the number of ships of the Dreadnought type which the principal Powers will possess when the ships of existing programmes are completed. The table is divided into years, so that the number for the end of any year can be ascertained. The figures in brackets, following the numbers of the ships, represent the number of big guns (11 inches calibre or over) that those ships will carry. It should be noted that the German figures relating to ships are those given by the German Government, and are likely to be modified as the rate of construction is accelerated. The gun numbers are largely speculative, but are based on the best information obtainable.

	End of 1909.	1910.	1911.	1912.	1913.
Great Britain	7 (64)	10 (94)	14 (132)	20 (190)	?
Germany	2 (24)	5 (58)	9 (106)	13 (154)	?
United States	2 (16)	4 (36)	6 (66)	8 (80)	?
Japan*	..	1 (16)	2 (38)	7 (80)	?
France†	4 (64)	8 (120)	12 (168)
Italy	2 (24)	4 (40)

* The first two ships included carry four 12-inch and twelve 9-inch.

† The first six ships included carry four 12-inch and twelve 9.4-inch.

PERCIVAL A. HSLAM.

THE momentous events foreshadowed in the article which I wrote for last year's issue of WHITAKER'S ALMANACK have, it is pleasing to note, not been entirely confined to the continents of Europe and America. During October (1909) aviation meetings were held at Doncaster and Blackpool; and, although foreigners were conspicuous among the prize-winners, no little satisfaction is to be derived from the fact that human flight has at last made a good start on British soil. The enthusiasm of the public at both these meetings was remarkable. Thousands of spectators stood for hours in rain, in wind, and upon wet grass in order to see a man fly; and it is to be hoped that future gatherings will take place at a time of the year when weather conditions are more propitious for the handling of aeroplanes in the air. At Doncaster one fact was particularly noteworthy—the suddenness with which a practically unknown beginner can come into prominence. Le Blon, who was not even an advanced pupil in the art of flying, elicited high praise from astonished experts for the ease with which he controlled his machine; and this fact should be borne in mind by those who predict that it will take a long time before British aviators can rival the skill of Frenchmen. Nor should it be forgotten that on Oct. 30 Mr. J. T. C. Moore-Brabazon won the *Daily Mail* £1,000 prize for a circular mile flight by a British aviator on an all-British aeroplane.

The past twelve months have not witnessed any startling developments in connection with aeroplanes; but it must be remembered that the majority of aviators were only endeavouring to perfect themselves in the handling of their new craft. The Rheims meeting proved that three persons could be carried in an aeroplane; but it is difficult to see how this slight addition to its weight-carrying capacity can render an aeroplane a more efficient offensive weapon of war; because there is little or no margin for the transport of explosives. Not very much has been done in the way of proving that aviators can handle their machines with ease at great altitudes. Paulhan reached a height of 720 feet at Brooklands, and O. Wright is said to have attained nearly 1,500 feet in Germany; but there is no official record in connection with the latter performance. The average aeroplane flyer does not care, at present, to go much higher than 300 or 400 feet, which is a long way off the 4,000 feet attained by dirigibles. There is considerable improvement, however, in flying when fairly strong winds are blowing, as evidenced by Mr. H. Latham's flight at Blackpool.

In my article last year I laid stress on the advisability of not abandoning the dirigible for military purposes in view of possible improvements in aeroplanes; and, although more than one serious attempt has been made to prove that the day of the former is over, it is gratifying to observe that the British Government has not allowed itself to be swayed by outside influence. Civilians may be quite at home with the mechanism and working of motors; but when it comes to military aeronautical policy the Government can only be guided by military experts who are familiar with practical aeronautics and the laws of strategy.

Messrs. Vickers, Sons & Maxim are constructing for the Navy a large rigid dirigible,

which will be stationed in the neighbourhood of Morcambe Bay; and the Army are entrusted with the duty of experimenting with non-rigid and semi-rigid dirigibles and also aeroplanes. One large dirigible is being constructed at Farnborough, while a dirigible ordered by the *Morning Post* from M.M. Lebandy will be accepted by the Government, and a Clément dirigible will be purchased, subject to its fulfilling certain conditions. It will, therefore, be seen that the subject of aerial navigation, from a military point of view, is not being neglected in this country.

The question of invasion through the air still occupies a foremost place in the minds of the public; and, as several sensational productions have appeared from the pens of civilian writers, who possess little or no practical aeronautical experience, it may be as well to draw attention to some important features of the subject. It has been pointed out that owing to their relatively small cost aeroplanes could be constructed in immense numbers—each carrying two or three men—so that the aerial transports could be sent to and fro over the sea. But, to be of any practical use from a military standpoint, the troops should alight in a body, or they would be "beaten in detail," especially in a thickly populated country like England. Now, no one who knows anything about the flight of aeroplanes can imagine a fleet of them coming to earth simultaneously within a definite area. The most they could do would be to arrive in dribbles, and, after avoiding collisions with each other, with trees, buildings, hedges, wires, and the numerous other obstacles of our much intersected country, it would be found that they were dispersed over too large an area to admit of subsequent concentration without an amount of delay which would seal their doom. For an aeroplane cannot alight anywhere like a grass-hopper, and the proof of this is the difficulty of finding suitable aviation grounds. Surprise attacks might be feasible abroad, but they cannot be so for long in our land. It must also be remembered that such a force would be unaccompanied by artillery, reserve ammunition for the rifles, and the numerous other necessities without which a body of armed men would be easily overcome. But perhaps the greatest difficulty of all would consist in starting such a force. The Wright launching apparatus would be out of the question for hundreds of aeroplanes, and the preliminary "ground-run" method would necessitate the finding of a suitable tract of land on the seaboard, sufficiently large to accommodate the requisite number of aeroplanes—a matter of some difficulty if the selected spot was not to attract the attention of the enemy's airships.

The great drawback to the aeroplane from a military aspect, therefore, is still its limited weight-carrying capacity; and, although both Sir Hiram Maxim and Major Baden-Powell point out that the "lift" can be increased by accelerated velocity, speed cannot be developed without a preliminary slower pace; so we cannot put on more weight than could be raised when travelling at the latter rate. Aeroplanes, however, are likely to prove very useful for reconnaissance.

It is to be regretted that a certain amount of valuable time has been lost in this country over

discussions on the respective merits of the rigid and non-rigid types of dirigibles. As a matter of fact, both are necessary in war time—the former for operating from a base, and the latter to accompany an army in the field, because it is easily deflated and packed up. The splendid voyages of the Zeppelin airship have established the utility of this class; and the fact that the French *République* remained inflated for 110 days is an answer to those who point to the limited “life” of dirigibles. So far as England is concerned, the dirigible is likely to prove a valuable adjunct to our resources for repelling an invasion. Such an attack could not be entirely successful without field artillery to silence our own guns inland; and, as these heavy weapons cannot be landed quickly, our airships could play havoc with the disembarkation.

Readers who desire more detailed information regarding the various types of aerial craft should refer to my article in last year's issue of this ALMANACK; and I may state that nothing has since occurred to alter my views in the “Forecast” which appeared in the same edition.

LITERATURE.—The interest attaching to the military aspect of Aeronautics has produced an abundant crop of hastily compiled works; but the majority of the writers lack practical aeronautical experience and knowledge of the art of war. The following, however, can be recommended: “Artificial and Natural Flight,” by Sir Hiram Maxim; “The Conquest of the Air,” by A. Berget; “The Force of the Wind,” by H. Chatley; “Airships Past and Present,” by A. Hildebrandt; “Fliegende Menschen,” by Moedebeck; “L’Aéroplane pour Tous,” by Lelasseux and Marquet.

PRINCIPAL EVENTS.

(1908) Nov. 7. Zeppelin airship, with German Crown Prince on board, made 5 hours' trip. 21. Santos-Dumont flew 145 metres (monoplane). Dec. 9. Zipfel (biplane) flew 1,500 metres. 18. Wilbur Wright won Aero Club prize for flight of 330 ft. above the ground. (1909) Jan. 20. Accident to Cody aeroplane. 23. Prince Henry of Prussia travelled in Gross airship. Feb. 11. Zipfel gave demonstrations of aeroplane flight near Berlin, and Mr. A. J. Balfour watched Wilbur Wright fly on several days. Mar. 19. *Zeppelin I.* carried 26 passengers. 19 to 27. First Aero Exhibition at Olympia. April 6. *Zeppelin I.* made an all-night voyage. May 2. Brothers Wright visited London. 6. Lieut. Calderara seriously injured in aeroplane accident. 29. First ascent of Russian dirigible *Russie*. 29 (to June 2). *Zeppelin II.* travelled 650 miles in 37½ hours. June 4. Gross airship carried out important “wireless” experiments over Berlin. 21. *Morning Post* opened a “National Airship Fund”; and during the month the *Daily Mail* guaranteed erection of an airship shed. July 4. M. Blériot flew nearly an hour in heavy rain. 12. Mr. F. Goodale navigated a dirigible over New York. 14. The *République* and *Ville-de-Nancy* manoeuvred together over troops at Longchamps. 19. H. Latham attempted cross-channel flight, but fell into the sea 7 miles from French coast. 25. Blériot flew from Calais to Dover in 37 minutes. 30. American Government acquired Wright aeroplane for £6,000. Aug. 1. *Zeppelin II.* travelled from Friedrichshafen to Frankfurt *via* Ulm, Stuttgart, and Heidelberg in 11 hrs. 50 mins. 4. Belgian dirigible ascended

for first time (Brussels). 11. S. F. Cody flew 3 miles at Aldershot. 15. Wellman dirigible sailed from Spitzbergen, fell into the sea and was destroyed (no loss of life). 17. Italian military dirigible made its first ascent this year. 23. Dirigible *Clément-Bayard* reached a height of 5,000 feet and remained over 2 hours at 4,000 feet. 25. Paulhan, at Rheims, flew 133·676 kilometres in 2 hrs. 43 mins.—*Zeppelin III.* ascended for first time at Friedrichshafen. 27. H. Farman, at Rheims, flew 180 kilometres in 3 hrs. 4 mins. (world's records for distance and duration).—*Zeppelin III.* started from Friedrichshafen on voyage to Berlin. 29. *Zeppelin III.* arrived at Berlin and manoeuvred over the city. 30. Orville Wright flew near Berlin. Sept. 3. Italian military dirigible travelled at an altitude of 3,000 ft. 7. Accident to Wright aeroplane near Paris; E. Lefebvre killed. 8. S. F. Cody flew 40 miles. 9. King of Saxony made 2 hours' voyage in *Zeppelin III.* 11. S. F. Cody flew before Empress Eugénie at Farnborough. *Zeppelin III.* travelled from Friedrichshafen to Frankfurt in 16 hrs. 45 mins. 13. German *Gross II.* took part in military manoeuvres. Santos Dumont flew on his monoplane *Demotele*. 15. *République* took part in military manoeuvres and carried out important reconnoitring duties while remaining 6 hrs. in the air and covering 60 miles.—Delagrangé on a Blériot monoplane flew at Aarhus before King and Queen of Denmark.—*Zeppelin III.* ascended with Prince and Princess August of Prussia.—M. Blériot entertained to lunch at House of Commons. 17. O. Wright, at Berlin, reached the record height of 554 feet in the presence of the German Emperor. 18. At Berlin O. Wright, with a passenger, flew 1 hr. 35 mins. (world's record passenger flight). 20. Rougier, at Brescia, and before King of Italy, reached a height of 650 feet (world's record). 22. Captain Ferber killed by an accident to his aeroplane at Boulogne. 25. Aeronautical Exhibition at Paris opened by President of the Republic.—The *République*, while returning from the manoeuvres, was wrecked and its crew of four killed. 26. Berlin Aviation Week commenced. Oct. 2. O. Wright flew with Crown Prince of Germany as a passenger. 4. W. Wright flew over a warship and liners in America. 9. W. Wright attained a speed record of 46 miles an hour.—Accident to J. Humphrys' monoplane at Wivenhoe. 12. H. Farman flew for 1 hour across country in France. 15. Doncaster Aviation Meeting commenced. 16. Accident to S. F. Cody's aeroplane. 18. Blackpool Aviation Meeting commenced. 25. Blackpool Aviation Meeting ended. Results: Lancashire Aero Club's Grand Prix of £2,000 for longest distance, Farman, 47 miles 1,544 yards; *Daily Sketch* Prize for speed, Farman, 36·38 miles an hour; *Manchester Guardian* Prize for slowest circuit (2 miles), Latham, 5 mins. 30 secs. 26. Doncaster Aviation Meeting ended. Results: Whitworth Cup for longest distance of the day, Sommer, 38 miles 1,580 yards; Doncaster Cup, Sommer; Tradesmen's Cup for the fastest circuit, Delagrangé, 1 min. 47 secs. 30. Paulhan, at Brooklands, flew for 58 mins., and reached a height of 720 feet.—J. T. C. Moore-Brabazon won *Daily Mail* £1,000 prize for first circular mile flight by a British aviator on an all-British aeroplane.

H. J. CONTINGHAM,
CAPTAIN.

AERIAL WARFARE.—In the year 1908 the British Government spent £5,270 on aerial navigation, of which sum £1,980 was expended on "dirigibles" and £3,290 on "aeroplanes." The French Government spent £47,700, Germany £133,731 (exclusive of £265,000 privately subscribed for the Zeppelin airship), while Austria-Hungary spent £5,500. The amounts expended in 1909 exceed the above totals.

AFFORESTATION.—The Royal Commission on Afforestation reported in January. They recommend an annual expenditure of £2,000,000, which would result in 9,000,000 acres being wooded in 40 years. The work would be self-supporting, and after 80 years would bring in an annual revenue of £17,500,000 if timber retained its present prices.

AQUEDUCT FOR NEW YORK.—The aqueduct now in course of construction for bringing water from the Catskill Mountains to the city of New York is proving a gigantic enterprise. The area for collection comprises 600 square miles. Several large reservoirs are being built, and a flow of 500,000,000 gallons of water will be required. The aqueduct when finished will be 92 miles in length.

ASSUAN DAM.—The Esneh Barrage, the last of the important works in connection with the Assuan Dam, was completed in February. It crosses the river 643 miles from the sea. It is 882 metres long, has 120 openings 5 metres wide, each fitted with a movable iron sluice. There is a lock at one end of the Barrage 262 ft. 6 in. long and 52 ft. 6 in. wide, and the work was completed within three years of the contract being given out.

ASTROGRAPHIC CONFERENCE.—The fifth meeting of the Astrographic Conference was held in April at Paris. The Conference split up into five committees, and considered (a) the progress and possible acceleration of the gigantic catalogue that is being produced by the co-operation of the different observatories; (b) the unification of the means of indicating star magnitudes; (c) the origin of certain systematic errors, and their correction; (d) the corrections needed to bring out the catalogue in a uniform and absolute system; (e) arrangements for the proper systematic observation of Eros in view of the opposition in 1931.

AUTOMATIC LIGHTSHIP.—The Trinity House have conducted successful experiments with an automatic lightship. The vessel is built somewhat after the style of the lighted buoys. The hull is 65 ft. long by 18 ft. 6 in. beam and 10 ft. 6 in. deep. A steel tower carries the lantern to a height of 26 ft., and four reservoirs in the hold carry sufficient gas at a pressure of 110 lb. to the square inch to keep a light burning for 100 days. A three-cylinder engine, driven by the gas as it escapes to the burner, serves to rotate the light. Other arrangements include an automatic bell for fog, a mechanism for extinguishing and lighting the lantern, and the beam of light is visible at a distance of 10 miles.

AVIATION, see pages 680-1.

BLACKFRIARS BRIDGE.—The new section of Blackfriars Bridge was opened to the public in September. The roadway has been widened from 45 ft. to 73 ft., the total width between the parapets now being 105 ft. The bridge now has space for six lines of traffic and two trams, instead of affording room for only five lines of

traffic. The total cost of widening amounted to £203,000, and was carried out by, and at the private expense of, the Corporation of London.

BLOOD AND ITS DETECTION.—Blood-stains, though many years old, can be detected with certainty by a new method, according to Prof. E. J. McWeeney. On dissolving benzidine in acetic acid and bringing it into contact with blood in the presence of hydrogen peroxide, the blood particles at once turn a brilliant blue. The test is claimed to be ten times as delicate as the somewhat similar guaiacum test, and will work successfully even if the blood has been diluted 500,000 times. It seems likely to prove of value to medical jurists.

BRITISH ASSOCIATION.—In his presidential address before the British Association at Winnipeg, in August, Sir J. J. Thomson referred to the educational value of research work. He showed how recent physical discoveries had led to a modification in the views held regarding the nature of electricity and the structure of the ether, and he pointed out that the ether must be incomparably denser than lead and yet incomparably rarer than the lightest gas. He concluded with a consideration of radium, and suggested that the intrinsic energy contained varied with the different individual atoms.

The combined discussions on wheat supplies of the world, and the papers read in this connection, were generally considered the most valuable outcome of the meeting.

CANADIAN ICEBREAKER.—A remarkable vessel, the *Earl Grey*, has been constructed for the Canadian Government. She embodies the features of an official yacht for the Viceroy, a passenger steamer, and an icebreaker, with a displacement of 3,400 tons. She is 250 ft. long, has 47 ft. 6 in. beam, and a speed of 17 knots. In the trial trip the engines indicated a maximum of 7,578 h.p. The vessel is designed to perform her work by charging upon the top of the ice and breaking down through it by means of her weight.

CANCER DIAGNOSIS.—Mr. E. C. Hort described a new method to the British Medical Association for the diagnosis of cancer. It depends on the fact that the serum of patients suffering from cancer is particularly potent in neutralising the digestive activity of the ferment trypsin. Mr. Hort, with whom Dr. Golla has been associated in the work, claimed that out of a hundred cases examined the test worked successfully in all but six, and that in three of these it could not be definitely proved that the patients concerned were suffering from cancer. (See also ROYAL SOCIETY.)

CANCER RESEARCH.—Starting from the fact that long-continued exposure to X-rays causes carcinoma of the hand, and applying the photographic and electrical test of radio-activity to healthy and to carcinomatous tissues and to certain substances supposed to cause carcinoma, Dr. Lazarus-Barlow has found evidence of a property which, though not identical with radio-activity, is in many respects akin to it. He further describes an "anti-radio-active" property which appears to be natural to certain animal substances, and evidences of which may be obtained electroscopically in aluminium discs that have been kept in proximity to uranium, thorium, or pitchblende. By direct experiment he has shown that both radio-active and

"anti-radio-active" substances influence the rate of division of living animal cells. He points out that a causation of the disease by radio-activity would better fit in with the known characters of the disease than any other cause hitherto suggested. The work was published by Dr. Lazarus-Barlow in the Croonian lectures.

CHEMICAL ANALYSIS.—In the course of experiments on the estimation of chloroform in the blood, Dr. G. A. Buckmaster and Mr. J. A. Gardiner have shown that a mistake has been made that vitiates the results obtained during 50 years in the analysis of the gases of the blood. Chloroform, they find, decomposes under the influence of potash, forming carbon monoxide. This in the analyses made in the past has been computed as nitrogen, and its presence was assumed to be due to a lack of air in the apparatus. The mistake is one that has obtained currency through the authority of the chemist Dumas.

CONSUMPTION.—The National Association for the Prevention of Consumption opened a campaign in July against tuberculosis. The methods adopted are to improve the present state of things by lectures, pamphlets, and exhibitions. The first exhibition was opened in Stepney by Mr. John Burns, who dealt with the subject from many points of view, and indicated as a desirable reform that the streets of all modern cities should have their gutters continually flushed with a stream of water.

Under an order of the Local Government Board consumption was this year made a notifiable disease in Poor Law cases.

DARWIN CENTENARY.—Cambridge celebrated on June 23 the centenary of the birth of Charles Darwin. Distinguished men of science attended from all parts of the world, and the view was advanced by several of the speakers in the Cambridge Senate House that Darwin did for the complex world of animate things what Newton did for celestial movements by his discovery of the law of gravitation. Addresses were presented from the various Universities and learned societies, and honorary degrees were conferred. Mr. A. J. Balfour gave an appreciation of Darwin's work at the formal dinner, and Sir Archibald Geikie delivered the Rede lecture on "Charles Darwin as Geologist."

DOVER HARBOUR.—The new Dover Harbour, covering at low water an area of 690 acres and costing £3,500,000 for its construction, was opened by the Prince of Wales on October 15. The docks have been in course of construction for 11 years. The western arm of the harbour has been increased in length from 2,000 ft. to 4,000 ft., and an eastern arm constructed measuring 2,924 ft. A southern breakwater 4,212 ft. long, with the two arms, encircles the harbour. There are two openings, on the east into the naval harbour, and on the west alongside the Admiralty Pier. The harbour has required 63,000 concrete blocks each weighing from 25 to 41 tons for the two arms and the breakwater, and 5,000 more as an apron to protect the new works on the outside. Many thousands of tons of Cornish granite have also been used. It is expected that Dover Harbour will become a port of call for many ocean-going vessels.

ELECTRIC RAILWAY FOR JAPAN.—Nearly the whole of the plant for the new Keihan electric railway in Japan has been ordered in Great Britain. The railway will link the old capital Kyoto with Osaka, the industrial capital of the

country. The operating plant is to have a total power of 2,550 kw. Though the standard gauge of steam railways in Japan is 3 ft. 6 in., the new line is to be built to the 4 ft. 8½ in. gauge.

The contract for the fourth and largest of the railways over the Andes has also been given to a British firm by the Argentine Republic.

EUGENICS.—Professor Karl Pearson and workers at eugenics are showing rapidly increasing activity. The State is mistaken, Professor Pearson contends, in carrying legislation by appealing to the sentiments and feelings of the cultured and sensitive upper and middle classes. In this way the biological and economic bases of life are disregarded, parentage is ignored, and environment unduly emphasised. As an illustration of the evil results he attributes the falling birth-rate of Bradford to the effects of factory legislation.

GIGANTIC TRAIN FERRY.—A gigantic train ferry has been built to extend the Lagos Railway in Nigeria. It carries six passenger carriages and waggon of 24 tons each; there are lines of rails on a hinged "prow" both fore and aft. It is equipped with two paddle-wheels, each of which is driven by a 150-h.p. engine. Its total displacement is 560 tons, its draft 5 ft. 6 in., and the speed, when fully loaded with 150 tons, is 7 knots.

HALLEY'S COMET, see page 89.

HYPNOTISM.—In the Harveian oration Dr. S. H. Savage urged the medical profession seriously to take up the problem of hypnotism. England, he contended, should take her part in the work that was now being done on the Continent on the subject. There was, he said, in that realm of psychology and philosophy a wide hinterland, often occupied by dangerous and unscrupulous persons, but scientific men should take up the work of exploration of this territory. The importance of Dr. Savage's contention lies in the fact that hypnotism has in the past been largely boycotted by the medical profession.

INTERNATIONAL CONGRESS OF APPLIED CHEMISTRY.—At the International Congress of Applied Chemistry, which met for the first time in London, the Prince of Wales presided over the inaugural meeting. The application of chemistry to foods, various aspects of sanitation, and the section dealing with brewing were among the more important features of the meeting, while the best attended demonstration was that by Professor Berntsen of a method for the fixation of nitrogen.

LARGEST RESERVOIR IN THE WORLD.—The largest service reservoir in the world was formally opened in May by the Lord Mayor of London, at Honor Oak. It has a capacity of 56,500,000 gallons, or a day's allowance for nearly 2,000,000 people. The works comprise four separate reservoirs, and an area of 16 acres is occupied. Both concrete and brick have been used in the construction, and the thickness of the walls varies from 6 ft. at the centre of the arches to 10 ft. at the abutments. Over 16,000,000 bricks were required for the purpose.

METAL CUTTING BY OXYGEN.—Metal cutting by oxygen is rapidly supplanting older methods in engineering works. The instrument used consists of an oxy-hydrogen flame, with a special means for producing an extra blast of oxygen when desired. The slab of metal to be cut is heated to incandescence by the flame and cut through by the jet of oxygen. Plates can be

cut up to 12 inches of thickness, and the cut is remarkably clean, its width being only about a quarter of an inch.

METEORIC FIREBALL.—On Feb. 22, at 7.30 P.M., a remarkable fireball was observed from the southern counties of England. At the outset it emitted an orange light. This, half-way through the flight, suddenly blazed out with a steely-blue colour. There was a short luminous streak when the chief outburst occurred, and this intensified and soon extended along the whole path traversed by the meteor. It was seen in the Milky Way about two hours after the time of its first projection. There were a series of brilliant outbursts, several being brighter than the lustre of Venus. The phenomenon has been described as the meteoric spectacle of a generation.

A MOTOR MOWER.—A new agricultural motor has been put upon the market in the form of a mower driven by its own incorporated petrol engine instead of being worked from a separate engine. The makers claim that it will cut 30 acres of hay in ten hours, and will reap and bind 20 acres in ten hours. The machine is also said to be able to plough 6 acres or cultivate 20 in ten hours, and can be used to drive a threshing engine or for purposes of agriculture.

OXYGEN AND PHYSIOLOGY.—The value of preliminary deep breathing in enabling the breath to be held has long been known in theory and practice, but new experiments have shown that by the use of oxygen the "time" of athletes can be enormously extended. Dr. H. M. Vernon has shown that by the "forced breathing" of oxygen he was able to hold his breath for the astonishing period of 8 minutes and 23 seconds. Other observers have shown that the time of athletes has been improved and discomfort of after-effects avoided by the inhalation of oxygen. The use of the gas may be expected to prove of practical value to divers and others. Its value depends on the thorough oxygenation of the muscles of the body; but the respiratory centre is made less sensitive to carbon dioxide, and this constitutes an element of danger, for the gas is then apt to accumulate to a more than normal extent in the body.

PARTHENOGENESIS.—Professor Loeb claims, in a volume issued in Berlin, that unfertilised eggs can be developed into larvae by placing them for a couple of hours into hypertonic sea-water, or, in other words, into sea-water to which sugar or salt has been added. The essence of his so-called "Lysin" theory is shown in his book to be an attempt to interpret biological phenomena in terms of chemistry and physics. The stimulus inducing development is said by him to be osmotic.

PASTEUR INSTITUTE.—The Pasteur Institute received in August a legacy of £1,200,000 from the late Mr. Osiris. The money was left because of the way in which Mr. Osiris was struck by the generous conduct of Dr. Roux, the head of the Institute, in handing over a prize of £4,000 he had won to the Institute. On being asked why he had acted in this way, Dr. Roux is said to have replied, "All that I am I owe to the Pasteur Institute, for all my experiments and discoveries have been made there. Besides, the Institute is very poor, for we have no income except what we make by the sale of serum; and though it brings in enough to keep the establishment going, some fresh remedy may any day be discovered, in which case I fear the Institute would have to close its doors for want of funds."

It is believed that Mr. Osiris was influenced by this statement in his endowment of the Institute.

RADIUM.—Mlle. Gleditsch claims that there is any constant ratio between uranium and radium in radio-active minerals, and contends that the view that uranium is changed into radium requires modification. (See also **TRANSMUTATION** and **CANCER**.)

RADIUM INSTITUTE.—The foundation of the Radium Institute, of which the foundation stone was laid by Lady Ramsay in October, may be expected to place Great Britain in the forefront of the nations actively engaged in determining the part that radium can play in relation to disease. For the first time this country will have a supply of radium (5 grams) sufficient to enable experiments to be carried out on a reasonably comprehensive scale, but it is emphasised by the medical profession that the benefits to be derived from the application of radium to treatment are at present only in the experimental stage.

RAILWAY THROUGH A BUILDING.—Four lines of railway have been constructed through the offices of the *New York Times*. The building stands 360 ft. above ground, and 40 ft. below street level, and as it weighs 150,000 tons, it had to be stipulated that there should be no rigid connection between the building and the subway. The columns supporting the building and those carrying the subway were made distinct, and cushions of sand were placed below the supports for the railway. In this way all vibration in the building has been avoided.

RAT EXTERMINATION.—The first annual meeting of the Society for the Extermination of Vermin met in March, and the rat was the special object of attack. The rat, Sir James Crichton-Browne declared, did fifteen million pounds damage a year in England and Wales alone, and was in addition responsible for the spread of a lot of preventable disease. The flea of the rat was capable of containing 5,000 disease germs.

ROYAL SOCIETY.—As in 1908 one of the most important exhibits at the Royal Society Conversation was the work of the Imperial Cancer Research Fund. Evidence was given showing the stages by which a superficial cancer, or carcinoma, could merge into a deep-seated cancer, or sarcoma. A method has been found by which, for the purposes of cancer research, a mouse only a few weeks old can be regarded as old, and the phenomena of old age as affecting cancer can be studied. It was also claimed that the possibility of cancer being due to a microbe was definitely disproved.

RINGING OF HOUSE BELLS.—Sir Oliver Lodge has suggested a physical explanation for the sudden unexplained ringing of house bells of the ordinary non-electric type. The bell wires, he suggests, collect atmospheric electricity, by induction or otherwise, which the walls are insufficiently conducting to carry off properly, consequently the bells get charged, are attracted to a neighbouring wall or pipe, and released suddenly by a spark. This little lateral jerk rings the bell. The suggestion has been attacked by those who suppose "another" cause, or attribute the effect to inefficient plumbing.

SALMON SHIPPED TO NEW ZEALAND.—The first stage of the attempt to acclimatise salmon in New Zealand has proved entirely successful. Eggs were sent out from Scotland, Ireland,

England, and Germany, about 95 per cent. reaching their destination safely. The eggs hatched out within a few hours of their arrival, and the difficulty of rearing the young fish has now to be met. There seems no reason why the attempt should not be as successful as it proved in the case of trout.

SAVING OF DAYLIGHT.—The Daylight Saving Bill (modified since its first introduction to the House of Commons in 1908) was read a second time on March 5. In its modified form it proposed that from 2 A.M. on the third Sunday in April until 2 A.M. on the third Sunday in September local time should be one hour in advance of Greenwich time, and for the remainder of the year the same as Greenwich time. In Ireland, Dublin time should be substituted for Greenwich. For the purposes of astronomy and navigation the time to be reckoned as hitherto. These changes were opposed by many classes of the community—manufacturers, merchants, theatre managers, &c. Among scientific men opinion was divided, those for and against being of nearly equal weight. The Astronomer Royal was against, and Sir Robert Ball favoured the innovation. The Select Committee's report on the Bill stated that, in view of the great diversity of opinion existing regarding the proposals of the Bill, they did not recommend that it should be proceeded with, and consequently it was dropped. The question may possibly be brought forward again on some future occasion.

SOUTHWARK BRIDGE.—The Corporation of London (through the Bridge House Estates Committee) proposes to widen Southwark Bridge at a cost of about £240,000, and to erect a new bridge (St. Paul's Bridge) at an estimated cost of £1,650,000.

THE WORLD'S LARGEST WATER-TURBINES.—The water-turbines required by the city of Winnipeg are each to have 5,300 h.p., and will cost £24,250, and will be the biggest in the world. The turbines are to be of the Francis type, and, as these require special experience in construction, the bulk of the hydraulic work will be done in Sweden, though the contract went to a London firm. The machinery is to be used in the Winnipeg power station.

TRANSMUTATION.—In his presidential address to the Chemical Society, Sir William Ramsay gave evidence to show why the transmutation of elements must be regarded as possible. He described experiments, and claimed that it appeared probable that carbon dioxide had been "engendered" from thorium nitrate, and, in fact, that carbon was one of the degradation products of thorium. The change was effected under the influence of radium emanation, and the work is parallel with that done by Sir William Ramsay on the apparent change of copper into lithium and sodium.

TREE-UPROOTING MACHINE.—The powerful ploughing engines employed in South Africa and elsewhere are being used for the novel purpose of tearing up trees by the roots. The method is to attach a wire rope to the trunk a considerable height above the ground, and apply it to the winding drum of a big agricultural engine. In this way a pull of from 5,000 to 12,000 lb. can be obtained, and trees of a very considerable size can literally be dragged from the ground.

The roots are usually loosened by water or dynamite.

A TURBINE LOCOMOTIVE.—The first steam turbine locomotive has been constructed by the North British Locomotive Company. The engine is designed for express passenger traffic, and is carried on two eight-wheeled bogies, which can easily negotiate curves. In its preliminary trials it has been pronounced a success.

TUMBLERS OF FROZEN WATER.—In the Congress on Refrigeration at Paris an ingenious inventor demonstrated a drinking tumbler made of distilled water frozen in moulds. The ice goblet is a conical drinking vessel in the shape of a tumbler made entirely of ice, placed in a paper shell for convenience in handling. It melts slowly, and would keep a beverage cool for about half an hour in summer. The models exhibited were differently coloured, and held about nine fluid ounces.

ULTRA-MICROSCOPE.—Several improvements and modifications have been made in the ultra-microscope since it was brought to the notice of microscopists by Siedentopf in 1903. The most ingenious is that produced by Messrs. Zeiss, the paraboloid illuminator. This takes the place of the condenser, and the rays of light passing through the slide are directed away from the lens of the microscope, with the result that there is a dark field only illuminated in those places where the presence of a particle causes diffraction. It has thus been possible to observe live unstained bacteria. It has been proved that the coloration in glass treated with gold is due to minute particles of the metal, and the instrument is finding application in bacteriology, biology, chemistry (notably with reference to the colloids), and with problems relating to the ultimate constitution of matter.

VICTORIA AND ALBERT MUSEUM.—The Victoria and Albert Museum was formally opened by the King on June 26. During the proceedings care was taken to emphasise that the object of the founders of the museum had been maintained. The systematic arrangement and classification that has been adopted are designed to encourage a high standard of excellence among the craftsmen, manufacturers, and designers of the country. An expert staff had been placed in charge of each section of the museum.

VEINS AS A MEANS OF IDENTIFICATION.—Dr. Tonassia has brought forward a new method for the identification of prisoners, designed to supplant the use of finger-prints. The veins on the back of the hand are in no two instances alike, and can easily be made to stand out sufficiently to be photographed. Finger-prints can be altered by shaving or burning the tips of the fingers, whereas only a serious operation can change the course of the veins. If adopted, the principle will probably be merely supplementary to that of the finger-prints, for these are often useful as a proof of guilt in addition to being a means of identification.

WHISKY COMMISSION.—Whisky has been scientifically defined as "a spirit obtained by distillation, from a mash of cereal grains saccharified by the diastase of malt." Scotch whisky being distilled in Scotland, and Irish in Ireland. Brandy has been labelled as "a potable spirit manufactured from fermented grape juice."

I.—POPULATION.

Growth of Population.—The population of the United Kingdom in the middle of 1908 was estimated at 44,539,593. At the census of 1901 it was 41,458,721, as compared with 27,368,736 in 1851. Hence in the half-century between these dates the population increased by 14,089,985 persons, or 51½ per cent. In other words, for every 100 inhabitants of the United Kingdom in 1851, there were 151 in 1901 and 163 in 1908. The increase has not, however, been equally distributed over the several divisions of the Kingdom, since for every 100 persons living in 1851 there were estimated to be living in 1908—in England, 108; in Wales, 127; in Scotland, 167, and in Ireland, 67. Thus while the population of England and Wales has nearly doubled in the period, that of Scotland has only increased by 67 per cent., and that of Ireland has decreased by 33 per cent. The rate of decennial increase varied considerably from one period to another, being at its maximum in the decade 1871–1881, a period comprising the years 1871–75, when the annual birth-rates were highest and when the country enjoyed a marked increase of prosperity.

Natural Increase.—The most important factor in the growth of population is the natural increase, that is, the difference between the number of births and the number of deaths. These figures have varied considerably, as will be seen from the following statement, showing for England and Wales the average annual rates per 1,000 of population:—

	Birth-rate.	Death-rate.	Natural Increase.
1851–55	33·9	22·7	11·2
1856–60	34·4	21·8	12·6
1861–65	35·1	22·6	12·5
1866–70	35·3	22·4	12·9
1871–75	35·5	22·0	13·5
1876–80	35·3	20·8	14·5
1881–85	35·5	19·4	14·1
1886–90	31·4	18·9	12·5
1891–95	30·5	18·7	11·8
1896–00	29·3	17·7	11·6
1901–05	28·1	16·0	12·1
1906	27·1	15·4	11·7
1907	26·3	15·0	11·3

It thus appears that the birth-rate reached its maximum about 1871–75, but has fallen rapidly since. The death-rate fell only slightly up to 1871–75, but has decreased considerably in recent years—a fact which is found to have been associated with a decline in the rate of infant mortality. The net result is that the “natural increase” shows in the past thirty years a slight diminution. A similar decline in the birth-rate is noticeable in the case of most European countries. The following examples may be given:—

	1850.	1907.
France	26·8	19·7
Belgium	29·7	25·7 (1905)
Prussia	39·6	33·0

As regards the causes which have led to the decrease in the birth-rate, it is found that there has been a falling off in the marriage-rate, that the number of married women at the younger ages is proportionately less now than it was in

previous decades, that there has been a large decrease in illegitimacy, but at the same time there can be little doubt that much of the reduced fertility is due to deliberate restriction of child-bearing.

Rural Exodus.—The distinction between urban and rural population is of primary importance in an estimate of social conditions, and the movement of the population from rural to urban districts is one of the most remarkable tendencies of modern times. The net result of a comparison between 1851 and 1901 in regard to four groups of area is to show that for every hundred persons living in 1851 there were approximately in 1901—

In London	203
In 84 large urban areas	282
In 14 rural counties (exclusive of their county boroughs)	95
In the rest of England and Wales	184

At the census of 1901 no less than 77 per cent. of the aggregate population were living in urban areas, while in 1851 the proportion was only about 50 per cent. The process of migration from the rural districts, which has for obvious reasons affected mainly the more youthful population of these districts, has had the effect of materially increasing the proportion of persons at the middle ages of life in the aggregate population of the rural as compared with the urban areas. This result is of importance in any comparison between urban and rural districts in respect of such matters as mortality and pauperism.

II.—PUBLIC HEALTH.

Death-rate.—An analysis of the mortality rates furnishes some interesting results. In the first place, the average death-rate for England and Wales has fallen from 22·2 per 1,000 of the population in the period 1851–60 to 15·8 in 1901–7. A similar reduction is also noticeable in most of the foreign countries. Next, it appears that the mortality of rural districts is about 23 per cent. lower than that of urban districts, the corrected average rates for 1902–6 being in London and 10 predominantly urban counties 17·21 per 1,000 of population, and in 16 predominantly rural counties 13·26. This greater mortality in urban areas may be attributed to risk incidental to certain occupations, greater liability to infection, and insanitary conditions in overcrowded areas.

Infant Mortality.—With regard to the death-rate of infants under one year of age, it appears that there was no persistent decrease until about 1900. The rate in England and Wales in 1907 stood at 118 per 1,000 births, but high as this would appear, the rate is higher in most of the principal foreign countries. The decline in recent years is attributable to the increased attention which has been given to the subject and to the administrative measures which have been adopted. Up to the present time health visitors who visit the houses of the poorer districts and advise as to the general hygiene of infancy have been appointed in about 150 districts.

Causes of Death.—Striking evidence of the effect of efficient sanitary administration is afforded by a comparison of the rates of mor-

* The particulars given are derived from “Public Health and Social Conditions” (Cd. 4671).

tality from the principal causes of death. Deaths from enteric have fallen from 390 per million in 1866 to 67 in 1907. Typhus has almost completely disappeared. The deaths from phthisis are less by one-half. In 1850 the death-rate from small-pox was 262 per million, in 1907 the rate had fallen to zero. Scarlet fever has declined from 894 per million in 1855 to 92 per million in 1907. The only important exceptions to this general decrease within the last three decades are pneumonia, diphtheria, and cancer. The apparent increase in pneumonia, and much, if not all, the increase of cancer may, however, be due to changes in medical nomenclature or to improved medical diagnosis and certification of causes of death.

Occupational Mortality.—A comparison of the mortality of men engaged in different occupations shows that clergymen, gardeners, gamekeepers and farmers enjoy the longest lives, while general labourers, tin-miners, costermongers and publicans have the shortest.

Housing.—The following interesting figures show for every 100 persons in the population of England and Wales in 1891 and 1901 the percentage living in the different classes of tenement:—

Persons living in—	1891.	1901.
One room tenements.....	2.2	1.6
Two	8.3	6.6
Three	11.1	9.8
Four	23.5	21.9
Five rooms and over	54.9	60.1

As regards overcrowding, some improvement occurred in the ten years, since while in 1891 11.2 per cent. of the population lived in overcrowded tenements, in 1901 the proportion had fallen to 8.2 per cent. No complete information exists as to what has been done to remedy the evils of overcrowding; but as illustrating the increased activity of local authorities it appears that in 1907 the sanitary authorities in London and six provincial towns were housing twelve times the number of people they did twelve years earlier, and were receiving about fifteen times the rents they derived in 1895.

Public Medical Service.—The development of the hospital service in England and Wales as a whole, and in London in particular, may be illustrated by the percentage proportion of the total deaths in the community which occur in institutions for the sick and diseased. This proportion, and therefore the extent to which recourse is had to these institutions, has more than doubled in England and Wales since 1871. In that year it was 9.0, while in 1906 it had risen to 18.2. In London at the present time more than one-third (42 per cent.) of all deaths take place in institutions.

III.—OCCUPATIONS, WAGES AND UNEMPLOYMENT.

Period of Working Life.—It is found, if the occupied population is analysed into its component age-groups at successive census dates, that the proportion of young persons engaged in occupations on the one hand, and that of persons over 65 years on the other, are decreasing. In the case of young children there has been a persistent decrease in the numbers employed during the past half-century, which may be attributed largely to the operation of the Factory Acts and of the Education Acts, which have limited the age of

employment of young children, and have raised the age of compulsory school-attendance. The percentage of boys between the ages (10-15) in employment decreased from 36.6 in 1851 to 21.9 in 1901, and in the case of girls from 19.9 to 12.0.

Principal Occupations.—The remarkable changes which have taken place in the occupations of the people since 1851 can be seen from the following table showing for the United Kingdom the numbers occupied in the principal occupations:—

	1851.	1901.
Building	508,634	1,124,387
Mining and quarrying.....	372,481	906,541
Metal, engineering and shipbuilding	504,668	1,438,835
Textile	1,671,681	1,301,685
Tailoring, boot and shoe	504,072	599,409
Female domestic service	1,093,870	1,641,154
Agriculture	3,347,998	2,053,993

It will be seen that the building, mining, and engineering trades show a marked increase, while agriculture exhibits an equally marked decline. But concurrently with the decline in agricultural labour there has been a rise in agricultural wages. For example, the average rate of weekly wages on 69 farms in 1907 was 14s. 6d., as compared with 9s. 3½d. in 1850.

Wages and Prices.—Turning to general wages and prices, the following interesting figures may be given, showing the course of wages since 1850, together with the average wholesale prices of a large number of the principal articles in daily use. The number 100, representing the values in 1850, is taken as the standard:—

	Wages.	Prices.
1850	100.0	100.0
1860	119.2	128.6
1870	134.1	124.7
1880	148.8	114.3
1890	161.3	93.5
1900	178.7	97.4
1905	173.3	93.5
1906	175.7	100.0
1907	181.7	103.9

The net result of the successive changes in the rate of general wages is an apparent increase of over 80 per cent. in the average rate between 1850 and 1907. But the comparison of single years cannot properly be pressed to support this inference. Comparison can only be drawn between averages calculated over a course of years, and on this basis it appears that the average rate of wages in 1900-7 was to the average rate in 1860-7 as 140 to 100; in other words, wages have risen in the 40 years by approximately 40 per cent. Similarly, a comparison of the average of prices in the two periods 1850-60 and 1897-1907 shows that the general level of prices was about 24 per cent. lower in the latter than in the earlier period. The two sets of figures afford a rough indication of the fact that while the bare rate of money wages has increased, the real increase is materially greater when the purchasing power of money, as measured by the average price, is taken into account. The prices do not fully represent the changes in the cost of living, since they do not include the item of rent. Rents have probably, on an average, risen since 1850, but there are no

reliable data for ascertaining the extent of the increase.

Unemployment.—In the absence of precise information as to the actual amount of unemployment now and fifty years ago, recourse can only be made to the statistics compiled from returns made by a number of trade unions representing a variety of industries. Since 1860 it appears there have been altogether seven periods of depression, the culminating points in which may be taken as falling in the years 1862, 1868, 1879, 1886, 1893-4, 1904, and 1908. The periods in which employment was comparatively good for several years together were 1870-6 and 1895-1902.

With regard to recent years, the unemployment statistics which have been obtained from the distress committees may be considered as complementary to the trade union figures. The average number of unemployed persons who applied to the committees in Great Britain in the three years 1906-8 was 106,924, representing 1.4 per cent. of the occupied population. In England and Wales the numbers of applicants in the three years 1905-6, 1906-7 and 1907-8 were 110,835, 87,001, and 90,057 respectively, while included in the figures for the last two years are 25,104 and 30,257 applicants who renewed their applications in successive years, representing 28.9 per cent. and 33.6 per cent. respectively. As to the work done by labour exchanges, it appears that in 1907-8 the London labour exchanges received and registered 116,034 persons, and found permanent or temporary employment with private employers for 22,096 of these.

IV.—THE POOR LAW AND PAUPERISM.

Volume of Pauperism.—It appears that 2,076,326 persons, exclusive of lunatics in asylums and casual or vagrant poor, received poor relief in the United Kingdom in the course of a year (1906-7), representing 47.1 per 1,000 of the population. But of this total no less than 918,010, or 44.2 per cent., represented what were in fact permanent paupers, i.e., persons who had been chargeable for periods amounting in the year to six months or over. In relation to the population, this figure represented a rate of 20.8 per 1,000.

Course of Pauperism.—Statistics as to the number of paupers relieved during certain periods have only been collected at rare intervals, and for the purpose of a comparison over a series of years it is necessary to take the figures of average daily pauperism. Taking the figures for England and Wales, the ratio of the average number of persons in receipt of poor relief, exclusive of the special classes above referred to, was approximately 56.5 in every 1,000 of the population in 1850, while in 1908 the ratio was only 22.1 per 1,000 of the population. The average number of poor relieved in 1850 was approximately 992,000, and in 1908, 772,000. In London the average daily number receiving poor relief in 1850 is estimated to have been approximately 105,000, or 45.9 in every 1,000 of the population; in 1908 the average was 116,000, an actually higher number, but, owing to the growth of population, equivalent to only 24.4 per 1,000.

Methods of Relief.—Considering the changes in the methods of relief, it appears that in England and Wales, as a whole, indoor relief—a term which embraces relief in all institutions except lunatic asylums—has since 1850 grown with the growth of population from 6.5 to 6.8 per 1,000,

while the number of outdoor paupers, in relation to population, has decreased by nearly 70 per cent.—from 50.0 to 15.3 per 1,000. In London, indoor paupers have increased from 10.5 to 14.7 per 1,000 of the population, while the outdoor poor have decreased from 35.4 to 9.7 per 1,000.

Components of Pauperism.—Comparison of the components of pauperism on 1st January, 1908, and sixty years previously (1849) gives the following interesting results per 1,000 of population:—

	1849.	1908.
Insane and idiot poor	0.9	3.2
Sane poor:—		
(i) Aged and infirm adults	22.7	12.7
(ii) Adults ordinarily able-bodied	13.5	3.5
(iii) Children	25.7	6.7
(iv) Casual or vagrant poor	0.5	0.5
TOTAL (all classes)	63.3	26.6

Apart from the two special classes of insane and casual poor, it is apparent that every class of pauper in proportion to population has declined; the decrease being about 74 per cent. in the case of children and able-bodied adults, and 44 per cent. in the case of the aged and infirm. At the present time rather more than 85 per cent. of the aggregate pauperism in England and Wales consists of children or of adults who receive public assistance on account of physical or mental disability.

Children under the Poor Law.—Of the 234,792 children who were being dealt with on the 1st January, 1908, 70,991 were under the direct care of the guardians, and of these the majority were being maintained in special institutions or being boarded out with foster parents. Practically no children now receive their education in workhouses, except infants under three years of age, and special classes of children who, from infirmity or other causes, cannot be dealt with otherwise.

Cost of Poor Law Relief.—A comparison of the cost of relief in England and Wales in relation to rateable value and population shows that the burden of poor relief measured by the value of property liable to local rates was actually lower in 1900-7 than in 1850-9, while measured by population the cost is now nearly one-third higher than it was at the beginning of the period. The changes since 1850 may be seen from the following figures:—

	Per £ of Valuation.	Per head of Population.
	s. d.	s. d.
1850-9	1 6 $\frac{3}{4}$	5 11
1870-9	1 3 $\frac{3}{4}$	6 5 $\frac{1}{2}$
1890-9	1 2	6 3 $\frac{1}{4}$
1900-7	1 4	7 9

Between 1849 and 1906 the cost of relief increased 51 per cent., while rateable value and population increased only 28 and 15 per cent. respectively.

Cost per Pauper.—The average annual cost of an indoor pauper in 1906-7 was about £29 5s. and of an outdoor pauper £7 1s., while in 1856-7 the rates are estimated to have been £16 12s. and £4 13s. respectively. It would appear that the changed character of the recipients of relief goes far to explain the increased cost of indoor relief. The sick and infirm need more elaborate treatment than do the able-bodied poor, and the relative increase of this class of poor has been

accompanied by provision for their accommodation in special wards or institutions on the lines demanded by the developments of medical and surgical practice. The special accommodation for children in separate institutions has also involved additional expenditure. Outdoor relief is now very largely limited to the class of aged and infirm who are permanently or quasi-permanently disabled, and it has thus become possible to grant relief on a scale more nearly adequate than formerly.

V.—LOCAL GOVERNMENT AND LOCAL TAXATION.

Local Rates.—The following is a brief summary since 1850 :—

	Rates raised. £	Per £ of Valuation.		Per head of Population.	
		£	s. d.	£	s. d.
1850-1	9,916,000	2	11	0	11
1867-8	16,503,000	3	3½	0	15
1874-5	19,199,000	3	3½	0	16
1889-90	27,713,000	3	8½	0	19
1905-6	58,256,000	6	1½	1	14

It will be seen that during the period of 22 years, from 1867-8 to 1889-90, the amount of rates increased by only 5d. per pound of valuation and by 4s. 3d. per head of population; whereas during the period from 1889-90 to 1905-6 (16 years only) the increase amounted to 2s. 5d. per pound and to 14s. 7d. per head. The period under review, however, was one in which many important legislative measures were enacted. In the earlier years public health administration was developed and consolidated, and elementary education became a charge upon the local rates, whilst the period since 1888 is distinguished by the passing of the Local Government Act, 1888, involving the creation of county councils and other administrative and financial changes; by the creation of parish councils and parish meetings under the Local Government Act, 1894, and by a further development in the charge imposed upon local rates in respect of elementary education, and, finally, by a marked expansion of municipal trading.

Classification of Rates.—A complete classification of local rates, according to the various purposes for which they have been raised, is not possible for the whole period, but particulars may be given for the year 1905-6, and also as to the increase compared with 1874-5 :—

Rates raised for purposes of :—	1905-6 Increase £ millions. £ millions.	
	millions.	millions.
Poor law authorities :—		
Relief of the poor	10½	3½
Other purposes	2½	1½
County and municipal authorities	11½	7½
Sanitary authorities :—		
London and urban districts	20½	15½
Rural districts	3½	1½
Elementary education authorities	9½	9½
TOTAL	58½	39

Thus the greater part of the increase is due to the increased expenditure of sanitary or public health authorities in urban districts; and to elementary education in the first place, and to the increased cost of county and municipal government in the second.

Exchequer Grants.—Rates, however, form only about one-half of the revenue of local authorities. The other half is derived from Imperial Exchequer grants and the revenue from municipal undertakings and other sources of income. The relief afforded by grants has increased to a marked extent in recent years. In 1867-8 only 2¼d. per £ of rateable value was received by the ratepayer from Imperial grants; in 1887-8 the relief represented 6¾d., but in 1905-6 the amount had risen to 12. 11½d., of which 12s. 2½d. was for education.

Local Debt.—In 1874-5 the amount of local debt was nearly 93 millions, representing 16s. 1d. per pound of rateable value, or £3 18s. 3d. per head of population, while in 1905-6 the amount had increased to 483 millions, representing £2 7s. 7d. per pound of rateable value, or £14 2s. 10d. per head of population. The distribution of the debt in 1905-6 can be seen from the following figures :—

	Debt £ millions.		Per £ of Valuation.	
	£	s. d.	£	s. d.
Trading undertakings	255½	1	5	2
Public health	136½	0	13	5
Education	41¾	0	4	1
Poor relief	13¼	0	1	4
Lunatic asylums	11	0	1	1
Miscellaneous	25½	0	2	6
TOTAL	483	2	7	7

By far the larger part of the increase in local debt is attributable to education, trading undertakings, and public health. It may be pointed out as regards the trading undertakings that probably the bulk of the capital debt belongs to undertakings producing a revenue which covers the cost of working and permits of a substantial contribution towards the redemption of the capital debt without recourse to the aid of local rates. Further, the capital value of the undertakings and other properties purchased by local authorities, the total of which has not been ascertained, must represent in the aggregate a very substantial set-off to the amount of their outstanding debt, and a large proportion of these assets may fairly be described as "realisable," consisting as they do of works of a permanent or remunerative character.

VI.—EDUCATION AND CRIME.

Education.—In 1870, before the Elementary Education Act had come into force, only 19 per cent. of the population between 3 and 15 were attending school, in 1907 the percentage had risen to 64. In 1865, out of every 1,000 men married in England and Wales, 225 could not sign their names, but by 1907 the number had fallen to 14. The improvement in the education of women is equally striking, since in 1865, 312 women in every 1,000 married could not sign the registers, while in 1907 only 17 in 1,000 were unable to do so. Scotland and Ireland show a similar improvement.

Crime.—With the growth of education there has been a diminution in crime. In 1857-61 the proportion to population of persons tried in England and Wales for indictable offences—a term embracing all the more serious crimes—was 266 per 1,000, as compared with 176, the average for 1903-7.

The Export of British Capital.

ONE of the most significant developments in our national finance during the past twenty-five years has been the remarkable increase in the amount of British capital invested in undertakings outside the United Kingdom. The political aspects of this development will probably be investigated and debated very minutely during the ensuing year, and do not require to be dilated upon in this article, which concerns itself solely with the collection of the statistical data relating to the subject. It is impossible to state definitely and without question the precise amount of British capital that is invested in

various parts of the globe, but we are able, by the use of the statistics at our disposal, to afford the political student an approximate idea of its growth during the past quarter of a century. The amount of the capital invested abroad may firstly be partly determined by capitalising the national income from Indian, Colonial, and foreign Government bonds and stocks, municipal stocks, and railway securities. The following table is based upon the return of the Commissioners of Inland Revenue, the final column representing the total income capitalised at 5 per cent. :-

Year.	India Government stocks, loans, and guaranteed railways.	Colonial and foreign Government securities.	Colonial and foreign securities (other than Government) and possessions, "coupons," and railways out of the U.K. other than those in first column.	Total Income.	Capital Value of Income on 5 per cent. basis.
	£	£	£	£	£
1886-87	7,793,097	16,243,321	20,471,584	44,508,002	890,160,040
1887-88	7,972,606	16,757,736	22,248,029	46,978,371	939,567,420
1888-89	8,026,310	17,388,562	24,584,936	49,999,808	999,996,160
1889-90	7,811,310	17,528,582	26,970,320	52,310,212	1,046,204,240
1890-91	8,028,524	16,608,700	30,851,608	55,488,832	1,109,776,640
1891-92	7,784,370	14,949,017	31,995,383	54,728,770	1,094,575,400
1892-93	7,709,642	15,333,817	32,046,043	55,170,502	1,103,410,040
1893-94	7,856,721	15,950,233	31,311,075	55,118,029	1,102,360,590
1894-95	8,021,797	15,927,769	29,556,692	53,506,258	1,070,125,160
1895-96	8,019,720	16,479,933	30,461,426	54,961,079	1,098,021,580
1896-97	8,065,866	16,790,472	31,462,629	56,318,967	1,126,379,340
1897-98	8,168,258	17,205,934	31,265,474	56,639,666	1,134,793,320
1898-99	8,258,820	18,233,429	33,217,654	59,709,903	1,194,198,060
1899-1900	8,281,704	18,394,390	33,590,792	60,266,886	1,205,337,720
1900-01	8,567,639	18,685,410	33,078,476	60,331,525	1,206,630,500
1901-02	8,880,908	19,245,888	34,432,683	62,559,479	1,251,189,580
1902-03	9,048,777	19,935,643	34,844,295	63,828,715	1,276,574,300
1903-04	8,695,929	20,263,072	36,906,305	65,865,306	1,317,306,120
1904-05	8,760,185	20,880,827	36,421,087	66,062,109	1,321,242,180
1905-06	8,862,807	22,069,260	42,967,198	73,899,265	1,477,985,300
1906-07	8,768,237	22,270,846	48,521,033	79,560,116	1,591,202,320

The foregoing figures respecting incomes are not, however, complete, inasmuch as there exists a large amount of income from abroad which in many cases cannot (in the absence of details which the taxpayer alone could furnish) be identified as such in the assessments. The fact that this unidentified income from foreign countries and British Colonies is of some magnitude will be appreciated when it is considered that it includes the profits derived from concerns (other than railways) situate abroad, but having their seat of direction and management in this country—that is, mines, gasworks, waterworks, tramways, breweries, tea and coffee plantations, nitrate grounds, oil-fields, land and financial companies, &c.; also profits from foreign and Colonial branches of banks, insurance companies, and mercantile houses in the United Kingdom; and profits of all kinds arising from business done abroad by manufacturers, merchants, and commission agents resident in the United Kingdom.

Several efforts have been made to arrive at an estimate of the capital which the Commissioners do not earmark as coming from abroad, but the results cannot be regarded as conclusive. One of the most enlightening of these investigations

was contained in a paper read by Mr. George Paish at a meeting of the Statistical Society. He took out the income of 2,172 of the miscellaneous Colonial and foreign companies the capital of which has been supplied by our investors, and arrived at a total of nearly £58,000,000, thus making an approximate grand total income from abroad of £140,000,000, to obtain which we have invested about £2,700,000,000 at 5 2 per cent. The estimate is the best that has yet been made, but it cannot be regarded as final. There are admittedly a great many more than 2,172 miscellaneous companies operating abroad with capital provided by British investors. There are hundreds of private joint-stock syndicates, consisting of seven or more shareholders, operating in foreign countries and deriving substantial incomes the amount of which is not disclosed to the public. There is a large income derived from the shipping industry. Sir Robert Giffen in 1902 estimated this income at £80,000,000. A large income is also derived from the operations abroad of private commission and mercantile houses. On the other hand, many of the loans issued in this country are subscribed by foreigners, and it is a notable fact that many millions of shares in

British-owned companies operating in various parts of the world have, during recent years, passed into the hands of foreigners. Much of the wealth that has been amassed during the past decade in the Argentine has been invested in the securities of the British-owned railways in that Republic, and it is impossible for the statistician to estimate accurately what proportion of the bearer securities of British-owned

foreign companies is held by the British investor and the foreigner.

The distribution of British capital among the various countries shows some interesting changes during the past decade. The following table exhibits in a condensed form the Inland Revenue Commissioners' assessments on the income from Indian, Colonial, and foreign Government securities:—

Year.	Indian.	Colonial.	European.	Asiatic.	African.	American.	Total.
	£	£	£	£	£	£	£
1897-98	3,168,258	10,812,176	1,563,344	728,595	691,360	3,410,459	25,374,192
1898-99	3,258,820	11,079,341	1,078,417	1,003,911	703,621	3,771,139	26,492,249
1899-1900	3,281,704	11,275,965	1,689,560	1,226,803	739,435	3,465,227	26,676,094
1900-01	3,567,639	11,529,608	1,613,042	1,333,100	655,477	3,554,183	27,253,049
1901-02	3,880,908	11,822,716	1,552,083	1,304,208	631,003	3,925,878	28,126,796
1902-03	9,048,777	12,359,514	1,486,173	1,344,585	620,558	4,134,768	28,984,420
1903-04	8,695,929	12,869,426	1,435,232	1,445,560	579,331	3,933,523	28,959,001
1904-05	8,760,185	13,553,540	1,344,476	1,651,687	574,054	3,777,080	29,641,022
1905-06	8,862,807	13,906,601	1,307,106	2,454,268	541,986	3,859,299	30,932,067
1906-07	8,768,237	13,932,722	1,467,855	2,516,593	510,749	3,842,927	31,039,083

It will be seen that whilst there has been a tendency for our investments in European securities to decline there has been a substantial increase in the Colonial section, probably the result of the great development of Canada. Investments in India and America have been almost stationary. Taking India, the Colonies, and Africa as "British possessions" and the remainder as foreign countries, and capitalising the income at 5 per cent., we arrive at the following distribution:—British possessions, £464,234,160; foreign countries, £156,547,500; total, £620,781,660. Of the total investment of British capital abroad, three-fourths is in British possessions and one-fourth in foreign countries. The large amount of British capital sent abroad is, therefore, mainly in connection with the development of Canada, Australia, and our other

possessions; and as the investment of capital in foreign countries has been almost stationary, it is fair to assume that as our Colonies become possessed of capital as a result of their own savings, the total amount of British capital invested outside the United Kingdom is likely either to diminish or to bear a lower rate of interest. The primary object of the investment abroad of British capital is either to obtain a greater rate of interest than can be secured at home, or to obtain greater equilibrium and stability of capital by its geographical distribution over the world's surface.

An examination of the issues of capital during the 72 weeks from 1st July, 1908, to 13th November, 1909, discloses an average public issue during that period of over three millions sterling per week. The figures are as follows:—

Country.	Amount of Capital issued.	Country.	Amount of Capital issued.	Country.	Amount of Capital issued.
	£		£		£
Australasia	13,744,000	Argentina.....	28,875,000	Mexico.....	12,909,000
British E. Africa	20,000	Brazil.....	16,970,000	Netherlands	125,000
British N. Borneo	1,165,000	Chili	4,139,000	Nicaragua	450,000
Canada	45,041,000	China	3,190,000	Norway	526,000
Gold Coast	1,307,000	Cuba	1,150,000	Persia	1,200,000
India	15,416,000	Denmark	1,032,000	Philippines	1,819,000
Jamaica	424,000	Dutch E. W. Indies	654,000	Russia	10,393,000
Malta	125,000	Ecuador	416,000	Sweden	881,000
South Africa	13,853,000	Egypt.....	769,000	Turkey	3,184,000
Southern Nigeria	113,000	Finland.....	2,262,000	United States	21,000,000
Straits Settlements	2,939,000	France	349,000	Unenumerated ...	2,205,000
Unenumerated ...	510,000	Japan.....	7,393,000	Total foreign countries	£121,822,000
	£94,657,000			Grand Total	£216,479,000

Allowance must be made in these figures for the capital which, although offered for issue, was not subscribed, but this amount would be offset by the issues of capital negotiated privately. In drawing inferences from the statistics set out in this article, it should be borne in mind that

the greater part of the capital does not, of course, pass out of this country in specie, but takes the form of manufactured goods, &c.; although it is, unfortunately, not possible to state the proportions of capital exported in specie and in goods.

HERBERT H. BASSETT, F.R.S.

ARRANGED in order that the men who are directing the newspapers of the Imperial Dominions might discuss with their colleagues of the Mother Country subjects of Imperial and newspaper interest, the Imperial Press Conference, which met in London in June of last year, attained a much greater significance from the very first gathering. While dealing with questions of importance only to newspapers, the Conference developed into a striking plea for unity and co-operation in the matter of the defence of the Empire; and the delegates, who came from every part of the King's Dominions, and represented all shades of opinion, combined with the statesmen of Great Britain in an appeal to keep the questions of the Army and the Navy free from all traces of partisanship and to place the safety of the Empire above every other consideration. The Conference presented the delegates with the opportunity of learning at first hand the views of Ministers and leading men in this country on important topics, and nearly every prominent man took part in the discussions, which were made the occasion of many noteworthy utterances.

The delegates numbered close on sixty, representing the most influential journals in Canada, Australia, New Zealand, South Africa, India, and the West Indies. The majority were editors, but among them were a few proprietors and managers. The doyen of the party was Sir Hugh Graham, the proprietor of the *Montreal Star*; and the most noteworthy of his fellow visitors, to mention only a few, were Mr. J. S. Brierley (*Montreal Herald*), Mr. J. A. Macdonald (*Toronto Globe*), the Hon. Surendranath Banerjee (*Calcutta Daily News*), Mr. Stanley Reed (*The Bengalee, Calcutta*), Mr. F. W. Ward (*Sydney Daily Telegraph*), Mr. R. Kyffin-Thomas (*Adelaide Register*), Mr. Philipson Stow (*South African News, Capetown*), Mr. Maitland Park (*Cape Times, Capetown*), and Dr. F. V. Engelenburg (*Die Volkstem, Pretoria*).

The keynote of the proceedings was struck by Lord Rosebery at the first gathering in connection with the Conference—a banquet given in honour of the Oversea Delegates by the Press of the United Kingdom. In offering the visitors a "Welcome Home," Lord Rosebery said the most vital topic which they had to discuss was that of Imperial Defence. Alluding to the condition of things in Europe as peaceful, yet menacing, he said: "All forbodes peace; and yet at the same time, combined with this total absence of all questions of friction, there never was in the history of the world so threatening and so overpowering a preparation for war." Without any tangible reason, they saw the nations preparing new armaments upon the sea, as if for some great Armageddon. "We live," he continued, "in the midst of a silent warfare in which not a drop of blood is shed in anger, but only the last drop is extricated from the living body by the lancets of the European statesmen." When he saw "this bursting out of navies everywhere," he began to feel uneasy as to the outcome, and to wonder where it would stop, or if it was nearly going to bring back Europe into a state of barbarism, or whether it would cause a catastrophe, in which the working men of the world would say, "We will have no more of this madness, this foolery; which is grinding us to powder." We could and would build *Dreadnoughts* as long as we had a shilling to spend on them or a man to put into them, but he was not sure that even

that would be enough, and he thought it might be the duty of the delegates to take back to their own Dominions across the seas this message and this impression, "that some personal duty and responsibility for national defence rests on every man and citizen." "Tell your people," his lordship went on, "the deplorable way in which Europe is lapsing into militarism, and the pressure which is put upon this little island to defend its liberties. But take this message also back with you, that the old country is right at heart; that there is no failing or weakness in her; and that she rejoices in renewing her youth in her giant Dominions beyond the seas."

The high level initiated by Lord Rosebery was continued at the discussions on "The Press and the Empire," to which the chief time of the Conference was devoted. At the first session on this subject, Mr. McKenna, the First Lord of the Admiralty, said the great strategic problem that confronted the country was to keep the highway of the sea open. They at home recognised that in the development of the naval idea in every Dominion, it was essential that the mainspring should come from the Dominion itself. The Home Government would assist in every way in its power, and in the long run every Dominion would come to the same conclusion—that the naval problem of defence was one and the same in the whole world, and that the maintenance of supremacy at sea meant the maintenance of supremacy in all seas alike. Sir Edward Grey, Secretary of State for Foreign Affairs, who followed, defined the foreign policy of Great Britain as being to keep what we have got, to consolidate and develop it, to quarrel as little as possible, and to uphold in the councils of the world, by supremacy, those ideals by which we set store. He endorsed every word that Lord Rosebery had said regarding the gravity of the European situation. They were not in stormy weather in foreign politics at the present moment, he declared, but the excessive expenditure on armaments made the weather sultry. Lord Cromer urged that one of the greatest Imperial problems that had to be faced was the government of the huge Oriental communities under the British Crown. Mr. Balfour, presiding over a further session on the same topic, expressed the belief that serious menace to the position of the Imperial Dominions was quite impossible so long as Great Britain retained maritime supremacy. If the fate of the Empire depended upon fleet superiority, that superiority must, he said, be shown in home waters. The German Ocean, the Channel, possibly the Mediterranean—these, in his opinion, were the theatres on which, if there was to be an Armageddon, it would take place. He expressed his concurrence with the views of Lord Rosebery and Sir Edward Grey as to the gravity of the situation, though he deprecated panic and was confident that the national spirit would be equal to anything it might be called upon to face. Continuing the flow of unanimity, Mr. Haldane, the Secretary of State for War, expressed his entire agreement with everything Mr. Balfour had said. Dealing with the military side of the question, he said it was necessary to have an army of a kind which no other Power required—an army for overseas work. Mr. Haldane put forward the idea of an Imperial military general staff, and suggested that it might carry with it in the end the conception also of an Imperial naval general staff. At another session, Lord

Charles Beresford said the fleet gave no indication whatever of the country's preparations for war. He loathed war, he said, but if we were properly prepared we should have no war. The country's defence should be one that could be instantly turned into an attack. During the discussions, a resolution was moved by a Colonial delegate confirming the urgent necessity of placing the defence of the Empire on the surest foundation, and expressing the view that to that end it was essential that in each of the self-governing Dominions systematic and universal training of the male population should be strenuously advocated. An attempt was made to include Great Britain in the motion, but eventually the whole resolution was withdrawn, and in the end no action in this direction was taken.

A subject of equal importance to the delegates and the journals they represented was that of "Cable News and Inter-Press Communications," which was discussed at some length, and which resulted in valuable concessions being made by the organisations concerned. The Earl of Crewe, Secretary of State for the Colonies, presided over the first session that dealt with the matter, which he described as of supreme importance, because, although there were countless prescriptions for bringing the various parts of the Empire nearer together, easy and cheap communication lay behind them all. What the Empire needed especially, he said, was an increase of intimacy. It was extremely difficult at present for really accurate accounts of what was said and done, either in the home country or overseas, to be reported at once all over the Empire. He assured the Conference that on the question of cable development the attitude of the Imperial Government was thoroughly sympathetic. A resolution was adopted to the effect that the Conference regarded it as of paramount importance that telegraphic facilities with the various parts of the Empire should be cheapened and improved so as to ensure a fuller inter-communication than existed at present. A committee was appointed to study the question of an Imperial news service and to take measures to secure a reduction in the rates of transmission, and that committee adopted a motion urging the desirability of establishing a chain of wireless telegraph stations between all British countries, which they considered necessary both for the cheapening of electric inter-communications and for the safety of the mercantile marine. The chairman, the Hon. Harry Lawson, made the welcome announcement that the Pacific Cable Board had agreed to reduce their charges for Press messages to one half, and that the New Zealand Government would do the same in regard to their terminal charge. He added that he had reason to believe that the Government of the Commonwealth of Australia would follow suit. Mr. Marconi foreshadowed a reduction in the Press rates charged by his company, and a resolution favouring State-owned electric communication was passed. The reduced rates of the Pacific Board and of the Australian Government took effect on August 1 last, as did similar concessions granted by the Eastern Companies between Great Britain and Australasia. By agreement with the British and South African Administrations, the tariff for Press telegrams exchanged between Great Britain and South Africa was also reduced from the same date. The Con-

ference appointed a deputation to interview the Prime Minister on the subject, and, in reply to this, Mr. Asquith declared that towards the reduction of cable rates, and especially of those for Press messages, the attitude of the Government was entirely sympathetic. Their influence would be used towards the reduction of rates, but it must be recognised, he said, that the cable companies had provided a world-wide system of enormous value, and that they were commercial companies. He was glad that the Conference had left the Government an absolutely free hand in regard to methods, because the development of wireless telegraphy was a matter they could not leave out of sight.

Another interesting discussion arose during the consideration of "Literature in its relation to Journalism." Lord Morley gave a scholarly address, declaring that the improvement in journalism had in his time been enormous, and expressing the view that it was continuing. He put a question to the delegates as to whether they considered that the influence of the Press, overseas and at home, was systematically and perseveringly used on behalf of peace among the nations.

The delegates had to undergo a round of brilliant functions during the time that was not occupied with the actual business. Foremost among the series was a garden party given by the Prince of Wales at Marlborough House, at which the visitors were presented to the King. The Government did a considerable share towards their entertainment. In addition to an official banquet, at which Lord Crewe presided, and which the Prime Minister attended, the delegates were taken down to Spithead, where they reviewed the Home and Atlantic Fleets, and were treated to an attack upon the *Dreadnought* by torpedoes and submarines, and to a mimic invasion of Whale Island; while a visit to Aldershot to witness field day operations in which fourteen thousand troops took part followed. Innumerable other banquets, such as a luncheon at the House of Commons—where the Speaker presided over a notable gathering of members of both Houses who had been connected with journalism—and a similar function at the Mansion House, gave the visitors but little time to devote to private engagements.

During the Conference, the guests were taken to a number of the principal provincial centres in England and Scotland, and were shown the main industrial features, and in many cases civic welcomes were accorded the delegates. In every conceivable way the Imperial representatives had brought home to them the varied interests and activity of the Old Country. The Conference not only illustrated to the representatives of the Dominions Beyond the Seas the might of Great Britain in a way that could not previously have been even slightly realised by the visitors, but revealed the necessity, and strengthened the possibility, of complete unity of feeling throughout the Empire. Before the delegates finally departed for their homes, the foundations were laid of an Empire Press Union, with headquarters in London and branch committees in the Overseas Dominions, to secure a permanent oversight of questions affecting cable service and charges to the Press of Great and Greater Britain. It was also decided to hold periodical Press Conferences in different parts of the Empire, and an invitation was received to hold the next gathering in Winnipeg in 1912.

THE Royal Commission on the Poor Laws and Relief of Distress, which was appointed in December, 1905, to inquire (1) into the working of the laws relating to the relief of poor persons in the United Kingdom, and (2) into the various means which have been adopted outside of the Poor Laws for meeting distress arising from want of employment, particularly during the periods of severe industrial depression, issued their report relating to England and Wales in the early part of last year. The volume consists of a report comprising 645 folio pages, which is signed by the chairman, Lord George Hamilton, and thirteen other members of the Commission, and a minority report comprising 518 pages signed by four dissentient members.

MAJORITY REPORT.

Defects of Existing System.—In a review of the existing conditions of Poor Law administration, the Majority enumerate the main defects which their investigations had revealed. They may be briefly summarised as follows:—

- (i.) The inadequacy of existing Poor Law areas to meet the growing needs of administration.
- (ii.) The excessive size of many boards of guardians.
- (iii.) The absence of any general interest in Poor Law work and Poor Law elections.
- (iv.) The lack of intelligent uniformity in the application of principles and in general administration.
- (v.) The want of proper investigation and discrimination in dealing with applicants.
- (vi.) The tendency in many cases to give outdoor relief without plan or purpose.
- (vii.) The unsuitability of the general workhouse as a test or deterrent for the able-bodied; the aggregation in it of all classes without sufficient classification; and the absence of any system of friendly and restorative help.
- (viii.) The lack of co-operation between Poor Law and charity.
- (ix.) The tendency of candidates to make lavish promises of out-relief, and of guardians to favour their constituents in its distribution.
- (x.) General failure to attract capable social workers and leading citizens.
- (xi.) The general rise in expenditure, not always accompanied by an increase of efficiency in administration.
- (xii.) The want of sufficient control and continuity of policy on the part of the central authority.

Scheme of Reform.

PUBLIC ASSISTANCE.

The Commissioners proceed to formulate proposals for reform, and to describe a new system of help which is better expressed by the title of Public Assistance than by that of Poor Law.

NEW LOCAL AUTHORITIES.

Public Assistance Authorities and Committees.—The Majority propose to abolish existing boards of guardians, and to enlarge the area of administration from the union to the county or county borough. A new authority, to be known as the Public Assistance Authority, is to be appointed for central administration and control within the enlarged area, and local committees, to be known as Public Assistance Committees, are to be constituted for dealing with applications for assistance in existing union areas. The Majority consider that the system of direct election for Poor Law purposes has not succeeded in obtaining local authorities who have an adequate or uniform appreciation of the difficulties which beset the administration of the

Poor Laws. They therefore recommend that the Public Assistance Authority should be a Statutory Committee of the county or county borough council. One half of the members of the committee may be appointed from the council, the other half to be appointed from outside, and to consist of persons experienced in local administration of public assistance or other cognate work. Women are to be eligible for appointment. The new authority would set up and supervise Public Assistance Committees, maintain institutions within their area, and generally undertake financial responsibility for public assistance administration. The local committees are to include a certain proportion of persons nominated by urban and rural district councils. As regards London certain modifications are proposed.

Voluntary Aid Councils and Committees.—Working in co-operation with the new authorities, Voluntary Aid Councils and Committees are to be appointed in the area of each Public Assistance Authority to aid persons in distress whose cases do not appear to be suitable for treatment by the Public Assistance Committee.

METHODS OF ASSISTANCE.

Institutional Relief.—The Commission recommend that general workhouses should be abolished, and that indoor relief should be given in separate institutions appropriate to the following classes of applicants: children, aged and infirm, sick, able-bodied men, able-bodied women, vagrants, and the feeble-minded and epileptics. Powers of removal to and detention in institutions should be given to the Public Assistance Authority under proper safeguards. The treatment of inmates should be as far as possible curative and restorative.

Outdoor Relief or Home Assistance.—This should be given only after thorough inquiry, except in cases of sudden and urgent necessity, and it should be adequate to meet the needs of those to whom it is given. There should be systematic co-operation between the Public Assistance Authorities and the recognised Voluntary Aid Committees.

Children.—Effective steps should be taken to secure that the maintenance of children in the workhouse should no longer be recognised as a legitimate way of dealing with them. The Commission strongly advocate the extension of boarding out, and closer supervision of the condition of children in receipt of out-relief.

The Aged.—As regards institutional relief, separate accommodation and treatment should be provided; and as to out-relief, greater care should be taken to ensure adequacy of relief.

Medical Assistance.—A general system of provident dispensaries should be established, of which existing voluntary outdoor medical organisations should be invited to form an integral part.

UNEMPLOYMENT.

A review of existing conditions led the Commissioners to the following conclusions:—

- (i.) We have an increased aggregation of unskilled labour at our great ports and in certain populous districts.
- (ii.) This aggregation of low-grade labour is so much in excess of the normal local needs as to promote and perpetuate under-employment.
- (iii.) This normal condition of under-employment, when aggravated by periodic contraction of trade or

by inevitable changes in methods of production, assumes such dimensions as to require special machinery and organisation for its relief and treatment.

The Majority make the following proposals:—

Labour Exchanges.—A national system of labour exchanges should be established and worked by the Board of Trade for the general purposes of assisting the mobility of labour and of collecting accurate information as to unemployment.

Education.—The education in elementary schools should be made less literary and more practical, and boys should be kept at school until the age of fifteen.

Regularisation of Employment.—Government Departments and local and public authorities should be enjoined to regularise their work as far as possible, and to endeavour to undertake irregular work when the general demand for labour is slack.

Unemployment Insurance.—The establishment of unemployment insurance, especially amongst unskilled and unorganised labour, is of paramount importance in averting distress arising from unemployment, and would justify contributions from public funds to trade and special provident organisations.

Voluntary Aid and Public Assistance.—In addition to preventive measures, separate but closely co-operating organisations must be established to deal with cases not otherwise reached. Voluntary Aid Committees should give advice and aid to the better class of workmen, while the Public Assistance Authority should assist necessitous workmen at the public expense. The following methods of treatment should be available: Home Assistance, Industrial and Agricultural Institutions, Labour Colonies, Detention Colonies, and Emigration.

MINORITY REPORT.

BREAK-UP OF THE POOR LAW.

Transfer of Services to Existing Committees.—The Minority agree with the Majority in recommending the abolition of boards of guardians, and that the county or county borough council should be the unit of administration. They differ in proposing the entire supersession of the destitution authority, and the appropriate distribution of its present functions among four existing committees of the councils:—

The **Education** Committee to become responsible for the entire care of children of school age.

The **Health** Committee to be entrusted with the care of the sick and permanently incapacitated, the infants under school age, and the aged needing institutional care.

The **Asylums** Committee to have charge of the mentally defective of all grades and ages; and the **Pension** Committee to deal with the aged to whom pensions are awarded.

Registrars of Public Assistance.—The Minority think that some systematic co-ordination within each local area of all forms of public assistance, and, if possible, of all assistance dispensed by voluntary agencies, is essential, and they therefore recommend the appointment by the county or county borough council of one or more officers to be designated "Registrars of Public Assistance." The duties of these officers would be to keep a public register of all cases in receipt of

assistance, to recover charges for treatment, and to sanction grants of relief or home aliment. So far as institutional treatment is concerned the several committees would be free to provide the treatment they deemed most appropriate; but where domiciliary treatment appeared desirable and it was proposed to grant home aliment, the committee would be required to submit the case for sanction to the Registrar of Public Assistance, who would be charged to satisfy himself that the circumstances of the family as a whole warranted the grant, and that the amount proposed was neither inadequate nor excessive. The Registrar would also maintain a small receiving house for the strictly temporary reception of cases found in need and not yet dealt with by the committee concerned.

UNEMPLOYMENT.

Ministry of Labour.—To carry out their reforms the Minority propose a Ministry of Labour, consisting of six divisions: National Labour Exchange, Trade Insurance Division, Maintenance and Training Division, Industrial Regulation Division, Emigration and Immigration Division, and the Statistical Division.

National Labour Exchange.—A complete system of public exchanges on a national basis should be organised. It is contemplated thereby that a rapidly increasing number of under-employed men would find themselves employed with practical continuity, but there would remain a surplus of labour without employment at all.

Absorption of Surplus Labour.—To reduce this surplus the Minority recommend (i.) that no child should be employed under the age of fifteen, no young person under eighteen should be employed for more than thirty hours a week, and all young persons so employed should be required to attend for thirty hours a week at suitable trade schools; (ii.) that the hours of labour of railway, tramway, and omnibus workers should be reduced to a maximum of sixty, if not to forty-eight hours a week; and (iii.) that sufficient assistance for the support of their families should be given to wage-earning mothers, thereby removing many women from the labour market.

Regularisation of National Demand for Labour.—The Government should arrange, to the extent of £4,000,000 annually, a Ten Years' Programme of the necessary work required by each Department, and carry it out in slack times by ordinary labour at standard rates.

Trade Union Insurance.—The Minority are unable to recommend the establishment of a plan of compulsory insurance against unemployment, in view of its probable adverse effect on Trade Union membership and organisation. They consider that under their proposals provision of out-of-work benefit would become practicable over a greater range of industry than at present, and to encourage such extension they propose a Government subvention to all Trade Unions and other societies providing unemployed benefits.

Maintenance under Training.—For the ultimate residuum in distress from want of employment the Minority propose Day Training Depôts or Residential Farm Colonies, while Detention Colonies of a reformatory type are suggested for vagrants and the work-shy.

Valuation of London.

THE Valuation (Metropolis) Act, 1869, provided for a valuation of all rateable property in London in the year 1870, to come into force for the collection of rates as from 6 April, 1871, and for a complete re-valuation every five years. In the intermediate years new properties are brought into rating, and increases and decreases in value, owing to improvements, pulling down, &c., are given effect to by means of provisional lists made from time to time. All the alterations in the year are brought together into a supplemental list at the end of the year. The quinquennial list with the addition of the supplemental lists form the valuation list in force for the purposes of totals, and this list with the addition of provisional lists forms the basis for the purpose of collection of the rates. A property may only be brought into a provisional or supplemental list by reason of some cause affecting the value of that property in particular, and not on account of a general rise or fall in value in the locality; this should wait for the quinquennial year.

New lists will be made this year, which will come into force on 6 April, 1911. The magnitude of the task will be realised when it is known that the number of assessments amounts to about 800,000. The lists are made by the Metropolitan Borough Councils and the City Corporation acting as overseers. Forms are sent out to all occupiers in February, and the information thus supplied, together with the lists in force, form the basis upon which the new lists are made. If any property is inserted in the list which was not previously assessed, or if the value of a hereditament is increased, notice is sent to the occupier. Any ratepayer is, however, entitled to inspect the list.

Provision is made in the Act for objections to be heard and the lists to be revised by the Assessment Committee, who are appointed in most cases by the Borough Council, but by the Guardians of the Poor where the Union is comprised in more than one borough area. In the event of the ratepayer not being satisfied with the final decision of the Assessment Committee, he can appeal to special sessions or quarter sessions, but this is a somewhat costly matter, as it necessarily involves the employment of solicitors and counsel.

The County Rates Act, 1852, does not apply to London, but in order to promote uniformity of practice among the various authorities it is the custom of the London County Council to convene a Conference of rating authorities prior to each quinquennial re-valuation. The Conference (the County Council members not voting) passes resolutions, which, although not binding upon the authorities, are generally adhered to. The lists when made form the basis of all rates, as well as of Income Tax (Schedule "A"), Inhabited House Duty and Water Rate. All the rates are levied by the Borough Council, precepts being sent by the other bodies for the amounts which they require.

The valuation lists give the gross value, rateable value, and assessable value of each property. Gross value is defined in the Act as "the annual rent which a tenant might reasonably be expected, taking one year with another, to pay for a hereditament, if the tenant undertook to pay all usual tenant's rates and taxes and tithe commutation rent-charge, if any, and if the landlord undertook to bear the cost of repairs and

insurance and any other expenses, if any, necessary to maintain the hereditament in a state to command such rent." Rateable value is the "gross value after deducting therefrom the probable annual average cost of the repairs, insurance, and other expenses as aforesaid." The assessable value is the rateable value less one-half in the case of agricultural land.

All Crown and Government property is exempt from rates, but the lists include the rateable value upon which the Treasury contribute in lieu of rates. This value, however, is in each case fixed by the Treasury valuer and not by the local authorities. There are also other exemptions, the principal of which are ambassadors' houses, places of public worship, public elementary schools not provided by the County Council, public parks, certain literary and scientific societies, underground sewers, unused land, and buildings in course of erection. Railways, tramways, canals, gas, water, electricity, telephone and hydraulic power undertakings are all included at an estimate of the rent which a hypothetical tenant would pay as rent. This value is arrived at by a complicated process based upon the accounts of the undertaking, and is generally left in the hands of a skilled valuer. With the exceptions given above the lists include all land and buildings in the county. In the table below are given the total values in the county at each quinquennial year from 1871. The increases are due to (1) new buildings, structural improvements, &c., and (2) to a general increase in value apart from rebuilding. The increases due to the supplemental lists may be taken as almost entirely due to new buildings and structural improvements, whilst after allowing for a similar increase in the quinquennial year the remainder of the increase due to the quinquennial list may fairly be ascribed to a rise in value independent of new buildings. In the table below the increase in the quinquennial year due to rebuilding, &c., is taken at the mean of that of the year before and the year after.

RATEABLE VALUE OF THE ADMINISTRATIVE COUNTY OF LONDON.

Year.	Rateable Value.	Increase due to rebuilding and structural improvements.	Increase due to general rise in value.
	£	£	£
1871	19,963,285		
1876	23,240,070	1,697,872	1,578,913
1881	27,629,241	2,686,833	1,702,338
1886	30,716,719	2,402,593	684,885
1891	33,004,612	1,284,662	1,003,231
1896	35,793,672	1,521,899	1,267,161
1901	39,043,628	2,198,931	1,651,015
1906	43,307,496	2,522,244	1,201,634
1909	44,609,935	1,242,439 (3 years.)	700,000 (3 years est.)
		15,557,473	9,789,177

Thus we find, allowing £700,000 for the increase in 1906-9 due to rise in value not yet brought into assessment, that the value of land and buildings in London has increased in the period of thirty-eight years from £19,963,285 to £45,309,935, or by no less than 127 per cent., of which about 77 per cent. is due to new building,

rebuilding, and structural improvements, while 50 per cent. is due to the general rise in values due to the segregation of the population and to the importance of London as the greatest city of the world.

In the total value of forty-five millions are included the following:—

Government property, about ...	£ 800,000
Property occupied by local authorities ...	2,000,000
Railways, tramways, gas, water, electricity and hydraulic undertakings, telephones, canals, docks ...	4,000,000
Hospitals ...	107,000
Public houses and beer houses ...	1,450,000
Hotels and restaurants ...	570,000

Theatres and music halls ... 188,000
Agricultural land ... 15,144

The increase in value mentioned above is, as may be supposed, not spread equally over the whole county. It is not possible to compare the value of each Metropolitan Borough in 1871 with that at the present day, as the Boroughs were only constituted under the London Government Act, 1899. In the following table, however, are given the value of each Metropolitan Borough area in 1901, the first quinquennial year after the formation of these areas, the value in 1906, with the increase due to each of the two causes before referred to, and the value in 1909.

RATEABLE VALUE OF THE CITY AND EACH METROPOLITAN BOROUGH IN 1901, 1906, AND 1909.

	Rateable Value.		Increase 1906 over 1901.		Rateable Value 1909.
	1901.	1906.	Due to new buildings, etc.	Due to rise in values.	
City of London	£ 4,877,874	£ 5,310,462	£ 298,679	£ 193,909	£ 5,451,836
Battersea	966,872	1,056,286	45,077	14,337	1,066,230

SAVINGS BANKS AND FRIENDLY SOCIETIES.

Savings Banks.—It appears that in the United Kingdom the deposits per head of population are now five times as much as they were in 1850. The figures may be set out in detail:—

	Deposits £ millions.	Per head of Population. s. d.
1850	29	1 1 0
1870	53	1 13 11
1890	117½	3 2 7
1907	232½	5 5 6

Friendly Societies.—At the same time the accumulated funds of friendly societies and trade unions show remarkable increases in recent years. In 1877 the funds of all friendly societies amounted to over 14 millions, in 1905 they had increased to over 52 millions. The funds held by the three most important groups of societies were:—

	1877.	1905.
Ordinary Friendly Societies	5,211,052	18,056,640
Branches of Registered Orders	7,752,050	23,888,491
Collecting Friendly Societies	1,172,363	8,459,767

THE Children Act 1908 has been aptly styled "The Children's Charter," and the appropriateness of this title will be readily realised when it is stated that the Act affects and consolidates the law relating to children from practically all points except those of education and the poor law. No fewer than 21 existing Acts and large portions of 17 others are repealed, the main provisions being re-enacted, but in an improved and strengthened form. The reception of the Bill by all parties in Parliament was most gratifying in these days of strong party politics, and showed that a measure of this character was urgently needed.

The Act is divided into six parts, dealing with the subjects mentioned below. The major part of the Act came into operation on 1st April, 1909, but the part relating to "places of detention" and special courts for children is operative generally from 1st January, 1910 only:—

- Part I.—Infant life protection.
- „ II.—Prevention of cruelty to children and young persons.
- „ III.—Juvenile smoking.
- „ IV.—Reformatory and industrial schools.
- „ V.—Juvenile offenders.
- „ VI.—Miscellaneous and general.

PART I.—INFANT LIFE PROTECTION.

Any person who undertakes for reward the nursing and maintenance of one or more children under the age of 7 years, apart from their parents, must, within forty-eight hours of the reception of the child, give notice thereof to the local authority. The local authority may fix the number of infants under 7 years of age which may be kept in any house in respect of which notice is required. Notice must also be given if the person moves, or if the child dies, or is removed to another address. In the event of the death of the infant the person having its custody must give notice to the coroner within twenty-four hours, and an inquest must be held unless a duly qualified medical practitioner certifies the cause of death, and that he has attended the child during its last illness, and the coroner is satisfied that no inquest is necessary.

The local authority has to appoint inspectors to make enquiries as to whether there are any persons in their district receiving children, and also infant protection visitors, whose duty it is to visit the premises where infants are kept, and to satisfy themselves as to the proper nursing and maintenance of the infants, and to give advice and directions where necessary. The authority may avail itself of the service of philanthropic societies or other agencies in connection with the duties of inspection.

Certain persons are precluded from taking the charge of such infants except with the written sanction of the local authority, viz.:—

(a) Any person from whose care any infant has been removed under this Act or the Infant Life Protection Act of 1897.

(b) In any premises from which an infant has been removed under these Acts by reason of the premises being dangerous or insanitary.

(c) By any person convicted of an offence under the second part of this Act or the Cruelty to Children Act 1904.

In the event of any infant being kept contrary to this part of the Act, or in overcrowded, dangerous or insanitary premises, or by any person unfit to have care of it by reason of negligence,

ignorance, inebriety, immorality, criminal conduct, or similar cause, the visitors or constables are empowered with an order from the justices or local authority to remove the infant to a place of safety until it can be restored to its relatives or otherwise lawfully disposed of.

The person having charge of an infant in respect of which notice is required is deemed to have no interest in the child's life for the purpose of the Life Insurance Act, 1774, and if he attempts to insure the life of such infant, or if a company or person knowingly issues or attempts to procure the issue of such a policy, they are guilty of an offence under the Act.

This part of the Act does not apply to any relatives or legal guardians of the child or to any hospital or other institution conducted in good faith. The term relatives means grandparent, brother, sister, uncle or aunt by consanguinity or affinity, and in the case of illegitimate children such persons as would be so related if the child were legitimate.

Persons guilty of offences under this part of the Act are subject on summary conviction to imprisonment for a term not exceeding six months or to a fine not exceeding £25, and also, where proper notice was not given, to forfeiture of any lump sum received, the latter to be applied for the benefit of the child under the direction of the Court.

The local authorities for this part of the Act are the City of London Corporation, the London County Council, and outside the Metropolis the Poor Law Guardians.

PART II.—PREVENTION OF CRUELTY TO CHILDREN AND YOUNG PERSONS.

This part of the Act relates to offences against children under 14 years of age and young persons between 14 and 16. The local authorities for administering this part of the Act are the Poor Law Guardians, and in London the City Corporation and the County Council are given concurrent powers.

The Act provides for a penalty of £100, or six months' imprisonment, with or without hard labour, in the case of any person over 16 years of age who has the custody, charge or care of a child or young person and wilfully assaults, ill-treats, neglects, abandons, or exposes such person or causes such person to be so treated in a manner likely to cause unnecessary suffering or injury to health. If the person convicted is interested in an insurance policy on the life of the child or young person the penalty may be increased to £200 or five years' penal servitude. Other offences provided for are using the child or young person for purposes of begging, and causing or encouraging the seduction or prostitution of girls under 16 years of age.

There are also some new provisions of a very important character. To meet the increasing evil of deaths of infants from overlying, Section 13 provides for the punishment of any person over 16 years of age in the event of the death from suffocation of an infant under the age of 3 years while in bed with such person, and such person went to bed under the influence of drink. Section 15 provides for a penalty of £10 in the event of the death or serious injury of a child under 7 years of age left in a room with an open fire grate and without reasonable precaution to prevent the child being burnt or scalded. It is also declared an offence to allow a child or young person in a brothel. Provision is made for the

care of any children in the custody of a person convicted, and for the detention in a retreat of habitual drunkards convicted of an offence under this part of the Act, and the Home Secretary is given power to cause the inspection of any charitable institute for the reception of children or young persons.

PART III.—JUVENILE SMOKING.

The provisions of this part of the Act attracted a disproportionate amount of attention when the Bill was in Parliament. The Royal Commission on Physical Training, and the Departmental Committee on Physical Deterioration, reported very strongly upon the evils of smoking at an immature age, and the provisions of the Act cannot be considered as too drastic. They have undoubtedly had the effect of materially reducing the amount of juvenile smoking.

Persons selling cigarettes or cigarette papers to children apparently under 16 years of age are subject to a fine not exceeding £2 for the first offence, £5 for the second offence, and £10 for any subsequent offence. The provision also applies to the sale of tobacco in any other form, if the person selling it has any cause to believe that the child is buying it for his own use. Constables and park keepers are directed to take any cigarettes or cigarette papers from any person apparently under 16 whom they find smoking in a public place, and have power to search boys found smoking, but not girls.

PART IV.—REFORMATORY AND INDUSTRIAL SCHOOLS.

Any person is empowered to bring a child apparently under 14 years of age before a magistrate and get him or her sent to an industrial school if the child is found begging, wandering, destitute, or under the care of a guardian or parent who, by reason of criminal or drunken habits, is unfit to have the care of the child, or if the child frequents the company of reputed thieves or prostitutes, or lives in a house used for the purposes of prostitution, or if a girl, legitimate or illegitimate, and the father has been convicted under the Criminal Law Amendment Act, 1925, of an offence in respect of any of his daughters.

A parent who is unable to control his child may himself take advantage of the Act.

A child apparently under 12, and in some cases between 12 and 13, charged with an offence punishable in the case of an adult by imprisonment, may be sent to an industrial school; and if between the ages of 12 and 16 to a reformatory school. In any case, where the child is liable to be sent to an industrial school, the Court may commit him to the care of relatives or other fit persons, with or without the supervision of a probation officer.

PART V.—JUVENILE OFFENDERS.

The Act provides that no person under 16 years of age shall be sentenced to death, but in lieu thereof shall be liable to be detained during His Majesty's pleasure. From January 1, 1920, no child under 14 is to be sentenced to imprisonment or penal servitude, and no young person under 16 is to be sentenced to penal servitude or to imprisonment in default of paying a fine or costs unless the Court consider that he is so unruly a character or so depraved, that it is undesirable to send him to a "place of detention" provided under the Act.

Special "places of detention" are to be pro-

vided for children awaiting trial or after remand or committal for trial, and they may be kept here instead of being lodged in gaol if committed to terms of imprisonment of less than one month.

Another important provision coming into force on the first day of 1920 is that of Juvenile Courts. Persons under 16 years of age must be tried at these Courts, unless charged jointly with adult offenders. The Court must sit "either in a different building or room from that in which the ordinary sittings of the Court are held, or on different days and at different times from those at which the ordinary sittings are held." Except with the special leave of the magistrate, only those directly interested in the cases, the Court officials, and press representatives, may be admitted, and every effort is to be made both before and after trial to prevent the association of children with adult criminals. Parents and guardians will be compelled to attend the hearing of charges against their children, and may be ordered to pay any penalty, charges, or costs imposed.

The London County Council are taking three remand homes from the Asylums Board, and these will be adapted for use as "places of detention" and Juvenile Courts.

PART VI.—MISCELLANEOUS AND GENERAL.

The most discussed provision in this part of the Act is that which enacts that a publican shall not allow, and no person shall cause a child under 14 years of age to enter the bar of a public house during the time the house is open for business. Bar means any open drinking bar or part of the premises exclusively or mainly used for the sale and consumption of intoxicating liquor.

This enactment has not been an unqualified success. It is a laudable attempt to keep young children from the contamination of the public house and from that familiarity with drink which, contrary to the adage, unfortunately kills rather than breeds contempt for the evils of intoxicating liquor. There have no doubt been many cases of persons with children under careful control debarred from getting legitimate refreshment at country inns, and on the other hand, the sight is common in the cities of children left on the doorstep of public houses, while the parents are inside drinking.

Other sections of this part of the Act provide for the exclusion of the public from court while children and young persons give evidence in certain cases; children, except babies in arms and witnesses, are to be excluded from court during the trial of other persons; dealers in old metal and marine store dealers are not to purchase from persons apparently under 16, nor pawnbrokers to receive goods from persons under 14 years of age; vagrants may be fined for allowing a child of school age to wander about with them; no child under five years of age is to be given intoxicating liquor except under doctor's orders, or in case of sickness or approved sickness or other urgent cause; sufficient adult attendants must be provided at all children's entertainments; medical officers of education authorities are to ensure cleansing of verminous children in schools, and to cause neglectful parents to be brought before a magistrate. Heavy penalties are provided for infringements of the provisions of these enactments.

General.—As compared with some other countries, it is to be regretted that the great drawback to educational progress in this country is the lack of public interest, due in a great degree to a distrust of the sciences as compared with the qualities of action and common sense. But slowly and surely the solid foundation of a national system of education is being laid. Two tendencies are at variance, one directed towards an increase of State authority, the other towards the preservation of the autonomy and variety of type of individual schools and the liberty of individual action in school administration, teaching and inspection.

Secondary Schools.—New secondary schools for boys and for girls, as well as "co-educational" schools, are rising all over the country, but it is considered by experts that there should be as little attempt as possible to force all the secondary schools into one groove, and that much encouragement should be given to variety of curriculum and experiment.

The recent statistics relating to secondary schools showed that in the State-aided schools of England there are 68,000 boys and 56,000 girls, and in fifty "efficient" schools, but not in receipt of Government grants, there are about 3,500 boys and 5,000 girls. Roughly, in the case of boys, there are about 72,000 in addition to about 30,000 in the public schools, say, over 100,000, who are receiving a nominal secondary education. This number is not a large percentage if we reckon a possible 2,000,000 boys in England between the ages of thirteen and eighteen. The total number of secondary schools receiving grants is 736, of which 320 are boys' schools, 239 are girls' schools, and 177 "mixed" schools. There are about 48,000 boys between the ages of twelve and sixteen, as against 37,000 girls. Of boys over the ages of sixteen there are only 4,820 as compared with 7,605 girls, as the latter generally pass through the secondary schools before becoming women teachers in the elementary schools—on this point it has been observed that the secondary schools should not become entirely seminaries for intending teachers.

The figures relating to the staffs of State-aided secondary boys' schools show that only four teachers have been trained in secondary teaching. To open higher education to promising children of the industrial classes, the Board, with a tendency towards centralisation, has enacted that in grant-earning schools 25 per cent. of the places, i.e., entries, must be available without payment. It is supposed that according to the official interpretation considerably over this number will enter the school without payment, and it is a moot point whether an undue strain will be placed on the school finances, and injuriously affect its general tone. It is desirable for the "free-placers" themselves to come into contact with more intellectual and moral surroundings, and it is considered that this may be done with mutual advantage so long as they form only a fourth of the school numbers.

Inspection.—The regulations for secondary schools for 1908-9 showed a tendency on the part of the Board of Education towards centralisation, and under the Charitable Trusts Act of 1853 they claimed the power of inspecting non-local schools which were outside any system of co-ordinated education. The Board's administration has, however, within certain limits, encouraged freedom of action in schools under

their jurisdiction, but the problem of the future will be how to make the best for the country out of the present heterogeneous machinery.

With regard to the public schools, there has been in recent years a growing fear of bureaucratic control, which it is considered would materially alter the tone of individual schools, as has already been done in France and Germany. It is hoped, however, that in the future plan of co-ordination of education, some system may be devised, not too systematic, but one which would help and preserve the freedom, variety, and elasticity of public schools, and would combine their aims and ideals.

With reference to the inspection by the Board of Education of schools represented at the Headmasters' Conference, it appeared that, out of 105 schools, 50 had already been inspected and 17 had received notice of inspection, but some of the 17 are already included in the 50. Eight schools of the 50 had invited inspection.

Curriculum.—Next to nothing appears to have been done in the past year to change the unscientific arrangement of subjects which is forced upon the preparatory schools of the country so as to enable them to compete at the entrance examinations of the great schools. To attain simplification it will be desirable for the State or, preferably, by reform from within, to compile a graded curriculum which will, in a great degree, alleviate the danger of cramming so prevalent in our preparatory schools. At the annual meeting of the Headmasters' Conference held at the end of 1908 the following important resolution was carried:—"That in the opinion of the Conference the average boy cannot undertake the study of more than two languages besides English before attaining the age of 13 years without detriment to his general education"; and the headmaster of Eton proposed: "That a committee be appointed to confer with preparatory schoolmasters as to a scheme of studies for schoolboys from the age of 9 till about 16 and to draw up a report on the subject," which was put to the meeting and carried with one dissentient. It is understood that, after conferences with different preparatory schoolmasters, a scheme will very shortly be drawn up which, it is hoped, will prove acceptable to the authorities in both classes of schools. During the period at the preparatory school the study of English should prove an integral part of the training, and further, the examinations for entrance into the public schools should consist mainly of English subjects. It is a matter for regret that the study of our language and literature has hitherto been so much neglected, and the difficulty experienced by the average boy in writing intelligently in his mother tongue is to be accounted for by this neglect.

Science.—With regard to the teaching of science in public schools, Mr. Latter, science master at Charterhouse, reported that of the seventy-one schools to which he sent a circular of questions, he received replies from forty-six schools, which showed that just over 61 per cent. of the boys are receiving instruction in science as part of the school course, and it is pointed out that the remaining 39 per cent. have received, or will receive, a similar training. It is, of course, possible that certain boys in the lowest forms may not reach the middle forms, but these are necessarily a negligible quantity, and it is hardly possible under existing circumstances for many boys to escape some period of science

training. So it would not be far from the truth to take 50 per cent. as the proportion of those who take a longer or shorter course in science at some period of their school career.

Scholarships and their Value.—Several discussions have taken place during the year, both at the Universities and the schools, with regard to the distribution of the emolument of scholarships. A few schools have a custom of sending out to parents of scholars-elect a memorandum reminding them that there were some parents to whom the emoluments were not essential, while the parents of other scholars were poor and would have to economise in order to enable their sons to go to the school, also informing them that there was a fund for the benefit of poor scholars, and suggesting that the rich parents should surrender wholly or partially the monetary value of their son's scholarship in favour of the poor scholar. It is understood that this subject is under consideration, and that the feeling of some of the important schools is being taken in the matter with a view to a possible remedy.

Teachers' Register.—The need of a teachers' register has continued to be one of the vexed questions of the year and has been debated since the Board of Education Act of 1899. The original arrangement in two columns proved unacceptable to elementary teachers, so clauses were introduced into the Education Bills of 1906 and 1907, "making it no longer necessary that there should be any official teachers' registry at all." However, an amendment was accepted, the Board of Education undertaking to co-operate with the teachers' representatives to promote a scheme of efficient registration. This new arrangement met with little success, as the Board of Education appeared to wish to destroy all schemes for registration and insisted on the different kinds of teachers, e.g., shorthand teachers, teachers of gymnastics, dancing, deportment, &c., being represented on the Council: at this *impasse* the matter stands to-day. It is hoped, however, that during the coming autumn (1909) the Board will again meet the representatives, and that a permanent teachers' register will be established on the lines indicated by the Board.

Tenure and Position of Masters.—The first step in obtaining security of tenure for assistant masters in endowed schools was taken after the judgment in the Richmond case, when the Endowed Schools (Masters) Act of 1905 was passed. The main provisions of this Act were that in endowed schools, masters shall be deemed in the employment of the governing body of the school; and, subject to any special provisions or agreement, the dismissal of a master in such schools shall not take effect except at the end of a school term, and after at least two months' notice of dismissal has been given to him on behalf of the governors of the school.

The application of the Act is limited to masters in endowed schools, so that teachers in private and municipal schools are not affected by its privileges.

The amelioration of the general position of the assistant master is quite the most urgent of reforms, and it is the State alone which can apply the remedy. In a recent work on secondary education, "Higher Education of Boys in England" (Norwood and Hope), the position has been aptly summarised. "It is practicable to make education a reality in England

by emancipating the masters, in whose hands it lies, from the penury, insecurity and inefficiency which are still rather the rule than the exception. If the country is really interested in the training of its boys, it will realise that their masters must be experts and enthusiasts, with a proper professional status and with a career of public service guaranteed and rewarded by the only agency that can give adequate expression to public needs, and bring system into public enterprise."

School Cadet Corps and Rifle Clubs.—The school cadet corps have changed their position and have become units of the Officers' Training Corps which are an integral part of Mr. Haldane's scheme of National Defence, and on this subject it has been arranged that the War Office authorities shall communicate directly with the headmasters. The military authorities will no longer be satisfied with a specified number of drills and an eight at Bisley; the cadets are expected to obtain Certificate "A" before they enter the senior division at the University, and qualify for the holding of Certificate "B," the latter representing 200 marks to a candidate for Sandhurst or Woolwich. The examination for Certificate "A" demands a fairly high standard of efficiency in such subjects as leading a section, commanding and directing a company, an elementary knowledge of musketry and drill, attack, defence, outpost work and guard duty, also at least one attendance in camp.

Emigration of Secondary School Boys.—A league has recently been formed to assist public school boys and others to emigrate to the Overseas Dominions. The scheme consists of a strong committee in London and local advisory committees in different towns in the colonies, the latter acting as intermediaries between the public schools in this country and the colonists under whose care the boys will be placed, in order that the practical experience necessary for their future careers may be gained. With regard to agriculture, it is arranged that the boy should work for the first year on the farm, receiving pay, board and residence from the farmer. The second year is passed at one of the provincial agricultural colleges, which are State institutions, and where the fees are in all cases quite nominal, so that the expense to the student resolves itself mainly into the cost of living during the year, which cost should not exceed £12 a week. In the third year, if a young man has profited by his two years' experience, he should be in a position to make a start on his own account with a modest capital, and with reasonable prospect of success. Again, to those proposing to enter one of the professions, the Universities in the colonies, notably McGill and Toronto in Canada, offer every advantage at a cost of about one-third of the sum which is incurred at Oxford and Cambridge. The professions offering most scope are those which have a practical bearing on the opening up of the country and the development of its resources, e.g., civil, mechanical and electrical engineering, mining, metallurgy, &c. In South Africa, Rhodesia, Australia, and the West Indies, land settlement schemes have also recently been started. Only those boys will be selected whose character and school record give reason to believe that they are the kind of material out of which good colonists can be made.

W. A. EVANS.

The Opening up of the Southern Congo.

History.—The geographical position of Katanga precluded any immediate effective occupation by the Government of the Congo State which had been created by the International Conference held in Berlin in 1885. Owing, however, to an armed prospecting expedition in Uganda, which the British Government prevented from setting out, and the attempt in 1890 by an emissary of Mr. Rhodes to conclude a treaty with Msidi, the Congo Government realised that it would be wise to make its occupation of the Southern Congo effective without delay. An International Company, called the Katanga Company, was to this end formed in Brussels, and an expedition commanded by one of Stanley's lieutenants set out from Zanzibar and reached Msidi's capital the same year. Msidi had no wish to conclude treaties with European Powers, and after a long period of futile negotiations which nearly resulted in a fight, Msidi was shot by one of the officers who had visited the town, leaving his escort outside. One of Msidi's sons, Mwenda, was appointed paramount chief, and the expedition having been relieved from the North withdrew to the coast, leaving the Katanga Company in effective occupation of Katanga. The *Comité Spécial* of Katanga—the successors of the Katanga Company whose original Concession they administer—in 1900 handed to the Tanganyika Concessions (Ltd.) the prospecting and development of the southern portion of Katanga (*the Haut Luapula Zone*), which adjoins the northern territory of the British South Africa Company. The Tanganyika Concessions were then engaged on pioneer, prospecting, and transport work in Northern Rhodesia. In 1901 they sent out two expeditions to Katanga, one from the Abercorn Plateau above Lake Tanganyika in N.E. Rhodesia, where they were already established, and the other from Bulawayo in Southern Rhodesia. These two expeditions met in Katanga in August the same year, and before the end of the year they had re-discovered all the principal copper deposits, organised a system of transport and supplies, and definitely established themselves and their prospectors in the country. The *Comité Spécial* of Katanga established posts in the country and organised a system of government similar to that in the Lower Congo. Discoveries and development proceeded apace. Various scientific expeditions were sent out by those interested in the country, and its mineral wealth was most favourably reported on. Towards the end of 1906 a company, styled the *Union Minière du Haut Katanga*, was formed in Brussels, the capital of which was equally subscribed by the *Comité Spécial* and the Tanganyika Concessions, to work the discoveries of the Tanganyika Concessions, who retained their prospecting rights. These prospecting rights expired in November, 1909.

Geography.—The Congo-Zambesi Divide separates North-Western Rhodesia from the Haut Luapula Zone of Katanga. The altitude of this watershed from where the railway crosses the border is from 4,200 ft., rising in a westerly direction, to 4,800 ft. The country breaks down quicker on the Belgian than on the British side, giving the copper belt a mean altitude of about 4,000 ft., except where the divides between the tributaries of the Congo river and their affluents form spurs, which rise up to 5,000 ft. North of the copper belt the country rises like a wall to the small series of plateaus over 6,000 ft. in

altitude, which break down with precipitous escarpments to the valleys of the great Congo tributaries. The country, owing to its altitude, and the fact that its fauna and flora are typically South African, must be considered entirely separate from the main Congo basin which forms that part of Africa which is now known as the Belgian Congo. The rainfall, which is nearly twice that of Southern Rhodesia, varies from 40 to 60 ins., and takes place between the beginning of November and the end of March. The country is open forest country, in which the common South African timbers, the pseudo-mahogany and the South African teak abound, and reach greater heights and have a greater bole than similar trees in the south. Near the sources and along the valleys of the Congo and its affluents are found occasional clumps of a species of magnolia (soft white timber), single trees of which sometimes attain a height of 100 ft., clean, clear bole and a girth at the base of 10 to 20 ft. The rubber vine is found in the river valleys and the ravines at the sources of their tributaries, but not in the quantities as it occurs in the Lower Congo. Reeds capable of producing fibre, which has already been manufactured into mine ropes, are found in many of the swamps. In and around the mining area the natives are not in numbers. There are four main races in the Haut Luapula Zone: the Wasenga, the Baluba, the Balunda and the Walamba. All these races, with the exception of the Walamba, speak a similar dialect to the Awembas in North-Eastern Rhodesia. The suitability of the country for European settlement is evidenced by the low death rate amongst the Belgian employees of the *Comité Spécial*, and by the fact that out of an average strength of 30 Europeans during the last eight years in the employ of the Tanganyika Company in Katanga there has only been one death. The Garengenze Mission, who have been established in the country since 1886, expect their people to reside 7 years in Katanga without going home.

MINERALS.

Copper Mines.—The Great Copper Belt, which has been discovered and prospected, commences about 100 miles north-west of the British South Africa Company's post, Ndola, about 12 miles south of the Congo border. It continues from the Star of the Congo Mine, near the Watershed, for 180 miles in a west-north-westerly direction, and is about 25 miles wide. It may be roughly divided into three districts: (1) The East Lufira District (*Headquarters*, Star of the Congo Mine), 25 mines; (2) The Central District (*Headquarters*, Kambove), 100 mines; (3) The West Lualaba District (*Headquarters*, Ruwe), 20 mines. These mines (or, better, quarries) are bodies of sandstone and derivatives of dolomite highly impregnated with carbonate of copper. They vary from 50 ft. to 500 ft. in width, and have a length of from a quarter to two miles, and those that have been opened up average about 12 per cent. copper.

Tin.—Alluvial and reef tin is found along the east bank of the Lualaba River, north of the western end of the copper belt. This tin commences at Busanga in Lat. 10° south and stretches for 100 miles to the N.N.E., through the granite belt which borders the high central sandstone plateau that divides the Lualaba tributaries from the tributaries of Lufira.

Gold has been found in small quantities all through Katanga. At Ruwe an alluvial field, which has been worked for six years, has produced over £30,000 worth of gold. The existence of other alluvial fields is problematical, as prospectors described Katanga as a "hungry" country.

Iron.—Mountains of almost pure hematite are found on both banks of the Lualaba River near its source, continuing westward for 60 miles on the Belgian side of the Zambezi watershed.

Coal.—Small seams of coal have been found north of where the tin belt commences on the Lualaba River—they do not appear to be of a very high value. Coal, however, is found in considerable quantities in the adjoining territory of N.W. Rhodesia.

Diamonds.—Diamonds have been discovered in the tin belt and north of the eastern end of the copper belt. A further discovery of diamonds has recently been reported in the south-eastern corner of Katanga, not great distance from Lake Bangweolo.

COMMUNICATIONS.

Direct communication by rail with the capital of the Belgian Congo will no doubt come in time, but at present the route, partly by rail, partly by steamers, and partly by carrier transport, occupies more than double the time from Europe than the southern route. The southern route is at the present time the only practicable one. The main South African railway system (the so-called Cape to Cairo Railway) has already crossed the Congo border, and June or earlier should see the railway at the Star of the Congo Mine, at the south-eastern extremity of the Katanga Copper Belt. This railway is to be continued on without delay to the Kambove Mine, the permanent administrative headquarters of the Mineral Company. The western route from the West Coast is undoubtedly the most natural one, not only because it is shorter by sea and land, but because for 600 miles it will be able to follow the Congo-Zambezi Divide, which is absolutely level. Work on this railway, of which 200 miles has been constructed, is beginning at once, and the finance is arranged to carry it through to Katanga.

The interior routes in the Katanga are the excellent 3 ft. 6 in. bicycle paths, on which it is possible to travel from any one local centre to another (roughly 100 miles apart) in one day. There are also traction-engine roads, but these only have value when they follow watersheds.

As the country is, with the exception of the high plateau country north of the copper belt and west of the Lualaba, all "fly" country, it is only possible to bring up cattle for farming or ranching purposes by keeping west of the Kabompo River in N.W. Rhodesia or through the West Coast.

The Belgian Colonial Office are, amongst other developments, contemplating the expenditure of a considerable sum on roads for motor transport, and no money could be spent on a better object.

IMMEDIATE DEVELOPMENTS.

A temporary smelter site on the Lubumbashi River, 8 miles south of the Star of the Congo Mine, is being prepared. A township is being laid out in the vicinity of this site under the direction of the new Lieutenant-Governor. Active developments are proceeding at the Star of the Congo Mine, and machinery and smelting plant have been ordered for delivery as soon as

the railway reaches the Star. The railway is to be continued on to Kambove. Where this line crosses the Lufira River a central smelting plant is to be erected. The various waterfalls of Katanga have been surveyed, and it is proposed to use the Madiengusa Falls, thirty miles from the railway crossing down the Lufira River, for the development of electricity. As soon as the railway reaches Kambove the central township, which is to become the capital, is to be laid out.

THE NEW RÉGIME.

Owing to the outcry raised against the Congo administration by England, America, and Italy, the Belgian Government, yielding to the wishes of the small Colonial party, which had been augmented by the disgraceful accusations that had been brought against individual Belgians, followed Sir Edward Grey's advice and annexed the Congo. This is the "Belgian solution" of the Congo question. Since the annexation H.R.H. Prince Albert travelled through the entire Congo, visiting the Katanga at the commencement of his trip. M. Renkin, the Colonial Minister, has visited the Lower Congo, and one of the great Belgian Socialist leaders carried out an extensive tour through the rubber districts. The outcome of the annexation and these visits of the Crown Prince and important officials has been that a considerable sum of money was voted in October last for the Congo. Two districts are to be thrown open to free trade, and conditions under which land can be obtained and prospecting licences issued can be expected early in the year. Katanga is one of the districts to be thrown open, and as Katanga is now in direct communication with the South African ports, the openings for British and South African enterprise cannot fail to be considerable.

SUMMARY.

British and Belgian financiers have secured a new mineral field which, ignoring the vexed question of the monopoly system, they own under the original mining law of the Congo State. To develop this field they have spent millions in prospecting, transport, and communications. In Katanga, therefore, British and Belgian interests are identical. Belgium having annexed the Congo is thoroughly in earnest in desiring to develop it and administer it in accordance with the highest principles.

The agitation in England against the Congo is frequently misinterpreted by Belgians, and creates distrust between the British and Belgians already in Katanga. The Belgians have adopted the mistaken view that the outcry against their administration is a cloak under which England may acquire the Southern Congo. Whatever may have been done in the rubber collecting districts has certainly not been done in Katanga, where a spirit of healthy rivalry and friendship exists between the two races. The Belgians are a new nation in the field of colonisation. Since the annexation a year ago great reforms have been effected, and if the present distrust and the hatred which the Congo agitation is producing can be obliterated, there is no reason why Belgian money and South African manhood should not prepare the Southern Congo as a *Colonie de peuplement* for the Belgian nation, which has sacrificed nearly 3,000 Belgian lives in the creation of a civilised State out of Stanley's "Darkest Africa."

JOHN THORNHILL.

THE INCREASE OF NATIONAL WEALTH.

ESTIMATES of the rate of increase of national wealth differ widely. It has lately been stated that the savings of the American people are about £800,000,000 to £1,000,000,000 a year—much more than the whole amount of our National Debt—and that although the greater part of this sum is needed for house construction and similar invisible investments, a vast sum is invested in securities, now mainly common stocks, and owing to the smallness of demand for bonds there is increasing disposition to issue common stock. This estimate of the savings of a population of about eighty millions seems very high unless, by chance, in course of transmission dollars were rendered as pounds sterling, but a much higher estimate of the annual increase of capital in the United Kingdom was made during the Boer war by an authority on economic subjects, who was reported to have said that large as a war expenditure of a hundred millions might seem to be, it was only the sum which the nation added to its capital every twenty days. This would mean that the savings of the people of the United Kingdom were at the rate of 1,800 millions a year, or considerably more than the whole of their income and earnings. Another estimate, published about the same time and based on the calculation that the average annual income and earnings of the whole of the population were about £39 per head, put the annual addition to the nation's capital at about 1,600 millions. Both of these high estimates seem, however, to have assumed that all income and earnings are saved and added to capital, whereas, of course, a very large proportion of the population (including women and children) do not save anything at all, and a great part of the income of the remainder is necessarily expended in what may be termed maintenance and renewals, of which food, fuel, clothing and shelter, education and recreation are chief items. Other estimates of the amount added yearly to capital in this country have been 400, 250 and 120 millions, and one of the latest estimates is that of a distinguished member of the Civil Service, who puts the total value of the nation's capital at 20,000 millions or under, and the annual addition thereto at 30 millions.

THE SLOW GROWTH OF WEALTH.

A careful study of the statistics available seems hardly to justify an estimate of much more than 15,000 millions as the value of the capital of the nation, and from 1,500 to 1,800 millions as the annual income from which perhaps about 80 or 100 millions are yearly added to capital. The accounts of the Commissioners of Inland Revenue give the value of the capital assessed to the Death Duties during the past ten years as follows:—

Year.	Capital Value.	No. of Estates.	Duties Paid.
1899-1900	£292,814,000	65,341	£18,409,000
1900-1901	264,514,000	62,523	16,721,000
1901-1902	288,860,000	61,393	18,573,000
1902-1903	270,473,000	62,310	17,913,000
1903-1904	264,118,000	62,108	17,326,000
1904-1905	265,103,000	63,918	17,258,000
1905-1906	272,172,000	62,845	17,344,000
1906-1907	298,460,000	66,082	18,958,000
1907-1908	282,294,000	67,533	19,108,000
1908-1909	270,903,000	67,524	18,310,000
	£2,769,711,000	642,577	£179,860,000

These figures do not indicate any considerable increase in capital values during the period to which they refer. The average of nearly £277,000,000 was exceeded in four years, but was not attained in six years, and the last year of the period was below the average of the ten years, and much less than the first year of the series which was also, with one exception, the largest. The average value of each estate for the whole period was £4,317, but for the year 1899-1900 the average was £4,466, for 1901-2, £4,705, and for 1906-7, £4,518. For 1908-9, the last of the series, the average of value of each estate was only just £4,000. The average of receipt of Death Duties on each estate was for the ten years, £280, for the year 1899-1900, £281, for 1900-1, £260, and for 1906-7, before the higher scale of duties imposed by the Finance Act of 1907 came into operation, the average of receipt of Death Duties on each estate was £287, the highest of the series. In the next year, 1907-8, when the increased scale of duties was for the most part effective, the average receipt from each estate was £285, but in 1908-9, the last of the series when the higher scale of 1907 was fully in operation, the average was only £270. The year 1908-9 thus apparently shows an important decline in net capital value, and in the amount of duties received, notwithstanding that the number of estates brought into account was larger than in any other year of the series, excepting 1907-8, when there were eleven more estates, but nearly £800,000 more in yield of duties. It is essential to bear in mind, however, that the returns in the Inland Revenue accounts of capital valued and duties received in any year include sums brought over from previous years, but, unfortunately, these are not distinguished in the accounts, which may thus be misleading as to the results of any particular year. It may be noted also that, until 1899-1900, the net capital value of estates brought into account had not exceeded in any year £250,000,000, and the largest sum received in Death Duties until that year, since the passing of the Finance Act of 1894 had been £15,732,000 in 1898-9.

METHODS OF CALCULATION.

Although the statistics of the Death Duties for the past ten years do not suggest any considerable addition to capital during that period, the Inland Revenue accounts show that the Income on which Income Tax was received had steadily increased from £548,230,000 in 1898-9 to £652,887,000 in 1907-8 at the rate of rather more than £10,000,000 a year. During the same period the gross amount of Income brought under the review of the Department for Income Tax purposes increased from £762,667,000 in 1898-9 to £946,579,000 in 1907, and it is interesting to notice that if the estimate of 800 to 1,000 millions as the annual savings of the American people be taken to mean pounds sterling the American people are saving from their income each year and adding to capital just about as much as the gross amount of the whole of the income brought under review annually in the United Kingdom. As the annual addition to capital in any country can hardly be taken at more than 10 per cent. of the income, and in most countries is probably less, the income of the American people, if the quoted estimate of their savings be correct, must be nearly 10,000 millions a year, about six times as much as the

annual income of the British people. In some estimates of the national wealth of this country, it has been assumed that the income which does not pay Income Tax may be equal in amount to that on which Income Tax is received, and that if the amount of the taxed income be doubled and the total capitalised, the result will give approximately the sum of the nation's capital. These calculations seem, however, to be based on the assumption that all income has a capitalised value, whereas a very large proportion of the income earned is not derived from any capital possessed by the earner other than his brain and muscle. It is to be noted also that what is called addition to capital is often liable to depreciation, and needs recurring outlay for maintenance or renewal. Such, for instance, are sums expended on house construction, which it is stated form the greater part of the savings of the American people.

PROPORTIONS OF PERSONALTY AND REALTY.

The gross capital value of *all* property subject to Estate Duty (including settled property) of which the Inland Revenue Department had notice during the past ten years was as follows, but this includes all property liable to contribute to the duty, whether in lump sums or in yearly or half-yearly instalments:—

	No. of Estates.	Personalty.	Realty.
1899-1900 ...	65,341	£236,012,638	£90,184,835
1900-1901 ...	62,523	209,512,398	85,225,414
1901-1902 ...	61,390	214,302,811	105,095,426
1902-1903 ...	62,310	213,594,553	84,869,513
1903-1904 ...	62,108	217,473,239	80,707,614
1904-1905 ...	63,018	211,047,806	82,282,543
1905-1906 ...	62,845	219,748,899	83,960,576
1906-1907 ...	66,082	232,742,088	84,597,411
1907-1908 ...	67,533	228,704,720	85,493,864
1908-1909 ...	67,524	224,510,252	77,378,883
	641,577	£2,212,645,404	£860,501,079
